Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

I guess that answers a few questions about the progress of an open-DV codec.

Respect (and a HNY) to the developers.

I like this one:
"Ham Radio 101: Getting Started Without a License"
"There's plenty of fun to be had with ham radio even if you don't have a
license."
You can't argue with that. Indeed, some people have more 'fun' than
others.

The Maritime Mobile Service Network Celebrates 45 years of service

Posted: 31 Dec 2012 09:48 AM PST
http://forums.qrz.com/showthread.php?373954-The-Maritime-Mobile-Service-Network-Celebrates-45-years-of-service&goto=newpost

Thursday, January 3, 2013, marks the 45th Anniversary of the "Maritime Mobile Service Network". The need for the type of volunteer service provided by the network had existed for many years. The launching of an organization to meet this need was placed on the drawing board when nine (9) amateur radio operators met at the home of Chaplain Alla Winston Robertson, USN, WB4AKB (now KB5YX) on December 27, 1967. Those meeting with Robertson were: S.C. Rock, WA4YVQ; Mel White, WA4IQS; D. Freeman, K1YLI; J.G. Kincade, WA4YVX; Art Werner, K3QYQ; H. Bretches, K4DBR; L.B. Lapman, W4SAW; and G.W. Powell, WA4RRO. This group agreed to launch the Maritime Mobile Service Network, or MMSN, on January 3, 1968 at 2130 UTC on 14.320 MHz but had to move to 14.317 MHz a few weeks later to avoid excessive interference. In 1969, when the net moved to 14.313 MHz, it also established 14.300 MHz as an alternate working frequency and for years operated on either frequency depending on nearby interference, but, since before 2000, the net has been operating exclusively on 14.300 MHz.

The original purpose of the MMSN was to "Serve Those Who Serve" in the United States military during the Vietnam crisis. Since that time, the network has grown considerably in hours of operation and services provided and consist of a dedicated group of Radio Amateurs who unselfishly volunteer their time, equipment, and efforts to serve and assist those in need of communications from foreign countries and the high seas.

mmsn-1.png

Our primary purpose now is that of handling legal third party traffic from maritime mobiles, both pleasure and commercial and overseas-deployed military personnel. We also help missionaries in foreign countries, and volunteer net control stations from throughout North America maintain the network. Furthermore, these stations are assisted by relay stations to ensure total coverage of the Atlantic Ocean, Mediterranean & Caribbean Seas, and eastern Pacific Ocean. The network, in particular, has been formally recognized for it's work with emergency traffic by the Dept. of Homeland Security, the United States Coast Guard and the National Weather Service, to mention a few.

The Maritime Mobile Service Network has grown in hours of operation from a 5 hour net operating 7 days a week to the 9 hour format today which is from 12:00 pm to 10:00 pm Eastern Time during daylight savings time and until 9:00 pm during standard time. In the early years, phone patch traffic was heavy, estimating over 10,000 pieces of traffic handled each year from 1968-1977. One of our net control stations (Dave Wagner, WA2DXQ in Fort Lauderdale, FL) ran well over 1000 phone patches during the 2 year period of 1977-1978, mostly to United States Navy (USN) ships in the Mediterranean and Red Sea but also to a few missionaries and both private and commercial vessels. Though the need for phone patch traffic has diminished considerably over the past 15 to 20 years, the need is still there. If it hadn't been for a number of our net control stations equipped with a phone patch, some rescues the net's been involved in would not have been as successful. Many mariners in the Caribbean Islands, Central and South America and the Gulf of Mexico view the network as a resource for weather information as well as a safety valve and trusted contact point for essential communications.

In 2003, the late Frank Kelley, N3FK, said "I would be remiss if I didn't say something about a great lady who used the net to get assistance with numerous medical problems. She was Ruth Paz, HR2RP, located in San Pedro Sula in Honduras". Frank was stationed in Panama from 1975-1977, and Ruth was a net control station for the MMSN during that time. Continuing, he stated "Ruth was a nurse and was the only medical type person in her area. She used the net to get medical advice, medical evacuations and medicine in and out of Honduras. While I was stationed in the Canal Zone, Ruth ran many patches to the Gorgas Army Hospital in Panama. She used the tropical disease section on Gorgas to save and help many people from Honduras, many of whom were bitten by exotic creatures. At the time Gorgas was the place for anything tropical." Today phone patch traffic has subsided, but there remain some net control stations to help with many of the missionaries and doctors in various locations with phone patch and assisting physicians to find needed help they can't otherwise obtain.

Since March 2000, the net's been featured in many publications such as QST (including network television news magazines) demonstrating help and rescue of people in life and death situations. There have been two notable rescues nearly one year apart: the S/V Hayat on March 27, 2000 off the northeast coast of Honduras and the S/V Lorna on March 20, 2001 off the northeast coast of Venezuela and west of Trinidad. In each case, one passenger was seriously injured from gun fire from modern day pirates and thankfully both survived. The Maritime Mobile Service Network has a legacy of service which will continue due to the selfless volunteer amateur radio operators donating their time to train and be ready to help each and everyday. Without such devotion, the net wouldn't be able to do what it does. As a member, I want to say a big thank you to all who've served in the past as well as those serving now. It's been a great 45 years, and may the net last to see another 45 years and more.

In honor of celebrating our 45th anniversary, the Maritime Mobile Service Network will unveil a new website design as well as announcing our presence on FaceBook on Thursday, January 3, 2013. We welcome everyone to

visit our new-look website as well as signing our new "Guest Book" and liking us on FaceBook.

Best Regards,

Bobby Graves, KB5HAV

International Kids Day - Austria 06/01/13

Posted: 01 Jan 2013 06:02 AM PST
http://forums.qrz.com/showthread.php?374038-International-Kids-Day-Austria-06-01-13&goto=newpost

During a recent QSO with a young operator from Austria I was asked to make a

note of, and pass on details of the above event.

For the last 6 or 7 years now the Icom club of Vienna has supported an event

known as 'Kids Day' - its an opportunity for young people to become acquainted

with Ham Radio with a hands on experience.

My contact, Monty, has asked me to pass on the details such as they are: the

station will be open all day on the 06th of January 2013 (whether that means 24 hrs wasn't clear) during

which time he and other friends will be working the bands under the supervision

of qualified hams - if you have the time and inclination please tune in to

14.285 Mhz or there abouts and give them a call - they will be using the C/S

OE1KIDS, and would be very pleased to hear from you!

Many thanks ladies and gents.

I hope you all had a merry Christmas and that the New Year brings all the things

you desire.

Regards. 73's Lin. M6TGT.

P.S. Pse mention that you saw the info here on QRZ.Com Tnx :)

There were about 10-12 posts to the Digital Voice mailing list in
August/September 2012. Since the beginning of December 2012 there have
been nearly 1000 posts, a large percentage of these are related to
FreeDV and its use in various systems for testing on air. At this time
the thrust is towards getting the codec parameters right and also making
the modem robust for various propagation environments, particularly
those found on HF.

One nice thing is that, due to the preponderance of digital interfaces
for PSK-31 and similar modes, nearly anyone with a working setup can
use FreeDV without making many changes other than installing a few bits
of software on their computer and adjusting their audio path a little.

Since, unlike 5MHz, this allocation has come about via WRC, I assume
that ComReg have rightly decided that adding it to the standard licence
schedule is all that's needed.

Boy Scout Merit Badge College 1-5-13

Posted: 01 Jan 2013 07:20 PM PST
http://forums.qrz.com/showthread.php?374131-Boy-Scout-Merit-Badge-College-1-5-13&goto=newpost

Hi everyone,

Every year, the Narragansett Council hosts the Merit Badge College at Rhode Island College. Up to 2,000 Boy Scouts come to earn a merit badge.
Again, "Radio" is a badge to be earned. We should have 20-25 scouts in our class, and we will be setting up a basic station for the scouts to operate.

W1TBR and I (KB1QYS), will be allowing the scouts to operate "third party" under one, or both of our call signs. We will most likely be operating on 20m.

We ask that you help us with a contact, and show them that this technology is alive and well.

Our class takes place on January 5, 2013 from 7AM until 4:30 PM (EST) or
12:00 - 21:30 GMT.

Thanks much & 73!

Paul KB1QYS (The world's worst call sign)

North American Traffic & Awards Net Celebrates 4th Anniversary On Air This
Week

Posted: 01 Jan 2013 02:09 PM PST
http://forums.qrz.com/showthread.php?374091-North-American-Traffic-amp-Awards-Net-Celebrat
es-4th-Anniversary-On-Air-This-Week&goto=newpost

Between January 1 and 4, 2013, the North American Traffic and Awards Net
will be conducting special anniversary nets in celebration of our 4th
Anniversary of coming back on the air in 2009.

All amateurs are invited to join us this week (and ANY other time!). The
theme for our 4th Anniversary Bash is ☐4 Bands, 4 Days, 4 Awards!☐

NATA will conduct nets on 20m, 40m, 60m and 80m in band order moving down
in frequency for each net. All four nets will meet each day of the four day
period. Live online chat support is available during all nets we operate at
www.natanet.info/chat (You must have JAVA installed to use the chat).

Time and NCS Schedule is as follows: (All NCS operators will use our
special ☐club☐ callsign of NA0TA)

TUES. 1/1
WED. 1/2
THURS. 1/3
FRI. 1/4

20m

1900 ☐ 2030z 14237 kHz
KU0G
KU0G
KD7ADH
KU8F

40m

2330 ☐ 0000z 7185 kHz
KU8F
KU0G
KU8F
K0THP

60m

0000 ☐ 0100z Channel TBA
K3TMD
KB3SGY
KU0G
K3TMD

80m

0230 ☐ 0400z 3905 kHz
K0THP
TBA
KU0G
KB3SGY

A special 4th Anniversary award is available, in addition to our other free awards as well as making WAS contact credits. To qualify for the special NATA 4th Anniversary Award submit a listing of log entries showing 4 different contacts on each of the 4 nets on each of the 4 days of the special event plus contact with NA0TA as operated by each of the NCS operators. Submit your log entries to KU0G via email (see QRZ.COM listing) no later than Jan. 15, 2013.

We hope that everyone will take time to join us and help us celebrate
NATA☐s 4th Anniversary as we kick off 2013!!!

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV from 4 April to 18 April 2013 however, for Central Europe the EME window will open only around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USERS of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USERS who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/contact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

DXNL 1813 - January 2nd, 2013
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Fabian Kurz, DJ1YFK
(e-mail: dj1yfk@darc.de)

5Z, Kenya:
Bertrand, DF3ZS and Tom, DL1QW will be QRV as 5Z4/DF3ZS and
5Z4/DL1QW respectively from Diani Beach on 80 - 10m in CW, SSB
and RTTY with dipoles, GPs and vertical loops from January 7
to 20. QSLs via home calls.

6W, Senegal:
Francis, F6BLP, will be 6W7SK again from January 4 to 18. From Saly
Portudal (aka Sali or Saly Port) in holiday style. He's using an
IC7000 with a G5RV and will be mostly in CW on 10 - 80m. He's also
trying to get on the air on 160m with an inverted L antenna.
QSL via home call, LoTW and eQSL.
http://www.f6blp.org/index.php?langue=uk&contenu=home.php

DL, Germany:
For the 50th anniversary of the French-German Treaty of Friendship
(Elysee Treaty) there will be a special station DL50FRANCE on the
air during the whole year of 2013, with special DOK 50FRA.
This activity is an example for the international understanding
which is fostered by amateur radio activities. Horst, DF8VV came
up with the idea for this activity, the QSL manager is DK8VR.

On the occasion of the anniversary of the first official broadcast
transmission from the Voxhaus Berlin on October 29th 1923, the
Deutsche Amateur Radio Club e.V. (DARC) local chapter Maerkische
Viertel (D13) issues a diploma and will be active on the bands
as DR90VOX with special DOK 90VOX. http://www.ovd13.de/

EI, Ireland:
"The Gathering" - An Irish party... on and off the airwaves.
Throughout 2013 Irish families and clans will be coming together
in thousands of events, both on the island and around the globe,
to celebrate their history and heritage in a unique event called

"The Gathering." Irish amateur radio stations, North and South,
will be participating and all operators throughout the world,
whether they have some green Irish blood or not, are invited to
join in the celebrations. The special event callsign EI13CLAN will
be on the air for the whole year; special diplomas are available.
QSL via EI6AL. http://www.irts.ie/thegathering

F, France:
Rodrigue, F8DFO, and Jeremy, F4DVJ, remember the Robert Delrue,
F3VD, who passed away on August 2012. He was a mentor of many
radio amateurs. Their activities as TM2VD will take part on
January 2 - 4 in CW, SSB and digital modes on 80 - 10m.
QSL via F8DFO.

JA, Japan:
The special event station 8N2MDR is QRV from January 1st to
March 31st 2013 on the occasion of the 50th anniversary of the
Nagoya's Midori ward (JCC 2001). Nagoya is in Aichi prefecture
in the Chubu region on Honshu (AS-007, WLOTA 2376).
QSL via Bureau.

OA, Peru:
Members of the "Radio Club Peruano" will be QRV during this
year's "Rally Dakar - Peru" (4 - 13 January) with the special
event callsign 4T4RDP in SSB, CW, RTTY and Digitalmodes from
80 - 6m aktiv. QSL via OA4O.

OZ, Denmark:
Throughout 2013, Danish radio amateurs will remember the 110th
birthday of the actic explorer Ernst T. Krenkel (RAEM) with the
special event callsign OU1RAEM. Activities will be on all bands
in all modes, including contest participations.
QSL via DF5LW.

PA, Netherlands:
On the occasion of the 110th jubilee of the football club MVV
Maastricht, the special event callsign PD110MVV will be on the
air until January 14th. QSL via PD3R.

S5, Slovenia:
With the special callsign S5300TP, members of the Radio club
SOCA Tolmin (S59DAP) will remember the 300th anniversary of the
peasant uprising of Tolmin. Activities are planned throughout
the whole year. QSL preferred via bureau.
http://s59dap.com/special-callsign-s5300tp

UA0, Asiatic Russia:
The special event callsign RU20WC will be QRV until January 5
during the "IIHF Ice Hockey U20 World Championship" in Ufa.
QSL via RV9WB.

V5, Namibia:
Ewald, DJ2BQ, will be on 10 - 80m as V5/DJ2BQ between January

4 - 18 in RTTY. QSLs will be sent automatically after the end
of the DXpedition via the bureau.

VK, Australia:
The "Hills Amateur Radio Group" celebrates their 30the jubilee
in January with the special callsign VI6AHR30 on all bands and
in all modes with a focus on January 26/27.
QSL via VK6IR. http://www.vk6ir.com/.

W, USA:
As every year since 1999, on January 6th the "Ham Radio University"
special event call W2V will be on the bands.
QSL via N2MUN. http://www.HamRadioUniversity.org

YO, Romania:
The "Radioclub QSO Banat Timisoara" celebrates their 10th
anniversary with the special event callsign YP10KQT throughout
the year 2013.
QSL via YO2KQT.

Z3, Macedonia:
20 years ago, Macedonia (formerly YU5) was assigned the prefix
Z3. With the special event calls Z320RSM and Z320A - Z320Z,
radio amateurs from Macedonia will remember this anniversary.
QSL info according to the operators.

Z6, Kosovo:
Stein, LA4MIA, will be on the air as Z6/LA4MIA until January 8
in SSB on 40, 20 and 15m. QSL via home call.

Dusan, S52DD, can be worked as Z6/S52DD until April or May on
40 - 10m in CW, SSB and possibly some RTTY.
QSL via home call, after his return home.

Miko, SP5CJQ, will also work from Kosovo as Z6/SP5CJQ over the
next few months. QSL via home call.

Caribbean tour:
Bjorn, SM0MDG will be on the air as V26BM until January 4 from
Antigua (NA-100), after that he'll be active from January 4-8 as
VP2MSW from Montserrat (NA-103) with a focus on 15/17m and if
conditions permit on 10m with a FT-857D and simple wire antennas.
QSL via M0URX (OQRS), LoTW. http://www.m0urx.com

Results of the WAE DC Questionnaire:
http://www.df7zs.de/Results%20of%20WAEDC%20Questionaire.htm

"DX Code of Conduct":
At a meeting of RSGB, CDXC and GM-DX on October 13th we
agreed to strengthen the 'DX Code of Conduct' and to prioritise
the DXpedition side. This has now been completed, thanks to
Wayne N7NG and 'DX University', and has been renamed 'Best
Practices for DXpedition Operating'.

http://www.dxuniversity.com

Radio Activity Award January 2013:

This award is sponsored by "Brave Radio Friends" and is given
out to hams and SWLs, who need to work or hear as many DXCCs
as possible in January 2013, with a minimum of 20 DXCCs.
Applications with log excerpt (PDF, DOC, XLS or JPG) can
be sent to de3ear@darc.de until February 28. The award which
comes as a PDF document is free of charge.

Morse Code as UNESCO Intangible cultural heritage (Update to DXNL 1809)

On December 12th, the Cabinet of Germany ratified the UNESCO
Convention for the Safeguarding of Intangible Cultural
Heritage, which brings us one step closer to the goal of the
Deutscher Amateur Radio Club (DARC) and IARU to have Morse
Code added to the list of Intangible cultural heritage.
The national UNESCO offices are checking the applications
of their respective countries, and upon success they will
be send to Paris, where in November 2014, Morse Code could
finally be accepted to the list.

DXCC:
The following operations have been accepted for DXCC credit:
5T0SP, J6/W4VAB and ZL9HR.

Upcoming contests

05.01. Schwaben-Contest
05./06.01. EUCW 160m Contest

The results of the CQMM Contest 2012 have been published:
http://www.cqmmdx.com/

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)

Island activities

AF-017; 3B9; Rodrigues Island: Until January 7, Juha/OH1LEG will be
active from Rodrigues Island as 3B9/OH1LEG. He's operating on
160 - 10 Meter in SSB, RTTY and PSK31. QSL via OH1LEG (d).

AS-079; JA6; Miyako Island: From Miyako Island, Take/JS6RRR will
be active until January 7. He also uses the callsigns
JI3DST/JS6 and JA3YEC/JS6. Activities take place on the HF
bands in SSB, CW, RTTY and PSK31. QSL JS6RRR via JS6RRR (B),
JI3DST/JS6 via JI3DST (B). JA3YEC/JS6 QSLs will be sent via
the bureau.

NA-073; V3; Corozal/ Belize District group & NA-123; V3; Turneffe
Islands: Markus/DJ4EL will be in Belize January 3-17 and plans

to activate two IOTA groups as V31ME. From January 3-5 he's
QRV from Abergris Caye (NA-073) and January 5 - 12 he's on
Long Caye (NA-123; Lighthouse Atoll). After that he'll be
back on Abergis Caye (NA-073) until January 17th.
He will use wire antennas and 100W for his SSB operations
on 10 - 40m. QSL via DJ4EL (d/B).

SA-096; LU; Chubut Province North group: Cezar/VE3LYC,
Johan/PA3EXX, Alex/LU5WW and Luc/LU1FAM are attempting the first
activation of Isla Escondida as LU6W from January 2 - 6. They have
tough logistical challenges to master and are not absolutely sure
whether the operation will succeed. If they manage to get on the
air, they will be operating with two stations on the HF bands.
QSL via VE3LYC (d/B) Online Log auf ClubLog.

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

January 2, 2013

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Rockin' With RTTY - ARRL RTTY Roundup
- 6BWAS Anyone? North American QSO Party CW
- Motor Mounted Radios
- Getting Dishy with Dingeloo
- Scope Out these Test Videos
- Sweepstakes by Hand and 10 GHz Results
- Wooden It Be Nice?
- Wall Warts on Parade
- Making FM Contesting Succeed

NEW HF OPERATORS - THINGS TO DO

If you've never operated on Kid's Day, you are missing something
delightful. Open up your shack to a family member or invite the
neighbor kids over - watch for the looks of surprise and delight as
they make a contact or two. If you don't have a kid of your own, get on
and be the station that creates those happy moments. You won't regret
it!

BULLETINS

There are no bulletins in this issue which is a bit attenuated due to
the editor's vacation.

BUSTED QSOS

The RAC Winter Contest and the Stew Perry Top Band Distance Challenge
contest listings were accidentally omitted from the previous issue -
apologies to the sponsors.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Jan 5-6
```

- ARRL RTTY Roundup
- Kid's Day--Phone
- SNS and NS Weekly Sprints--CW (Jan 4)
- 070 PSKFest
- QRP Pet Rock Sprint--CW

Jan 12-13

- North American QSO Party--CW
- OK1WC Memorial Contest (Jan 7)
- ARS Spartan Sprint--CW (Jan 8)
- CWops Monthly Mini-CWT Test (Jan 9)
- MI QRP Club Jan QRP Contest--CW
- WW Peace Messenger Cities
- UK DX RTTY Contest
- EUCW 160 Meter Contest--CW
- DARC 10 Meter Contest

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Just how old is the car radio, anyway? The story <http://www.antiqueradiomuseum.org/thecarradio.htm> involves one of the largest mobile radio companies and a famous name in invention lore. (Thanks, Wayne AB0GR)

Much has been made of the everybody-on-the-same-frequency problem after a spot is posted. Win-Test and N1MM have frequency offset or randomizing functions so that when you click on a spot, your frequency is offset by + or - 100 Hz. QNZ!

Ten-Tec <http://tentec.com> has announced the latest model of an old friend - the Argonaut. The 539 Argonaut VI <http://www.tentec.com/products/Argonaut-VI-QRP-1%252d10-Watt-Transceiver.html> continues the QRP tradition at Ten-Tec, where the original "Argo" was one of its early successes. The rig features the same high dynamic range receiver architecture as the recently-introduced Eagle transceiver, 1-10 watts of output power on the HF bands, and a simple user interface.

Martti OH2BH contributes this handy world-wide temperature conversion table:

+15 °C, Spanish wear caps, gloves and winter coats, Finns are sunbathing
+10 °C, French desperately try to get their central heating on. Finns plant flowers.
+5 °C, Italian cars won't start. Finns drive with convertibles.
0 °C, Pure water...freezes. Water in river Vantaa thickens a bit.
- 5 °C, First people are found frozen in California. Finnish midsummer festival ends.
-10 °C, Scottish turn the heat on in their houses. Finns start to use long-sleeve shirts.
-20 °C, Swedes stay indoors. Finns are having last barbeque before

winter.
-30 °C, Half of the Greek people have frozen to death. Finns start to
dry their laundry indoors.
-50 °C, Polar bears evacuate North Pole. Finnish army starts its
winter training.
-70 °C, Siberian people are moving to Moscow. Finns are furious since
the Koskenkorva liquor can't be stored outdoors anymore.
-273 °C, Absolute zero. Finns admit that it is quite cold outside.
-300 °C, Hell freezes over. Finland wins the football World Cup.

Just how big were those legendary stations of yore? Well, pretty
big! Tim K3LR credits this article
<http://www.k3lr.com/Layout_Design/W2PV/W2PV.pdf> in the September 1982
edition of Scuttlebutt, the Yankee Clipper Contest Club's
<http://www.yccc.org> newsletter, as an inspiration to creating the
world-class station he's built today.

You might not think hum and background noise could ever be an asset but
this BBC article
<http://www.bbc.co.uk/news/science-environment-20629671> reports that
they are being used as a means of determining the source of recordings
and whether they have been tampered with.

The latest issue (2/2012) of PileUP!
<http://www.contestclubfinland.com/documents/PileUP2_12.pdf> is now
out. PileUP! is the PDF newsletter of Contest Club Finland
<http://www.contestclubfinland.com/>. This issue fills 47 pages in
Finnish (Google Translate <http://translate.google.com> can handle the
translation) and English. (Thanks, Timo OH1NOA)

Web Site of the Week - Tales from the Dwingeloo Radio Observatory
<http://www.astron.nl/about-astron/press-public/news/dish-dwingeloo-radio-telescope-back-t
ower/dish-dwingeloo-radio-telesc>
- not in Australia but the Netherlands - claims the dish-style radio
telescope to be one of the biggest ham radio projects but they may not
be as large as the OH8X <http://www.radioarcala.com/> rotatable 160
meter Yagi. Nevertheless, this restoration project is a great story and
if you are capable of EME communications, a QSO with the station may be
possible as they have just reinstalled the dish on its pedestal.

WORD TO THE WISE

Whinge - a terrific word from our British Commonwealth friends, roughly
equivalent to "whine" here in America. Your New Year's resolution? No
whinging, mate!

==> SIGHTS AND SOUNDS

Alan, W2AEW has assembled a nice collection of "how to" videos
<http://www.youtube.com/user/w2aew> on YouTube on using oscilloscopes.
(Thanks, Paul W9AC)

If you're musically inclined, watching this video <http://www.youtube.com/watch?v=6XHwygN9CKM&feature=share> of Vadrum hammering out the alphabet might be an excellent way to learn the code! (Thanks, Tim K3LR)

==> RESULTS AND RECORDS

The results of the ARRL 10 GHz and Up Contest are now live and all RTTY Roundup certificates and plaques have been mailed. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The volunteers who hand-enter all of the paper Sweepstakes logs into electronic Cabrillo format files report that 67 paper logs were typed in. That includes 27 CW and 40 phone logs with 3999 CW QSOs (average just over 148 QSOs per log) and 6105 phone QSOs (average 152.625 QSOs per log). Thanks to one and all! Now - let's all do our part and help anyone hand-logging submit their logs electronically, such as by using WA7BNM's Cabrillo Web Forms <http://b4h.net/cabforms/> page.

The CWJF Group is proud to publish CQMM DX Contest 2012 Results <http://www.cqmmdx.com/> online. (Thanks, Luc PT7AG)

OPERATING TIP

A reader asks, "I thought leaving duplicate QSOs ("dupes") in a log was a problem - no?"

In paper logs, dupes used to be a problem because they were hard for the log checkers to detect and remove. Thus, there was a penalty to the station submitting the log for leaving them in. (The station worked was not penalized...)

In electronic logs, it's easy for the log checking software to identify and discard dupes. Not only that, leaving the dupes in an electronic log makes it possible to insure everybody gets credit for a QSO since an initial contact may not have been completed or mis-logged in some way. The duplicate QSO may, in fact, be the valid QSO, especially if the duping station called you!

If you think about it the way Trey N5KO recommended in the latest National Contest Journal <http://ncjweb.com>, it will make more sense. "In the days of paper logs there was a claimed score, and then there would be deductions made for miscopied call signs and so forth. With 100 percent log checking by machine, the old approach gave way to a new methodology, where your log starts at zero points, and your score builds with each contact and multiplier as your log is evaluated." So there is no reason to penalize dupes - the worst thing that can happen is that your score isn't increased. So definitely leave the dupes in your electronic log - you won't be penalized.

While we're on the subject, send in your log - many a certificate is hanging on the wall of those who persevered all the way through log submission while their competition got lazy or just plain forgot!

==> TECHNICAL TOPICS AND INFORMATION

Dave W8NF recalls that "professional" TV shops used home-made workbenches, made of wood. "The bench height was 42 inches. This allowed the techs to stand at the bench, a more healthy position than sitting all day. But it also afforded an added layer of shock protection. When first placing a piece of equipment on the bench for testing, we sat down - on 32" tall wooden bar stools. Rest your feet on the cross-member about a foot off the floor, and there's no risk at all of a shock traveling through the body."

If you find it hard to keep edges straight when trimming PC board, this jig design <http://www.instructables.com/id/PCB-cutter-tool/> from Instructables uses inexpensive materials and also protects fingertips!

Tony G3OVH reports, "The differences between the RF and computing worlds get even smaller with this article <http://www.icrobotics.co.uk/wiki/index.php/Turning_the_Raspberry_Pi_Into_an_FM_Transmitter> showing how you can transmit 100 MHz FM from a Raspberry Pi single-board computer." And even smaller as this primer on software defined radio <http://blog.y3xz.com/blog/2012/12/02/a-primer-on-cheap-software-defined-radios/> explains. (Thanks, Brian N9ADG and George K5TR)

Charles, KG2V relayed this mnemonic for remembering the color order of CAT5 network cable: blue, orange, green, brown - remember "sky to ground" - blue sky, orange sun, green grass, brown earth.

Brian N9ADG has discovered, "If you type "4.7k ohm" into the search bar of duckduckgo.com <http://duckduckgo.com/>, you get the color code representation of a resistor."

If you are looking for conductive lubricants, Jerry KF6VB contributes the CAIG Laboratories <http://www.caig.com/> web site. "Every conductive grease and oil that a child could want." And with the post-holiday sale season upon us, who could resist?

Technical Web Site of the Week - Here's a great application note <http://www.jameco.com/Jameco/content/walladapter.html> from Jameco on those "wall wart" power supplies - the different types and their characteristics. This will help you choose the right supply for your application. (Thanks, Dan KI4YZE)

==> CONVERSATION

Making FM Contesting Succeed

The ARRL January VHF Contest offers an FM-Only category for the first time. The goal is, of course, to encourage new hams that have never used the "weak signal" modes to do a bit of DXing and find out what their stations are capable of. Contests are a terrific way to do just that but communicating with the target audience requires understanding their needs and expectations. Les Rayburn N1LF posted a thoughtful discussion on this topic to the VHFcontesting reflector <http://lists.contesting.com/mailman/listinfo/VHFcontesting> - it is

food for thought for all of us who participate in both emcomm and radiosport. Thanks, Les.

73, Ward N0AX

As the previous Section Emergency Coordinator for Alabama, I understood that FM simplex capability translated to a greater level of capability during an emergency. Amateurs who improved their stations on simplex, also benefited by being able to reach more distant repeaters which is a huge advantage during severe weather.

Some "lessons learned" from cross-promoting FM activity during VHF+ contests were:

1) Tailor your message to your audience. I didn't try to pitch it as a "contest" as much as an exercise when talking to ARES, SKYWARN, and CERT groups. We encouraged them to test their ability to communicate without the aid of a repeater, as they might have to do in an emergency. We also encouraged Field Day-type operations from high locations.

2) Concentrating activity in a three- to five-hour period is going to be more successful than just putting out the dates and times for a two-day long contest. Nothing is less interesting than "dead air" to a non-contester. (It's not all that interesting to a contester, either - Ed.)

3) It's vital that weak-signal operators monitor the FM simplex channels
and participate during those concentrated activity periods. I tried to utilize the afternoon hours on Saturday, when conditions are poorest---so that operators didn't miss out on a lot of contacts on SSB and CW but that doesn't work well in June when six meters is liable to be open.

The point is that weak-signal operators often turn their nose up at FM - and this hurts the effort. If you give a new operator a taste of DX, they may become hooked for life. The best way to accomplish this is to get those "monster signals" active on FM. If your local big gun doesn't
support FM contesting, then try to change their mind on the topic.

You should hear some of the reactions you get from newcomers when they discover they can communicate 75-100 miles or more on their FM rig without a repeater. This is easily possible with a high-performance weak-signal station on one end of the contact.

4) Talk up the event on your local FM nets, club meetings, etc. Tailor the message to the crowd. A DX club isn't going to respond to the same "pitch" as your local ARES team.

5) Poll your club and see who has 222 MHz FM capability. I always make it a point to schedule contacts with those operators on 223.5 MHz

simplex.

6) In the last few days before the contest, make a lot of calls on 146.52 and talk to operators there about the contest. They understand the concept of simplex and use it often. They're your best candidates for participation in the contest. Nothing in the rules forbids promoting the contest on 146.52 prior to the event!

7) Don't get discouraged by the naysayers. The FM-Only category is a great idea, but it needs the active support of the weak signal community
to work!

73, Les Rayburn, N1LF

==> CONTESTS

2 Jan through 15 Jan 2013

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL RTTY Roundup--Digital, from Jan 5, 1800Z to Jan 6, 2400Z. Bands (MHz): 3.5-28. Exchange: RST, state/province/serial. Logs due: Feb 7. Rules <http://www.arrl.org/contests>

Kid's Day--Phone, from Jan 6, 1800Z to Jan 6, 2400Z. Bands (MHz): 3.5-28. Exchange: Name, age, location, favorite color. Rules <http://www.arrl.org/kids-day>

North American QSO Party--CW, from Jan 12, 1800Z to Jan 13, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com/naqprules.php>

SNS and NS Weekly Sprints--CW, from Jan 4, 0200Z to Jan 4, 0300Z. Weekly on Thursday evenings local time. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/>

070 PSKFest--Digital, from Jan 5, 0000Z to Jan 5, 2400Z. Bands (MHz): 3.5-28. Exchange: Call sign, RST, S/P/C . Logs due: Jan 19. Rules <http://www.podxs070.com/>

QRP Pet Rock Sprint--CW, from Jan 5, 1500Z to Jan 5, 1800Z. Bands (MHz): 3.5-28. Frequencies (MHz): QRP calling frequencies. Exchange: RST, S/P/C, QRP ARCI number or power. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

OK1WC Memorial Contest--Phone,CW, from Jan 7, 1600Z to Jan 7, 1659Z. First through fourth Monday of each month; see website for bands. Bands (MHz): 3.5, 50, 144. Exchange: RS(T) and serial. Logs due: 7 days.

Rules <http://www.hamradio.cz/ok1wc>

ARS Spartan Sprint--CW, from Jan 8, 0200Z to Jan 8, 0400Z. Monthly on the first Monday evening local time. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

CWops Monthly Mini-CWT Test--CW, from Jan 9, 1300Z to Jan 9, 1400Z. Multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies (MHz): 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

MI QRP Club Jan QRP Contest--CW, from Jan 12, 1200Z to Jan 13, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, MI QRP number or power. Logs due: Feb 13. Rules <http://www.miqrp.org/>

WW Peace Messenger Cities--Phone,CW, from Jan 12, 1200Z to Jan 13, 1200Z. Bands (MHz): 3.5-28. Exchange: RS(T) and PMC ref number or CQ zone. Logs due: 30 days. Rules <http://www.s59dcd.si/>

UK DX RTTY Contest--Digital, from Jan 12, 1200Z to Jan 13, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: 30 days. Rules <http://www.ukdx.srars.org/>

EUCW 160 Meter Contest--CW, from Jan 12, 2000Z to Jan 12, 2300Z. Multiple operating periods. Bands (MHz): 1.8. Frequencies (MHz): Exchange: RST, serial, club name, member nr or "NR". Logs due: Feb 13. Rules <http://www.uft.net/>

DARC 10 Meter Contest--Phone,CW, from Jan 13, 0900Z to Jan 13, 1059Z. Bands (MHz): 28. Exchange: RS(T), serial, DOK code. Logs due: 2 weeks. Rules <http://www.darc.de/referate/dx/contest>

VHF+ CONTESTS

OK1WC Memorial Contest--Phone,CW, from Jan 7, 1600Z to Jan 7, 1659Z. First through fourth Monday of each month; see website for bands. Bands (MHz): 3.5, 50, 144. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

MI QRP Club Jan QRP Contest--CW, from Jan 12, 1200Z to Jan 13, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, MI QRP number or power. Logs due: Feb 13. Rules <http://www.miqrp.org/>

==> LOG DUE DATES

2 Jan through 15 Jan 2013

- January 6 - AWA Bruce Kelley Memorial CW Contest <http://www.antiquewireless.org/pdf/AWA_2012-2013_Event_Schedule.pdf>
- January 8 - ARRL 10 Meter Contest <http://www.arrl.org/10-meter>
- January 8 - CQC Great Colorado Snowshoe Run <http://www.cqc.org/contests/snow2012.htm>

- January 15 - Croatian CW Contest
<http://www.9acw.org/index.php?option=com_content&view=article&id=47:rules-2009&catid=39:english&Itemid=66>
- January 15 - OK DX RTTY Contest <http://www.crk.cz/ENG/DXCONTE.HTM>

A very strange week with Thursday the best day by far. A group of German
stations have been active from Namibia, V5, most weekdays but for some
reason were absent for the weekend. V25A was also up there from Antigua and
Barbuda along with V55A, the club station from Namibia. There were also
VYs, VKs, VPs, VUs, VAs and VEs about just to confuse things even more

WIANEWS WEEK COMMENCING JANUARY 06 2013.

Relay of National news broadcast using FreeDV on 7.190 mhz.

VK0 Mawson in Antarctica to be activated

MORE 2012 YASME EXCELLENCE AWARD WINNERS ANNOUNCED

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JAN 6 2013.

January 1, 2013 marked the release to Australian amateurs of the
630 metre band - 472 to 479 kilohertz.

In Melbourne first on the band was Drew VK3XU who came on at midnight
calling CQ on CW.

Then came Grant VK3HP on SSB.

The two soon found each other and a cross-mode contact was had on 476 kHz.

Peter Parker VK3YE recorded the first 30 minutes of signals from both
stations and they have been "You Tubed".

http://www.youtube.com/watch?v=9hM7LqSwtlw

Relay of National news broadcast using FreeDV in SE Australia today.

There is a growing world-wide interest with digital voice communications on the HF bands. The D-Star equipped systems have been testing as has an open source solution FreeDV which uses the Open Source CODEC-2 code.

Digital voice allows SSB quality communications in half the bandwidth and at lower power levels.

The technology is in its infancy but could be the way of the future for HF communications, as always the amateur radio hobby forms the best platform for innovation and improvement of new technologies.

In order to allow more people to hear FreeDV in action Amateur Radio New South Wales has kindly allowed the relay of its VK2WI transmission, today Sunday, January 6th. (UTC 23:00 - 23:59 5th.January) to be relayed by Ed VK2JI from the Central Coast using the proposed Digital Voice 40m calling frequency of 7.190MHz LSB. Ed will only be running about 25W into a 40m wire loop antenna, so low signal strength tests can take place.

It may be that this will be a world first of a national news bulletin being transmitted using a digital voice mode on the HF bands.

To be able to receive the transmission you will need a PC connected to your transceiver in exactly the same way as a connection to run digital data modes (e.g. PSK31, FSK31, RTTY etc.) and on the PC (either Windows or Linux), you need to install the FreeDV program (which is free to download from http://freedv.org where you will also find installation instructions and general information).

If you successfully receive the test transmission or if you have a general interest in Digital Voice on the HF bands, please post a message to the digitalvoice (all one word) Google group where all matters FreeDV are discussed.

(Tim and Ed)

A SCOUTING WE WILL GO

Hello have you made it into our log at VI4ASJ, the Special Event Station running at the Australian Scout Jamboree?

I'm Geoff, VK4ZPP, from the Maryborough Electronics and Radio Group and I've been lucky enough to be one of the non scouting operators at AJ2013. In fact, if we do a head count, there are more licenced amateurs wearing scouting clothes than us civilians.

The miniature city called AJ2013 is a mixture of camping tents and marquees, fixed showground facilities and transportable buildings adapted for this 10 day event. The largest of these buildings is home to most of the medical facility, the badge shop and, of course, VI4ASJ. The station is comprised of 4 operating positions combined with a computer logging area.

One thing that may surprise many is that most of the modern electronic paraphernalia is absent from the participants. If you see someone with a

mobile phone, you can be pretty sure they are working towards meeting the goal of "Dream It Live It", the Jamboree motto. If you see a handheld radio, the user is likely to be in a non-scout uniform providing security, policing, first aid or site maintenance services. Every so often the h/t belongs to an amateur using the onsite repeaters and internet linking.

The amateur radio at AJ2013 has been initially a qualifying activity for scouts to get their Jamboree Award but is also a fully-fledged Special Event Station manned by licenced amateurs participating in the Jamboree. There are just too many people to mention today but look out for a full report in "Amateur Radio" magazine.

Maryborough Radio and Electronics Group, Inc. has agreed to act as QSL Manager with the assistance of the WIA QSL bureaux.

VI4AJS is really a limited time offer which expires on 12th January. No steak knives with this offer but the chance to score a rare call!

Reporting from AJ2013, this has been Geoff Emery, VK4ZPP.

HAMS ACROSS AUSTRALIA.

VKG Roundup http://www.police.nsw.gov.au/news

Just 49 days to go to the Wyong Field Day and that means only 48 days until the Mini Contest University at Wyong.

Registrations are flowing in so if you wish to attend the MCU you'd better register soon as space is limited. If you want to be in the free draw for a HF contesting book, you'll need to register before the end of January.

As well as lectures we are planning an informal round table where you'll be able to ask experienced contesters all the questions you need.

The draft program is up on the website and to see all details and how to register simply go to fieldday.org.au and click on "Mini Contest University" on the right hand side and you'll get all the details you require.

73, This is Ed VK2JI. "See you at Wyong".

The Centre Victoria RadioFest

Want to secure a trading spot at this well-attended event to be held on Sunday February the 10th at Kyneton?

Table bookings can be made conveniently and easily at our online shop via the main Amateur Radio Victoria website.

For general inquiries call Ross Pittard VK3CE on 0408 533 107, for Club Corner displays Tony Hambling VK3VTH on 0423 635 152 or

vk3vth@amateurradio.com.au

The event includes the busy Traders Hall, Second-hand Sellers' Market,
Club Corner and the Mini-lecture Program.

Speakers are Kevin Forbes VK3UKF about things in orbit
Drew Diamond VK3XU homebrewing techniques
Alan Devin VK3XPD and Michael Coleman VK3XH show and tell on the Millimetre
Wave Bands, and Wayne Merry VK3WAM about 'Summit on the Air'.

See you at the Centre Victoria RadioFest, on Sunday February the 10th.

I'm Barry Robinson VK3PV and you are listening to VK1WIA.

DISCUSSION POINT

I don't know where you were on New Year's Eve, but being conscientious
Amateurs I'm sure a few of you were manning your stations, ready to relay
messages and provide communications if required.

Your stations were likely still prepared from the End Of The World 'Disaster
Drill' that I'm reliably informed by some of my Mayan mates has been delayed
until after the GFC, and will be back on sale when the consumer confidence
index picks up again! HiHi

A shame, it seems that the major Telco's are unable to add new hardware to
their Christmas lists, like we did. Or perhaps they have, but were a little
busy to read the manuals and unpack the boxes in time for the New Year's
festivities.

All around Australia, as has been the case for 15 years in my experience, the
thronging masses heading to the CBD to see the fireworks have given the
mobile phone networks a bit of indigestion. Indeed, with the pain that the
general populace experienced with passing SMSes, I'm sure this will be
diagnosed as a case of 'DNGS' -- Digital Network Gall Stones.

All joking aside though, Twitter was abuzz with complaints levelled at all the
carriers beginning as early as 6.30pm on New Year's Eve. Comments like
"Haven't been able to make a call with @Telstra in Melbourne for last 2
hours. Network outages starting early?? #fail" cause the official Telstra
Twitter account to respond with: "Sounds like NYE Network Congestion. Sorry
about the inconvenience."

Yes, they're undoubtedly aware of the situation and expecting it every year,
unable and unwilling (and I think rightly so) to justify massive hardware
rollouts to cope with the mass spamming of Happy New Year messages to entire
address books.

Indeed, Telstra and Facebook rolled out features in recent weeks to pre-load
your messages to be sent at mid-night and Telstra's Facebook page shows a
graphic of the SMS traffic spike. It shows a ramp-up over the evening hours
and a doubling of traffic from 11pm to mid-night before a sharp decline and
by 5am SMS traffic is down to 5% of the peak.

But what has been forgotten?

Stories from the trenches are emerging as to the effects of the network congestion on other mobile network users in the capital cities.

With the ubiquity of coverage and our comfort with mobile devices, it's easy to overlook the commercial and industrial uses of the technology. For last-mile network connectivity in difficult to reach or temporary locations and backup communications for medical and security hardware, there are a lot of scenarios more serious than not being able to pay by EFTPOS on a portable terminal at a street-vendor selling Glo-Sticks and party hats.

Despite best efforts, Tuesday January 1st was a busy day in the Building Maintenance and IT services around the world. False alarms, real alarms, unreported break-ins and impossible to complete backup jobs needed tending to.

Fortunately, no medical stories have hit the wire, and we should commend those working at the large events who ensure our safety. And count yourself lucky if you managed to hail a taxi driver who wasn't relying on their smartphone and Google maps to decipher your address at 1am!

All that aside, no matter how congested the mobile phone network is, there's always one trusty method to get through:
-.-. --.- / -.-. --.- / -.-. --.-

https://twitter.com/liamdobrien/status/285710306288734209
https://www.facebook.com/photo.php?fbid=10151222318264315

What use is an f-call?

When I was a lad, which for me was in the 1970's, I had a big tub of LEGO. I used it to learn about the mechanics of things. I built a diff with Yellow, Blue and Red cogs - long before LEGO Technic came along with a pre-made diff. I built trucks and steering linkages, suspension arms and when I had the opportunity to build a V8 engine with several kits from friends, I did that.

My electronics building followed a similar path. I had a Commodore VIC-20 - which reminds me, Jack Tramiel, the founder of Commodore Business Machines passed away aged 83 - read up on his story when you have a moment. Anyway, I had a Commodore VIC-20. My experimentation with that was at a TTL level, rather than at a component level. I plugged in switches and connectors, made a serial port between an Apple and my VIC-20 and did all manner of software and hardware experiments.

Other amateurs I have spoken with have experienced a similar journey, some with LEGO, others with Meccano, or Valves, Leiden Jars or a kite with a piece of string in a thunderstorm - hi hi.

What I'm getting at is that even though I have limited experience with resistors, capacitors, tuned circuits, transistors and diodes, let alone designing and building circuit boards, I have the pre-requisites to start, that is, a thirst for understanding, a joy with experimentation and a steady enough hand to solder.

While there is no way I would consider myself at any level other than beginner in this field of circuits, I know enough to start to read diagrams and when another amateur turns up for lunch showing off a frequency divider, I can follow what it's doing and how.

Why does this matter?

I've heard plenty of people tell me that they are not smart enough to know about electronics, and that they don't have enough physics, or maths, or what ever excuse they come up with.

What I'm trying to say is if you think of yourself as not capable of doing something, you'll be right almost every time. However, if you think about how the skills that allowed you to survive until now might apply to what you're looking at, you might be surprised.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

MORE 2012 YASME EXCELLENCE AWARD WINNERS ANNOUNCED

Along with Peter G3PLX and Pawel SP9VRC, who received the award for the development of PSK31, are George Fremin, K5TR; Tree Tyree, N6TR; Trey Garlough, N5KO, and Scott Neader, KA9FOX for their contributions to many infrastructure projects that benefit the ham community at large.

Also recognized is ARRL Education and Technology Program Director Mark Spencer, WA8SME. Spencer received the honour for his contribution to the ARRL Teachers Institute on Wireless Technology and other training efforts. Also for his development of P-I-C microcontroller projects, books for amateurs, as well as working with leaders in student and scientific teams in applying amateur radio to scientific projects and experiments.

The YASME Excellence Awards are given to individuals who through their own service, creativity, effort and dedication, have made a significant contribution to amateur radio. The award itself takes the form of a cash grant and an engraved crystal globe.

For a complete list of last year's winners please take your web browser to www.yasme.org/awards

HUNGARY CLOSES REGIONAL PUBLIC SERVICE STATIONS

Hungary's Media Services and Support Trust Fund has closed all five of its regional radio studios which make up the Regio Radio network. According to the Trust memo on December 21st, the studios will be leased out, and staff will either be made redundant or employed as correspondents for the national public talk and news service.

According to the Chief Operating Officer of the Media Services and Support Trust Fund, the Regio Radio network experienced a waning audience due to increasing competition from other local private stations. The soon-to-be-available FM and AM frequencies will be used for broadcasting a new nationwide public service of Hungarian song or urban folk music and at least one operetta music station

VK0 Mawson in Antarctica to be activated

Departing next month for the coast of MacRobertson Land and Australia's base at Mawson is Craig Hayhow VK6JJJ, who will be signing as VK0JJJ.

He lands on February the 10th, planning to soon after install the 6m beacon VK0RTM and test the propagation on that band.

The main HF rig is a FlexRadio Flex-5000A coupled to an amplifier and feeding a terminated sloping triangle antenna.

On 6m it will be at 400 watts from Mawson thanks to a power amplifier from Steve Gregory VK3ZAZ, who is also the QSL manager, and radiated by a 5-element yagi.

The amateur satellites on 2m and 70cm are to be accessed using a crossed duo-bander.

During the next 12 months Craig VK0JJJ is in Antarctica to work and amateur radio is his leisure time activity.

OPERATIONAL NEWS - DATELINE 2013

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Alpine Ski World Championships - Special Event

Every Austrian amateur radio operator has a chance to operate with the special callsign OE2013(???) (their own suffix) between January 15th and February 18th (2013).

Activity is to celebrate the Alpine Ski World Championships 2013 taking place in Schladming.

An award is available for three different classes (Gold, Platinum and Diamond). Each class requires a certain number of special event stations and OE stations logged. Each special event station or OE station will only count once on each band. All bands and the below listed modes may be used; the only exception Packet radio and Echo Link contacts do not count.

The award may be worked in the following modes:
CW, SSB, DIGITAL, MIXED and QRP (max. 10 Watts).

For complete details, visit:
http://wmdiplom2013.oevsv.at/export/sites/wmdiplom2013/downloads/Diplomausschreibung_Englisch.pdf

Lord Howe Island

Several JA operators are expected to be active as callsign/VK9L from the Blue Lagoon on Lord Howe Island between January 11-18th (2013).

The following operators were mentioned:
Tatsuo, JA3ARJ/VK9L (via JA3ARJ) Kunio (JA1CJA), AE6XY/VK9L (via JA1CJA)
Lida, JA3BZO/VK9L (via JA3BZO) Masumi (JA3AVO), W7AVO/VK9L (via JA3AVO)
Shozo, JA3HJI/VK9L (via JA3HJI) Hiroko (JH3PBL), W7PBL/VK9L (via JH3PBL)

Activity will be on 80-6 meters using CW, SSB and RTTY.

Refer to QRZ.com for QSL instructions.

F6ITD will be on the air stroke FG from Guadeloupe and two islands between next February 1st and March 25th. He will be using SSB and the Digital modes during his stay. Logs will be uploaded to both ClubLog and Logbook of the World. QSL via his home call either direct or via the bureau.

Special event station 8 J 6 HAM will be operational from the Island of Kyushu Japan, until March 3rd. Activity is in celebration of the 12th West Japan Ham Fair with operations on all bands and using many modes.
QSL via the JARL Bureau.

AA9A will again be active from Antigua between February 11th and the 20th using a new callsign V24A. Operations should be on 160 through 10 meters using CW, SSB and possibly RTTY.
QSL via his home callsign either direct or using the bureau.

8N119T - celebrating the 65th anniversary of the Tokyo Fire Department
(119 is the emergency fire/ambulance number in Japan)
23 Dec to 25 Mar active on all HF bands and modes.

F 6 KOP expected to be active from Uganda as 5 X 8 C between Feb 6 to 18 from a location some 20 Km from Entebbe airport. 5X8CX has announced they will comply to the last IARU band plan on 40 meters for the region with the frequencies of the PSK and RTTY moved to 7040 and 7042 kHz.
For more details see www.5x2013.com

TG 9/KF 5 LSG will be active from Guatemala until middle of January.
He may operate as TG 9 IDX.
If you make contact, please QSL via his home callsign DL 5 RMH.

WW SPECIAL INTEREST GROUPS --- ILLW

Tally steadily grows

So far there have been 120 registrations from 24 countries in the annual International Lighthouse and Lightship Weekend held each August.

Germany leads the tally of 30, closely followed by its rival in this fun event Australia with 28.

Then follows the United States, England, Scotland, Canada, Argentina, Sweden and Holland, with many more nations registered including a few just having one entry.

The idea behind the event is to activate former marine navigation structures, draw public attention to them and publicise amateur radio.

To read the guidelines and register for the next International Lighthouse and Lightship Weekend on August the 17th to the 18th, visit the website illw.net

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh 'and always if the news room is to read your
item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

I am pleased to report that Mrs.Nugatory has broken off from her usual cynical sniping and has provided something useful for a change.

Follow the link above (and also for the 5MHz NOV from that web page) and although it pains me to have to deal with the RSCB following on from their systematic destruction of amateur radio in Brit, the NOVs come winging back in the email faster than you can log off from the RSCB web page.

Note; you will need to find your licence to get hold of the licence number (different fromt he callsign)

472 kHz - I wonder if I could put a surreptitious wire around the boundary of the cemetery onto which my house backs?

//
2013 Australian Scout Jamboree:

Posted: 02 Jan 2013 04:01 PM PST
http://www.eham.net/articles/29571

The 2013 Australian Scout Jamboree began this week in Maryborough, Queensland, in the Fraser Coast region, a few hours North of Brisbane. As I walked around the Jamboree site on New Years Day, I saw coaches begin to arrive just after breakfast, steadily, one by one, every few minutes, more coaches arrived. Tonight when I went to dinner, there were still coaches arriving, one by one. This will continue through the night until sometime the 2nd January, and some 10 thousand Scouts and 2 thousand adults will attend the opening ceremony in an in front of a large stage that would do justice to any big rock band. The Scouts will participate in a multitude of on and off site activities that will challenge their abilities and wits, and teach them new skills and experiences. One of the onsite activities that Scouts can choose to attend is the Amateur Radio activity. There is a 4 bay radio shack and other activities to occupy Scouts. Amateur Radio has had a long association with Scouts, and is present at most Scout Jamborees around the world.

34. [RAC-Bulletin] British Columbia QSO Party 2013

Newsgroup: rec.radio.amateur.misc
Date: 2013-01-04 06:34:24 UTC
From: rac-bulletins@eton.ca
Message-ID: <50E525EF.20604@rac.ca>

British Columbia QSO Party 2013
2013-01-02

Rebecca VA7BEC here. I'm contest coordinator at Orca DXCC and have the task of promoting the British Columbia QSO Party The 2013 event is just a month away.

Date/Time: 1600z Feb 2 to 0400z Feb 3.
Objective: BC stations can contact anyone anywhere, while stations outside BC must catch the attention of BC stations.

Other details, including rules, exchange and multipliers, can be accessed from the BCQP homepage on the Orca DXCC website. Visit http://orcadxcc.org/bcqp.html

If anyone is interested in how the 2012 event played out and hasn't read the report, it's here:
http://orcadxcc.org/content/bcqp_2012_report.pdf

BCQP 2012 was the first under Orca DXCC sponsorship and was, by all accounts, a tremendous success. The most encouraging indicator of progress, to me, was that the number of VE7/VA7s on the air tripled year-on year, to more than 120 and more electoral districts were activated, 26 of 36. With more BC operators on the air and a deeper reservoir of multipliers to tap, along with a QSO boost from same-day QSO party activity in the US, more BC stations stayed on the air longer, which gave non-BC stations more opportunities for QSOs. BCQP 2012 was well attended and post-QP comments were very positive so we can assume that the 2013 event will be an active 12 hours as well. Contesting is not for everyone, but the casual and friendly atmosphere of the BCQP presents merits for contester and non-contester alike.

- The slower pace allows newcomers to ease into the world of contesting and try out strategies without irritating operators who are only interested in a high score. Great practice for Field Day or a RAC contest.

- It's a chance to practice different modes without the pressure of an impatient pileup and to acquire familiarity with new logging software or remote operations.

- It's an excellent opportunity to hone operating and elmering skills. Whether amateur radio is used for emergency purposes, for ragchewing or for radiosport, it will not survive if we don't practice our skills and share our knowledge.

In addition to the fun factor and the learning/elmering opportunities,
the BCQP offers tangible rewards: one-of-a-kind certificates --
different design every year -- and nice Orca trinkets for top scores.
We have also introduced a plaque program, effective from the 2013
event, and have sponsors for four plaques:
Top BC Score, Top Score in Canada outside BC, Top YL Score and Most
Federal Electoral Districts Worked.

A(nother) whale of a good time awaits!

Amateur Radio Newsline(tm) Report 1847 - January 4 2013

Amateur Radio Newsline report number 1847 with a release date of
January 4 2013 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC begins work to create a new Citizens
Broadband Service; the ARRL asks the FCC to create a new low frequency
band from 472 to 479 kHz as Ireland gives that same spectrum to its ham
radio community; the 2013 International DX convention finds a new home
at the Visalia California Convention Center and the transistor reaches
age 65. Find out the details as we ring in the New Year with Amateur
Radio Newsline(tm) report number 1847 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: FCC PROPOSES 3.5 GHZ CITIZENS BROADBAND SERVICE

First there was the old Class A and Class B Citizens radio of the
1940's. Then came 11 Meter Class D Citizens Radio Service in 1958.
Next was the Family Radio Service authorized in the United States since
1996. That was followed in 2000 by MURS or the Multi Use Radio
Service. Now in 2013, the FCC is proposing to create a new Citizens
Broadband Service and it's like nothing else the regulatory agency has
ever attempted before. Amateur Radio Newsline's Norm Seeley, KI7UP,
has the details:

--

Just before years end on Wednesday December 26th the FCC announced a
proposal to make available 100 MHz of shared spectrum in the 3.5 GHz
band using small cell and database technologies. The FCC calls the new
service in the 3550 to 3650 MHz band the "Citizens Broadband Service"
or C-B-S and proposes three tiers of service. These will be known as
Incumbent Access; Priority Access and General Authorized Access.

Incumbent Access would consist solely of authorized federal and
grandfathered licensed Fixed Satellite Service 3.5 GHz band users. They
would be protected from the other tiers by regulation and technical
means. This would include the use of exclusion zones where other C-B-S
uses would not be permitted.

Priority Access level would be given to small cell use by certain
critical quality-of-service dependent users at specific target
locations. This might include hospitals, utilities, state and local

governments. It might also include users with a distinct need for reliable, prioritized access to broadband spectrum at specific, localized facilities.

Lastly, the General Authorized Access or G-A-A level would allow opportunistic use of the spectrum for a variety of residential, business and enterprise purposes. These users would have to protect Level 1 Incumbent Access and Level 2 Priority Access users through technologies including geolocation. Also as the lowest level users they would not have any expectation of protection from harmful interference to this user base.

The Notice of Proposed Rulemaking is known as FCC 12-148. It also seeks comment on including spectrum at 3650 to 3700 MHz, immediately adjacent to C-band downlink spectrum. If the FCC does include the 3650 to 3700 MHz band in the proposed new service, wireless Internet service providers using this band for links would have to be licensed under the tier 3 General Authorized Access rules.

The NPRM proposes a "Spectrum Access System" which would govern interactions between all devices in the 3.5 GHz band. It would be modeled after the TV White Space database concept and all devices would be limited to 1 watt Effective Radiated Power as compared to an Isotropic radiator.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

If the proposed services name of the Citizens Broadband Service has a 1960's or 1970's ring to it, its not by mere coincidence. The FCC is proposing to license users under Section 95 of the Personal Radio Service rules. That's the same section that includes 11 meter Citizen's Band radio. (FCC, RW)

**

RESTRUCTURING: ARRL FILES FOR 472 - 479 KHZ US BAND

The ARRL has filed a Petition for Rule Making requesting the establishment of a domestic amateur radio allocation at 472 to 479 kHz. The League's request calls for a power limit of 5 watts effective isotropic radiated power, with only 1 watt to be permitted in certain specific locations.

The ARRL took this action for the FCC to follow up on the actions of the 2012 World Radiocommunication Conference now rather than waiting several years as was the case with WRC-07. As regular listeners know, telecommunications administrations around the world have been fairly quick to make this spectrum available to their nations ham radio communities.

As we go to air the FCC had not responded to the League's petition. (ARRL, CQ, eHam)

**

RESTRUCTURING: IRISH RADIO AMATEURS GET NEW 472-479 KHZ ALLOCATIONS

Some good news for hams in Ireland. This with word that the Irish Radio Transmitters Society have been informed by telecommunications regulator ComReg that the band segment 472 to 479 kHz becomes available to all licensed radio amateurs in Ireland. This, on a secondary basis, with effect from 1 January 2013. The maximum power is 5 watts and available for use with CW, QRSS, and narrow band digital modes.

There are some restrictions that ComReg has put in place. As ham radio is a secondary user of this spectrum ComReg says that stations in the Amateur service shall not cause harmful interference to, or claim protection from, stations of the aeronautical radionavigation service or stations of the maritime service. Also that the amateur service shall ensure that no harmful interference is caused to the frequency 490 kHz which is used exclusively for the transmission by coast stations of navigational and meteorological and urgent information to ships.

Also, a Test License held from ComReg by the Irish Radio Transmitters Society under which a number of licensed amateurs were given permission to operate in the band segment 501 to 504 kHz expired on January 2nd. As such, amateurs in Ireland who had received special permission to use that spectrum were required to cease operation on 501 to 504 kHz on that same date. (IRTS)

**

RESTRUCTURING: ICASA TABLES DRAFT NATIONAL RADIO FREQUENCY PLAN

South Africa's telecommunications regulator I-C-A-S-A has made public a draft of the proposed new National Radio Frequency Plan for comment by February 8th. One positive aspect is that a new band from 472 to 479 KHz for amateur radio is shown as secondary allocation which makes the way for allotment as soon as the plan has been adopted.

Meantime the South African Radio League has proposed to the regulator to have the 160 meter band extended as this is not provided for in the draft plan. There is however a footnote that pays the way for further discussion. Foot note 5.096 list a number of countries where administrations may allocate 1 810 to 2 000 KHz to the amateur service after consultation with neighboring countries. The South African Radio League says that it will continue pursuing the possibilities of having that band extended.

The South African National Radio Frequency Plan is the base document for allocation of spectrum to various services in that nation. (SARL)

**

COMMUNICATIONS LAW: SPACE EXPORT CONTROL REFORM PASSES HOUSE AND SENATE

Good news for United States hams and others involved in the development of experimental satellites. Legislation reforming space related export control has passed the House and the Senate and is expected to be signed by the President.

The measure is included in the National Defense Authorization Act for Fiscal Year 2013 under Section 1261. This area of the proposed law is titled The Removal of Satellites and Related Items from the United States Munitions List or USML.

The legislation does contain some restrictions. Key among these is a continued prohibitions of data and parts export that are specific to China, North Korea, and any country that is a state sponsor of what the United States considers to be terrorism.

The passage of this legislation is significant and brings with it the promise that United States universities and other satellite experimenter groups including ham radio will be better able to interact in the design and construction of flight hardware. It also suggests that these groups may be better supported in their mission to prepare the workforce needed to design and deploy the space systems of the future. This in turn should enable the United States to remain a leader in space.

You can read more about this change in United States satellite export law on line at tinyurl.com/Space-Export-Reform. (ANS, SpaceMarket)

ENFORCEMENT: SALE OF NON CERTIFIED DEVICES BRINGS $14000 FINE

The FCC has affirmed a $14,000 Forfeiture Order to LawMate Technology Co., Ltd. This for its alleged marketing of unauthorized radio frequency devices for more than two years. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the details:

--

ENFORCEMENT: SALE OF NON CERTIFIED DEVICES BRINGS $14000 FINE

The FCC has affirmed a $14,000 Forfeiture Order to LawMate Technology Co., Ltd. This for its alleged marketing of unauthorized radio frequency devices for more than two years.

On July 15, 2009, the Enforcement Bureau's Spectrum Enforcement Division released the $14,000 Notice of Apparent Liability for Forfeiture after it found that that LawMate manufactured and marketed two models of wireless video transmitters in the United States before obtaining FCC certifications for the models. The finding was based on LawMate's own admission in response to a letter of inquiry.

LawMate responded on November 14, 2009. At that time LawMate declared that that it was willing to pay a penalty for its violations but requested cancellation or reduction of the proposed forfeiture amount based on certain remedial efforts that LawMate stated it intended to implement. It also claimed financial hardship, and asserted that it had a past history of compliance with the FCC rules.

Now in affirming the NAL, the FCC says that it carefully considered LawMate's and find no basis for reduction or cancellation of the proposed forfeiture. It noted that LawMate's contention that it planned to undertake certain remedial measures to ensure future compliance with the rules was not a valid reason for a downward reduction of the fine. It also noted that LawMate claim that payment of the forfeiture would place undue stress on the company's financial situation was not accompanied by the proper documentation. It noted that any claim of inability to pay must specifically identify the basis for the claim by reference to the financial documentation submitted to the agency.

I'm Don Wilbanks, AE5DW.

--

LawMate was given the customary 30 day time period from the affirmation date of the fine to pay it or to file a further appeal. (FCC)

**

ENFORCEMENT: UNLICENSED RADIO STATION IN FLORIDA LOCKS PEOPLE OUT OF THEIR CARS

What appears to have been a relatively high power out of band spurious signal from an unlicensed broadcast transmitter is being blamed for locking hundreds of people out of their cars in Hollywood, Florida. This according to a statement from the city's police department who called it a mystery no one could solve until now.

For months residents were complaining that they could not use their keyless entry systems to unlock or start their cars whenever they parked near the Hollywood Police Department. Once the cars were towed to the dealers, the problem disappeared.

After months of searching, the wayward signal causing the problem was T-Hunted to the roof of the near-by Regent Bank Building. An undercover detective and FCC agent found the equipment on December 6th concealed under an air conditioning chiller.

Four days after they removed the equipment, a man identifying himself only as "Jay" left a message for a maintenance worker at the bank building. Police say that when the worker returned the call, "Jay" asked if he'd taken his equipment. The worker answered no, but told him that the cops had.

Hollywood Florida detectives are still searching for the man who set up the bootleg station on the roof of the bank building. When it was shut down and seized it was operating around the clock on 104.7 FM broadcasting Caribbean music. If found, the man could be arrested on state felony charges and also face a minimum fine of at least $10,000 from the Federal Communications Commission. Cars made by Ford, Lexus, Toyota, BMW and Mercedes reportedly were affected. (Radio Ink, RW, others)

**

RADIO EMPLOYMENT: SURVEY SAYS BBG WORST PLACE TO IN GOVERNMENT TO WORK

It's not exactly a list you'd want to be at the top of. This as the Broadcasting Board of Governors finds itself as the number one worst place to work in the federal government among mid-sized agencies. This according to survey results recently published by the Washington Post.

They were followed by the National Archives and Records Administration, the Department of Housing and Urban Development, Securities and Exchange Commission and Department of Education.

Best mid-sized agencies to work at included the Federal Deposit Insurance Corporation, Government Accountability Office, Nuclear Regulatory Commission, the Smithsonian Institution and the Federal Trade Commission. (RW, Washington Post)

**

HAM HAPPENINGS: ILLW 2013 ATTRACTS MORE THAN 110 ENTRIES SO FAR

Jim Linton, VK3PC, reports that the leading countries pre-registered for the next International Lighthouse and Lightship Weekend are Germany with, Australia with 27, followed by the USA and England. In fact a total of 110 pre-registrations have been received from 26 countries even though the next International Lighthouse and Lightship Weekend does not take place until the August the 17th and 18th. More about this fun event is on-line at www.illw.net (VK3PC)

**

HAM HAPPENINGS: BATAAN MEMORIAL DEATH MARCH MARATHON EVENT

The Mesilla Valley Radio Club of Las Cruces, New Mexico will be operating Special Events Station K5B on March 17th. This, in conjunction with the 24th annual Bataan Memorial Death March Marathon to be held at the nearby White Sands Missile Range.

K5B will operate from 1000 to 2300 UTC on or near 21.337, 14.330, 7.225, and 3.893 megahertz. A commemorative QSL card will be available by request. Please QSL with a self-addressed stamped business sized envelope to K5B in care of the Mesilla Valley Radio Club, P. O. Box 1443, Las Cruces, New Mexico, 88004.

More information about the K5B operation is at www.n5bl.org/batan. Information regarding the marathon event is available at www.bataanmarch.com. (WB4AEJ)

**

HAM HAPPENINGS: TARCFEST IN GEORGIA MARCH 30

On the social scene, the third Annual Thomasville Amateur Radio Club Hamfest and Tailgate, will take place in Thomasville, Georgia, on March 30th. This is a one day event, starting at 7:30 AM and lasting until around 4:00 PM Central U-S time. Admission is free, Tailgating is free, and there is only a minimal charge for indoor vendor tables. For more information take your web browser to tarchamfest.blogspot.com or follow this event on Facebook or Twitter as TARCHamfest. (KJ4ZNK)

**

HAM HAPPENINGS: 2013 INTERNATIONAL DX CONVENTION MOVES TO VISALIA CONVENTION CENTER

Registration is now open for the 2013 International DX Convention to be held this year at the Visalia Convention Center in down-town Visalia, California.

According to planners the move to the Convention Center gives the show 17 meeting rooms and 2 Board Rooms, which will allow them to put together several concurrent presentations. Also the exhibit hall can easily handle up to 100 vendors and there will be banquet facilities for up to 900 attendees.

2013 marks the 64th year of this event that which will be held April 19th to the 21st. For more details please visit www.dxconvention.org or www.dxconvention.com on the World Wide Web. (Intl DX Convention)

NAMES IN THE NEWS: NEW SECTION MANAGER APPOINTED IN NEW YORK CITY -LONG ISLAND

Some names in the news. Effective January 1st Jim Mezey, W2KFV, of Carle Place, New York, became the new ARRL New York City-Long Island Section Manager. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, appointed Mezey after consulting with current Section Manager Mike Lisenco, N2YBB. Lisenco, who stepped down as Section Manager after being elected as ARRL Hudson Division Director. (ARRL)

**

NAMES IN THE NEWS: CLYBURN RE-NOMINATION TO FCC APPROVED BY SENATE

The United States Senate has approved the re-nomination of FCC commissioner Mignon Clyburn. This time for a full five-year term retroactive to July 1, 2012, when her current term expired.

Clyburn had been serving out the term of Commissioner Jonathan Adelstein, who exited to join the Department of Agriculture. Her re-nomination had been held up after the death of Commerce Committee member Daniel Inouye forced the committee to postpone a vote. Had the nomination not been voted before the seating of a new Congress, Clyburn would have had to have a new hearing in the Commerce Committee when that new Congress convened. (Published news reports)

NAMES IN THE NEWS: BILL PASTERNAK, WA6ITF, HONORED BY CEDARS SINAI ALUMNI ASSOCIATION

Newsline producer Bill Pasternak, WA6ITF, was recently honored with a Certificate of Appreciation for his volunteer work to the Cedars Sinai Medical Center Alumni Association.

No, Bill never worked at the medical facility. However since his retirement from Fox Television in 2009 he has been the volunteer Videographer for the monthly social gatherings of the group.

The award was presented to Bill the evening of December 17th during a break in the evenings program while he was video recording a presentation by famed Hollywood Producer Director Paul Mazursky. Mazursky was the featured speaker talking about the production of his 1984 film Moscow on the Hudson that starred Robin Williams. (ARNewsline)

**

NAMES IN THE NEWS: N8TMW TO GUEST ON THE DODROPIN ECHOLINK NET ON JANUARY 12

And on Jan 12th at 2100 hours Eastern Standard Time, Amateur Radio Newsline's Jim Damron, N8TMW, will be the guest on the Amateur Radio Newsline Net held on the DoDropIn Echolink conference server. You are invited to drop in and catch Jim talking about his career in broadcasting, his stage career as well as his amateur radio involvement. Again that's the Amateur Radio Newsline Net on Saturday January 12th at 2100 hours Eastern Standard Time to meet Jim Damron, N8TMW. You will find it on the DoDropIn Echolink conference server node number 355800. I hope to see you there. (W8WFO)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

EMERGING TECHNOLOGY: ANOTHER NEW SOURCE OF LIGHT ANNOUNCED

A new and more efficient way to light your way is on the horizon. Amateur Radio Newsline's Skeeter Nash, N5ASH, reports:

--

Scientists at the Wake Forest University have created a new type of light bulb that promises to be just as efficient as LED equivalents, but without any of the drawbacks.

The new field-induced polymer electroluminescent bulbs or FIPEL for short, produce light when an electric current is passed through its nano-engineered plastic layers. The team says that the new type of bulbs are malleable, allowing them to take any shape like compact fluorescent lamps. They also won't shatter like traditional bulbs, nor will they generate the same hum or flicker.

The inventor of FIPEL is Dr. David Carroll. He believes that his new solution is superior to LED bulbs because there is a limit to how much brightness you can get out of them. If you run too much current through an LED they can short out and melt. Not only that, the light generated by FIPEL bulbs is closer to natural sunlight, unlike the bluish tint generated by LEDs.

Any worries about longevity are also put to rest by Dr. Carroll. He claims to have had a field-induced polymer electroluminescent prototype lamp working in his laboratory for almost a decade.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH.

--

As for when the technology will make the jump to a commercial product? The research team says that a corporate partner is interested in producing the new bulbs at scale, with the first run expected in 2013. (CGC, earthsignals.com, TheVerge.com)

WORLDBEAT: ADELAIDE AUSTRALIA SAYS YES TO PUBLIC WI-FI

The first Australian city with free Wi-Fi outdoors will be Adelaide. The South Australian Government and Adelaide City Council will foot $1.5 million bill to provide it at all public areas, by the end of 2013. Already a trial of free Wi-Fi is on all Adelaide Metro trams and 20 buses. Similar public Wi-Fi initiatives are in progress in Singapore, Prague, Wellington, Auckland, and Luxembourg. (VK3PC)

**

WORLDBEAT: NEW CANADIAN IRLP/ECHOLINK WEATHER NET

The Weather Radio Listeners Newsletter Net hosted by Gordon Maybee, VA3WXA out of Toronto, Canada, takes place every Saturday evening at 8 PM Atlantic, 7 PM Eastern time on IRLP Reflector 9034 and Echolink node 223557. The net carries information about Weather Radio and the CANWARN service. It also includes weather warnings and notices of any power outages across Canada.

The sponsors say that they are trying to make this a Cross Canada Net to include all provinces and territories. They are also looking for station from Quebec to participate.

For more information about the net, go to The Maritime Amateur website www.maritimeamateur.ca and click on CANWARN. Once there, click on CANWARN news where you will find articles on this net. (VE1JBL)

**

RADIO IN SPACE: NEW LAUNCH VEHICLE TO CARRY CUBESAT SWARM IN 2013

Turning to space related news, 2013 should see the first flight of a new satellite launch vehicle. Super Strypi, also known as Space-borne Payload Assist Rocket - Kauai was developed by Sandia National Laboratories in New Mexico, the University of Hawaii and Aerojet Corporation. It based on an enlarged version of Sandia's Strypi sounding rocket.

The Super Strypi vehicle will be launched from a rail-launcher at Barking Sands, Kauai at the Pacific Missile Range Facility towards the end of 2013. Super Strypi will be carrying a swarm of CubeSats called the Edison Demonstration of Smallsat Networks. The CubeSats are an unusual size of 10 by 10 by 15 cm and weigh 2 kg. The Edison swarm will demonstrate distributed, multipoint space weather measurement and are expected to operate for at least 60 days and have an on-orbit life-time of up to 4 years.

More is on the web at tinyurl.com/new-sat-launcher. (Space Times)

**

ON THE AIR: AUSTRIAN HAMS CELEBRATES ALPINE SKI WORLD CHAMPIONSHIP

Hams in Austria will have the chance to operate with the special callsign O-E-2013 followed by their assigned suffix between January 15th and February 18th. This is to celebrate the 2013 Alpine Ski World Championships taking place in that nation. An award is available for three different levels which are Gold, Platinum and Diamond. Each level requires that a certain number of special event stations and O E stations to be contacted and logged. More is on-line at tinyurl.com/austrian-2013-event (OPDX)

**

WORLDBEAT: N2ZN IS NEW NEW QSL MANAGER FOR W2JO

According to the Ohio Penn DX Newsletter, Ken Boasi, N2ZN, says that he is now the QSL Manager for David Farnsworth, WJ2O. Farnsworth has made over 30 DXpeditions over the last 20 years and N2ZN says that he can confirm QSO's made with any or all of them.

Farnsworth's most recent trip was for the 2012 CQ World Wide CW contest where he operated from Barbados under the callsign 8P9DF. Dave's earlier DX operations and many logs can be found at wj2o.com.

N2ZN adds that QSL's for W2JO should now be sent to him either direct of via the bureau. He adds that his address is good on both QRZ.com and in the FCC database. (OPDX)

**

DX

In DX, members of the Radio Cub Peruano announced the activation of special event station 4T4RDP during the 2013 edition of the Rally Dakar. They will be active using SSB, CW, RTTY and the Digital Modes on 80 through 6 meters between January 4th and the 13th. QSL via OA4O.

SM0MDG will travel to Montserrat and be active as VP2MSW through January 8th. Operation will be holiday style with a focus on 17 and 15 meters with possible operations on 10 meters if propagation allows. This is an ultra-lite operation using a FT-857D and simple wire antennas. Look for the log to be uploaded to Logbook of the World W after his return home. QSL via his manager M0URX, either direct or using OQRS

DJ9KH will be on the air as A31WH from Vava'u Island between February 20th and March 3rd. All activity will be on the High Frequency bands. QSL via his home callsign, either direct or by the bureau.

W6HGF will be on the air stroke J8 from St. Vincent between January 9th and the 24th. His operation will be focused on RTTY using dipoles and a traveling beam. QSL direct to his home callsign or electronically via Logbook of the World or ClubLog.

DJ9KH will be active from Tongatapu Island as A31WH and from Vavau Island as A31WH/P February 20th through March 3rd. Operations will be on the High Frequency bands only. QSL via his home call.

Lastly DF3ZS and DL1QW will be active stroke 5Z4 from Diani Beach, Kenya, between January 7th and the 20th. Their operation will be holiday style on 80 through 10 meters using CW, SSB and RTTY. QSL via their home callsign, direct or via the DARC Bureau.

(Above from various DX news sources)

THAT FINAL ITEM: A BELATED HAPPY 65 TO THE TRANSISTOR

And finally this week, a belated happy birthday to an electronic device whose invention revolutionized telecommunications and made possible the

technology that we have today. Of coarse we are talking about the transistor as we hear from Amateur Radio Newslines Bruce Tennant, K6PZW:

--

On December 16, 1947, Bell Labs researchers William Shockley, John Bardeen and Walter Brattain created an amplifier from a germanium crystal that boosted the level of an input signal by 100 times. Various researchers had tried to develop a solid-state alternative to the vacuum tubes during World War II but none had succeeded. The Bell Labs Trio demonstrated it for lab officials a week later on December 23 where Shockley deemed it a magnificent Christmas present.

Bell Labs announced the invention of the transistor six months later. The device went on to become one of the signature scientific achievements of the 20th century, ranking up with splitting the atom, manned flight, and the discovery of DNA. One could argue, in fact, that the transistor was the most important breakthrough of the 20th century because subsequent advances in those other fields relied on the computing power made possible through integrated circuits and semiconductors. In essence, information has become a science itself.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

As a result of their achievement Electronics Magazine put a photo the three men on its cover. The three went on to share the Nobel Prize for physics in 1956. John Bardeen became a laureate a second time in 1972 for his work on superconductivity. And very apropos the entire story is on-line at tinyurl.com/transistor-comes-alive (Readwrite, others)

SB PROP ARL ARLP001
ARLP001 Propagation de K7RA

The New Year brings dreams of solar cycles of old, so distant now, sweetly remembered for their profusion of sunspots. We hear many times from operators who began in the amateur radio service as teenagers at the peak of Cycle 19. With youthful optimism, they naturally assumed that radio propagation would always be like that, when a few watts and a modest radiator on 10 meters spanned the globe during all the days and nights.

If you were age 13 to 17 in 1957 to 1959, the peak of Cycle 19, perhaps you were born between 1941 and 1945, and probably looked forward to the next peak in activity. That may have been a disappointment when Cycle 20 peaked around 1969, as that had a somewhat broader peak but at a far lower level. You can see it graphically at http://wm7d.net/hamradio/solar/historical.shtml. These young adults, now 24 to 28 years old in 1969, might be busy starting families and careers, and no doubt fondly recalling simpler times and the tremendous propagation of their younger years.

Cycle 21 peaked around 1980, and the former teenaged ham of Cycle 19 was now 35 to 39 years old. This was quite an improvement over the last cycle, as was Cycle 22, which looked like an echo of Cycle 21. Cycle 22 peaked around 1991-1992, with a more pronounced double-peak. The former teenager was now 47 to 51 years old, solidly into middle-age, and still wondering if sunspot activity would ever roar back to the levels of the late-1950s.

The following cycle, number 23, was another double-peak, but significantly lower in 2000 to 2002 than the previous cycle. Perhaps another disappointment for the now 56 to 60 year old ham, who then sees solar activity slide into a long and low minimum over the next decade, impossible to imagine 60 years earlier. The 160 meter operators, quite happy in this situation with a much quieter Sun,

have no such longing for the active Sun of yesteryear.

Now the young ham of the late 1950s contemplates the peak of Cycle 24, apparently much lower than any seen in most of the past century, and expected to grow to maximum this year. Now we have many more tools to observe and measure both solar activity and propagation, and we know that activity could still increase significantly. Some foresee decades of lower activity, but of course predicting future solar activity is a very tricky proposition, and anything could happen.

At
http://www.solen.info/solar/images/comparison_recent_cycles.png
you can see a comparison of recent cycles, from 21 to the current 24.

While we've seen a number of papers and predictions for a series of quieter sunspot cycles, some disagree. For instance, Michael Proctor, professor of Astrophysical Fluid Dynamics at Cambridge University is not convinced. He was quoted this year as saying, "This present cycle is similar to the weak one that ended in 1913, and that was followed by a strong cycle."

Those were Cycles 14 and 15, and Cycle 15 was only strong relative to 14. Cycles 17, 18 and 19 were stronger than 15, and so were 21, 22 and 23.

It is also important to remember there is wild variability in solar activity. To make those graphs of sunspot numbers appear smooth, each point on the graph actually represents an average of a year of data. When averaged, the flurry of solar activity at the end of 2011 and some future activity in 2013 could appear as a broad peak on a graph.

NASA looks frequently at their predictions for the current cycle, and often adjusts them every month. The latest shows a smoothed sunspot number a bit lower than the forecast from several weeks ago. In the December 10 forecast they predicted a smoothed sunspot number of 72 in the late in 2013, but that number is now 69 in the January 2 release. Note these are the lower international sunspot numbers, which are always less than Boulder numbers presented in this bulletin. Read the report at
http://solarscience.msfc.nasa.gov/predict.shtml.

With the change from 2012 to 2013, now is a good time to review sunspot numbers and trends. Average daily sunspot numbers in 2013 were up substantially from 2012. From 2004 through 2012 the yearly progression was 68.6, 48.9, 26.1, 12.8, 4.7, 5.1, 25.5, 29.9 and 82.3. I took all the daily sunspot numbers for 2012, added them together, and the sum was 30,133. Divide that by 366 (the number of days in 2012, a leap year) and the result is approximately 82.3. In 2011 it was 10,913 divided by 365, yielding 29.9.

The 2012 average was higher than any year after 2003. But at the peak of Cycle 23, the averages from 1998 to 2003 were all higher: 88.7, 136.3, 173, 170.3, 176.7, and 109.2. It seems unlikely that average daily sunspot numbers this year will reach anywhere near the level of 2000-2002.

We observe a moving 3-month average of sunspot numbers, in an attempt to smooth out some of the variations. Unfortunately, the past three months were much lower then the three month period ending one month earlier. The current average of 74.4, centered on November 2012, is lower than any three month period since averages centered on February and March of 2012.

The 3 month period previous to the current one is centered on October 2012, and covers September through November. The average then was 82.3. To recap averages from previous bulletins, the three-month moving averages of daily sunspot numbers centered on July 2011 through November 2012 were 63, 79.6, 98.6, 118.8, 118.6, 110, 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9, 89.9, 81.2, 82.3, and 74.4.

Looking at the past week, yesterday we saw a sizable gain in solar flux, when the value went from 106.7, 113.6, 117.8, and 119 to 128.8, on December 30 through January 3. NOAA and USAF predict solar flux at 130 on January 4-6, 125 and 120 on January 7-8, 115 on January 9-10, 110 on January 11, 105 on January 12-13, 110 on January 14-17, 115 on January 18-20, and 120 on January 21-23.

Predicted planetary A index is 5 on January 4-12, 10 on January 13, 5 on January 14-25 and 8 on January 26.

F.K. Janda, OK1HH issues a weekly geomagnetic forecast. This week he says geomagnetic conditions will be quiet January 4, quiet to active January 5, mostly quite January 6, quiet January 7-9, quiet to unsettled January 10-12, active to disturbed January 13, quiet to unsettled January 14-16, quiet January 17-19, mostly quiet January 20-21, and quiet on January 22-26.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for December 27 through January 2 were 78, 54, 49, 37, 87, 99, and 90, with a mean of 70.6. 10.7 cm flux was 106.8, 105.8, 104.3, 106.7, 113.6, 117.8, and 119, with a mean of 110.6. Estimated planetary A indices were 1, 2, 3, 4, 2, 1, and 3, with a mean of 2.3. Estimated mid-latitude A indices were 0, 2, 3, 4, 1, 1, and 2, with a mean of 1.9.

Amateur Radio Newsline Report 1847 January 4 2013

Posted: 03 Jan 2013 09:21 PM PST
http://forums.qrz.com/showthread.php?374380-Amateur-Radio-Newsline-Report-1847--January-4-2013&goto=newpost

Amateur Radio Newsline☐ Report 1847 ☐ January 4 2013

Amateur Radio Newsline report number 1847 with a release date of January 4 2013 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC begins work to create a new Citizens Broadband Service; the ARRL asks the FCC to create a new low frequency band from 472 to 479 kHz as Ireland gives that same spectrum to its ham radio community; the 2013 International DX convention finds a new home at the Visalia California Convention Center and the transistor reaches age 65. Find out the details as we ring in the New Year with Amateur Radio Newsline☐ report number 1847 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: FCC PROPOSES 3.5 GHZ CITIZENS BROADBAND SERVICE

First there was the old Class A and Class B Citizens radio of the 1940☐s. Then came 11 Meter Class D Citizens Radio Service in 1958. Next was the Family Radio Service authorized in the United States since 1996. That was followed in 2000 by MURS or the Multi Use Radio Service. Now in 2013, the FCC is proposing to create a new Citizens Broadband Service and it☐s like nothing else the regulatory agency has ever attempted before. Amateur Radio Newsline☐s Norm Seeley, KI7UP, has the details:

Propagation Forecast Bulletin #01 de K7RA:

Posted: 04 Jan 2013 03:20 AM PST
http://www.eham.net/articles/29574

The New Year brings dreams of solar cycles of old, so distant now, sweetly remembered for their profusion of sunspots. We hear many times from operators who began in the amateur radio service as teenagers at the peak of Cycle 19. With youthful optimism, they naturally assumed that radio propagation would always be like that, when a few watts and a modest radiator on 10 meters spanned the globe during all the days and nights.

//
DX News -- ARRL DX Bulletin #01:

Posted: 04 Jan 2013 03:10 AM PST
http://www.eham.net/articles/29573

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

//
ARNewsline Report 1847 -- Jan 4 2013:

Posted: 04 Jan 2013 02:43 AM PST
http://www.eham.net/articles/29572

The following is a Q-S-T. The FCC begins work to create a new Citizens Broadband Service; the ARRL asks the FCC to create a new low frequency band from 472 to 479 kHz as Ireland gives that same spectrum to its ham radio community; the 2013 International DX convention finds a new home at the Visalia California Convention Center and the transistor reaches age 65. Find out the details as we ring in the New Year with Amateur Radio Newsline report number 1847 coming your way right now.

SARL NEWS SUNDAY 06 January 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

SARL TO FOCUS ON DISASTER COMMUNICATION CENTENARY

ICASA HAS ISSUED CALL SIGN ZS9DCC "ZS9 DISASTER COMMUNICATION CENTENARY"

THE TRANSISTOR ONLY 65 YEARS OLD

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SARL TO FOCUS ON DISASTER COMMUNICATION CENTENARY

In his New Year message the SARL President, Rassie Erasmus, ZS1YT, said that for the next four months the SARL will focus on celebrating the theme "Amateur Radio - entering its second century of disaster communication."

He said "In my Christmas message I focused on Ham spirit and the Amateur Code and likened it to the spirit of Ubuntu - that profound African sense that we are human only through the humanity of other human beings. Nelson Mandela once said that it is not a parochial phenomenon, but it has added globally to our common search for a better world.

As we are at the beginning on a brand new year I would like to single out the sixth and last item in the amateur code "The Radio Amateur is Patriotic..... Their knowledge and their station are always ready for the service of their country and their community."

As the SARL we have lived up to the amateur code as clearly demonstrated through the activity of our disaster communication division "HAMNET" and the many amateurs who freely give of their time and expertise to support it.

On 18 April this year, the world celebrates world amateur radio day with the theme "Amateur Radio - entering its second century of disaster communication."

We believe it is fitting that we dedicate the next four months to support the theme and to celebrate a century of disaster communication support to South Africa and, indeed many times, to countries far beyond our borders.

ICASA HAS ISSUED CALL SIGN ZS9DCC "ZS9 DISASTER COMMUNICATION CENTENARY"

I would like to invite clubs to take turns in setting up public event stations to demonstrate how amateur radio contributes to South Africa and South Africans though disaster communication support, search and rescue operations, communication support for sporting events and technological innovation.

Amateur Radio was the first to use Voice over IP. Echolink was established many years before commercial operators introduced voice over IP in their networks. Radio amateurs build and operate satellites, have developed sophisticated software to enable communication under weak signal conditions and share these experiences to develop a culture of technological advancement.

The SARL will soon have a brochure available that demonstrates our abilities in providing disaster communication and technological advancements in communication. We need you to show it to the world."

Listen to the full message on Amateur Radio TODAY this morning or download it from the web

THE TRANSISTOR ONLY 65 YEARS OLD

Newsline this week entered a belated happy birthday to an electronic device whose invention revolutionised telecommunications and made possible the technology that we have today.

On December 16, 1947, Bell Labs researchers William Shockley, John Bardeen and Walter Brattain created an amplifier from a germanium crystal that boosted the level of an input signal by 100 times. Various researchers had tried to develop a solid-state alternative to the vacuum tubes during World War II but none had succeeded. The Bell Labs Trio demonstrated it for lab officials a week later on December 23 where Shockley deemed it a magnificent Christmas present.

Bell Labs announced the invention of the transistor six months later. The device went on to become one of the signature scientific achievements of the 20th century, ranking up with splitting the atom, manned flight, and the discovery of DNA. One could argue, in fact, that

the transistor was the most important breakthrough of the 20th century because subsequent advances in those other fields relied on the computing power made possible through integrated circuits and semiconductors. In essence, information has become a science itself. As a result of their achievement Electronics Magazine put a photo the three men on its cover. The three went on to share the Nobel Prize for physics in 1956. John Bardeen became a laureate a second time in 1972 for his work on superconductivity. And very apropos the entire story is on-line at tinyurl.com/transistor-comes-alive.

NOT A SARL MEMBER YET?

If you are not yet a SARL member you can now become one for only R240 covering the period from now until the end of June. This offer is only available to radio amateurs joining now or re-joining after more than a year of non-membership. The offer regretfully does not apply to members who have not yet paid their fees for the 2012/2013 year. For details visit www.sarl.org.za or call 011 675 2393 on Monday when the SARL office at the NARC opens.

CONTEST NEWS

The PEARS National VHF/UHF contest will take place on 18 - 20 January 2013, and is open to all licensed amateurs in South Africa and the neighbouring states. The aim of the VHF/UHF contest is to stimulate activity on the bands, make many long distance contacts possible, establish new records and encourage the improvement of VHF/UHF equipment. This is a 44-hour dual contest for digital and analogue modes; it will reflect changes of propagation over the two days and offer a wonderful camping period with lots of fun for field stations. Amateurs are requested to participate in both the contests and keep the bands alive. Stations in the first three categories can compete in both the national and divisional sections.

The first 22-hour session of the contest starts at 16:00 UTC on Friday 18 January and closes at 14:00 UTC on Saturday 19 January. The second 22-hour session commences at 14:01 UTC on Saturday and ends at 12:00 UTC on Sunday 20 January 2013.

You can participate as a Base station, a Field station, a Club or Multi-Operator station, a Limited Category (a) Base or (b) Field or Stationary Mobile station or a Rover station. The activity is SSB, CW, Digital and FM on 6, 4 and 2 metres as well as 70 and 23 cm. A valid contact consists of an exchange of call signs, signal reports and location such as the 6 digit Maidenhead Locator or co-ordinates.

The SARL Summer QRP Contest will take place on Saturday 26 January 2013 from 12:00 to 15:00 UTC. The QRP contests are intended to be fun activities to promote QRP operation between radio amateurs. Using homebuilt equipment or operating as a portable / field station and using temporary antennas is encouraged, but is not a requirement. SSB and CW may be used with 5 watts (PEP) output or less and a station may

be worked once per band per mode. There are no antenna restrictions.

The first hour is limited to the 40 m band only, the remaining two hours the contesters are free to use any HF (non-WARC) band as they see fit. The exchange is a RS(T) report and Grid locator.

The rules for both contests can be found in the 2013 SARL Contest Manual, please take note that the rules for the QRP contest have been changed from the 2012 contests.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the expected solar activity will be at moderate levels. Sunspot AR 1 640 is crackling with low-level C-class flares and harbours energy for an X-class flare.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 73.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be frequent 10 m openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 12 and 13 January - Hunting Lions-in-the-Air activity. 15 January - Last day to provide feedback on the DRAFT NATIONAL RADIO FREQUENCY PLAN to sarlregwg@sarl.org.za. 18 - 20 January - PEARS National VHF/UHF contest. 26 January - SARL Summer QRP Contest 12:00 to 15:00 UTC. 31 January - Last day for submission of nominations for councilors for the next term and motions for the 2013 AGM. 31 January - Last day for submission of a brief outline of a proposed paper at the SA AMSAT Space Symposium on 18 May 2013 to saamsat@sarl.org.za. 23 February - SARL Youth Sprint 10:00 to 12:00 CAT with a special event starting at 09:00.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot

studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

>From the SARL News team we wish all listeners a happy and prosperous new year. May your radio amateur activity bring you lots of pleasure.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

http://forums.qrz.com/showthread.php?374295-Vu4-rn3fz-operating-from-andaman-nicobar-island!!&goto=newpost

Hai friends

i have a small contact with the station working from HAVOLK island andaman nicobar islands

on 7.170mhz.through the conversation i understand he has no idea about wireless rules and reciprocal licence rules in india

he told me he has not taken any permission from WIRELESS PLANNING AND COORDINATION WING IN INDIA

he is working with vu4/rn3fz ,so it is totally illegal and challenging the rules in india may be he is not aware of the fact

even for those having vu license you will not get permission to operate from vu4 location very easily there is a lot of procedures.

have a good dx

Tasmanian Bushfire Disaster:

Posted: 05 Jan 2013 04:01 AM PST
http://www.eham.net/articles/29582

WICEN Tasmania (South), assisted by other trained southern region radio amateurs, is providing 24 hour support for firefighting activities as several fires continue to burn. At least 100 properties have been destroyed and thousands of people are left stranded. Towns on the devastated Tasman Peninsula in the state's south-east are cut off and only accessible via sea. WICEN Tasmania (South) Secretary, Roger Nichols VK7ARN said teams of two radio operators for the Incident Management Team based at Tasmania Fire Service Cambridge, are concerned primarily with two of the major fires. "These are fires on the Tasman Peninsula and in the Derwent Valley. Both of these and several others are still fast moving at this time," said Roger VK7ARN. Significant property loss has already occurred, especially in the Tasman Peninsula fire. There are 60 fire units in the field on these fires, being almost half of 130 currently actively deployed across Tasmania. He said, "Radio operator needs and deployments are under constant review as the situation develops. The Tasmania Fire Service 80MHz network is being used, involving standard procedures and Prowords."

//
Sun's 2013 Solar Storm Peak Expected to Hit Century Low:

Posted: 05 Jan 2013 03:58 AM PST
http://www.eham.net/articles/29581

Sunspot numbers are low, researchers said, even as the sun reaches the peak of its 11-year activity cycle. Also, radio waves that are known to indicate high solar activity have been very subdued. "It's likely to be the lowest solar maximum, as measured by sunspot 'number,' in more than a century," wrote Joe Gurman, a project scientist for NASA's sun-observing mission Stereo, or Solar TErrestrial RElations Observatory. The current sun weather cycle is known as Solar Cycle 24. This still from a NASA video shows the New Year's Eve sun eruption of Dec. 31, 2012, to kick off the New Year.

//
In Defense of Ham Radio:

Posted: 05 Jan 2013 03:54 AM PST
http://www.eham.net/articles/29580

I am responding to a letter posted by Burt Fisher, chief engineer of WCCT(FM), Sandwich, Mass., in which he misses an important aspect of amateur radio, which is the development of many key RF communication technologies by radio amateurs. A significant number of technical innovations in the RF and digital communications realm were developed by amateur radio operators, either as part of their ham radio hobby activities or as part of their daytime jobs as technologists for universities and corporations. For example, many of the innovations in vacuum technology over the past 80 years came from the technologists at CPI/Varian/Eimac and RCA, most of whom were amateur radio operators. Much of this technology was initially tested in amateur radio equipment. As vacuum technology has transitioned to solid-state devices, you will also find that a high percentage of the technologists working on solid-state RF amplifiers are active in ham radio and, once again, much of the practical, early, field testing and perfecting of these devices was carried out with amateur radio equipment. If you don't believe me, please check the links posted at radioworld.com/links.

//
Box Social Starts a Book Club, Learn to Talk on Ham Radio:

Posted: 05 Jan 2013 03:53 AM PST
http://www.eham.net/articles/29579

Next week, you can learn to talk and send messages on a HAM radio at an event on North Charleston Avenue. Tom Hallman, Jr., has an update on Daniel Winters, the man whose journey is symbolized by a door hanging on the wall at the Rebuilding Center. The Box Social is starting a book club. The every-other-Monday club will begin next week with a discussion of the first chapter of "A Confederacy of Dunces" by John K. Toole.

//
Open-Hardware Licensed Handheld Software-Defined Radio In the Works:

Posted: 05 Jan 2013 03:51 AM PST
http://www.eham.net/articles/29578

"Chris Testa recently presented at TAPR Digital Communications Conference and annouced his development work on a hand-held software defined radio. Running uClinux on an ARM Corex-M3 coupled to a Flash-based FPGA, it will be capable of receiving and transmitting from 100MHz to 1GHz. Designed to be low power, Chris has designed the radio primarily with the Amateur 2m and 70cm bands in mind. Currently in early prototyping stage, Chris intends to release the design under the TAPR Open Hardware License."

//
Planning to Consider Ham Radio Amendment to Zoning:

Posted: 05 Jan 2013 03:49 AM PST
http://www.eham.net/articles/29577

Ridgecrest's Planning Commission will hold a public hearing to recommend the City Council amend a city zoning ordinance at its meeting Tuesday evening. The amendment request, should it be approved by the city council

at a later date, could permit "amateur ham radio antennas and windmill towers in excess of 35 feet to be erected subject to a Conditional Use permit," according to a city staff report.
The agenda relates directly to a previous request by Ridgecrest resident Steven Rainey to erect a 55-foot ham radio tower on his property back in September. Rainey could not receive a conditional use permit for his proposed tower following a public hearing. The planning commission does not have the authority to grant such permits, under the current muncipal code.
During the public hearing, Rainey said the Tower would not be up 24 hours a day, but would be lowered via a crank when not in use.
City Planner Matthew Alexander said ham radio operators represented a strong asset to the city in case of emergencies.

//
Senate Approves Second Term for FCC Commissioner Mignon:

Posted: 05 Jan 2013 03:57 AM PST
http://www.eham.net/articles/29576

In June 2012, President Barack Obama nominated Mignon Clyburn to serve a second term as FCC Commissioner. On January 1, 2013, the Senate confirmed her nomination, paving the way to Clyburn's first full term as one of five FCC Commissioners.

//
Comment Deadline Set in WRC-07 Implementation Proceeding:

Posted: 05 Jan 2013 03:55 AM PST
http://www.eham.net/articles/29575

As previously reported, the FCC has proposed to amend its rules to implement the allocation decisions of the 2007 World Radiocommunication Conference (WRC-07) and to make certain other changes. Notice appeared in the December 27, 2012 issue of the Federal Register, which started the clock on a 60-day window for the submission of comments. Thus, comments are due no later than February 25, 2013, with reply comments due no later than March 27, 2013.

8P, BARBADOS. Members of the "Buddies in the Caribbean" suitcase mini-DXpedition group which specializes in 100 watt or less low power radios and Buddipole portable antenna systems is going to Barbados (NA-021) and

will be active between January 29th and February 6th. Operators mentioned are Mike/KC4VG (8P9VG), Weymouth/K8EAB (8P9EA), Paul/KB9AVO (8P9DG), Daniel/WZ1P (8P9WZ), Budd/W3FF (8P9FF), Chris/W6HFP (8P9HF), Guy/N7UN (8P9UN) and Steve/WG0AT (8P9RT). There will be 3 villa stations during the operation on 160-10 meters using CW, SSB, and RTTY or PSK. The equipment used this year will be four Elecraft KX3, two Yaesu 857-D and two Icom IC-7000 transceivers. All members will use Buddipole portable HF/VHF antennas in both horizontal and vertical configurations at 100 watts or less. At the same time, several teams will be battery-only, field portable either from Barbados beaches or scenic mountain tops and will sign call/p. They state, "Our goal is to demonstrate 'ultralite' DXpeditioning into magnificent 'vista' locations, operating field portable battery-only radios with backpackable, lightweight antennas and most of all 'having fun' with a number of local operators from a 5-star Villa near the ocean." QSL via LoTW or to the operator's home callsign (w/SASE).

9X, RWANDA. Carl, SM6CPY, will be active as 9X0PY from Rwanda between January 15-31st. Activity will be holiday style on all bands, if possible depending on antenna possibilities, using mainly CW listening up 25 kHz and operating with 100 watts. QSL via his home callsign, direct or by the Bureau.

AFRICAN TOUR. Operators Steve/HA0DU and Laci/HA0NAR plan to be on an African tour to Guinea Bissau (J5) and Senegal (6V) starting next month and to be active as J5NAR and 6V2R. They will start their journey in Cabrousse (South-Senegal). From there they will drive to Guinea-Bissau and expect to be on the air around February 9th. Additionally, they also plan to activate (in February) Carabane Island (AF-078) with the callsign 6V2R/P and Jeta Island (AF-093) with J5NAR/P. On their QRZ.com page they state, "We would like to remind you that the entire trip and stay on islands is paid in full by each of the operators and that any contribution/support will help us to reduce the high logistical costs." Their PayPal account is <ha0nar@hotmail.com>. QSL for both J5NAR and 6V2R go to Laci, HA0NAR (direct or by the Bureau). For details and updates, watch the Web page at: http://www.ha0nar.hu

ARCTIC/ANTARCTIC INFO NEEDED! John, KL7JR, is requesting that if you or any of your radio friends, SWL or Ham operator, has worked or heard any Arctic or Antarctic stations, he would love to hear from you for his monthly Arctic and Antarctic DX column which goes to CIDX (Canadian Int'l. DX Club) for publication in the monthly Messenger. Scanned copies of QSLs or reception reports from anywhere north of 60 degrees or the Antarctica are also welcomed. You can receive a sample of his column by E-mailing him at: KL7JR@yahoo.com

CS8/CT8, AZORES. Operators Dervin/PD9DX and Derk/PD9DX will be active as CS8/PD9DX (or with a CU callsign) and CT8/PA4N from Sao Miguel Island (EU-003) in the Azores between March 26th and April 3rd. Activity will be on all HF bands using CW and SSB. Rigs will be a Kenwood TS590 and an Elecraft K3. Power will be 100 watts for both radios. Antennas will consist of a multiband doublet (inverted vee-style), a multiband vertical

and an FD4 off-center fed antenna. They mention, "As we will be on the west side of the Sete Cidades volcanic mountain, propagation to the Americas will be much easier than propagation to Europa and Asia." Read QRZ.com for QSL info on each operator.

CT9, MADERIA. Mathieu, MJ0ASP, will be active as CT9/MJ0ASP from Madeira between January 4-9th. Activity will be on 40-10 meters using CW only. The log will be uploaded to LoTW and Clublog on January 10th. QSL via his home callsign, direct or by the Bureau.

DAYTON HAMVENTION NEWS. From Bill Salyers, AJ8B, <AJ8B@arrl.net> --
FOR IMMEDIATE RELEASE - "The SouthWest Ohio DX Association (SWODXA) is pleased to announce that we will again sponsor the DX Dinner ®, held in conjunction with the 2013 Dayton Hamvention®. This, our 28th annual dinner,
will be on Friday, May 17th, 2013, at the Dayton Marriott, 1414 S. Patterson Blvd., Dayton, OH 45409.
There will be a cash bar starting at 5:30 p.m., with dinner served at 7:00. Following the meal, there will be a separate room and cash bar available for more fellowship. This is an excellent opportunity to meet new hams, and renew old acquaintances, as well as learn about past DXpeditions and those in the planning stages.
The Marriott is very accommodating to a group our size. The dining room is on the ground floor so there are no steps, the dining room is very large, and there is ample free, on-site parking.
This dinner is always well attended by some of the most avid DXers in the world. As in the past, there will be some major door prizes, and there is always great anticipation as to who will be named the 'DXpedition of the Year'.
The Marriott is a large hotel with many room choices. Should you need accommodations, their website is
http://www.marriott.com/hotels/travel/dayoh-dayton-marriott
and their phone number is 937 223-1000.
Details and dinner reservation information can be found on the SWODXA Events
website <www.swodxaevents.org>. From there, click on the DX Dinner icon. You can print the reservation form and submit it with your personal check or money order. We are also accepting PayPal and credit card payments. Program details and a list of the prizes will be on the website as they become available and updates will be sent out regularly via Twitter. Check out our Facebook page at 'Southwest Ohio DX Association', or follow us on Twitter - @SWODXA"

FY, GUYANA. Christian, F5UII, will be active as FY/F5UII from the FY5KE Radio Club of Kourou between January 13-30th. Activity will be limited to SSB between 2200-1200z during the weekdays. He is there on a business trip but has plans to activate Salut Islands (SA-020, WLOTA 0911) on this trip, January 19-20th. His precise location is on the main island called Royal Island (Ile Royale), which is part of the group of islands with Devil's Island (Ile du Diable) and St. Joseph Island (Ile Saint Joseph).

Activity will be on 40/20/17/15/10 meters using 100 watts into as GPA-030
vertical and dipoles for 40/17m. Updates will be available on his Twitter
page and Web page at: http://www.f5uii.net
https://twitter.com/f5uii
QSL via his home callsign, direct or by the Bureau.

HR, HONDURAS. After his trip in Uganda with the F6KOP gang, Gerard,
F2JD, will be back in Honduras from around February 25th for 3 months.
As usual, he will be active as HR5/F2JD, but he needs to repair his
tower which was destroyed by the very strong wind last autumn. QSL via
F6AJA. The log will be online at: http://lesnouvellesdx.fr/voirlogs.php

IOTA NEWS.............
OC-261. Craig, VK5CE, will be active as VK5CE/p from Flinders Island
later in the new year between August 15-21st. Activity will
be on 80-10 meters, with most of the operations being on
40/20/15m, using SSB and PSK. QSL via his home callsign.
For more details and updates, watch Craig's Blog page at:
http://oc261.blogspot.co.uk

SA-022. (Update) Members of the Bahia Blanca DX Group (GDXBB) will be
active as L22D from Gama Island between January 24-27th, after
being off the air for 10 years. Operators mentioned are Osmar/
LU8DWR (Team Leader), Carlos/LU7DSY, Eduardo/LU5DEM, Carlos/
LU4ETN, Hugo/LW9EVA, Carlos/LW2EHD, Willy/LU4DBT, Marcos/
LU7DKO, Edgar/LU5VAT, Daniel/LU9VS, Federico/LU1WJF and Pedro/
LU7WW. The Camp Manager is Damian, LU5VDG. Activity will be
on 160-10 meters, including the 17/12 meter, and using CW,
SSB and PSK31. They will have 4 stations on the air with
various mono-banders and dipoles. QSL via Carlos Almir�n,
LU7DSY: P.O.Box 709, 8000 BAHIA BLANCA, ARGENTINA. Direct
with SASE + 3 dollars or 2 IRCs. Sorry not Paypal. Also,
watch the following Web page for updates at:

http://lu6evd.wordpress.com/2012/12/07/activacion-isla-gama-iota-sa-022

IOTA TOUR. Operators Vincent/F4BKV and Col/MM0NDX plan to activate nine
islands starting January 10th for three days. Look for the following
callsigns from the following Danish, German and Polish IOTAs:
EU-029 &#65533; operating from Sjaelland, Elleore, Gavno, Masnedo, Fallster,
Lolland, Sprogo and Amager (OZ/F4BKV & OZ/MM0NDX)
EU-128 - operating from Fehmarn (DL/F4BKV and DL/MM0NDX)
EU-057 - operating from Ruden (DL/F4BKV and DL/MM0NDX)
EU-129 &#65533; operating from Usedom (DL/F4BKV and DL/MM0NDX)
EU-132 &#65533; operating from Wolin (SP/F4BKV and SP/MM0NDX)
EU-042 &#65533; operating from Sylt (DL/F4BKV and DL/MM0NDX)
EU-125 &#65533; operating from Romo (OZ/F4BKV and OZ/MM0NDX)
EU-172 &#65533; operating from Fyn (OZ/F4BKV and OZ/MM0NDX)
EU-171 &#65533; operating from Jegindo (OZ/F4BKV and OZ/MM0NDX)

Their full itinerary can be found at: http://t.co/nLV0UopH
Activity will be on 40/20/17/15 meters SSB. Operators will be using
Twitter to follow their progress <https://twitter.com/IOTA_Trip>. For
Bureau cards, QSL via their home callsigns. For direct cards, QSL both
via F4BKV, preferably via the OQRS Web Page at: http://www.f4bkv.net/oqrs

KP2, U.S. VIRGIN ISLANDS. Three JA operators will be active from the KP2M
Radio Reef Contest Station (rental shack) on St. Croix (NA-106) between
April 3-9th. Look for the following:
Yoshi, K1HP/KP2 via JE2EHP
Taka, KP2/JF1BVG via JF1BVG
Toshi, WH7P/KP2 via JP1IOF
Activity will be on all bands and modes. Both Bureau and direct cards are
accepted via the JA home callsign. LoTW and OQRS will also be available.
For more details about the KP2M station, see: http://www.radioreef.com

KP4, PUERTO RICO (W1AW GOES DX!). The Puerto Rico Amateur Radio League
and the Caribbean Amateur Radio Group, sponsors of the American Radio
Relay League Puerto Rico State Convention to be held in the city of
Hatillo, Puerto Rico, on January 26th and 27th, are proud to announce
that the official ARRL Amateur Radio station, W1AW, will be on the air
as W1AW/KP4. It is of historical significance being the first time the
callsign is used outside the United States. Those amateurs who would
like to operate the station can contact Wilfredo Avil�s � KP4ARN at
<wavilesjr@yahoo.com> for scheduling. Before that, between January
11-25th the callsign N4D will also be on the air to commemorate this
event. For more info, go to: http://www.arrlpr.org

P2, PAPUA NEW GUINEA. Nao, JA2VQP, who is now living in PNG for the next
two years, is a volunteer of JICA (Japanese ODA) teaching mathematics
at the Divine Word University in Wewak, East Sepic Province (north coast
of PNG main land). He states that he has received a PNG license and
planned to bring radio equipment from Japan during the month December
(2012), so begin looking for P29NO in the coming months. Watch QRZ.com
for updates.

5W0W QSL STATUS. Rex, NR6M, reported on January 2nd: "I received the QSL cards from the printer today for 5W0W. All requests that I have received thru today will be in tomorrow's outgoing mail."

CY0 QSL STATUS. Sable QSL cards scheduled to be sent between December 26th (2012) and January 31st, 2013.

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone to visit the Les Nouvelles DX (LNDX) Web page to see more than 10500 old QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2011) with more than 300 QSLs
- At least one card for each 60 deleted DXCC countries (more than 1400+ QSLs)
- Nearest the totality of current prefixes, disappeared now (more than 3700+ QSLs)
- Album for stations from North Africa 1945-1962 (400+ QSLs)
- More than 850 QSLs from the Antarctic bases.
- Nearly 270 QSLs from the TAAF (Terres Australes and Antarctiques Francaises).
- More than 300 QSLs for the rare French Pacific Islands such as FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
- The FG, FM, FP, FS, FY stations from 1945 to 1970
- More than 1500 cards for the old timer with more than 130 countries before 1945.
- Cards from the French Department before 1945.
- At least one card from each of the states in the U.S. before 1945.
The URL address for the Web site is: http://LesNouvellesDX.free.fr
Some cards are still needed for the collection, and your particip-
ation is welcome. Please visit their site and give them your comments by sending an E-mail to: LesNouvellesDX@free.fr

SU9VB AND LOTW. Vlad, SU9VB, says, "I have currently indefinitely totally discontinued uploading any newer latest QSOs to LoTW until the system is slightly more manageable and more user logical and friendly."

QSL RECEIVED VIA LoTW: 9L0W, C6AKQ, CW5W, E7DX, EA1PO, EA3NE, ED3X, EI7M, F6HRP, GI7AXB, HC2UB, HI8PLE, KH6GMP, OH0X, OH0X, PJ2/K3ND, RT0Q, RV3FT, SM4RGD, SP5GRM, UT5EPP, VA7ST, VE7JH, VU2PAI, WP3A, ZF1A and ZL9HR

QSLS RECEIVED VIA MAIL: 1A0C, 3D2C, 4O7VB, 7X4AN, 7Z7AB, 9A8OK, 9A8VB, A71CT, AA4VK/CY0, AH0/N0AT, C6AXY, CP4DR, E20VB, EL2LF, ES5Q, JW7QIA, JY8VB, GO3TXF, JW7QIA, KL7RRC/P, LA2S, NH8S, P29VCX, SU9VB, T6LG, TR8CA, VP2MGZ, V85TL, VP2MDD, VP2MYL, WA4DAN/CY0, XX9THX and ZL7A

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED FOR THIS WEEK!

S7, SEYCHELLES. Nobby, G0VJG, will be active (callsign not issued yet) from the Seychelles (AF-024) between April 4-16th. Activity will be on the 40-10 meters using SSB only and HF verticals on the beach (QRO). QSL via G4DFI.

ST2, SUDAN. Samual, K0YAK (ex-9N7AK), will be active as ST2SF from Khartoum beginning late January and continuing through at least mid-April. Activity will be on 40-10 meters using CW, SSB and the Digital modes. There may also be 80 and 6 meter operations. QSL via K0YAK or LoTW. More details will be forthcoming.

T6, AFGHANISTAN (Update). Ilian, LZ1CNN (ex-YI9LZ), has been active as T6LG from Kandahar and will be there until the end of February. Activity over the past week has been on CW, the lower bands and 20/10 meters. Ilian states, "I will keep trying low bands daily within the next 2 months. In the beginning of March I will remove all antennas and leave. It was a good DXpedition, but hope to do a bit more on low bands especially. Did not have so good setup and opportunity to install many antennas when I was in Iraq as YI9LZ. Listen for me on top band, I will do my best!" QSL Manager is LZ1ZF. Postal address since September 1st, 2012, for LZ1ZF is: G. Vodenicharov, P.O. Box 25, 3600 Lom, BULGARIA. All QSOs will be uploaded to LoTW.

T8, PALAU. Just a reminder that operators Mike/JA6EGL, Yasu/JA6UBY and Yu/JE6DND will once again be active as T88SM, T88CP, and T88HK, respectively, from Koror Island (OC-009) between January 9-14th. Activity will be 80-10 meters using CW and SSB. QSL via their home callsigns (direct only).

V6, MICRONESIA. Haru, JA1XGI, will once again be active as V63XG from Pohnpei Island (OC-010) between April 3-11th. Activity will be on 160-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. Also JT65. Suggested frequencies are (no 80m):
CW - 1823, 7025, 10105, 14010, 18075, 21010, 24895 and 28010 kHz
SSB - 7125, 14175, 18135, 21260, 24940 and 28450 kHz
RTTY - 10140, 14088, 18120, 21088, 24910 and 28088 kHz
JT65 - 7076, 10138, 14076, 18102, 21076, 24920 and 28076 kHz

6m - 50110/CW, 50150/SSB, 50090/RTTY and 50330/JT65

He will use an IC-7000 into a two element yagi for 17/12m and a fishing rod (only 5m long) antenna. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW. Look for updates and details on Haru new Web page or Blog page at: http://island.geocities.jp/v63xg/index.htm http://ja1xgidxvacation.blogspot.com

VK9/N, NORFOLK ISLAND. Lee, VK3GK, will be active as VK3GK/9 from the Governor's Lodge on Norfolk Island (OC-005) between January 11-15th. Activity will be holiday style as Lee is celebrating his 21st wedding anniversary, so look for operations on 80-10 meters, mainly SSB, with CW possible and using IC-7000 into a Multi-band vertical and 80-10m OCF dipole.

YS, EL SALVADOR. Roberto, I2JIN, will be active as YS3CW from Corinth between January 11-31st. Activity will be on 80-10 meters using mainly CW. QSL via I2JIN, direct or by the Bureau. Log will be uploaded LoTW.

ZL7, CHATHAM ISLANDS (Update). Jim, ZL1LC, informs OPDX that he has booked airlines and accommodations to allow him to run as ZL7LC from Chatham Island between March 14-20th. He adds that all other preparations are going well, and this is a micro DXpedition which includes himself and his XYL with limited gear. Jim will be running PSK31 only. The rigs will be Icom 7000 and 7200 units, and the antennas will be verticals on 10, 15, 20 and 40 meters. The QTH is within 100 meters of the sea, so DX should be hot. The frequencies will be the standard PSK frequencies of 7035, 14070, 21070 and 28120 kHz. Jim states [edited], "I'll normally be operating on the highest working frequency. If/when a pileup develops, callers will be asked to work SPLIT and transmit 100 - 400Hz higher. For ZL contacts, there is a chance of SSB on 3677 kHz between 0700-0800z, but it depends upon the PSK activity. The IOTA is OC-038, the grid locator AE16ug and the nearby lighthouse (1km away) is CHA009. ClubLog will be uploaded about 24 hours later, as there is no internet at the QTH. All QSLs are direct to ZL1LC and further updates will be on the ZL7LC QRZ.com page."

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 6th January 2013

Counties Contest

80 metres was alive with EI call signs on New Year's Day for the counties contest. The number of counties activated, however, seemed to be somewhat lower than usual. Initial reports suggest that 25 of the 32 counties were active. During the final hour, as ionospheric conditions began to favour longer distances, some continental European stations joined in.

A number of portable stations braved the elements - we heard Mayo Radio Experimenters Network operating portable in Mayo, Dave EI9FBB was portable in Kerry and seemingly the only station in Kerry in the contest, so he was in great demand, while Joe EI7GY was out on the Wicklow mountains.

Logs need to be submitted to the contest manager no later than 15th January.

EI13CLAN

Any member wishing go on air with EI13CLAN should contact Dave EI6AL at dave.ei6al /at/ gmail.com or by phone on 0861000000.

New MF Allocation

We have been informed by ComReg that the band segment 472 to 479 kHz becomes available to all licensed radio amateurs here, on a secondary basis, with effect from 1 January 2013. The maximum power is 5 watts (7 dBW) and the modes available are CW, QRSS, and narrow band digital modes. Stations in the Amateur service operating in this band shall not cause harmful interference to, or claim protection from, stations of the aeronautical radionavigation service or stations of the maritime service. The amateur service shall ensure that no harmful interference is caused to the frequency 490 kHz which is used exclusively for the transmission by coast stations of navigational and meteorological and urgent information to ships.

Coolmine Radio Rally

Coolmine rally will be held at the Coolmine Community School on Sunday 10th February 2013. Doors open at 8.30am for traders and for member of the public at 9.30am. Admission is 5.00. Usual traders will attend and there will be a bring and buy sale. Tea and refreshments available all day during the event. Unlimited free car parking available. To book a table for the rally please call the following: Tom, 01 8211043 or Tony, 087 2439997. Everyone welcome to this excellent annual event.

DX News

Two German operators will be QRV from Kenya from 7 - 20 January. Callsigns to look for are 5Z4/DF3ZS and 5Z4/DL1QW. They will be on all bands 80 - 10m on SSB and RTTY. QSL to the home calls.

The Dakar Rally will start in Peru for the first time this year. The route will take participants through Peru, Argentina and Chile. To mark the occasion the Radio Club Peruano are airing a special event station with the callsign 4T4RDP. The station will be active from 4 - 13 January. A special QSL card will be available via OA4O.

Al W6HGF will be active from the island of St. Vincent in the Caribbean from 9 - 24 January. He will use the callsign J8/W6HGF and focus on RTTY. QSLs go via his home call.

Austrian amateurs will have the option of replacing their normal prefix with the special prefix OE2013 between 15 January and 18 February. This is to celebrate the Alpine Ski World Championships taking place in Schladming. Details of a special award in connection with this event can be found on the internet.

Morse Code as UNESCO Intangible Cultural Heritage

On December 12th, the Cabinet of Germany ratified the UNESCO Convention for the Safeguarding of Intangible Cultural Heritage, which brings us one step closer to the goal of the Deutscher Amateur Radio Club (DARC) and IARU to have Morse Code added to the list of Intangible cultural heritage. This should be achieved by November 2014.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085-7100-511

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

//
Ofcom Thanks RSGB for Olympic Help:

Posted: 06 Jan 2013 02:49 AM PST
http://www.eham.net/articles/29584

Dear Mr Beattie, Now that the London 2012 Games have come to an end I wanted to express my warm thanks and appreciation for the contribution that you made to the outstanding success of wireless communications during the Games. One of the critical challenges for Britain was to find enough enough people with the right skills in radio engineering and interference management to support the needs of the Games. Ofcom could not have found enough people from our own resources and we therefore sought help from you and other agencies to help us find expert staff.
The radio amateurs who helped us at the London Games were:

//
Sun Heating Up As Solar Cycle 24 Peaks:

Posted: 06 Jan 2013 02:47 AM PST
http://www.eham.net/articles/29583

The Sun is waking up as it approaches the peak of its roughly 11 year cycle. The past month (and really much of last year) was dominated by relative quiet despite the peak of solar maximum approaching. Most experts predict that solar maximum is peaking in the early to middle part of this year. While this is expected to be an unusually quiet solar max, that doesn't mean we won't see activity, and the Sun is making that clear now with the presence of three interesting sunspots. One of these is active region (AR) 1640, located in the Sun's northern hemisphere and rotating towards the west limb. A few days ago while it was near the center of the Sun AR1640 was a small, simple spot. However, it has grown rapidly for several days, and also developed into a magnetically complex spot that harbors energy for powerful flares. Surprisingly, however, this giant spot has produced only a smattering of relatively weak low-level C class flares. There certainly remains potential for this area to launch a stronger flare, but since it is nearing the western limb eruptions are unlikely to be Earth directed.

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
31 December - 06 January 2013

Solar activity ranged from very low to moderate. The summary period
began on 31 December with very low levels. Low levels were observed
on 01 January due to a single C1/Sf flare at 01/0906Z from Region
1640 (N28. L=323, class area Eho/360 on 06 January). A return to
very low levels existed on 02 January. Low levels returned on 03
January due to a single C1 event from Region 1640. 04 January
witnessed numerous C-class events, the largest a C2 long duration
event (LDE) from Region 1652 (N20, L=187, class area Dao/120 on 06
January) that began at 04/2346Z, peaked at 05/0018Z and ended at
05/0119Z. Associated with this event was a 170 sfu Tenflare. Earlier
on 04 January, Region 1639 (S16, L=311, class/area Dao/090 on 28
December) produced a C1 LDE that began at 04/0822Z, peaked at
04/0918 Z and ended at 04/1034Z. Associated with this event was a
coronal mass ejection (CME), first observed in STEREO A COR2 imagery
off the SE limb at 04/0924Z. Activity increased to moderate levels
due an impulsive M1 event observed at 05/0931Z from Region 1652. A
return to low levels was observed on 06 January. The largest event
on the 6th was a C3 event at 06/0303Z from Region 1653 (N09, L=185,
class/area Cso/030 on 06 January). By the end of the summary period,
a total of 14 spotted regions populated the visible disk.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels.

Geomagnetic field activity was quiet. Solar wind speed, measured at
the ACE spacecraft, ranged from a high of about 480 km/s at the
beginning of the period to a low of near 275 km/s late on 05
January. The interplanetary magnetic field (IMF) Bt ranged between 1
to 9 nT while the Bz component of the IMF varied between +7 to -6
nT. Phi angle was observed to be in a positive (away) orientation
```

for a majority of the period. Intervals of negative (towards) orientation occured between 31/0000Z to 02/0445Z and again from about 06/1300Z through the end of the summary period.

Forecast of Solar and Geomagnetic Activity
07 January - 02 February 2013

Solar activity is expected to be at low levels with a chance for M-class activity through 18 January when active Regions 1650 (S29, L=194), 1652 (N20, L=187) and 1653 (N09, L=185) rotate off the disk. Very low to low levels are expected to persist through 21 January. >From 22 Janaury through the end of the outlook period, low levels are expected with a chance for M-class activity as old Region 1640 (N28, L=323) is due to return.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels through the outlook period.

Geomagnetic field activity is expected to be at quiet to unsettled levels on 07 - 08 January due to the influence of a geoeffective CH HSS coupled with possible glancing blow effects from the 04 January CME. With the exception of 13 January, 20 - 21 January and 26 January when recurrent CH HSS are expected to become geoeffective, quiet conditions are expected to persist through the outlook period.

Tasmania fires update

Posted: 07 Jan 2013 04:49 AM PST
http://forums.qrz.com/showthread.php?374783-Tasmania-fires-update&goto=newpost

Tasmania fires update

The major fires in south-east Tasmania, which began last Friday, continue to burn fanned by relentless hot and windy weather.

WICEN Tasmania (South) Secretary, Roger Nichols VK7ARN said operators were at the Incident Management Team headquarters coordinating the fires on the Tasman Peninsula and in the Derwent Valley. There they helped to run the Tasmanian Fire Service communications using its 80MHz system, a communications role in which they are trained.

Roger VK7ARN said there had been power and communications outages caused by the blazes. Crews are working in safe areas to restore power and communications, although he said WICEN had offered to link the Eaglehawk Neck and Port Arthur areas.

A search for possible victims has already involved 250 properties. More than 100 proerties, including houses and a school, have been destroyed.

Access to the wild fire affected areas continues to be restricted, as more hot and windy days are forecast with the major fires out of control. Victorian firefighters are now in Tasmania to help with the fires.

Jim Linton VK3PC

Chair of the IARU Region 3

Disaster Communications Committee

HamRadioNow: A Social Mesh; HF Digital Voice Update

Posted: 05 Jan 2013 07:48 PM PST
http://forums.qrz.com/showthread.php?374620-HamRadioNow-A-Social-Mesh-HF-Digital-Voice-Update&goto=newpost

HAMRADIONOW.tv

Episodes 46 and 47 from the ARRL/TAPR DCC

Episode 46: A Social Mesh - a new way to distribute the Internet

How do you get your mobile Internet? Cell phone, Starbucks Wi-Fi? How about from the guy walking down the street a block in front of you? Sound radical? Well, listen to Sri (Devabhaktuni Srikrishna) for a few minutes in this talk from the 2012 ARRL/TAPR DCC, and you start to think it just might happen.

HamRadioNow

Episode 47: HF Digital Voice - FDMDV2 and CODEC2

Digital Voice has a firm foothold... maybe more of a toehold... in Ham Radio VHF/UHF with D-STAR, P25 and MotoTRBO modes in routine operation. On HF, though, it's a lot more tentative. AOR has an outboard "modem" that works with SSB rigs to create a narrow digital signal, and while they've sold some, it hasn't really taken off. Sound-card based programs like WinDRM and FDMDV relied on a codec that wasn't totally legit to use, and eventually hams had to stop using it. No other suitable codecs existed to replace it. ICOM put D-STAR into their IC-9100, putting digital voice on the mode switch of an HF rig for the first time. But its almost 7 kHz bandwidth makes D-STAR unsuitable for widespread use below 29 MHz.

Enter CODEC2, an open source, low bit-rate CODEC being developed by David Rowe VK5DGR, and the program that will run it, FDMDV2 (see the 2011 DCC Video for David's talk on CODEC2 development here). Looks like Digital Voice on HF is about to become viable (if not maybe popular) again.

In this talk from the 2012 DCC, Mel Whitten K0PFX and Dave Witten KD0EAG team up to review HF Digital Voice to date, and talk about its future.
HamRadioNow

The ARRL/TAPR DCCis an annual, three-day conference featuring presentations on a variety of technical and operational aspects of Amateur Radio. This year's DCC, held in Atlanta last September, had 16 of the 45-minute main presentations, the usual Saturday banquet talk, and a four-hour "deep dive" into GNU radio on Sunday. HamRadioNow videotaped all the talks, and we are now releasing them on-line. We'll continue with one or two a week until you have them all.

GB2RS NEWS

Sunday 6th January 2013

The news headlines:

Happy New Year

Centenary station G100RSGB operational

472kHz and 5MHz NoVs available to Full licensees

The news team and all the staff at RSGB HQ would like to wish our newsreaders, listeners and online readers a very Happy New Year. We would like to remind listeners that the deadline for news items is 10am on Thursday mornings and we welcome your news every week. The GB2RS script is uploaded to the Members Only area of the RSGB website on Friday afternoons and placed in the public area on Mondays.

RSGB President Dave Wilson, M0OBW, opened the year-long operation of the RSGB Centenary station, GB100RSGB, on 1 January as it was being hosted by the Widnes & Runcorn ARC. During the year the callsign will be operated by many different clubs and groups as it moves around the 13 RSGB Regions. Today and tomorrow, 6 and 7 January, the G100RSGB callsign will be operated by Workington & District ARS; on 8 & 9 January it's the turn of South Cheshire ARS; 10 January sees Oldham ARC operating the special event station and, finally for this week, Furness ARS have the callsign from 11 to 13 January. Although intentionally a celebration for all to enjoy, there is an associated RSGB Centenary Award. The rules for this have been amended this week to allow contacts with the station to count for points on a Region/Band basis. Please check www.rsgb.org/centenary/ for further information.

UK Full Licence holders can apply for 472kHz and 5MHz Notices of Variation online at www.rsgb.org/operating. Click on Notices of Variation in the right hand column. Both NoVs became effective on 1 January 2013.

Sadly, we've received a report that an FT-897, serial number 7L860208, has gone missing from the Finningley Amateur Radio Society clubhouse. Please contact the Secretary by e-mail to stuartboast@yahoo.co.uk if you come across it.

UKube-1, the UK Space Agency's first satellite, has booked its journey into space on a Russian Soyuz-2 rocket. The launch is expected to take place in Kazakhstan in March 2013. UKube-1 has also completed thermal

vacuum testing to verify the spacecraft operation in a simulated space environment. UKube-1 will carry a set of AMSAT-UK FUNcube boards to provide a 435/145MHz linear transponder and a 145.915MHz BPSK telemetry beacon for educational outreach.

Many radio clubs took part in the International Museums Weekend special event in 2012. In 2013, this event will take place on the double weekends of 15 & 16 and 22 & 23 June. Radio amateurs are encouraged to participate in this event by setting up stations in their local museums. Organiser Harry, M1BYT asks that all those intending to take part in the event should register their museum via the web form on the website www.ukradioamateur.co.uk/imw.

And now for the details of rallies and events for the coming week

There are no rallies taking place this weekend and the first rally of the year will be the Red Rose Winter Rally on 13 January in the George H Carnell Leisure Centre, Kingsway Park, M41 7FJ. The venue is easily accessible from M60 J9. Doors open at 11am and there will be trade stands, special interest groups, a Bring & Buy and an RSGB bookstand. More details from Steve on 07502 295 141.

It is with regret that the Wakefield & District Radio Society must announce the annual Northern Cross Rally, which was scheduled for Sunday 17 February, has had to be cancelled due to circumstances beyond their control. For more information, contact the Chairman and Rally Manager, Ken Quinn, G8FSO, on 07 900 563 117.

Now for the news of special events

RNLI SOS Radio week runs from 19 to 27 January and more than 25 stations have registered to take part. For full details of those stations, check out the website at www.sosradioweek.org.uk.

Pontefract & District ARS will be operating GB0SRW from 19 to 27 January as part of RNLI SOS Radio week. The club will operate on the 2, 4, 20 and 40m bands. QSLs will be sent but only on receipt of a card either direct to G0BPK or via the bureau to GB0SRW. Full details are on QRZ.com.

Today, 6 January, the Icom club of Vienna supports an event known as Kids Day. It's an opportunity for young people to become acquainted with amateur radio via a hands-on experience. If you have the time and inclination please tune in to 14.285MHz or thereabouts and give them a call. They will be using the callsign OE1KIDS and would be very pleased to hear from you.

Throughout 2013, Irish families and clans will be coming together in many events to celebrate their history and heritage in The Gathering. Irish amateur radio stations, both north and south of the border, will be participating. The special event callsign EI13CLAN will be active throughout the year and there will be a variety of awards and other activities, details of which will be posted on the IRTS website,

www.irts.ie/thegathering.

And now the DX news compiled from 425 DX News and other sources

4T4RDP will be active until 13 January as part of the 2013 Dakar Rally. They will be using SSB, CW, RTTY and digital modes on the 6 to 80 metre bands. QSL via OA4O.

W6HGF/J8 will be on the air from St Vincent, IOTA NA-109, between 9 and 24 January. His operation will be focused on RTTY using dipoles and a travelling beam. QSL direct to his home callsign, via Logbook of the World or ClubLog.

DF3ZS and DL1QW will be active as stroke 5Z4 from Diani Beach, Kenya, between 7 and 20 January. Their operation will be holiday style on 10 through to 80 metres using CW, SSB and RTTY. QSL via their home callsign, direct or via the DARC Bureau.

Max, DJ4EL will operate as V31ME from Belize until 17 January, making a side trip to Long Caye, IOTA NA-123, until 12 January.

A number of Japanese operators will be on the air from Palau from 9 to14 January. Callsigns to look for are T88SM, T88CP and T88HK. Activity will be on all bands from 10 to 80m using SSB and CW. QSLs go via their home callsigns.

Now the contest news

The ARRL RTTY Roundup will be making the datamodes portions of the HF bands busy today, 6 January. Activity is on all datamodes and finishes at 2359 tonight. In this event you can work everyone. There are low- and high-power categories for single- and multi-operator stations, but no single-band entries. Entrants are limited to a single transmitter, irrespective of section. Send a signal report and serial number. US stations will send a signal report and their 2-letter State code, while Canadian stations will send a signal report and their 3-letter Province code.

The 432MHz UK Activity Contest takes place from 2000 to 2230UTC on 8 January. Using all modes, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 14th of December to Thursday the 3rd of January, compiled by Neil Clarke, G0CAS on Friday the 4th of January.

Solar activity was mostly low with only low strength C class solar flares taking place on most days. The largest solar flare was a C4, which occurred on Christmas Day. On several days the activity was very low, notably around the end of December. Solar flux levels declined slightly from 122 units at the start of the period to just above 100 units by the 29th. The 90 day solar flux average on the 3rd of January was 117 units, that's a decline of 28 units from exactly 12 months ago. X-ray flux levels showed little variation day to day and varied between

B2 and B4 units. Geomagnetic activity was quiet every day. The most disturbed day was the 17th with an Ap index of only ten units. In fact, this was the only day in December with the Ap in double figures. Solar wind data from the ACE spacecraft saw normal solar wind speeds, which varied between 270 and 500 kilometres per second. Particle densities were low every day except for the 30th, which increased briefly to nearly 100 particles per cubic centimetre. Bz never varied more that minus and plus 10 nanoTeslas. There was some Sporadic-E propagation into Europe on 28 and 50MHz on some days and on others F2 openings to Asia, Australia and North America.

And finally the solar forecast for the coming year. Twenty thirteen should see the maximum for sunspot cycle 24; this is expected to take place during late spring or early summer. We are already in the maximum phase of the cycle. Most, but not every maximum sees a `double peak'; the first took place in February 2012 with a smoothed sunspot number of 66.9. Levels are still declining, and the latest figure for May 2012 is 61.7. If that turns out to be the maximum, it will be the lowest maximum since sunspot cycle number 6 that peaked in May 1816 with a smoothed sunspot number of 59. At sunspot maximum the Sun's polar magnetic field reverses. The polar regions change and become the opposite magnetic polarity to what they had been for about the last 11 years. This process takes between 12 and 24 months to complete. This is thought to be the one of the reasons why solar activity is not as intense during this period, and the reason behind the double peak. During the last maximum the first, higher peak took place in the April 2000, with a smoothed sunspot number 121. The second, lower peak took place in November 2002, at 116, before continuing to sunspot minimum. Comparing this sunspot cycle with the last for the number of X class solar flares, 120 took place during the last cycle and only 8 so far for this cycle. They were 331 days with the daily solar flux figure above 200 flux units during the last cycle, with the highest of 289 units on the 26th of October 2003. The highest daily figure so far for this for this cycle is only 182 units, which occurred on the 7th of November 2011.

During the summer months MUFs will reach their daily highs during the evening but during the autumn and winter months will take place around local midday. The daily highs are expected to peak probably for this cycle next autumn. Sporadic-E will take place on most days from May to late August.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Wythall Radio Club is holding a club net on 145.225MHz today and next Sunday. On Tuesday there's a Morse class at 19.45 and a committee meeting at 20.30. Friday sees the shack social from 19.30, and next Sunday they're taking part in the 80m AFS CW Contest. Details from Chris, G0EYO, on 07710 412 819.

Sutton Coldfield Amateur Radio Society is running an open net on 145.250.00MHz from 7 30pm on Monday. Tuesday sees an open net on 70.475.00MHz from 7 30pm. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

Lincoln Short-Wave Club is holding its AGM on Wednesday. The simplex club net is on 145.375MHz from 20.00 on Tuesday. Next Saturday sees the surgery and mentoring from 0900. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is holding its regular coffee morning on Tuesday. Wednesday sees a meeting in the main hall to discuss New Year resolutions. Training classes are on Thursday with Dave Murphy, G8OWL, while Friday sees shack and aerial work. Contact Mick Cleary, G7RRP, on 07595 696 359.

Now we return to the traditional listing in date order. On Monday Gloucester Amateur Radio & Electronics Society invites members to bring their 4m gear to see about getting a 4m net started. Details from Anne, 2E1GKY, on 01242 699 595, daytime.

On Tuesday Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club will discuss ideas for the new year. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday Worcester Radio Amateurs Association is holding a table top sale. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Notts Amateur Radio Club is having a video night. Contact Robin, G4NDM, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is discussing winter projects. Contact Mike, G3JKX, on 01952 299 677.

On Friday Coventry Amateur Radio Society is having a video night. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND

We start with two items of advance news. South Tyneside Amateur Radio Society is starting Foundation and Intermediate courses this month. For more information contact Darren, 2E0MTY, on 07511 968 073, or email starsradioclub@yahoo.co.uk.

Bury Radio Society will commence a Foundation course on Tuesday 29 January. It will run for 8 weeks, including the exam. For more information please contact Norman, G1HHU on 07525 932 729 or email training@BuryRadioSociety.org.uk.

Now for the traditional listing in date order. On Monday Angel of the North Amateur Radio Club commences enrolment for its Foundation and Intermediate courses. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is looking at microcontroller projects including a hands-on demo by John Collins, G8JHG. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday South Tyneside Amateur Radio Society is having a night on the air. Details from 2E0MTY, on 07511 968 073.

On Monday Workington and District Radio and IT Group is on the air and having a club meeting. Details from Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday Chester & District Radio Society is holding a committee meeting. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society is having a club night. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday Otley Amateur Radio Society is on the air and continues its Intermediate training. Contact Paul, M0PKW, on 07768 996 370.

On Wednesday Denby Dale Radio Club is having a night on the air on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Thursday South Manchester Radio and Computer Club is holding a PC clinic with Dave, G4UGM. Details from Ron, G3SVW, on 01619 693 999.

On Friday Tynemouth Amateur Radio Club is looking at Tyneside's secret war. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND

Mid Ulster Amateur Radio Club commences is Intermediate course on Tuesday. On Thursday there's a display and demo in association with Craigavon Borough Council and the BBC for the televised `Stargaze Live' programme from Oxford Island, Craigavon. Next Sunday there's a talk by guest speaker John, Mi0DFG / ZE5JS / Z25JS on amateur radio in Rhodesia / Zimbabwe and the need for homebrew radio. Contact Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND

On Tuesday Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Ayr Amateur Radio Group is having a presentation on computer generated logging. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday Lothians Radio Society Video Evening at the Edinburgh Cine & Video Society, 23a Fettes Row, Edinburgh. Details form Alan J. Masson, GM3PSP, on 0131 623 4580.

On Thursday Aberdeen Amateur Radio Society is holding a quiz night and SD workshop. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with clubs that have several events this week. Worthing & District Amateur Radio Club has its monthly breakfast meeting at the Goring Caf&#65533; at 9am today. On Wednesday there's a talk on portable magnetic loops by Phil, G4UDU. Next Sunday they're taking part in the AFS contest, CW. Contact John, G8FMJ, on 01273 593 232.

Farnborough & District Radio Society is running a slow Morse net on Monday from 13.00 hrs on 3.570MHz, then the G2DX Top Band net on 1.995MHz from 8pm. All are welcome. On Wednesday there's a natter night and Friday sees a net from 8pm on 144.675MHz. Contact Neville, G3SPD, on 01252 404 816.

Southdown Amateur Radio Society is holding its AGM on Monday at Chaseley. Wednesday sees an operating evening at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

Chelmsford Amateur Radio Society is running its 70cm net on GB3ER from 8.30pm on Tuesday. The Foundation course is on Thursday at Danbury Village Hall. Friday sees reminiscences of the life of G5HF, SK, from 7.30 at Great Baddow Parish Hall. Contact Martyn, G1EFL, on 01245 469 008.

Now we return to the traditional listing in date order. On Sunday Thames Amateur Radio Group holds its club net on GB3DA from 8pm. Details from Pete Sipple, M0PSX, on 07940 579 116.

On Monday Braintree & District Amateur Radio Society is having a natter night on the topic of what radio presents we had for Christmas. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club is doing its contest planning. Contact Dave, G4XDU, on 01628 625 720.

On Monday Surrey Radio Contact Club is having a talk on practical Yagi design by Alton Antennas. Contact John, G3MCX, on 02086 883 322.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Harwell Amateur Radio Society is holding a quiz and preparing for the rally. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday South Essex Amateur Radio Society is preparing for the Canvey Rally. Contact Dave, G4UVJ, on 01268 697 978.

On Wednesday Chesham & District Amateur Radio Society is holding a general meeting & members' forum. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Harwich Amateur Radio Interest Group is having a show and tell evening. Details from Kevan, 2E0WMG, on 07766 543 784.

On Wednesday Southgate Amateur Radio Club is having a talk on datamodes by Nigel, G0RPM, including a live demonstration provided an antenna can be erected. Contact Mr K Mendum, G8RPA, by email to g8rpa@arrl.net.

On Thursday Reading & District Amateur Radio Club is having a talk on the secrets of 3D imaging by Simon Lambert, M0XIE. Details from Pete, G8FRC, on 01189 695 697.

On Friday Bromley & District Amateur Radio Society is having its annual dinner. Details from Andy, G4WGZ, on 01689 878 089.

On Friday Cambridge & District Amateur Radio Club is having a talk on aspects of Japanese culture by Peter, M0DCV. Contact Ron, G3KBR, on 01223 501 712.

On Friday Itchen Valley Amateur Radio Club is watching the T32C DXpedition DVD. Details from Liz, M0ACL, on 02380 254 599.

On Friday Mid-Sussex Amateur Radio Society is having a round table discussion of events for 2013. Contact Mike Mundy, G1TDL, on 01444 246 899.

On Friday Radio Society of Harrow is having a talk on 40 years of technical things at the BBC by Tony, G0OVA. More information from Linda, G7RJL, on 02083 868 586.

RAC Bulletin 2013-001E - RAC Affiliated Club , SONRA to host ARISS
contact*
2013-01-07

The Society of Newfoundland Radio Amateurs (SONRA), partnering with
the Royal Canadian Air Cadets and the Admiralty House Museum and
Archives (SONRA Club station VO1BZM), are pleased to host an ARISS
contact on Saturday January 12, 2013 at 1440 Z. It is expected that up
to 100 air cadets will be present for the event, and they are all
anxious to speak to Canadian Astronaut Chris Hatfield via Amateur Radio.

In making this announcement, I would like to especially thank the lead
for this event, Everett Price VO1DK RAC Atlantic Regional Director for
the Maritimes and Past President of SONRA (1991-1992), for the
tremendous effort and success that he has helped his team achieve. I
wish them much success and good propagation on Saturday.

National media coverage on both the CBC and CTV are anticipated, so
stay tuned.

I would like to especially thank our ARISS mentor Wayne Harasimovitch
VE1WPH, VE1ISS for helping us through the details and preparation.
Thank you Wayne!

Doug Mercer VO1DTM'VO1DM CEC
Radio Amateurs of Canada
Chief Field Services Officer
President SONRA

Wichita Amateur Radio Operators can Offer Key Link in Emergencies:

Posted: 07 Jan 2013 11:15 PM PST
http://www.eham.net/articles/29588

For Mark Spaulding and other amateur radio operators, communication is key. The retired Beech demonstration pilot is a member of the Tec-Ni-Chat Amateur Radio Club and part of a group of about 30 amateur radio operators that volunteer as part of the Radio Amateur Civil Emergency Service (RACES) for Sedgwick County Emergency Management. "The important thing in volunteering is to get outside of yourself and do something useful for society," said Spaulding, who received his amateur radio license in 1999. Spaulding admits a lot of people don't understand ham radio, but says RACES consists of people from all backgrounds and generations.
Retirees generally have the most time to dedicate, he said. Radio Amateur Civil Emergency Service was developed in 1952 during the Red Scare and fears of nuclear war with the Soviet Union.But with the Cold War long ended, RACES operators now mostly focus on local emergencies, including natural disasters. "They're an important part of our ability to communicate in emergencies," said Randall Duncan, Sedgwick County emergency management director. "They've always shown flexibility and adaptability in providing communication, sometimes when more traditional means of communication aren't available."

QRZ Forums - Hamfest and Convention Calendar

//////////////////////////////////////
1st Puerto Rico ARRL State Convention January 26-27, 2013

Posted: 07 Jan 2013 03:24 AM PST
http://forums.qrz.com/showthread.php?374781-1st-Puerto-Rico-ARRL-State-Convention-January-26-27-2013&goto=newpost

It is with great pleasure and excitement that we are going to have the first ever Amateur Radio convention in our island. Not only that, we will also have the visit of ARRL President Kay Craigie, N3KN as well Southeastern Division Director Greg Sarratt, W4OZK and an ARRL booth. Other guests are IARU Region 2 Secretary and well known DXer/Contester Ramon Santoyo, XE1KK who will be giving a forum on DXpeditions, and Virgin Islands new Section Manager Fred Kleber, K9VV will be sharing a forum on MESH technology, and how can we benefit from it and uses for Amateur Radio. Also we will have John Kalotai - N1OLO from Hamsource witha PowerPole presentation and John Bigley - N7UR from Nevada.

Another surprise is that renowned amateur radio manufacturer YAESU will have their own booth, and there even will be a raffle of an FT 3000DX, plus lots of other exhibits, and offerings for the family. And, for the first time ever, W1AW goes DX, when during the Convention the official ARRL station will go on-the-air as W1AW/KP4, making it the first time the W1AW call is used outside the 50 States. Before that during January 11 thru 25th the Special Event N4D will be running. And a local Net is being run Thursdays at 2300UTC on 147.210 Mhz in preparation for the Convention.

All this and more will happen on January 26-27, 2013 on the Francisco "Pancho" Deida Coliseum in the city of Hatillo. Entrance is FREE!! More information available at www.arrlpr.org . Sponsors of the Convention are ARRL Affiliated Clubs; Caribbean Amateur Radio Group (CARG) and the Puerto Rico Amateur Radio League (PRARL).

Our friend John Bigly, N7UR, made a promo video which he is showing on various ham radio activities in preparation for the Convention. You can view it on http://www.youtube.com/watch?v=O8z20...ature=youtu.be And we would like to extend a big invitation to all those fellow Amateurs who can or will be at Puerto Rico and would like to be with us on this special occasion, and as Bob Barker said when calling contestants "Come On Down!".

MMMonVHF Newsletter No. 1/ WEEK 02 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2013-01-09
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

144.370 is the general calling frequency for MS in Region 1. However,
in many countries this particular frequency suffers from birdies,
often related to Cable TV networks. An option would be to shift the
general calling frequency to another one (144.375 or 144.365),
but in order to start this initiative I would like to inquire whether
or not the "370 birdy" is a general phenomena experienced throughout Europe.
If not, moving from 370 to another frequency might introduce new birdies
to stations who do not experience issues now.

In order to make a thorough inventory, I need your assistance:

Please send me an email:
1. Tell me if you like the general calling frequency to be shifted
(or if you do NOT like it to be shifted)
2. Would 365 and/or 375 be a suitable alternative?
3. Please include call sign and locator.

send to: pa3biy at ziggo dot nl

Many thanks,

Peter, PA3BIY

Best VHF DX Expedition of the Year

The MMMonVHF VHF-DX-Portal is happy to invite all VHF enthusiasts and VHF-DX'ers
to join the survey to find the "Best VHF DX Expedition of the Year"
The aim of the survey is to thank the very hard effort of those, who organized
and carried out so many nice expeditions and trips all around the world on the

VHF bands in the past year.
Participation Period: 01. January last year to 31. December last year
Voting Period: 01. January current year to 20. January current year

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV from 4 April to 18 April 2013 however, for Central Europe the EME window will open only around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144

MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will
be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

Interest is Buzzing in Amateur Radio:

Posted: 09 Jan 2013 03:28 AM PST
http://www.eham.net/articles/29594

In the day in age where you can check email on your phone. You can look at people while you're talking to them. You can basically do anything but brush your teeth with my phone. You might think amateur radio would be a thing of the past. You'd be wrong. Interest is actually growing. "Right now the number of amateur radio licenses is at a 10-year high and it's growing rapidly. There's tremendous interest," said Kevin Grantham, from the Dallas Amateur Radio Club.

WIANEWS WEEK COMMENCING JANUARY 13 2013.

Bushfires throughout Australia.

Australian given an AMSAT accolade.

Raspberry Pi.

VI 4 ASJ Wraps up.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JAN 13 2013.

Bushfires throughout Australia

The wild fires in Tasmania, Victoria, New South Wales and Queensland come
as Australia experiences its hottest temperatures on record spanning 120 years.

The fierce immense fires have even been photographed and tweeted by the
International Space Station Commander, Canadian Astronaut Chris Hadfield VA3OOG.

So far WICEN South (Tasmania) is the only group of trained radio amateurs
reported to be engaged by manning Tasmanian Fire Service communications.

In teams of two, WICEN is posted at the Incident Management Team headquarters to control the busy 80MHz radio traffic to crews at the massive blazes on the Tasman Peninsula and in the Derwent Valley.

Lots of people including tourists were trapped. Aerial and ground crews have worked on those two fires that saw houses, out-buildings and a school lost. Fires had burnt elsewhere in Tasmania.

In Victoria houses were burnt by a grass fire at Snake Gully near Ballart including an historic homestead.

A similar situation existed in New South Wales with fire near Bega, Cooma, Wagga Wagga and Nowra in the Shoalhaven region.

Queensland has had numerous fires. South Australian fire-fighters are being kept busy too.

Despite some respite in a few areas with cooler weather, including reports of a little snow on Hobart's Mount Wellington on Wednesday gave fire-fighters some help, but severe hot weather is forecast to return to most areas.

In Victoria, authorities are mobilising fire fighting fire trucks, aircraft and resources to the north-east region fearing the worst there by this weekend.

(Jim Linton VK3PC, Chair of the IARU Region 3, Disaster Communications Committee)

Australian given an AMSAT accolade

It was a very humble Tony Hutchison VK5ZAI who received an award from AMSAT North America for the voluntary work he has done for the Amateur Radio on the International Space Station (ARISS) program.

In accepting the award, Tony VK5ZAI said it was a very nice honour which made him feel humble.

"I look at it as a combined effort for all those that have helped over the last 20 years because I couldn't have done it alone," he said.

In praise of ARISS, Tony VK5ZAI said, "They're a great group to work with and he has made many friends through it and amateur radio."

He is the Australian ARISS Coordinator and a Telebridge Earth Station involved in many contacts between the ISS and schools.

The Channel 7 Today Tonight show interviewed Tony VK5ZAI in early 2012, when he gave some great insights as to how Amateur Radio can provide support for NASA, as well as raise public awareness through the ARISS schools program.

The segment has been posted to YouTube and NOW features as a prelude to many Australian school contacts with the ISS.

WIA BOARD TALK

President Phil Wait VK2ASD vk2asd@wia.org.au
Vice President Chris Platt VK5CP vk5cp@wia.org.au

Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Phil Wait VK2ASD our WIA President writing on WIA Front Page News (wia.org.au) says the Society needs an Assistant Treasurer to assist John Longayroux VK3PZ in looking after the financial affairs of the Institute.

Ideally you would live in the wider Melbourne area, have some corporate or not-for-profit experience and be proficient in MYOB or other computer based accounting systems, and naturally have some spare time to devote to the WIA. If you are able to assist John in the preparation of our yearly budgets and quarterly financial reports, and also happy to attend occasional meetings, we need to hear from you.

WIA President went on to say "I would like to say that this is a paid position and full of all sorts of perks and benefits. Sorry! but you will be involved with a great group of people all working for Amateur Radio and, although deadlines have to be met, the position is not too demanding."

If you believe you can help the WIA in this aspect of its work, please send an Email with a brief outline of your qualifications and experience to president@WIA.org.au

Learn - 13 January 2013

Have you prepared for the last weekend in May; the 2013 WIA AGM and Conference?

With access to Amateurs from all levels of experience, you'll participate in sessions about and related to Amateur Radio. With so much expertise in one place we offer a platform to tap into the assembled knowledge and experience and give you front row access to it all.

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

You'll find all the information online at the VK6 conference site, conference.vk6.net

The one subject that is mentioned every day on Amateur Radio Nets around Australia is the weather.

The Gold Coast Amateur Radio Society, VK4WIG, will be hosting a presentation by well respected local Meteorologist and Storm Chaser, Anthony Cornelius.

He will be answering all of those nagging questions, like how do meteorologists forecast storms, what are the best instruments to use at home, and what's' with all this crazy weather we are having right now.

Anthony will be at the Molendinar clubhouse at 10am on 19 January and everyone is welcome.

A bar-b-Q will follow at approximately 12noon. See you there - I'm Bryn VK4GF GCARS Secretary"

VK3
web service:- http://www.amateurradio.com.au/news/

The Centre Victoria RadioFest

This major event will be at the Kyneton Racecourse, only an hour from Ballarat, Bendigo and Melbourne on Sunday February the 10th, tickets on sale from 9am and the doors open at 10am.

A feature will be a Homebrew Competition judged by Drew Diamond VK3XU.

There will be a bustling Traders Hall, a second-hand seller market, club displays including vintage equipment and the ever popular mini-lecture program.

Presentations are by Alan Devin VK3XPD and Michael Coleman VK3XH on the Millimetre Wave Bands, Wayne Merry VK3WAM about 'Summit on the Air', Drew Diamond VK3XU home brewing, and Kevin Forbes VK3UKF on things in orbit.

See you at the Centre Victoria RadioFest, on Sunday February the 10th.

I'm Barry Robinson VK3PV and you are listening to VK1WIA.

What use is an f-call?

Over the past year I've come to see and experience some of the different achievements that amateurs have made in this hobby. It's not immediately obvious what the scale or range of those things are.

Just scratching the surface reveals that the amateur radio news is broadcast every week, there's likely a repeater within range, if not several, there are clubs and associations, contests, training services, websites, magazines, on-air nets, technical talks and seminars, educational activities, promotions, sponsorships and emergency services.

I've had the opportunity to participate in most of those activities, some as a receiver of services and others where I was an active contributor.

Recently I was struck by the invisibility of the edge. What I mean by that is that there are single points of failure in many of those services.

The news that you're listening to right now for example is put together by amateurs like you. The news has been here every week and you've been able to listen to it. The reason that's possible is because there is a large group of people across the world making it happen.

You could stop there and leave it at that, but if you did, you'd lose the point I'm making.

The edge that I'm talking about is for example, one single person is responsible for broadcasting the produced news file on my local repeater. Similarly, one single person is responsible for doing the same on 160m. Across the country, and across the world for that matter, are single individuals who are providing an essential service. Each individual representing a single point of failure.

I know that I am one of those single points of failure - not a critical one by any stretch of the imagination, but none the less. I didn't plan to be, in-fact, the opposite is true - I offered to help another amateur with the aim of sharing the load and found myself holding the baby. This is not a unique story, in fact, it's played out all over the hobby every day.

You could construct a list of all of those individuals and laud them with accolades, but I know for myself, that's not what I want - and I doubt others do either - of course, it's not for me to say, so instead, I'll ask this question:

What things in Amateur Radio are you taking for granted, and what could you do to contribute to them?

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

In the USA their FCC has formalized rules to help speed the deployment of Internet services on board planes.

Since 2001, the commission has authorized a number of companies to operate earth stations on aircraft communicating with Fixed-Satellite Service geostationary-orbit space stations.

Installed on the exterior of the aircraft, the satellite antenna carries the signal to and from the plane, providing two-way, in-flight broadband services to passengers and flight crews.

The commission's recent Report and Order formalizes earth stations aboard aircraft • ESAA • as a licensed application in the Fixed-Satellite Service Fixed-Satellite Service and establishes a framework for processing applications while ensuring other radio service operations are protected from harmful interference.

Airlines will be able test their own systems to prove they meet FCC standards, establish that they do not interfere with aircraft systems, and then get FAA approval.

A proposal to embed bar codes and radio-frequency ID tags in Virginia license plates is currently 'on the table.'

Proponents say the first-in the-nation surveillance program would aid law-enforcement agencies and could even "unclog traffic."

But civil-liberties groups see a more sinister agenda, and ulterior motives.

"RFID (radio frequency identification), in particular, is often cited as a key offender of privacy and, in fact, Virginia statute 46.2-323.01 prohibits the use of RFID tags in driver's licenses. DMV reports that similar concerns have been raised for bar codes," the report stated.

Morse Code as UNESCO Intangible Cultural Heritage

On December 12th, the Cabinet of Germany ratified the UNESCO Convention for the Safeguarding of Intangible Cultural Heritage, which brings us one step closer to the goal of the Deutscher Amateur Radio Club (DARC) and IARU to have Morse Code added to the list of Intangible cultural heritage.

This should be achieved by November 2014.

BILL PASTERNAK, WA6ITF, HONORED BY CEDARS SINAI ALUMNI ASSOCIATION

Amateur Radio Newsline producer Bill Pasternak, WA6ITF, was recently honoured with a Certificate of Appreciation for his volunteer work to the Cedars Sinai Medical Centre Alumni Association.

No, Bill never worked at the medical facility. However since his retirement from Fox Television in 2009 he has been the volunteer Videographer for the monthly social gatherings of the group.

The award was presented to Bill during a break in an evening's program while he was video recording a presentation by famed Hollywood Producer Director Paul Mazursky. Mazursky was the featured speaker talking about the production of his 1984 film Moscow on the Hudson that starred Robin Williams.

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

QNEWS WORKBENCH

The Raspberry Pi is a credit card sized computer that has taken the internet tinkerers set by storm. Running a 700Mhz ARM11 type CPU it promises a cheap, powerful embedded Linux platform with USB for keyboard and mouse, and a High-Def HDMI video output capable of BluRay quality playback; a seemingly impossible feature for such an inexpensive and generally available device.

It runs on 5v and exposes a bunch of GPIOs for interfacing with homebrew projects and has a composite video out and 3.5mm analogue audio output to make sure there are no excuses in getting this thing to talk to the outside world. The first model released boasted Ethernet jack and 256mb of RAM, which has since been doubled in a revised hardware configuration and more recently a cheaper version without the network connection is on sale.

The operating system is written on SDcard media, the same media used in most digital cameras and a variety of flavours of Linux are officially supported by the Raspberry Pi Foundation, and others by the user community.

Originally envisaged as a primary and secondary school level educational platform to teach software programming, the Raspberry Pi went on general sale to attract a community and ensure economies of scale would keep the price low.

Over 500,000 units were sold in its first 6 months, to September 2012. What makes this more impressive is that the 'Arduino', a microcontroller platform that was the previous 'darling of the internet', took 5 years to reach the 300,000 mark. You'll see the penetration of Arduinos at your local electronics parts retail stores, right alongside the PicAxe and Basic Stamp kits.

Raspberry Pis of both flavours -- pardon the pun -- are available from the 'big two' mail-order parts suppliers in Australia. I'm sure you can find them.

The 'Pi is a little underpowered to be used as a day-to-day home computer for most people, but with some technical assistance it could be a very inexpensive introduction to computing and general web-browser connected to a television for a complete novice. You're probably better off pulling out a few 'Crinkly Mawsons' from under the mattress if you're looking for a general purpose computer.

The price: performance ratio and its low power consumption makes the Pi an excellent platform for Ham experimenters and home brewers. We Amateurs have really taken to the Raspberry Pi with a range of projects reimplemented to take advantage of the much improved user-interface, over your traditional microcontroller based project.

Some projects that have caught my eye are:
-Full featured CW-trainer that plugs into the TV
-APRS Digipeaters and Gateways
-AMSAT Satellite platform
-Field day logging and Rig control
-2-axis rotator controller with real-time satellite tracking
-Lightweight Digi-mode setup for hiking

I hope this introduction has piqued your interest and got you thinking about investigating further.

(vk3gr)

OPERATIONAL NEWS - DATELINE 2013

VK ROSS HULL MEMORIAL VHF-UHF ALL JANUARY

VK SUMMER VHF-UHF FIELD DAY Sat sUN JANUARY 12-13

ZL Jock White Memorial Field Day Contest Sat and Sun Feb 23 and 24.

Hunting-Lions-in-the-Air

This event takes place this weekend (the closest to 13 January) the birth date of Melvin Jones, the founder of the Lions organisation.

It is not a contest but merely a means for Lions to exchange greetings with other Lions and Lions Clubs. Radio amateurs and members of the various Lions Clubs get together and the Lions are allowed to exchange greetings with other Lions under supervision of the radio amateur.

Normally the name and number of the Lions Club is the exchange.

SKN on OSCAR 2013 Best Fist Nominations Due

Many thanks to all who participated in AMSAT's Straight Key Night on OSCAR 2013. If you have not already done so, please take a moment to nominate someone you worked for Best Fist. Remember, your nominee need not have the best fist of those you heard, only of those you worked. Send your nomination to w2rs at amsat.org.

This year's event is dedicated to the memory of John Thompson, W1BIH/PJ9JT, who passed away in 2012, aged 96. Although known primarily as an HF DXer and contester, John was also active on OSCAR, mostly on CW.

Those nominated will be recognized in an ANS bulletin in early Feb-ruary, and in The AMSAT Journal.

[ANS thanks Ray Soifer, W2RS for the above information]

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

P29NO Nao/JA2VQP East Sepic Province Papua New Guinea
on air during January 2013 to January 2015 whilst volunteer
teacher at Divine Word University Wewak.

Two German operators will be QRV from Kenya from 7 - 20 January. Callsigns to look for are 5Z4/DF3ZS and 5Z4/DL1QW. They will be on all bands 80 - 10m on SSB and RTTY. QSL to the home calls.

The Dakar Rally will start in Peru for the first time this year. The route will take participants through Peru, Argentina and Chile. To mark the occasion the Radio Club Peruano are airing a special event station with the callsign 4T4RDP. The station will be active from 4 - 13 January. A special

QSL card will be available via OA4O.

Al W6HGF will be active from the island of St. Vincent in the Caribbean from 9 - 24 January. He will use the callsign J8/W6HGF and focus on RTTY. QSLs go via his home call.

VK Club Bulletins http://groups.yahoo.com/group/aarnie/
VK2 CCARC news ccarc.org.au/wp/2012/09/ccarc-news-12-31/

I am happy to report that the planned live relay of VK2WI's transmission using the FreeDV digital voice mode went ahead as planned last Sunday on 7190 LSB, digital voice, with no problems.

I would like to thank those amateurs who responded not only with written reports but also with screenshots, audio and video files to the digitalaudio Google group.

These reports have shown areas where I can improve my transmit side as well as the effects of QSB on the received signals at various VK2 locations from the Illawarra in the south up to Duri in the north.

The developers, who also monitor the list, have received these files and reports and are considering what might be possible to improve low signal performance of the mode.

Thanks to the coverage of both the ARNSW and WIA News broadcasts there have been several new amateurs posting their interest in FreeDV on the digitalaudio google group. During the week there have been reports on the list from several VK amateurs testing with FreeDV for the first time and making successful contacts.

For those who haven't joined the "band wagon" yet, can I suggest you check out FreeDV on the web at www.freedv.org

73 and hope to work you on Digital Voice this is Ed VK2JI.

WW SPECIAL INTEREST GROUP --- NAVAL

Members of the Lake Boga Lions Club have established a Museum at Lake Boga on the site of the No 1 Flying Boat Repair Depot that was established back in 1942.

Members might like to take a moment to visit their website by clicking the following Link <http://www.flyingboat.org.au> and get a feel for the 30 years of effort that has gone into the establishment of the Museum. Museum volunteers are currently looking for help locating two AR7 Radio Receivers to complete the restoration of the original communications bunker.

If you can help, the please contact Ross Pfeiffer from the museum by email: museum@flyingboat.org.au <mailto:museum@flyingboat.org.au>

http://www.wia.org.au/newsevents/news/2013/20130107-1/index.php

(sourced from WIA Front Page News)

WW SPECIAL INTEREST GROUPS --- RADIO SCOUTING
http://www.scouts.com.au
http://www.scout.org/jota
http://www.international.scouts.com.au

Like all events that raise a ground swell of emotion, it is time for joining hands and a couple of verses of "Auld Lang Syne." The Australian Scout Jamboree is wrapped up and many of the participants have arrived home or are travelling as this news goes to air.

The antennas and cables are down from the roof of the activities building and equipment returned to clubs and individuals. A decision has been made that the IC-718 donated by Icom Australia, go to a special scout's radio unit, to be formed in Queensland. No doubt part of the thinking has been after seeing the facilities that Peter, VK3AJ, brought from Victoria. For further information follow the link.

http://www.sresu.asn.au/

For the operators, it has been a demanding time with troops of 6 scouts coming through to take part in Amateur Radio. Often there were 4 positions in use with the logging computer pressed into service to access Echo link whilst more scouts sat waiting, up to 3 deep. Sadly from the Fraser Coast, the band conditions did not favour daylight operations and many scouts did not get to experience hands on ham radio. Thankfully, the EchoIRLP, supplied by VK4KEV allowed many DX contacts with amateurs, scouts and former scouts.

Once an operating schedule was set up for the radio scouts attending AJ2013, night time operations resulted in dog piles of activity. To the stations who missed a contact with VI4ASJ, we are sorry but we tried. To the stations who have made the contact, Maryborough Electronics and Radio Group, Inc. has accepted the role of QSL Manager. Contact details for MERG are either via WIA affiliated clubs or follow this links

http://www.qrz.com/db/VI4ASJ
http://www.wia.org.au/clubs/vk4/MaryboroughElectronicsAndRadioGroup/

The Wireless Institute of Australia has provided sponsored use of the QSL services so please "QSL via buro".

To the many new friends we have made during this journey, we say safe journey home, to the amateurs at the Jamboree, 73 and meet you further down the log and to those still working on site we wish you a speedy return home and a good night's sleep in your own bed.

>From MERG, Inc., I'm Geoff, VK4ZPP, reporting for WIA National News.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

WICEN Victoria are involved in 2 events during the next quarter.
If you are available to participate in any of these events, please
get in touch with the contact listed for the event.

SPECIAL INTEREST GROUPS - VHF AND ABOVE

First 24 GHz Contact Between USA and Japan

Al, W5LUA and Shichirou, JA6CZD made the first 24 GHz EME contact between
the USA and Japan on January 2 at 1430Z. The two stations had about an hour
of common window where each had 15 to 20 degrees of elevation.

JA6CZD uses a 2.4 M offset fed dish with a 22 watt SSPA. W5LUA uses
a 2.4M offset fed dish and a TWT mounted on the feed support provid-
ing 100 watts at the feed. JA6CZD sent Al a 559 signal report and Al
gave Shichirou a 449 report.

Both stations use linear polarity and must compensate for the 70
degrees of spatial offset between their locations. JA6CZD was used
horizontal and Al used vertical polarization. The noise figure at
both stations was under 2 dB.

Al measured his Doppler Shift with his return echoes at 51 KHz at
the start of the contact. The mutual Doppler Shift placed both at
about 24048.108 MHz based on a centre frequency of 24048.100 MHz
This shifted down in frequency as the schedule took place.

W5LUA was GPS locked and JA6CZD uses an OCXO and a Rubidium standard
to control frequency.

[ANS thanks Al Ward, W5LUA for the above information]

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh 'and always if the news room is to read your
item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

DXNL 1814 - January 9th, 2013
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Fabian Kurz, DJ1YFK
(e-mail: dj1yfk@darc.de)

9X, Rwanda:
Carl, SM6CPY, plans to be active as 9X0PY from January 15 - 31.
He'll mainly be active in CW with 100W in holiday style.
QSL via SM6CPY.

DL, Germany:
DB100AWPB is a special callsign issued for the 100th anniversary
of the "Ausbesserungswerk Paderborn" of the German Railway.
QSL via DO6NIK (OQRS), LoTW, eQSL.http://www.qrz.com/db/DO6NIK

DU, Philippines:
Bob, WT3A, is typically QRV between 0945 and 1300UT as DU7TET from
near Dumaguete on 160m. He plans to improve his antennas soon.
QSL via Homecall, only direct.

I, Italy:
The "Extreme DX & Contest Group" celebrates Carnival in Venice
with the special event call II3CV from January 12 - February 12.
A special award is available. QSL via IK3HHX.
http://www.extremegroup.org

JT, Mongolia:
Chak, JT1CO, was active on 30m around 2100 UT lately.
QSL direct only.

KP4, Puerto Rico:
On the occasion of the "ARRL Puerto Rico State Convention" (Jan
26/27) the "Caribbean Amateur Radio Group" (CARG) will be on
the air with the special station N4D (NA-099, WLOTA 2802)
from January 11 to 25. QSL via WP4CRG. During the convention
itself, they are using the ARRL callsign W1AW/KP4.
http://www.arrlpr.org

OE, Austria:
Dieter, OE8KDK, contest manager of OEVSV-DV announces that special callsigns will be on the air during the Ski world cup in Schladming (January 15 - February 18). Individual stations can apply for a special prefix (e.g. OE2013KDK), club stations will also be QRV with callsigns OE2013A .. OE2013Z.
http://wmdiplom2013.oevsv.at/

P2, Papua New Guinea:
Nao, JA2VQP, will teach math at the "Divine Word University" in Wewak on the north coast of PNG (OC-034, WLOTA 0084) for the coming two years. He's looking forward to enjoy the pileups as P29NO in the coming months.

SP, Poland:
Janusz, SP9YI, will use the special event callsign HF0A (WAP-237) from January 15 to February28 to celebrate the 10th "Arctic Activity Week" erreichbar. He previously held WAP-215 for HF36POL and WAP 216 for HF35APAS. QSL via Homecall.

SV/A, Mount Athos: Apollo, SV2ASP/A showed up around 0600z - 0700z on 40m in SSB and around 1400z on 17m in SSB.
QSL direct only.

UA, European Russia:
The shooting club "Sniper" in Vologda celebrates its 60th jubilee with the special event station R60SKV, which will be QRV until October. QSL via RA1QD.

In 1613 Mikhail I Fyodorovich became the first Russian Tsar of the house of Romanov.His reign marked the end of the Time of Troubles. Throughout the year 2013 the special callsign R400DR will be on the air to remember Michael I. QSL via RN3DG.
http://www.imperialhouse.ru/

XV, Vietnam: Larry is now QRV as XW1A from 160 - 2m in CW and SSB, and possibly some RTTY. QSL via E21EIC.

YS, El Salvador:
Roberto, I2JIN will be on the bands as YS3CW, January 11 - 31 from Corinth. He will mainly work CW on 10m - 80m.
QSL via I2JIN, LoTW.

Arctic/Antarctica stories wanted:
For his monthly column "Arctic and Antarctic DX" of the "Canadian International DX Club", John, KL7JR, is looking for reports, stories and QSL cards about ham radio contacts with stations in arctic regions. A sample of this column can be requested by mail from KL7JR@yahoo.com.

International DX Convention (IDXC) 2013:
The 64th "International DX Convention" (IDXC) will take place from April 19 - 21 in ths "Visalia Convention Center" in Visalia, CA.
http://www.dxconvention.org http://www.dxconvention.com

Committee for the Respect of the IARU QRP frequencies
The Committee for the Respect of the QRP frequencies
(Comitato per il Rispetto delle Frequenze Riservate, RFQI)'s
website can be found at: http://qrprespect.jimdo.com/

New QSL Manager:
Ken, N2ZN, is now the QSL manager for the more than 30 DXpeditions
of Dave, WJ2O: http://wj2o.com/

Award "Deutsche Rosenschau 2013"
The Deutsche Amateur Radio Club e.V., local group Forst/Lausitz,
DOK Y27, offers the short term award "Deutsche Rosenschau 2013"
("German Rose exhibition") for ham radio contacts within the
year 2013 on the occasion of the 100th jubilee of the Rose Garden
Forst ("Ostdeutscher Rosengarten Forst"). The exhibition takes
place for June 14 to September 29 in Forst (Lausitz).
http://www.darc.de/distrikte/y/27/diplomdeutsche-rosenschau-2013/

DE0BAH's QSL album:
Karl-Heinz, DE0BAH, has put together a collection of QSL cards
on his website: http://www.de0bah.de/

Upcoming Contests

12.01. Old New Year Contest
12.01. Activity Day DARC district Nordrhein
12./13. North American QSO Party
13.01. DARC 10-m-Contest
13.01. VERON Midwinter QSO-Party
13.01. ON 10 Meter Contest 2013

12./13.1. CQ Bande Basse Italia http://www.mdxc.org/cqbbi/regolamento-2013/

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)
====

Island activities

AS-128; 3W; Gulf of Thailand group: From January12 to 16, Sei/JA7LU
and Hiroo/JA2VWG are QRV from Phu Quoc Island (WFF 3WFF-020, WLOTA
2523) as XV4LU and XV4DDD respectively, on 40m - 10m in SSB and
RTTY. QSL only direct via home call.

IOTA tour: On January 10, Vincent/F4BKV and Col/MM0NDX are starting their
IOTA tour through Denmark, Germany and Poland. The following nine
islands will be activated until January 13:

EU-029; OZ; Sjaelland Archipelago: As OZ/F4BKV and OZ/MM0NDX
they will activate Sjaelland (DIA SJ-001, WLOTA 3302), Elleore (DIA
SJ-032), Gavno (DIA SJ-027), Masnedo (DIA SJ-033), Falster (DIA
SJ-016, WLOTA 1961), Lolland (DIA SJ-015, WLOTA 2773), Sprogo (DIA
SJ-009) and Amager (DIA SJ-002).

EU-128; DL; Schleswig-Holstein State East group: As DL/F4BKV and DL/MM0NDX they will be QRV from Fehmarn (GIA O-001, WLOTA 0637).

EU-057; DL; Mecklenburg-Vorpommern State group: As DL/F4BKV and DL/MM0NDX they are on the air from Ruden (GIA O-001).

EU-129; DL; Usedom Island: As DL/F4BKV and DL/MM0NDX they will activate Usedom Island (GIA O-013, WLOTA 1640).

EU-132; SP1; Szczecin/Koszalin Province group: As SP/F4BKV and SP/MM0NDX they are QRV from Wolin (SPIA SZ-002, WLOTA 1420).

EU-042; DL; Schleswig-Holstein State North West group: As DL/F4BKV and DL/MM0NDX they will be QRV from Sylt (GIA N-016, WFF DLFF-013, WLOTA 2057).

EU-125; OZ; Jylland West group: As OZ/F4BKV and OZ/MM0NDX they will show up from Romo (DIA NS-001).

EU-172; OZ; Jylland East and Fyn group: As OZ/F4BKV and OZ/MM0NDX they will be on the air from Fyn (DIA FY-001, WLOTA 2690).

EU-171; OZ; Jylland North group: As OZ/F4BKV and OZ/MM0NDX they are QRV from Jegindo (DIA NJ-006).

They plan to be active on 40, 20, 17 and 15m in SSB.
Bureau QSLs via Homecall. Direct QSLs for all calls via F4BKV.
A OQRS will be available.
http://www.f4bkv.net/oqrs
https://twitter.com/IOTA_Trip/status/286920748596088832/photo/1/large
https://twitter.com/IOTA_Trip

NA-016; ZF; Cayman Islands: Pete/K8PGJ will visit Grand Cayman Islands (WLOTA 1042) from January 12 - 20 and operate as ZF2PG in holiday style on 20 - 10m, mainly in SSB.
On January 19 he will take part in the NAQP SSB on 40/20m.
QSL via K8PGJ (d/B/L).

NA-048; C6; Bimini Islands: From January 11 to 14, Rick/K6VVA once again visits the Bahamas and will be on the air as C6AVA from Bimini Island in CW. A participation in the NAQP CW is planned. QSL via N6AWD (d/B).
http://www.k6vva.com/iota/na048

NA-109; J8; ST. Vincent: Al/W6HGF will be J6/W6HGF from January 9 to 24 from St. Vincent (WLOTA 0492; WW Loc. FK93jd). His operation will focus on RTTY. QSL via W6HGF (d/B/L). OQRS / ClubLog.
http://www.qsl.net/w6hgf/

OC-004; VK9; Lord Howe Island: From January 11 to 18, the following OPs will be QRV from Lord Howe Island (WFF VKFF-295, WW Loc. QF98): Tatsuo JA3ARJ/VK9L (QSL via JA3ARJ), Takeo JA3BZO/VK9L (QSL via JA3BZO), Shozo JA3HJI/VK9L (QSL via JA3HJI), Kunio AE6XY/VK9L (QSL via JA1CJA), Masumi W7AVO/VK9L (QSL via JA3AVO, direct only) and Hiroko W7PBL/VK9L (QSL via JH3PBL, direct only). The team will be

on 80 - 6m in CW, SSB and RTTY. Also see their QRZ.com entries.

OC-005; VK9; Norfolk Island: Lee/VK3GK will be on Norfolk Island as
VK3GK/9 from January 11 - 15. He's visiting the island for a trip
to celebrate his 21st wedding anniversary and plans to operate on
80 - 10m in SSB and a little CW in holiday style. QSL via VK3GK (d/B).

OC-009; T8; Palau Islands: From Koror Island Mike/JA6EGL, Yas/JA6UBY and
Yu/JE6DND will be operating as T88SM, T88CP and T88HK respectively.
Their activity from January 9 - 14 will cover 80 - 10m in SSB and CW.
QSL only direct via homecalls.

SA-003; PY0F; Fernando de Noronha Archipelago: Leo/PP1CZ is on vacation
on Fernando de Noronha Island (DIB OC-01, WFF PYFF-016, WLOTA 1208)
from January 15 - 21. In his free time he plans to be QRV signing
PY0F/PP1CZ with a focus on 160 and 80m in CW. Depending on the
conditions, he'll also work in CW, RTTY and SSB on other HF bands.
QSL via PP1CZ (d/B/L).

SA-020; FY; French Guiana group: During his stay in Guyana Christian/F5UII
(who uses the equipment of FY5KE from January 13 - 30) plans a
side trip to Salut Islands (WLOTA 0911). On January 19 and 20 he will
be QRV with 100W and a GPA-030 as FY/F5UII. QSL via F5UII (d/B).
http://www.f5uii.net/en
http://www.f5uii.net/en/fyf-5uii-en-guyane-du-13-au-30-janvier-2013

General Information

AN-010; div.; South Shetland Islands: Oleg/RI1ANF reports that during his
6 month activity from the Russian Arctic station Bellingshausen (WAP
RUS-01) he put 38,000 QSOs in his log, and another 1,300 from Priroda
Refuge (WAP RUS-15). These are all-time records for arctic activations.
He also set a new record in the CQWW DX CW contest with: 3106 QSOs
and approx. 4 million points.

GMA
As of January 2013 the German Mountain Activity Group (GMA) starts
the "GMA Triathlon", a challenging award programme. Besides activities
of the GMA, also outdoor activities of WFF and IOTA count towards this
award. http://www.cqGMA.eu

WFF Activities
The DLFF award manager Friedrich, DL4BBH informs that all DLFF awards
are now available free of charge in PDF format. The paper awards are
still available as usual for a fee of 7 EUR. http://www.wff-dl.de/

W1AW to operate as DX

Posted: 09 Jan 2013 11:09 AM PST
http://forums.qrz.com/showthread.php?375120-W1AW-to-operate-as-DX&goto=newpost

W1AW the flagship station of the ARRL will be operating DX from this months ARRL Puerto Rico Section Convention as W1AW/KP4.

The station will be on the air January 26-27 from Hatillo, Puerto Rico. Also, beginning on January 11th. in conjunction with the big convention Special Evevt Station N4D will begin operating from various locations on the island of Puerto Rico. This operation will continue up until the hamfest.

You can get all of the information here:www.arrlpr.org

There is still plenty of time for you to toss your socks in a carry on bag and join us in PR as one of the operators of W1AW/KP4......if you can't make it we will look for you on the air!

CQ Facebook 'Fans' Top 10,000 Mark -- Nearly Half Under Age 45:

Posted: 10 Jan 2013 02:34 AM PST
http://www.eham.net/articles/29595

As 2013 began, the number of "likes" on the CQ Facebook page exceeded
10,000 for the first time. These fans of CQ continue to represent a
considerably younger group of ham radio operators than organized ham radio
has been reaching through traditional means. CQ has had a page on Facebook
since 2010, and the demographics of its fans have remained consistent even
at the numbers have grown.

==> + LOGBOOK OF THE WORLD PROCESSING SPEED INCREASES THANKS TO NEW
HARDWARE

The processing queue for Logbook of The World (LoTW
<http://www.arrl.org/logbook-of-the-world>) -- the ARRL's online log
```

processing system -- has been shrinking steadily since Monday, January 7, when the system was brought back online after the completion of previously announced maintenance involving the installation of a new database server equipped with solid state drives (SSDs).

==> + FCC NEWS: COMMENT DEADLINE SET IN WRC-07 IMPLEMENTATION PROCEEDING

As previously reported <http://www.arrl.org/news/fcc-seeks-to-assign-entire-amateur-portion-of-160-meter-band-to-primary-status-to-amateur-radio-serv>, the FCC has proposed to amend its rules to implement the allocation decisions of the 2007 World Radiocommunication Conference (WRC-07) and to make certain other changes. Notice appeared in the December 27, 2012 issue of the Federal Register <https://www.federalregister.gov/articles/2012/12/27/2012-31049/wrc-07-implementation>, which started the clock on a 60-day window for the submission of comments. Thus, comments are due no later than February 25, 2013, with reply comments due no later than March 27, 2013.

While most of the 130-page Notice of Proposed Rulemaking and Order <http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db1119/FCC-12-140A1.pdf> does not directly affect the Amateur and Amateur-Satellite Services, two sections of the document are of particular interest to amateurs.

Specifically, the FCC proposes to upgrade the Amateur Service allocation in the upper half of the 160 meter band (1900-2000 kHz) from secondary to primary, while deleting the existing allocation to the Radiolocation Service. This is possible, because the re-accommodation of radiolocation stations displaced by the expansion of the AM broadcasting band to 1705 kHz has been completed and there are no non-federal radiolocation stations licensed to operate in the 1900-2000 kHz band.

The FCC also seeks comments on whether, and how, an amateur low frequency (LF) allocation might be able to co-exist with Power Line Carrier (PLC) systems that are used by electric utilities to monitor and control the power grid. The Commission notes that while PLC systems do not have the status of an allocation, they carry "communications important to the reliability and security of electric service to the public." WRC-07 created a new secondary allocation to the amateur service at 135.7-137.8 kHz that already has been implemented in a number of other countries.

The ARRL will be preparing comments supporting both of these allocations. Individuals wishing to comment directly to the FCC should carefully read paragraphs 13-24 of the NPRM <http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db1119/FCC-12-140A1.pdf> and follow the instructions contained in paragraph 175.

==> + FCC NEWS: SENATE APPROVES SECOND TERM FOR FCC COMMISSIONER MIGNON CLYBURN

In June 2012, President Barack Obama nominated Mignon Clyburn to serve a second term as FCC Commissioner <http://www.arrl.org/news/president-obama-announces-nomination-of-mignon-clyburn-for-new-term-as-fcc-commissioner>.
On January 1, 2013, the Senate confirmed her nomination, paving the way to Clyburn's first full term as one of five FCC Commissioners. "I am so pleased that the Senate has approved Commissioner Clyburn's re-nomination to the FCC," said FCC Chairman Julius Genachowski in a written statement <http://transition.fcc.gov/Daily_Releases/Daily_Business/2013/db0102/DOC-318203A1.pdf>.
"Commissioner Clyburn is an excellent and dedicated public servant and has been a strong advocate in seeking to extend the benefits of broadband to all Americans. I look forward to continuing to work closely with Commissioner Clyburn and congratulate her on her new term." Clyburn's five-year appointment is retroactive to July 1, 2012, when her first term expired. No date has yet been announced for her swearing-in ceremony.

==> FCC NEWS: FCC ENFORCEMENT ACTIONS FOR OCTOBER-DECEMBER 2012

Here's a summary of FCC enforcement actions during the past quarter (October-December 2012): Repeater-related cases: 1. General infractions (including unauthorized operation): 9. Powerline cases: 0. General infractions are listed below power line cases; be sure to scroll down the page to view them. Click here <http://transition.fcc.gov/eb/AmateurActions/Welcome.html> for details.

==> AMATEUR RADIO IN THE CLASSROOM: ARRL EXECUTIVE COMMITTEE APPROVES RESOURCE GRANTS FOR FIVE SCHOOLS

In December, the ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program (ETP), awarding equipment and resources valued at nearly $7000 to five schools. Two types of grants are awarded: ETP Grants and Progress Grants. ETP Grants for school radio stations are awarded to schools that provide a plan to use Amateur Radio as part of an enrichment program and/or as part of in classroom learning, while Progress Grants offer modest resource support to teachers who are currently using Amateur Radio as an instructional tool in their classrooms and who need additional resources for specific purposes. Read more here <http://www.arrl.org/news/arrl-executive-committee-approves-resource-grants-for-five-schools>.

==> ON THE AIR: ARRL JANUARY VHF CONTEST OFFERS WINTERTIME FUN

The 2013 ARRL January VHF Contest -- scheduled for the weekend of January 19-21 -- is sure to make the dreary winter days come to life with the sound of RF! "Don't let cold weather dissuade you from getting on the air," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "Many

a portable or rover operation has done just fine in January. Even so, the VHF bands can be tough, especially if there's no enhanced propagation; however, we had pleasant sporadic E openings on 6 meters in late December 2012, and last year's January VHF Contest also saw some sporadic E." Read more here <http://www.arrl.org/news/get-in-on-the-winter-fun-with-the-arrl-january-vhf-contest>.

==> ARRL IN ACTION: ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of December -- takes a look at the ARRL's Petition for Rulemaking that asks the FCC create a domestic Amateur Radio allocation at 472-479 kHz, the new Evolution of Amateur Radio exhibit at League Headquarters, updates from the ARRL Development Office, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-53>.

==> DAYTON HAMVENTION®: HAMVENTION AWARDS NOMINATION DEADLINE IS JANUARY 15

There is still time to nominate a radio amateur for the 2013 Dayton Hamvention® Awards: Amateur of the Year, Club of the Year, the Special Achievement Award and the Technical Excellence Award. The deadline for nominations is Tuesday, January 15. Anyone may nominate a person or club for these awards, and all Amateur Radio operators are eligible to receive these awards. The winners will be recognized at the 2013 Dayton Hamvention, which runs May 17-19. Read more here <http://www.arrl.org/news/hamvention-awards-nomination-deadline-is-january-15>.

==> + NEW YORK CITY HAM WINS APPEAL, CAN KEEP HIS TOWER

In September 2010, Paul Isaacs, W2JGQ, of New York City, obtained a building permit for his Amateur Radio antenna support structure, comprised of a 40 foot tower topped by a Yagi antenna. Isaacs installed his antenna system on the roof of his four story brownstone -- 58 feet above ground -- in lower Manhattan.

Almost four months after the erection of the system, the New York City Department of Buildings (DOB) declared its intention to revoke Isaacs' properly attained building permit, claiming that his Amateur Radio antenna system was not, in the Department's opinion, "an accessory use." Isaacs appealed the decision through the Department's bureaucracy, and when that didn't reverse the decision, he had a series of hearings before the New York City Board of Standards and Appeals.

In November 2012, the Board ruled that though perhaps uncommon, an Amateur Radio antenna system is indeed an accessory use under New York City's zoning ordinance and the building permit was properly granted. "The Board agrees with DCP [Department of City Planning] that the size

of a use can be relevant to whether it is 'incidental to' and 'customarily found in connection with' a principal use," the Board wrote in its decision. "However, it finds that in the case of Amateur Radio towers, unlike cellular [towers] and certain other uses, there is no articulated standard to guide DOB in determining at what height a particular radio tower becomes a non-accessory."

The full decision may be found here <http://www.antennazoning.com/main/page_amateur_radio_legal_library.html> under "Application of Paul K. Isaacs." Isaacs was represented by attorneys Fred Hopengarten, K1VR, Stuart Klein and Chris Slowik.

==> NEW BOOK ON HANDHELD TRANSCEIVERS, 2012 PERIODICALS DVD NOW AVAILABLE

Ring in the new year with new publications from the ARRL! Radios to Go! Getting the Most from Your Handheld Transceiver <http://www.arrl.org/shop/Radios-to-Go> by QST Editor Steve Ford, WB8IMY, and the 2012 Periodicals DVD <http://www.arrl.org/shop/ARRL-Periodicals-DVD-2012> are now available and ready for shipping.

If you recently received a handheld transceiver -- or are contemplating purchasing one -- Radios to Go! Getting the Most from Your Handheld Transceiver is a must-have book for your Amateur Radio library. A handheld transceiver, or "HT," is often the first radio that a new ham purchases, paving the way to a lifetime of radio enjoyment. While it won't replace the radio's user's manual, Radios to Go! will open your eyes to many of the "hidden" features that can be found in a handheld transceiver. Veteran amateurs will also find a great deal of new knowledge, including how to communicate via EchoLink or IRLP, or how to use these radios as packet radio data transceivers.

The 2102 ARRL Periodicals DVD is now available and includes the complete, fully searchable collection of three ARRL journals -- QST, QEX, and the National Contest Journal (NCJ). In addition, this DVD includes source code for software projects and PC board patterns, Section News, as well as the ever-popular Contest Soapbox and Contest Results. Search the full text of every article by entering titles, call signs or names. See every word, photo, drawing and table in technical and general-interest features, columns and product reviews, plus all advertisements. Print what you see, or copy it into other applications. System requirements: Microsoft Windows and Macintosh systems, using Adobe Acrobat Reader software.

==> FT-817 SATELLITE INTERFACE NOW AVAILABLE AS A KIT

The satellite computer-aided tuning interface described in the October 2012 issue of QST (pages 40-43) for use with SatPC32 software and the Yaesu FT-817 transceiver is now available for purchase from the ARRL Education & Technology Program (ETP). The interface was created by Mark Spencer, WA8SME, as part of resource development for the ARRL ETP. You

can order the board and the programmed PIC at a cost of $20; the complete kit is priced at $35. Earnings from the sales of these kits will be used to cover development costs, plus a donation to AMSAT. Read more here <http://www.arrl.org/news/ft-817-satellite-interface-available-as-a-kit>.

==> + NEW SECTION MANAGER APPOINTED IN NEW YORK CITY-LONG ISLAND

As of January 1, 2013, Jim Mezey, W2KFV, of Carle Place, New York, is the new ARRL New York City-Long Island Section Manager. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, appointed Mezey after consulting with current ARRL New York City-Long Island Section Manager Mike Lisenco, N2YBB. Lisenco stepped down as Section Manager on being elected as ARRL Hudson Division Director. Read more here <http://www.arrl.org/news/new-section-manager-appointed-in-new-york-city-long-island>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: After last week's somewhat downbeat look at sunspot cycles <http://www.arrl.org/news/the-k7ra-solar-update-251>, we have great activity to report this week: The average daily sunspot numbers more than doubled in the past week, rising nearly 93 points to 163.3, while the average daily solar flux was up more than 37 points to 147.7. On top of that, the geomagnetic conditions were very quiet, which is a wonderful combination, and not often seen in more active solar cycles. Currently, the NOAA and USAF predict solar flux values of 175 on January 10-12, 170 on January 13-14, 165, 150 and 125 on January 15-17, 105 on January 18-19, 110 and 120 on January 20-21, 125 on January 22-24, 130 on January 25-28, 135 on January 29, and rising to 140 on January 30-February 1. The predicted planetary A index is 5 on January 10-11, 7 and 8 on January 12-13, 5 on January 14-19, 8 on January 20-21, 5 in January 22-25, 10 on January 26, 5 on January 27-February 2, and rising to 8 on February 3-5. Look for more on the ARRL website on Friday, January 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + SILENT KEY: FORMER QST TECHNICAL EDITOR STU COHEN, N1SC (SK)

Former QST Technical Editor Stu Cohen, N1SC, of Colbert, Washington, passed away January 3 after a long battle with cancer. He was 70. An ARRL member, Cohen came to Headquarters in 2002 after an active career in television broadcasting. From 1974-1993, he was the Engineering Supervisor at ABC-TV in Los Angeles. During his tenure there, Cohen was awarded an Emmy®. After leaving the ARRL in 2005, he continued his relationship with the League, becoming a Technical Advisor. Read more here <http://www.arrl.org/news/former-em-qst-em-technical-editor-stu-cohen-n1sc-sk>.

==> + ARRL RECOGNIZES: JAMES K. BOOMER, W9UJ, WINS DECEMBER QST COVER PLAQUE AWARD

The winner of the December QST Cover Plaque award is James K. Boomer, W9UJ, for his article "Delta Loop Collinear Antennas <http://www.nxtbook.com/nxtbooks/arrl/qst_201212/index.php#/34>." Congratulations James! The QST Cover Plaque Award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot today for your favorite article from the January issue.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- How do you feel about the frequent use of macros during keyboard-to-keyboard digital contacts?
- Did your college have an Amateur Radio club?
- If you were applying for a job, would you mention your Amateur Radio experience on your resume?
- Are you comfortable working around high voltage?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the April 2013 issue of QST on the QuickStats page located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- January 11 -- NCCC Sprint Ladder
- January 12-13 -- North American QSO Party (CW); WW PMC Contest; UK DX Contest (RTTY); Michigan QRP January CW Contest
- January 13 -- SKCC Weekend Sprintathon; NRAU-Baltic Contest; DARC 10 Meter Contest; Midwinter Contest
- January 14 -- NAQCC-EU Monthly Sprint
- January 16-17 -- AWA Linc Cundall Memorial CW Contest
- January 17 -- NAQCC Straight Key/Bug Sprint

Next week:

- January 18 -- NCCC Sprint Ladder
- January 19 -- Feld Hell Sprint; LZ Open Contest
- January 19-20 -- North American QSO Party (SSB); Hungarian DX Contest; YL-ISSB QSO Party (SSB); AWA Linc Cundall Memorial CW Contest
- January 19-21 -- ARRL January VHF Contest <http://www.arrl.org/news/get-in-on-the-winter-fun-with-the-arrl-january-vhf-

contest>
- January 21 -- Run for the Bacon QRP Contest
- January 23 -- SKCC Sprint
- January 23-24 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 18-19 -- ARRL North Texas Section Convention <http://www.arrl.org/hamfests/north-texas-section-convention-cowtown-hamfest-1>,
Fort Worth, Texas
- January 19 -- ARRL Southern Florida Section Convention <http://www.arrl.org/hamfests/southern-florida-section-convention-3>,
Fort Myers, Florida
- January 25-26 -- ARRL Mississippi State Convention <http://www.arrl.org/hamfests/mississippi-state-convention-capital-city-hamfest>,
Jackson, Mississippi
- January 26-27 -- ARRL Puerto Rico State Convention <http://www.arrl.org/hamfests/puerto-rico-state-convention>, Hatillo,
Puerto Rico
- February 2 -- ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-2>, North Charleston, South Carolina; ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-1>,
Richmond, Virginia
- February 8-10 -- ARRL Southeastern Division Convention <http://www.arrl.org/hamfests/southeastern-division-convention-orlando-hamcation-1>,
Orlando, Florida
- February 15-16 -- ARRL Arizona State Convention <http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-1>,
Yuma, Arizona
- February 16 -- ARRL Arkansas State Convention <http://www.arrl.org/hamfests/arkansas-state-convention-winterfest>,
Hoxie, Arkansas
- February 23 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-3>,
South Burlington, Vermont
- March 8-9 -- ARRL Oklahoma Section Convention <http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfest-1>,
Claremore, Oklahoma; ARRL Louisiana Section Convention

<http://www.arrl.org/hamfests/louisiana-section-convention-acadiana-53rd-annu
al-hamfest>,
Rayne, Louisiana
- March 16 -- ARRL Nebraska State Convention
<http://www.arrl.org/hamfests/nebraska-state-convention-2>, Lincoln,
Nebraska; ARRL West Texas State Convention
<http://www.arrl.org/hamfests/west-texas-section-convention-58th-annual-st-pa
trick-s-day-hamfest>,
Midland, Texas
- March 23 -- ARRL South Texas State Convention
<http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-
hamfest-3>,
Rosenberg, Texas
- March 29-30 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-3>, Lewiston,
Maine
- March 30 -- ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
-2>,
Raleigh, North Carolina
- April 13-14 -- Communications Academy
<http://www.arrl.org/hamfests/communications-academy-2013>, Seattle,
Washington
- April 19-20 -- Southeastern VHF Society Conference
<http://www.arrl.org/hamfests/svhfs-conference>, Cocoa Beach, Florida
- April 19-21 -- International DX Convention
<http://www.arrl.org/hamfests/international-dx-convention-2>, Visalia,
California
- April 20 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-northeast-louisiana-
regional-ham-radiofest>,
Monroe, Louisiana
- April 26-28 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-3>, Boise, Idaho
- May 31-June 2 -- ARRL Northwestern Division Convention
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-4>,
Seaside, Oregon

Ararat shrine hambash - april 20, 2013

Posted: 10 Jan 2013 10:12 AM PST
http://forums.qrz.com/showthread.php?375262-Ararat-shrine-hambash-april-20-2013&goto=newpost

Join us for fun and fellowship! Once again the Shrine Radio Club is putting on the largest hamfest in the central states. Come to beautiful Kansas City and have fun and find a treasure you can't live without. Commercial vendors, flea markets, seminars, W5YI Testing, plenty of parking, food door prizes. See you there! www.hambash.com

//
Winterfest, Vienna, VA (just outside Washington DC), Sunday, February 24, 2013

Posted: 10 Jan 2013 08:35 AM PST
http://forums.qrz.com/showthread.php?375243-Winterfest-Vienna-VA-(-just-outside-Washington-DC)-Sunday-February-24-2013&goto=newpost

On Sunday, February 24, 2013, the 37th annual Winterfest will bring hams and equipment vendors together for a full day of fun! Several amateur radio clubs will be on hand to provide information about the ham radio hobby, getting started, where to find instructional help for earning the amateur radio license and much, much more! Dealers in new and used communications equipment, antennas, cabling, parts and supplies will also be on hand to help you find the hard-to-find. Tailgating starts at 6 am, the indoor sales area opens at 8 am. The event wraps up at 2 pm, but come early for the best stuff.

And if you're ready to take the test, a credentialed VE Examination Team will be on hand Saturday, February 25, 2012, so that you can earn that new license or upgrade!

SPONSER: This event is run by the Vienna Wireless Society, a 50 year old not-for-profit ham radio club located in Northern Virginia. This is an ARRL-affiliated event. The proceeds from this event help support the activities of the Vienna Wireless Society, which include community service, emergency preparedness, and technical innovation.

LOCATION: Northern Virginia Community College, Annandale Campus, 8333 Little River Turnpike Annandale, VA. Talk-in on the 146.91 repeater. GPS coordinates are 38.833216N, 77.236872W.

RESCUE RADIO: WICEN RESPONDS TO WILDFIRES IN TASMANIA

Major brush fires in south-east Tasmania, which began on Friday,
January 4th continue to burn relentlessly fanned by hot and windy
weather. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Nelson,
New Zealand, with the latest:

--

WICEN Tasmania South Secretary, Roger Nichols VK7ARN reports that
operators were sent to the Incident Management Team headquarters
coordinating the firefighting efforts on the Tasman Peninsula and in
the Derwent Valley. There they helped to run the Tasmanian Fire
Service Communications using its 80MHz system. This says Nichols is a
communications role in which they are trained.

Nichols said there had been power and communications outages caused by
the fires. Crews are working in safe areas to restore power and
communications and that WICEN had offered to link the Eaglehawk Neck
and Port Arthur areas.

A search for possible victims has already involved 250 properties. More
than 100 of them, including houses and a school, have been destroyed.

Access to the wild fire affected areas continues to be restricted, as
more hot and windy days are forecast with the major fires out of
control. Victoria State firefighters are now in Tasmania to help with
the fires.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, reporting.

--

For those not familiar with WICEN, it can best be described as Australia's version of the United States RACES but with some major differences. Chief among these is that WICEN operates as an autonomous body under the relevant disaster plan in each Australian state or territory. (VK3PC)

**

RADIO LAW: COMMENT DEADLINE SET IN WRC-07 IMPLEMENTATION PROCEEDING

The ARRL reports that a commentary deadline of February 25th and a reply comment deadline of March 27th have been announced for rule making dealing with ET Docket No. 12-338. This measure deals with implementation decisions of the 2007 World Radiocommunication Conference and to make certain other changes.

While most of the 130 page Notice of Proposed Rulemaking and Order does not directly affect the Amateur and Amateur-Satellite Services, two sections of the document are of particular interest to the ham radio community. Specifically, the FCC proposes to upgrade the Amateur Service allocation in the upper half of the 160 meter band at 1900 to 2000 kHz from secondary to primary, while deleting the existing allocation to the Radiolocation Service. This is possible, because the re-accommodation of radiolocation stations displaced by the expansion of the AM broadcasting band to 1705 kHz has been completed and there are no non-federal radiolocation stations licensed to operate in the 1900 to 2000 kHz band.

The FCC is also seeking comments on whether, and how, an amateur Low Frequency allocation might be able to co-exist with Power Line Carrier systems that are used by electric utilities to monitor and control the power grid. The Commission notes that while Powerline Communication Systems do not have the status of an allocation, they do carry communications important to the reliability and security of electric service to the public. WRC-07 created a new secondary allocation to the amateur service at 135.7 to 137.8 kHz that already has been implemented in a number of other countries.

The complete text of the Notice of Proposed Rule Making can be found in PDF format at tinyurl.com/wrc-07-fcc (ARRL, FCC)

**

WORLDBEAT: CENTENARY STATION GB100RSGB NOW ON THE AIR

A 12 month celebration of the founding of the Radio Society of Great Britain is now underway. Jeramy Boot, G4NJH, reports from Nottingham in the U-K:

--

Radio Society of Great Britain Centenary station G100RSGB is now on the air. RSGB President Dave Wilson, M0OBW, opened the year long operation

of the RSGB Centenary station, GB100RSGB, on January 1st as it was being hosted by the Widnes & Runcorn ARC.

Although intentionally a celebration for all to enjoy, there is an associated RSGB Centenary Award. The rules for this have been amended this week to allow contacts with the station to count for points on a Region/Band basis.

I'm Jeramy Boot, G4NJH, and you are listening to the Amateur Radio Newsline.

--

Please check www.rsgb.org/centenary for further information. (GB2RS)

**

WORLDBEAT: OFCOM THANKS RSGB FOR OLYMPIC HELP

The Radio Society of Great Britain has received a thank-you letter from U-K telecommunications regulator Ofcom. This in appreciation for the national societies assistance in the area of communications during the London 2012 Olympic Games.

In the note, Ofcom's Peter Bury says that the games have come to an end he wanted to express his warm thanks and appreciation for the contribution that the RSGB made to the outstanding success of wireless communications during the event.

According to Bury, one of the critical challenges for Britain was to find enough people with the right skills in radio engineering and interference management to support the needs of the Games. He says that Ofcom could not have found enough people from its own resources and we therefore sought help from you and other agencies to help us find expert staff.

Bury continues his letter by stating that the support of the RSGB for this initiative introduced Ofcom to people who were very well motivated and with a high level of technical skill and expertise. He noted that Ofcom could not have provided such good service to its customers without the RSGB's help.

Bury concludes by stating that he thinks the exchange of knowledge between Ofcom and radio amateurs will be an enduring legacy of the 2012 Olympic Games and that he sees this as a model for further fruitful cooperation between the two organizations. (RSGB)

**

HAM RADIO IN SPACE: PHONESAT LAUNCH NOW RESCHEDULED FOR FEBRUARY

The PhoneSat cubesat, originally planned for a December 2012 launch, now looks like it will fly aboard a new commercial rocket from Orbital Sciences Corporation in February. Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

--

The PhoneSat series of micro sat flights is a technology demonstration mission ultimately consisting of three 1 Unit CubeSats to be placed on-orbit in succession. The flights are intended to prove that a smartphone can be used to perform many of the functions required of a spacecraft bus.

The first satellite is built around the Nexus smartphone which will be running the Android operating system and will be enclosed in a standard 1 Unit cubesat structure. The main function of the phone is to act as the Onboard Computer, but the mission will also utilize the phone's Secure Digital card for data storage.

The bird will also have a 5 Megapixil camera for Earth Observation, and 3-axis accelerometer and 3-axis magnetometer for attitude determination.

Ham radio wise, PhoneSat 1 carries an amateur radio payload that will downlink on 437.425 MHz. It must be noted that this overall design was chosen as one of the winners in the Aerospace category of Popular Science magazine "Best of What's New in 2012" awards. Its also quite a lot of flight hardware for such a tiny bird.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Also planned for this launch is the commercial DOVE-1 satellite for a technology demonstration nano satellite based on the triple CubeSat form factor. Dove-1 plans to transmit its telemetry and image data to the ground 145.825 MHz in the amateur radio band although this is a commercial mission. (ANS, AMSAT-UK)

HAMVENTION 2013: CALL FOR AWARD NOMINATIONS

The Dayton Hamvention is soliciting nominations for its annual awards program. Amateur Radio Newsline's Stephen Kinford, N8WB, has the details:

--

There are four Dayton Hamvention award categories that consist of the Radio Amateur of the Year. the Technical Achievement Award, the Special Achievement Award, and the Radio Club of the Year.

By way of background, the Amateur of the Year is for the special person who has made a long term commitment to the advancement of amateur radio.

The Technical Excellence Award is presented to a radio amateur that has made an outstanding technical advancement in the field of amateur radio.

The Special Achievement Award goes to a ham radio operator who has made an outstanding contribution to amateur radio primarily by spearheading a single significant project.

Last but by no means lest, the Club of the Year recognizes an organizations on several levels. These might be a contribution of mitigating the effects of disaster situations, support of public service events, amateur radio education, recruitment, youth programs, years of service and media coverage.

The cutoff date to submit nominations is February 15th. For the Amateur Radio Newsline, I'm Stephen Kinford, N8WB, in Wadsworth, Ohio.

--

More information and official nominating forms are now on-line at www.Hamvention.org/awards.PHP. (Dayton Hamvention)

**

HAM HAPPENINGS: DAYTON DX DINNER - MAY 17

And still with Hamvention news, the SouthWest Ohio DX Association has announced that it will again sponsor the DX Dinner to be held in conjunction with the Hamvention 2013.

The date for this gathering is Friday, May 17th at the Dayton Marriott Hotel. This will be the 28th annual DX dinner and planners say that it is an excellent opportunity to make new friends, renew old acquaintances, as well as learn about past DXpeditions and those in the planning stages. More information is on the Web at www.swodxaevents.org. (AJ8B)

**

HAM HAPPENINGS: YOUTH IN AMATEUR RADIO EPISODE 5 READY FOR DOWNLOAD

Episode 5 of the Youth in Amateur Radio Podcast titled The Amateur Radio Bands, is now ready for download. Joe Andrews, KD0LOS, one of the Podcast producers has more:

--

In this episode we discuss the characteristics of the amateur radio bands and highlight a high school in St.Charles, Missouri, that is in the process of rebuilding a radio club for its students.

To listen to this episode, visit yarphams.com or look up the Youth in Amateur Radio Podcast on i-Tunes.

For the Amateur Radio Newsline, I'm Joe Andrews, KD0LOS, for the Amateur Radio Newsline.

--

The Youth in Amateur Radio Podcast service is produced by a dedicated group of young hams to serve the needs of young radio amateurs, world wide. (YARP)

**

HAM HAPPENINGS: AMATEUR RADIO ENTERING ITS SECOND CENTURY OF DISASTER COMMUNICATIONS IS THEME OF WORLD AMATEUR RADIO DAY 2013

The theme for World Amateur Radio Day 2013 is Amateur Radio Entering Its Second Century of Disaster Communications.

Each year on April 18th, radio amateurs around the world celebrate World Amateur Radio Day. In 1913, the first recorded instance of amateur radio being used to provide communications in a natural disaster took place during severe flooding in the Midwest of the United States. This in part led to the formation of the International Amateur Radio Union in 1925.

Now, event planners say that activities surrounding World Amateur Radio Day 2013 can be a great opportunity to spread the word about what amateurs are doing in the field of disaster communications in the 21st Century. More is on-line at www.iaru-r2.org/world-amateur-radio-day-2013. (IARU)

**

NEW POWER SOURCE: FUEL CELL TO POWER MICROSOFT EXPERIMENTAL RESEARCH FACILITY

The Fuel Cell Energy Corporation has announced a project using a stationary fuel-cell power plant to support Microsoft's latest data-center research project. The power plant will use renewable biogas generated by a wastewater-treatment facility as the fuel source to generate ultra- clean and carbon-neutral electricity to power Microsoft's Data-Plant project in Cheyenne, Wyoming. This sub-megawatt power-plant project will enable Microsoft to evaluate the effectiveness of using FuelCell Energy power plants to efficiently power future sustainable data centers.

The sub-megawatt Direct Fuel Cell power plant will be installed at the Dry Creek Water Reclamation Facility in Cheyenne, Wyoming by the spring 2013. The fuel cell plant will provide 200 kilowatts of power for

Microsoft's Data Plant which will be housed in a modular pre-assembled building that will the home of a server farm to recreate a data center environment.

The Direct Fuel Cell power plant will also provide excess power not used by the data center to the water reclamation facility to offset their electric costs. In the event of a grid outage, the Data Plant project and fuel cell plant will be configured to operate independently to provide continuous power. (Fuel Cell Energy Report)

**

RADIO EDUCATION: ANACAPA SCHOOL TO HOLD 3 DAY SPACE RELATED SEMINARS

Students at California's Anacapa School will have several experts on hand for their annual Synthesis Unit which will explore the topic "Space: Where Are We Going?"

This year the school has scheduled an all-star lineup of presenters. These range from astrophysicists and astronomy experts on the cutting edge of modern interstellar research to specialists who will discuss how ancient Central American stargazers. The students will also visit Vandenberg Air Force Base to learn about space launch operations as part of their research. After the three days of presentations, students will be asked to create academic products designed to synthesize the information learned during the week with the goal of charting the nation's future in space.

The annual, three-day event is Anacapa's premier tool for developing critical thinking skills. Each Unit provides students with unique opportunities to explore a topic in depth. Expert speakers make individual presentations with plenty of time for questions and answers. More about this special event is on-line at tinyurl.com/anacapa-space-speakers. (K6LCM)

RADIO MARKETPLACE: FORMER HAM RADIO COMPANY DATONG HAS NEW BUSINESS

Former amateur radio manufacturer Datong Electronics has been mentioned in the UK press. This following a recent $12 million dollar order win.

Datong was formed in 1974 by Dr. D. A. Tong, G8ENN. The company initially specialized in the development of Radio Frequency technology for use by amateur radio operators.

In the late 1970's and early 80's Datong was well known for a number of successful amateur radio products that included Filters, RF Speech Processors, Morse Tutor and an HF to VHF receive up-converter. The company's final amateur radio product was its 2 Meter Direction Finding unit known as the D F One that was produced in 1982. The D F One led Datong into the security and defense sectors where it found a ready market for its products in an era of heightened terrorist activity in the UK. At that point Datong stopped producing equipment for radio

amateurs.

Datong PLC, as it is known today, provides a range of advanced high performance covert intelligence gathering solutions, supplying defense, homeland security and law enforcement agencies around the world. More about the company and its current products is on-line at www.datong.co.uk. (Southgate)

NAMES IN THE NEWS: FIRST 24 GHZ CONTACT BETWEEN USA AND JAPAN

Some names in the news. First up are W5LUA and JA6CZD reportedly made the first 24 GHz EME contact between the USA and Japan on January 2nd.

Their QSO took place at 1430 UTC when both stations had about an hour of common time where each had 15 to 20 degrees of elevation to the Moon. JA6CZD used a 2.4 meter offset fed dish with a 22 watt transmitter. W5LUA also used a 2.4 meter offset fed dish and a Traveling Wave Tube mounted on the feed support providing 100 watts out.

W5LUA's station was GPS locked and JA6CZD uses a Rubidium standard to control frequency. The mutual Doppler Shift placed both at about 24048.108 MHz based on a center frequency of 24048.100 MHz. This shifted down in frequency as the schedule took place. (ANS, W5LUA)

**

MAMES IN THE NEWS: KC2UHB ON HAM RADIO EDUCATION

A number of articles written for Make Magazine by Diana Eng, KC2UHB, about getting started in amateur radio are now available on the web. These include Setting Up a Radio Shack; How-To: Set Up an HF Portable Radio While Hiking and Seeing Radio Waves With a Light Bulb to mention only three. Most of these articles date back to 2009 and 2010 but remain relevant today. More information is on-line at blog.makezine.com or simply do a Google search for Diana Eng. (Southgate)

EMERGING TECHNOLOGY: NEW SUB MICRO MEMORY UNVEILED

A major breakthrough in magnetic storage for data has been announced. Amateur Radio Newsline's Jim Damron, N8TMW, has the details:

--

An atomically assembled array of 96 iron atoms containing one byte of magnetic information in antiferromagnetic states has been announced.

The findings, being reported in the journal Science, could help lead to a new class of nanomaterials for a generation of memory chips and disk drives that will not only have greater capabilities than the current silicon-based computers but will consume significantly less power. And they may offer a new direction for research in quantum computing.

According to Shan X. Wang, director of the Center for Magnetic Nanotechnology at Stanford University magnetic materials are extremely useful and strategically important to many major economies, but there aren't that many of them. To make a brand new material is very intriguing and scientifically very important.

Until now, the most advanced magnetic storage systems have needed about one million atoms to store a digital 1 or 0. The new achievement is the product of a heated international race between elite physics laboratories to explore the properties of magnetic materials at a far smaller scale.

Last May, a group at the Institute of Applied Physics at the University of Hamburg in Germany reported on the ability to perform computer logic operations on an atomic level.

The group at I.B.M.'s Almaden Research Center here in the United States has now created the smallest possible unit of magnetic storage by painstakingly arranging two rows of six iron atoms on a surface of copper nitride. Such closeness is possible because the cluster of atoms is antiferromagnetic. This is a rare quality in which each atom in the array has an opposed magnetic orientation. In common ferromagnetic materials like iron, nickel and cobalt, the atoms are magnetically aligned.

>From Charleston West Virginia, I'm Jim Damron, N8TMW, reporting.

--

As this technology matures it could lead to a major breakthrough in magnetic based data storage for many industries as well as in future scientific endeavors. (Science)

WORLDBEAT: ABORIGINAL RADIO STATION IN CANADA'S NORTHWEST TERRITORIES GOES DARK

A popular aboriginal radio station in Canada's Northwest Territories is no longer on the air.

CKLB Radio made the announcement online early Saturday morning, January 5th. Its posting to the World Wide Web says that as of December 21st, the society didn't get the promised funding for the 2012 fiscal year, adding that it is nine months overdue. Because of this, those in charge of CKLB have no choice but discontinue the broadcasting service.

The post did not say if or when the station, which broadcasts on 101.9 FM, might be back on the air. This Aboriginal radio station is run by the Native Communications Society of the Northwest Territories. (RW)

**

HAM RADIO IN SPACE: CUBESAT LECTURES JAN 29 TO FEB 3 IN BRUSSELS

Lectures on CubeSat Technology and Applications that will be held at von Karman Institute in Brussels, Belgium from January 29th to February 1st. In all there will be close to twenty sessions presented by a group of worldwide experts in this field. Participation is limited to 100 people. If you wish to attend you must pre-register on-line now at tinyurl.com/belgium-cubesat-gathering. (ANS)

**

HAM RADIO IN SPACE: SKN ON OSCAR 2013 BEST FIST NOMINATIONS DUE

AMSAT is thanking all who participated in Straight Key Night on OSCAR 2013. It's also requesting that if you have not yet done so to please take a moment to nominate someone you worked for Best Fist.

According top AMSAT, your nominee need not have the best Morse sending fist of those you heard, only of those you worked. Send your nomination to w2rs (at) amsat (dot) org. Those nominated will be recognized in an Amsat News Service bulletin in early February, and in an upcoming AMSAT Journal. (ANS)

**

WORLDBEAT: EUROPEAN DX COUNCIL CONFERENCE SEPT 6 - 9 IN PORTUGAL

This year's European DX Council Conference takes place Friday September 6th to Monday September 9th at Figueira da Foz, near Coimbra, Portugal. More details will be released in the near future at the EDXC web site at www.edxc.org (EDXC)

**

DX

In DX, K4ZW is currently on the air from South Sudan as Zed-81-Zed. He is active on High Frequency Bands mostly using CW. Please QSL via home call or electronically using Logbook of the World.

SM6CPY will be operational as 9X0PY from Rwanda between January 15th and the 31st. Activity will be holiday style on all bands using mainly CW and listening up 25 kHz. QSL via his home callsign, direct or by the Bureau.

F6BLP is again be active as 6W7SK from Senegal through January 18th. Operations are holiday style using an IC-7000 into G5RV antenna operating mainly CW. QSL via F6BLP, direct or by the bureau.

F5OGL reports that back on March 24th and 25th, 2012, a station operating as TO4E, and claiming that he was on Europa Island was definitely not where he claimed to be. According to F5OGL tells the last TO4E DXpedition to Europa was in 2003 and there has not been any authorized activity from this island since.

Lastly, VK2CCC will be active from Lord Howe Island September 22nd to the 29th as VK9LL. He will focus on 160 and 80 meters. QSL direct via home call or electronically using Logbook of the World.

**

THAT FINAL ITEM: SAVING EARTH FROM AN ASTEROID WITH PAINTBALLS

And finally this week, if an asteroid ever takes aim at our planet one MIT researcher says that shooting paintball pellets at it could bump it off its course. Amateur Radio Newsline's Cheryl Lasek, K9BIK has more:

--

In the event that a giant asteroid is headed toward Earth, you'd better hope that it's blindingly white. Why you ask? This is because one researcher believes that such a pale colored asteroid would reflect sunlight. So by bouncing a lot of photons off its surface could create enough of a force to push the asteroid into a different direction.

Sung Wook Paek is a graduate student in MIT's Department of Aeronautics and Astronautics. He says that if timed just right, pellets full of paint powder, launched in two rounds from a spacecraft at relatively close distance, would cover the front and back of an asteroid. This would more than double its reflectivity. Paek claims that the initial force from the pellets might bump an asteroid off course and that over time, the sun's photons would deflect it even more.

But there are a few caveats. From his calculations, Paek estimates that it would take up to 20 years for the cumulative effect of solar radiation pressure to successfully pull the asteroid off an Earthbound trajectory. He also says that launching pellets with traditional rockets may not be an ideal option, as the violent takeoff may rupture the payload. Instead, he envisions paintballs may be made in space, in ports such as the International Space Station. There a spacecraft could then pick up a couple of rounds of pellets to deliver to the asteroid.

Paek's paper detailing this unconventional strategy won the 2012 Move an Asteroid Technical Paper Competition. This is an award sponsored by the United Nations' Space Generation Advisory Council, which solicits creative solutions to space-related problems from students and young professionals.

The challenge put forth by this year's U.N. competition was to identify novel solutions for safely deflecting a near-Earth object, such as an asteroid. Scientists have proposed a wide variety of methods to avoid an asteroid collision. Some suggested launching a projectile or spacecraft to collide with an incoming asteroid. Other suggested detonating a nuclear bomb near an asteroid or equipping spacecraft as "gravity tractors," using a craft's gravitational field to pull an asteroid off its path. But when the judging was complete, Paek's paintball strategy was deemed among the most novel approaches presented to date.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Researcher Paek recently presented his paper at the International Astronautical Congress in Naples, Italy. More about this theoretical way to deflect an asteroid off its trajectory is on-line at tinyurl.com/asteroid-paintball. (MIT, Science OnLine, others)

HamRadioNow: Double Dose of D-STAR from the DCC

Posted: 10 Jan 2013 04:29 AM PST
http://forums.qrz.com/showthread.php?375220-HamRadioNow-Double-Dose-of-D-STAR-from-the-DCC&goto=newpost

HAMRADIONOW.tv

Episodes 48 and 49 from the ARRL/TAPR DCC

Episode 48: The DVAP - Digital Voice Access Point Dongle ☐ Under the Hood
with Moe Wheatley AE4JY

You may have seen Robin Cutshaw AA4RC give talks and a HamRadioNow interview on the DVDongle and DVAP - Robin's been the "face" of the products so far. But he's only half of the design team - he wrote the software. The hardware guy is Moe Wheatly AE4JY, and until this program, he's managed to duck the spotlight. Well, we don't know why - here he does a great job talking about how he designed the DVAP and the Dongle... with a little help from some friends who knew how to get stuff working above 100 MHz.

HamRadioNow

Episode 49: D-STAR Low and High Speed Data Modes with John Davis WB4QDX

We're going to guess that most D-STAR users only use voice. Low speed data is part of every transmission, but it requires a computer (or maybe a smart phone) to tap into it. That data has phenomenal, but largely untapped potential.

In this presentation, John Davis WB4QDX shows you what it takes (and how easy it is) to use programs like D-RATS to utilize D-STAR's data modes.

For more D-STAR training, check out John's three-hour course for new users on operating D-STAR from the 2012 Dayton Hamvention®. That course is all in HAMRADIONOW Episode 12. HamRadioNow

The ARRL/TAPR DCCis an annual, three-day conference featuring presentations on a variety of technical and operational aspects of Amateur Radio. The 2012 DCC, held in Atlanta last September, had 16 of the 45-minute main presentations, the usual Saturday banquet talk, and a four-hour "deep dive" into GNU radio on Sunday. HamRadioNow videotaped all the talks, and we've been releasing them on-line. These two are the last 45-minute talks. The

Banquet keynote, and the GNU deep dive, are coming next.

Watch these episodes at our web site, www.HamRadioNow.tv.

http://forums.qrz.com/showthread.php?375320-ISS-School-Contact&goto=newpost

My local radio Club the Loyalist City Amateur Radio Club Inc. (LCARC) Is doing it's second schools/ISS contact. The first one in 2008 was a great success.

This one will have Commander Chris Hatfield talk to 20 students at the Saint Rose/Barnhill schools.

On Thursday the 17th of January at 13:40 UTC the students will be talking the the ISS and asking there questions.. You can join us live online. There will be a video feed that will start at 12:00 UTC covering the whole event.

The live feed will be at live.streamit.ca/?player=66

You should also be able to find it at : http://www.lcarc.ca

Hope you will join us live!

ARLP002 Propagation de K7RA

ZCZC AP02
QST de W1AW
Propagation Forecast Bulletin 2 ARLP002
>From Tad Cook, K7RA
Seattle, WA January 11, 2013
To all radio amateurs

SB PROP ARL ARLP002
ARLP002 Propagation de K7RA

After last week's somewhat downbeat look at sunspot cycles, current, past and future, we sure have some great activity to report this week.

The average daily sunspot number more than doubled in the past week, rising nearly 93 points to 163.3. Average daily solar flux was up more than 37 points to 147.7. On top of that, the geomagnetic conditions were very quiet, which is a wonderful combination, not often seen in more active solar cycles.

There is a bit of uncertainty regarding the mid-latitude A-index on January 5-6. Some sort of outage for 24 hours blocked the data (from Fredericksburg, Virginia) on 8 consecutive 3-hour readings from late January 5 (UTC) through early January 6. The mid-latitude K-index tracked closely with the planetary K-index from January 3-9, so if the data were not missing, the January 5 mid-latitude A-index would probably have been a little higher, and the January 6 mid-latitude A-index a little lower than reported. The daily A-index is based solely upon the eight K-index readings throughout the day.

Currently NOAA and USAF predict solar flux values of 175 on January 11-12, 170 on January 13-14, 165, 150 and 125 on January 15-17, 105 on January 18-19, 110 and 120 on January 20-21, 125 on January 22-24, 130 on January 25-28, 135 on January 29, 140 on January 30 through February 1, then 135, 140, 135 and 130 on February 2-5, and 125 on February 6-7.

A predicted planetary A index is 5 on January 11, 8 on January 12-13, 5 on January 14-19, 8 on January 20-21, 5 in January 22-25, 10 on January 26, 5 on January 27 through February 2, 8 on February 3-5, 5 on February 6-8, and 10 on February 9.

The forecast is from January 10, and the solar flux portion is identical to the same report on January 9. The A index portion is only slightly different on a couple of days, otherwise the same as Wednesday's forecast.

OK1HH has an updated geomagnetic activity forecast. He says to watch for quiet to unsettled conditions January 11-12, active to disturbed January 13, quiet to unsettled January 14, mostly quiet January 15, quiet to active January 16, quiet on January 17-19, mostly quiet January 20-21, quiet on January 22-25, mostly quiet January 26, quiet to active January 27, quiet January 28-29, mostly quiet January 30-31, and quiet again on February 1-2.

Howard Lester, N7SO of Schuylerville, New York recently saw his wire antennas go down in a big wind. The former inverted vee is now suspended two feet above ground at the feedpoint, and 12 feet above ground at each end. So it is now an actual upright V instead of an inverted vee. Howard was excited to see what he could work this week with the fast rising solar flux and sunspot numbers.

He wrote, "Mysteriously, the antenna system still loads with identical settings on my transmatch. So I decided to try transmitting, called a guy on SSB in Germany, and he came back to me with a nice signal report. Then a guy in Greece. And on 17 CW I broke through a little pileup to Iceland."

This was from January 9-10. On January 10 he wrote, "I made a couple of contacts on 15 SSB to Poland and to eastern Ukraine, both less than 1 hour after sunrise. They're all using giant antennas, so no wonder they hear me. It seems awfully early in the morning this time of year for 15, let alone 12, to be open, except that the flux is so high right now.

"I just worked OZ1ADL, Jan, in Galten, Denmark on 12 meter SSB. He gave me a 59 report, and was especially surprised after I described my antenna situation. But, HIS antenna is a 13-element log periodic at 100 feet."

With the fast-rising solar flux this week, it has been fun to examine the thrice daily readings from the observatory at Penticton, British Columbia.

Check ftp://ftp.geolab.nrcan.gc.ca/data/solar_flux/daily_flux_values/fluxtable.txt and look at the first column on the left for date, second column for time and the fifth column for observed solar flux. Daily readings are at 1800, 2000 and 2200 UTC, but the 2000 UTC reading (local noon) is the official solar flux number for the day.

Carl Luetzelschwab, K9LA of Indianapolis, Indiana has some observations on recent solar activity. Carl wrote, "The New Year welcomed us with a nice increase in solar activity. In the past several days I, along with many others, worked A45XR and A65BP (and others) in the late morning hours on 12m and 10m via long path to

the southwest from here in the Midwest. I even worked VU2XO on 10m SSB via long path (to the south) at 1638z on Friday January 4 - he was extremely weak but workable.

"These QSOs are good examples of low probability openings, and they were aided by the increased aforementioned solar activity. VOACAP predicts these openings (even at low solar activity), along with many other low probability paths. You just have to be there when they happen.

"Both ends of the path are looking toward the equatorial ionosphere, with the highest MUFs in the world (even at low solar activity). Our end of the path is in daylight, which of course is good for these higher band QSOs. The other end is past sunset, but not far enough past sunset to have the MUF decrease significantly - thank goodness the ionosphere recombines much slower after sunset than it ionizes at sunrise. And more than likely this wasn't conventional multi-hop - I suspect chordal hops that kept the losses down."

Thank you, Carl.

Several readers had comments about past solar cycles. Lou De Chiaro, WB2IJT of Lindenwold, New Jersey wrote, "I was fairly active on HF during the late 1960s when Cycle 20 peaked. At the time, my rig was a Heath SB-300 receiver and SB-400 transmitter running around 100 watts CW output. My largest HF antenna consisted of a rhombic that measured around 40 feet in the short dimension and about 300 feet in the long dimension. The best propagation results happened on 10 meters during the 1969-1970 period, and I both observed 20 dB/S9 signals and received equally glowing reports from several VK and ZL stations on both CW and SSB. My QTH at the time was in northern NJ. Since then, I have unfortunately not seen signals of comparable strength from 'down under,' though one always wants to remain hopeful."

Ken Bourke, N6UN of San Diego, California wrote, "I was born in 1940 and fit the age group that you talk about and the expectations we had. I enjoyed the current article about this age group as it moved thru the 11 year sunspot cycles and it is very accurate and true. No cycle compares to the 1958 one.

"We old QCWA hams always hope and think we will have another cycle like that 1958 one, but it never has happened. In 1958 I was 18 years old, in Illinois (W9ZVG, Extra Class), with 1 KW and a quad at 60 feet. But I even got bored working so many DX countries. I did not know I was experiencing a once in a lifetime event. 15 meters was also hot. I made a tape recording of the crowded 10 meter band on old tape at 7.5 ips.

"But I always thought the band would come back like that 1958 event every 11 years, but it never has come back like 1958. I still keep hoping and do think some cycle in the future will be even stronger,

with a higher daily 23 cm solar flux than our 110 or 120 today, like over 150 or 200 daily, solar flux which might occur with a big long term solar eruption and massive solar wind. I keep waiting for a lot of long term continuous solar activity."

Fortunately, solar flux this week is actually over 150, rising to 174 on January 10 and predicted at 175 on January 11-12.

Tom Gallagher, N6RA of San Francisco, California wrote, "I was one of the lucky ones to be on the air and hunting DX in the 50s. I'm now 70. I was licensed in 1955 as KN4DRO in Miami at the age of 12. I quickly got into DXing (having been an SWL DXer at the age of 10 and a BC band DXer at the age of 6 when my parents gave me my own little BC band radio). In 1958 I received DXCC #3698. I had about 210 countries when I went off to college in 1960 (I was actually the #9 DXer in the state of Florida with my puny station when I went off to college). I had a very modest station--50 watts on CW and AM (I had 140 countries on AM phone) with a 2 element quad at 30 feet. My experience during the various sunspot cycles was very much like you outlined. I had them all for a while, but missed South Sudan (haven't sent in the new PJ cards yet).

"6 meters has taken my interest in the last 13 years or so. There seem to be a lot of geezer HF DXers on 6! I had hopes of making DXCC on 6, but it's harder than I ever envisioned from the West Coast and the sunspots don't seem to be cooperating. I do have some juicy DX on 6 from 2001, such as Z22JE, ZD7, 3W, DU, VR2, etc."

Before closing, check out a couple of interesting articles about solar activity at http://earthsky.org/space/nasas-three-minute-solar-cycle-primer and http://earthsky.org/space/frank-hill-sees-future-sunspot-drop-no-new-ice-age.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

New SSTV Contest:

Posted: 11 Jan 2013 02:48 AM PST
http://www.eham.net/articles/29622

The Contest, organized by the World Slow-Scan Television Club, will be held in the 15-meter amateur band only and the recommended modes are the fastest B/W or Robot modes, namely Robot 8, Robot 12 or Robot 24. These modes enable the contester to make a QSO in as short a time as possible: this should introduce a bit of spice to the competition. Contesters who do not have these modes may be encouraged to try them out, but in fact any analog SSTV mode would be acceptable in the Contest. Just be aware that the slower the mode a contester uses, the fewer QSOs he/she may be able to make during the Contest, hi.

Thornton Students Set to Correspond with Astronauts:

Posted: 11 Jan 2013 02:35 AM PST
http://www.eham.net/articles/29621

Students at Thornton Middle School will give new meaning to a "long-distance call" later this month, when they communicate with International Space Station crew members through the Amateur Radio on the International Space Station (ARISS) program. A combined effort of NASA, the American Radio Relay League (ARRL) the Radio Amateur Satellite Corporation (AMSAT), ARISS organizes scheduled contacts via amateur (ham) radio between astronauts aboard the International Space Station (ISS) and classrooms and communities.

//
Amateur Radio Festival Hamfest Comes Home to Shelby, NC:

Posted: 11 Jan 2013 02:33 AM PST
http://www.eham.net/articles/29620

SHELBY, N.C. -- The Shelby Hamfest is back. After five years of being held in Dallas, N.C., the amateur radio festival will return to the Cleveland County Fairgrounds during Labor Day weekend. "We are just tickled pink," said Cleveland County Fairgrounds Manager Calvin Hastings. "We are very excited about it returning to the county for the community. People come from all over the United States and will bring in a lot of revenue to the county." The Hamfest is the oldest and one of the largest gathering of

amateur radio operators in the United States, O. Max Gardner III, legal representative of the Cleveland County Fair, wrote on The Star's Facebook page. "I can confirm that the Fair has signed an agreement with this group to return the event to Cleveland County during the Labor Day weekend for 2013 and thereafter," Gardner wrote. "The Fair is grateful for the confidence the group has shown by agreeing to return. The annual Hamfest will bring thousands of consumers to Cleveland County and will have a major economic impact."

Amateur Radio, Morse Code Useful Yet Today:

Posted: 11 Jan 2013 02:31 AM PST
http://www.eham.net/articles/29619

WHITEWATER -- At first blush, it might seem quaintly antiquated to hear that ham radio and Morse code still have enthusiasts in the 21st Century, what with all the smartphones and Internet-enabled tablets available. However, you can bet your nearest copper wire that not only do ham radio and Morse code adherents still have a place in modern society, but they actually are making it a safer place for all of us, especially in emergency situations and during severe weather outbreaks. That was the primary message being sent during the third annual Kid's Day of the American Radio Relay League (ARRL), which took place Sunday in Whitewater's Cravath Lakefront Building. Although popularly called "ham radio," it officially is "amateur radio," which separates it from commercial broadcasting stations. Several local amateur radio clubs were on hand to assist with Kid's Day Sunday, including the Tri-County Amateur Radio Club, Lake Area Amateur Radio Club, Walworth County Emergency Management, Milwaukee Area Skywarn Association (MASA) and the Jefferson County Amateur Radio Emergency Services (JefCARES).

SARL NEWS SUNDAY 13 January 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

SA AMSAT ACCELERATING THE KLETSkous CUBESAT PROJECT

NOMINATION OF COUNCILLORS

THE PEARS NATIONAL VHF/UHF CONTEST THIS COMING WEEKEND

HAMNET SERVICE IN WESTERN CAPE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SA AMSAT ACCELERATING THE KLETSkous CUBESAT PROJECT

SA AMSAT has decided to accelerate their CubeSat project, named KLETSkous and expect to have the first prototype version of the transponder and control system on the table for testing by end February. "One of the reasons to speed up development is the quest to have the transponder included as an experimental payload on the ARMC project." Hannes Coetzee, ZS6BZP, said. Jacques Roux, ZR1ADC, is working on the transponder while Brian McKenzie, ZS1BMN, is responsible for the control systems.

As part of South Africa's contribution to the African Resource and Environmental Management Constellation (ARMC) of satellites, SANSA, in collaboration with local industry and academic experts, have been in discussions on the specifications for the new satellite (ZA-ARMC1) and its associated benefits for South Africa and the continent. SA AMSAT is making representation to SANSA to have an amateur payload included in the project.

Deon Coetzee, ZR1DE, last year demonstrated a locally designed space frame. He is currently working on the second prototype.

SA AMSAT is in serious need of funding and appeals to radio amateurs to make a financial contribution. Full details are on www.amsatsa.org.za.

NOMINATION OF COUNCILLORS

The due date for nominating councilors and submitting motions, is 31 January. The SARL requests each affiliated club, to nominate one or more of its members as councillors.

A councillor must be nominated by an SARL member and and seconded by another SARL member. The nomination must be accompanied by a short amateur radio based CV as well as a signed statement by the nominee that he is willing to serve as a Councillor. Councillors should be experienced amateurs who can spend some hours per week on SARL business and can take part in council teleconference meetings.

The SARL makes extensive use of volunteers. Councillors and many other amateurs having special skills or experience, contribute their time and knowledge.

To operate effectively, many different skills are needed. At the moment it seems that there is a special need for a youth co-ordinator, for amateurs with website and database administration skills, for a forum administrator, an office manager to name but a few. There is also a need for more general skills.

Please send in your nominations now, there is no advantage in waiting until the last minute. Send nomination to secretary@sarl.org.za.

GET READY FOR THE YOUTH SPRINT ON 23 FEBRUARY

As reported over the past two weeks the SARL Youth Sprint will be held on 23 February and no longer on Youth Day on 16 June. The sprint is held 10:00 to 12:00 CAT with a special event starting at 09:00.

For the special event the SARL would like to put together an audio file of young Radio Amateurs voicing their opinions about amateur radio and why they became involved. The recordings will be done telephonically from mid-January to end January. To take part send an email with your name, call sign and telephone number to youth@sarl.org.za and you will be contacted to set up a recording date and time. All participants will go into a lucky draw for some great prizes including a 2012 ARRL Handbook and ARRL Basic Antenna. Do it today.

NOT A SARL MEMBER YET?

If you are not yet a SARL member you can now do so at only R240 covering the period from now until the end of June. This offer is only available to radio amateurs joining now or re-joining after more than a year of non-membership. The offer regretfully does not apply to members who have not yet paid their fees for the 2012/2013 year. For details visit www.sarl.org.za or call 011 6752393 on Monday. ADF GAINED R600 TO

REACH R28 850

Last week the SARL Antenna Defence Fund increased by R600 to R28 850, still some way from the R50 000 target. Thanks to all who have contributed. To see a list of donors and to find out how to add your name and donation, visit www.sarl.org.za and select Antenna Defence Fund from the left hand menu.

HAMNET SERVICE IN WESTERN CAPE Hamnet in the Western Cape volunteered its services to assist at the Lion's Club of Kirstenbosch's Ride for Sight and Sound Cycle Tour, starting and ending in Fishhoek on 6 Jan 2013, and we were privileged to be able to activate ZS9DCC for the first time, during the race. 8 Hamnet members assisted, on a beautiful clear morning, in shepherding 800 riders round a 50 km course, and there were no major incidents. Assisting were ZS1CU, ZU5DX/div1, ZS1PXK, ZS1SAM, ZS1BTD, ZS1JNT, ZS1BL and ZS1DFR. We are grateful to the SARL for letting us use the ZS9DCC callsign.

THE PEARS NATIONAL VHF/UHF CONTEST THIS COMING WEEKEND

The PEARS National VHF/UHF Contest is the only VHF contest that is scheduled during the summer and covers the best period of the year for country-wide VHF contacts as well as to the neighbouring states, when propagation conditions could also change during the two day period. The month of January always provided the best propagation on Tropo and Sporadic-E, so watch out for Namibia and Zimbabwe. Make it an enjoyable and exciting VHF weekend with many stations on the VHF bands and help to promote VHF operation in this country.

The first session of the contest commences on Friday 18 January at 18:00 CAT, and ends at 16:00 CAT on Saturday. The second session starts immediately at 16:01 CAT until Sunday 20 January 2013 at 14:00 CAT.

Some of the rules of the contest have been revised and log sheets simplified for the benefit of the participants. The complete rules have been posted on the SARL VHF Forum. Good luck with the contest!

PEAK PERIOD FOR SPORADIC-E OPENINGS Thanks to Mike Bosch, ZS2FM, for this item.

Sporadic-E clouds are patches of ionization that form in the E-layer during the summer months, drift from east to west, and make long distance VHF contacts possible. These strong openings on VHF may last only ten minutes or up to an hour or even longer with a skip distance of around 500 km on 50 MHz.

The best Sporadic-E contacts in South Africa and to Namibia were made on 50 MHz during the month of January, and one particular E opening between Port Elizabeth, Windhoek and Outjo almost lasted the whole afternoon. Unfortunately these openings are unpredictable and could appear anytime in the mornings or afternoons.

The old Band 1 TV FM sound channels in Zimbabwe and Zambia, on 53,750 MHz and 53,760 MHz respectively, have often been heard in Port Elizabeth at S9 plus around midday when Sporadic-E clouds appeared further north. Therefore, it is important to watch a distant VHF beacon, preferably on 50 MHz, and when you hear it call immediately on 50,200 MHz SSB. If you are not in the range of a suitable VHF beacon then monitor the 50,200 MHz SSB frequency with the squelch on and be alerted by someone who can copy the beacons. Recently the Cape Town VHF beacon, ZS1SIX, on 50,080 MHz has been heard several times during the afternoons via Sporadic-E propagation.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is on the rise after some periods of moderate activity. Big sunspot AR 1 654 is growing more active and is now crackling with M-class solar flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 121.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be frequent 10 m openings in the afternoon, especially on sunlit paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 13 January - Hunting Lions-in-the-Air still active. 15 January - Last day to provide feedback on the DRAFT NATIONAL RADIO FREQUENCY PLAN to sarlregwg@sarl.org.za. 18 - 20 January - PEARS National VHF/UHF contest. 26 January - SARL Summer QRP Contest 12:00 to 15:00 UTC. 31 January - Last day for submission of nominations for councilors for the next term and motions for the 2013 AGM. 31 January - Last day for submission of a brief outline of a proposed paper at the SA AMSAT Space Symposium on 18 May 2013 to saamsat@sarl.org.za. 23 February - SARL Youth Sprint 10:00 to 12:00 CAT with a special event starting at 09:00.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot

studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League
compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Australian given an AMSAT accolade

Posted: 12 Jan 2013 01:46 AM PST
http://forums.qrz.com/showthread.php?375465-Australian-given-an-AMSAT-accolade&goto=newpost

Australian given an AMSAT accolade

It was a very humble Tony Hutchisson VK5ZAI who received an
award from AMSAT North America for the voluntary work he has done for the
Amateur Radio on the International Space Station (ARISS) program.

In accepting the award, Tony VK5ZAI said it was a very nice
honour which made him feel humble.

"I look at it as a combined effort for all those that have
helped over the last 20 years because I couldn't have done it alone," he
said.

In praise of ARISS, Tony VK5ZAI said, "They're a great group to
work with and he has made many friends through it and amateur radio."

He is the Australian ARISS Coordinator and a Telebridge Earth
Station involved in many contacts between the ISS and schools.

The Channel 7 Today Tonight show interviewed Tony VK5ZAI in
early 2012, when he gave some great insights as to how Amateur Radio can
provide support for NASA, as well as raise public awareness through the
ARISS schools program.

The segment has been posted to YouTube and features as a prelude
to many Australian school contacts with the ISS.

Ham Radio Deluxe v6.0 Preview/Beta 2 .2

Posted: 11 Jan 2013 05:05 PM PST
http://forums.qrz.com/showthread.php?375428-Ham-Radio-Deluxe-v6-0-Preview-Beta-2-2&goto=newpost

HRD Software, LLC announces the release of Ham Radio Deluxe 6.0 Preview/Beta 2.2 This includes many fixes for issues the userbase has found. The list of the fixes and enhancements for Beta 2.2 is on the HRD website at http://www.ham-radio-deluxe.com.

The updated buglist is on the website as well as the updated Preview Version. For those that have purchased but not received their key, we ask them to check their junkmail folder, and if you still haven□t found your key, email Erin, KJ4MFO at key@hrdsoftwarellc.com.

Support for the Preview/Beta 2.2 is in a special category in the support forums. Support for the beta will be provided via the HRD forums, as many hams may run into the same issues and the solutions will be discussed in the forum. HRD will also provide email and support tickets for the 6.0 Preview/Beta 2. We will be closely monitoring the forums for any major issues resolving them as quickly as possible. The goal of the HRD Staff is to make the product defect free.

Version 6.x will has many new features including FSK support, a new QSL and awards tracking interface, improved cluster filters, label printing, and the Super Sweeper RTTY and PSK in Digital Master. Super Sweeper will allow multiple signals to be decoded in a single window.

Previews for Version 6.x are also provided on our YouTube channel: http://www.youtube.com/hrdsoftware

You can purchase and download the product at http://www.ham-radio-deluxe.com.

N3A - Presidential Inauguration Special Event Station: January 12-22, 2013

Posted: 11 Jan 2013 02:40 PM PST
http://forums.qrz.com/showthread.php?375417-N3A-Presidential-Inauguration-Special-Event-Station-January-12-22-2013&goto=newpost

The District of Columbia Amateur Radio Society, NW3DC, will be activating special event station N3A for the inauguration of Barack Obama on his second term as President of the United States.

We will be active from The District of Columbia, Maryland and Virginia from January 12 through January 22.

There is no fixed schedule, so please check the various sources (RBN, Clusters, etc.) for our activity.

Known schedules are:

CW: Monday-Wednesday and Friday nights (local time):

7.043 0200UTC-0230UTC

3.543 0230UTC-0300UTC

Digital Modes (PSK31, RTTY) days/evenings/nights (local time)

- known digital mode frequencies

SSB and RTTY randomly during the day. - modes check the packet clusters

If you have special requests, feel free to email them to Eric, W3DQ.

QSL via LoTW and "mailbox mail" (with SASE). We are looking into OQRS and eQSL.

Hope to see you on the air!

New SSTV Contest

Posted: 11 Jan 2013 09:58 AM PST
http://forums.qrz.com/showthread.php?375378-New-SSTV-Contest&goto=newpost

Hi,

I'd like to announce a new contest for SSTV, the WSSTVC 15-Meter SSTV Dash Contest, which will be held twice yearly - once in the Spring and once in the Fall.

The Contest, organized by the World Slow-Scan Television Club, will be held in the 15-meter amateur band only and the recommended modes are the fastest B/W or Robot modes, namely Robot 8, Robot 12 or Robot 24. These modes enable the contester to make a QSO in as short a time as possible: this should introduce a bit of spice to the competition. Contesters who do not have these modes may be encouraged to try them out, but in fact any analog SSTV mode would be acceptable in the Contest. Just be aware that the slower

the mode a contester uses, the fewer QSOs he/she may be able to make during the Contest, hi.

Contest periods are as follows:

Spring: first full weekend in April, from Saturday 00:00 UTC to Sunday 23:59 UTC

Fall: first full weekend in October, from Saturday 00:00 UTC to Sunday 23:59 UTC.

For 2013, the dates and times are:

Spring - Saturday April 6 00:00 UTC, to Sunday April 7 23:59 UTC

Fall - Saturday October 5 00:00 UTC, to Sunday October 6 23:59 UTC.

The Contest website is http://contests.wsstvc.org, and the Contest Rules are to be found at http://contests.wsstvc.org/rules.

If you intend to participate, you may wish to announce your forthcoming activity - go to http://contests.wsstvc.org/announce/form (the form will be activated 2 months before the start of the Contest); you can read others' announcements at http://contests.wsstvc.org/announce/list. There's also a Contest blog at http://contests.wsstvc.org/blog where you can post comments and keep up-to-date with Contest developments.

Thanks for your time and interest, hope to see you in the Contest.

73, Rob DM1CM

Tasmania Fires Update:

Posted: 12 Jan 2013 02:32 AM PST
http://www.eham.net/articles/29628

The major fires in south-east Tasmania, which began last Friday, continue to burn fanned by relentless hot and windy weather. WICEN Tasmania (South) Secretary, Roger Nichols VK7ARN said operators were at the Incident Management Team headquarters coordinating the fires on the Tasman Peninsula and in the Derwent Valley. There they helped to run the Tasmanian Fire Service communications using its 80MHz system, a communications role in which they are trained. Roger VK7ARN said there had been power and communications outages caused by the blazes. Crews are working in safe areas to restore power and communications, although he said WICEN had offered to link the Eaglehawk Neck and Port Arthur areas.

Ham Radio Enthusiasts Keeping Old Technology Alive:

Posted: 12 Jan 2013 02:31 AM PST
http://www.eham.net/articles/29627

Some ham radio enthusiasts in Winnipeg are sticking with an "original" form of wireless technology, despite the popularity of Twitter and text messages these days. Amateur radio operators like Adam Romanchuk say the newer technologies, like Wi-Fi and cellphone networks, may be more user-friendly, but they haven't really improved on the reach and reliability of a good radio.

//
Propagation Forecast Bulletin #02 de K7RA:

Posted: 11 Jan 2013 09:43 AM PST
http://www.eham.net/articles/29626

After last week's somewhat downbeat look at sunspot cycles, current, past and future, we sure have some great activity to report this week. The average daily sunspot number more than doubled in the past week, rising nearly 93 points to 163.3. Average daily solar flux was up more than 37 points to 147.7. On top of that, the geomagnetic conditions were very quiet, which is a wonderful combination, not often seen in more active solar cycles.

//
N3A Inauguraion Special Event:

Posted: 11 Jan 2013 09:44 AM PST
http://www.eham.net/articles/29623

The District of Columbia Amateur Radio Society, NW3DC, will be activating special event station N3A for the inauguration of Barack Obama on his second term as President of the United States.

119. [RAC-Bulletin] LCARC, RAC Affiliated Club to Host ARISS contact

LCARC, RAC Affiliated Club to Host ARISS contact
2013-01-09

The Loyalist City Amateur Radio Club of Saint John, NB along with St. Rose Elementary School will host an ARISS contact on Thursday, Jan 17th at 1340 Z.

Greg D'Entremont, VE9GFI and Peter Campbell, VE9PTR lead this project with much support from the teachers and staff of the school, plus members of LCARC in setting up the equipment for the contact. Thanks also to ARISS mentor Wayne Harasimovitch, VE1WPH, for his usual support in preparation on this project.

Students have been selected, have their questions ready for Commander Hadfield and are excited to have this opportunity to talk to the International Space Station via Amateur Radio.

Live streaming video will be available at the following link from approximately 8 AM on Jan 17th: http://live.streamit.ca/?playerf

Stay tuned to LCARC web site: http://www.lcarc.ca/ for any changes or updates.

NZART Headquarters Infoline Special Issue 36s

13 January 2013

NZART Website: www.nzart.org.nz

Roy Symon ZL2KH Silent Key

It is with much regret that we inform you that Roy passed away on the 10th of January. Roy served as an NZART Councillor from 2003 to 2009 and as NZART President from 2009 to 2012.

Roy’s death notice reads:

SYMON, David Roy (Roy). Sadly passed away on 10 January 2013, aged 74 years. Loving and cherished husband of Jill for 53 years. Beloved father and father in law of Murray and Debbie, Bob and Janet, Vicki and Andrew, Brenda, and Jay. Much loved Grandad and best friend of Daniel and Belle, Amanda, Brittany; Charlie and George; Catherine and Olivia, and James. Great-grandad of Ollie. Brother of Valerie, and Shirley. NZART Past President ZL2KH. "We loved you dearly and you loved us back - miss you - kiss you" A service for Roy will be held at Knox Presbyterian Church, Fitzroy, New Plymouth, on Wednesday 16 January at 11:00am. Private Cremation. Abraham's Funeral Home www.wabraham.co.nz New Plymouth

The location of the Knox Church: 524 Devon street East, New Plymouth.

NZART Council

Next NZART Official Broadcast is on Sunday 24th February 2013. Next HQ-Infoline e-mailed on FRIDAY 18th January 2013. Closing date for this is Thursday 17th January 2013.

You have received this message because you are subscribed on an NZART infoline list.

HAMFEST INDIA 2013

Posted: 11 Jan 2013 11:08 PM PST
http://forums.qrz.com/showthread.php?375461-HAMFEST-INDIA-2013&goto=newpost

HAMFEST INDIA 2013 will be hosted in Gwalior on 21 - 22 September 2013.

HAMFEST is one of the biggest event
usually hosted once in a year. Unfortunately it is not hosted in NORTH
India till today and this is for the first time, GWALIOR got the
opportunity to host it in year 2013.

HAMFEST is studded with technical
lectures on latest topics like satellite communication, software design
radio, antennas, etc. It also has live demonstration of HAM Radio

Operation, workshops on different topics, stalls having wireless
communication equipment

. We expect about 1000 delegates from all the
corner of India as well as from nearby countries. It requires 2 and half
day to complete this HAMFEST 2013.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2012 DX SOUND BITES! Tom, K8CX, has done it again. He has provided DXers with 135 memorable DX sound clips from 2012. Visit Tom's famous "HAM GALLERY" Web at: http://hamgallery.com/dx2012

While there also check out some of his other features on his Web page, such as: 15 years of "Rare DX Sound Clips" of the past (as well as some clips from the 1960's and 1970's), QSL Card Museum, Dayton Photo Galleries and Tribute to Silent Key Ham Operators. Tom states, "If anyone has any old HF recordings, I would be interested in hearing from them."

5B, CYPRUS. Roman, UR0MC, will be active as 5B/UW2M during the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/High-Power entry. QSL via US0LW.

9M4, SPRATLY ISLANDS. Operators John/9M6XRO, Steve/9M6DXX, James/9V1YC, Ben/DJ0YI/N6MUF, Don/G3BJ, Christian/EA3NT and Tony/KM0O will be active as 9M4SLL from Layang-Layang Island (AS-051) between March 10-18th. Activity will be on 160-10 meters using CW, SSB and RTTY. They will have several stations on the air with amplifiers into vertical antennas all within a few meters of the ocean. QSL Manager for this operation is Tim, M0URX (OQRS, direct, by the Bureau, LoTW). Logs will be uploaded to LoTW as quickly as possible after the DXpedition. More details will be forth-coming.

AAW NEWS (How may I register my station for 10th AAW?). Gianni, I1HYW, reports: "Next month, February, will start the 10th Antarctic Activity Week; here below there is a brief explanation on how to join the Antarctica Activity Week (see <www.waponline.it>). To enter the AAW, it's necessary to get a special callsign (not the home call) issued to celebrate the event, (just for example I have requested as every year, my IR1ANT call issued by the Ministry of Communication of my Country for the AAW event). In alternative, one can use his home callsign adding /AAW, or /ANT, or /WAP, or /A which stands for Antarctica to any special event callsign will be given a WAP reference number to be used during the event. I don't know the law/rules of foreign countries, but the applicant should get in any case an authorization to eventually use his own callsign /ANT or /A etc.... , since just a pure own call is not a special event call, but a classic home call which could not be given a WAP reference number. Participation is open and hunters can try to contact as many as AAW SES which WAP reference number can be used when applying for WAP Antarctic Awards according to the Award's rules. The list of participants already registered for the 10th AAW is available at WAP Web site at: http://www.waponline.it/Default.aspx?tabid3 "

C6, BAHAMAS. Operators George/W4BUW (C6AGH), Joe/W8GEX (C6DX), Janet/W8CAA and Joe/AA4NN will be active adjacent to the ocean on Great Exuma Island (NA-001), Bahamas, between January 20-27th. Activity will be on 160-10 meters using CW, SSB and RTTY, with three stations on the air. QSL C6AGH via W4BUW and C6DX via W8GEX.

C6, BAHAMAS. George, KQ8Z/GM0IIO, will once again be active as C6AZZ from Grand Bahama Island (NA-080, WLOTA 0527, WW Loc. FL06UO). This time it will be for the ARRL DX CW Contest (February 16-17th) and the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/Single-Band (20m)/Low-Power entries. He states that he will be on other bands for a few

days before and after the contests. If like last time, activity will focus on 6 meters (CW, SSB, FM) if there are any band openings, otherwise on 80-10 meters, mainly CW with some SSB using his Icom 756 Pro3. George will use a 80m OCFD antenna at 40 feet. The 20m antenna will be a full sized 20m delta loop right on the beach vertically polarized with the apex at 40 feet. QSL via KQ8Z.

CQ NEWS (CQ Facebook "Fans" Top 10,000). Richard, W2VU, Editor of CQ Amateur Radio, reports on January 9th: "CQ Facebook 'Fans' Top 10,000 Mark - Nearly Half Under Age 45 -- As 2013 began, the number of 'likes' on the CQ Facebook page exceeded 10,000 for the first time. These fans of CQ continue to represent a considerably younger group of ham radio operators than organized ham radio has been reaching through traditional means. CQ has had a page on Facebook since 2010, and the demographics of its fans have remained consistent even at the numbers have grown. 'Over 46% of CQ's Facebook fans are under age 45,' said CQ Editor Rich Moseson, W2VU. 'In addition, fully three-quarters are under age 55 and 20% are under age 35. This is continued proof that there is a significantly higher number of younger hams 'out there' than we commonly see at club meetings and hamfests. It also shows that reaching these younger hams requires 'meeting them on their turf'.'
Facebook statistics show that CQ's fans are drawn from all over the world, with some 20 countries represented and members in the U.S. accounting for fewer than half of the total. CQ's Facebook page may be found at < https://www.facebook.com/CQMag>.
CQ Amateur Radio magazine < www.cq-amateur-radio.com> is the world's leading independent amateur radio publication, with print and digital edition readers in over 100 countries. CQ sponsors more than a dozen amateur radio contests and operating awards, including the world's most popular participation sport, the CQ World Wide DX Contest.
CQ is a publication of CQ Communications, Inc., which also publishes Popular Communications < www.popular-communications.com>, CQ VHF <www.cq-vhf.com> and WorldRadio Online < www.worldradiomagazine.com> magazines. In addition, Spanish and Portuguese versions of CQ are published in Spain and Brazil, respectively."

The 2013 Contest Dinner tickets are on sale now exclusively via the Contest Dinner Web site. Thanks to Scott, KA9FOX, and QTH.com for designing, building and running the Contest Dinner Web site: http://contestdinner.com
Master of Ceremonies for the Dayton Contest Dinner is CQ Contest Hall of Fame member and World Wide Radio Operators Foundation (WWROF) Chairman, John Dorr, K1AR. Dr. Robert G. Cox, K3EST will be our featured speaker.
The Contest Dinner will be held on Saturday night, May 18th, at 6:30 PM. Cash bar opens at 5:30 PM. Located at the newly renovated Crowne Plaza Hotel (Official Contester Hotel) 5th and Jefferson Streets

(Next to the Dayton Convention Center) Dayton (Downtown), Ohio in the
PRESIDENTIAL BALLROOM on the second floor.
Seating is random. Tables are set in rounds of 10. You can purchase
an entire table for your club or group (purchased group tables are
set for 8).
Tickets are only available at: http://contestdinner.com
There will be no tickets for sale at the door.
Also remember to visit the 25th annual Contest Super Suite (all FOUR
nights during Dayton) - details are here: http://contestsupersuite.com
We expect another sold out event for the Dayton Contest dinner. Get
your tickets early!"

* Dayton Contest University - Tim, K3LR, CTU Chairman, reports [edited]:
"I am pleased to announce that early bird registration (lowest fee)
is now open for 2013 Dayton ConTest University ('CTU') to be held
all day on Thursday May 16, 2013, at the Crowne Plaza in Dayton, Ohio.
Six different countries have hosted CTUs. USA, Germany, Italy,
England, Brazil and Finland. CTU Australia will be held in a few weeks.
Nearly 2000 students have attended CTUs with more than 60 CTU Professors
sharing their contesting experiences.
2013 will be the seventh year in a row for CTU Dayton. The 2013
suggested CTU topics are listed on the CTU web site at:
http://contestuniversity.com
The 2013 CTU Professor line up is outstanding. New 2013 CTU Professors
are - K5GN, N0JK, K9YC, K3EST and K6MM. Also past CTU Professors - who
will give new papers this year are W3LPL, K1DG, W0YK, NC0B, N6TV, K5ZD,
M0DXR and K3LR.
Details and early bird discounted registration information is on
the CTU web site at: http://contestuniversity.com
Important - as we did last year - if you want to sign up for CTU
2013 Dayton and you have given (or will give by Dayton 2013) a talk
about Amateur Radio Contesting to any club, hamfest or group since
May 20, 2012 - you qualify for a 10.00 USDs registration fee discount.
Please choose the 'Registration w/Discount' option to get the 10.00
USDs discount. Spreading the word about contesting is lots of fun and
can save you money!
Early CTU student signups will have the opportunity to help select
the 2013 Dayton CTU class outline topics. For a limited time, once
you have registered, please help construct the CTU curriculum content
by going to this survey link: http://www.surveymonkey.com/s/8XZG5NS
Thanks to all of the CTU sponsors Icom America, Superbertha.com, DX
Engineering, CQ Magazine and INRAD for making CTU possible. Thanks to
W9PA and K1SO for all of their help with CTU. Special thanks to Scott,
KA9FOX from QTH.com for hosting and constructing the CTU web site."

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting
the following operation for DXCC credit:
3D2C • Conway Reef; 2012 Operation
If you had cards previously rejected for this operation please send an
E-mail to <bmoore@arrl.org> to be put on the list for an update.

DX MARATHON (Update). John, K9EL, CQ DX Marathon Manager, reports [edited]:
"The 2012 DX Marathon ended at 0000z January 1, 2013, and the 2013 Marathon began immediately! Yes, everyone's country and zone count reset to Zero and the race for the most countries and CQ zones for 2013 is underway.
Everyone can participate in the Marathon – details and complete rules are
available at: http://www.dxmarathon.com
The deadline for submission of 2012 logs is January 31, 2013. We know an earlier date was published, so the date was extended to avoid any confusion. Next year's deadline will be January 10, 2014.
To submit your score, use the latest Marathon Score Sheet (2012.5) that can be downloaded from the DX Marathon website. If you use computer logging, see the website for links to tools that simplify the submission process. Please note if you are using the ADIF to DX Marathon tool created by Jim, AD1C, make sure you are using the latest version. The tool changes each year in response to DX Marathon changes.
Double-check your submission for errors, making sure all information is filled out at the top of the form, BAND data was used instead of frequencies and MODE is either CW, Phone or Digital. SSB is also accepted.
If you are entering in Formula Class, be sure to include a detailed description of your antenna. And don't forget to add your comments on the Marathon at the end of the form.
The Marathon offers special awards for single mode and single band submissions. Simply enter only QSOs for a particular band or mode and the computer will classify your submission accordingly.
The DX Marathon website offers additional information on pirates and other helpful hints. If you have questions, feel free to contact me at:
john@dxmarathon.com
Once your submission has been computer validated for all required information and proper formatting, your callsign will be listed on the received logs page on the DX Marathon website.
High claimed scores will be published in February and the complete results of the 2012 Marathon will be in the June 2013 issue of CQ Magazine."

DX SURVEY RESULTS (DX Magazine's 2012 Most Wanted Countries Survey).
DX Magazine's has published their Most Wanted Countries. Here are the "Top 20" (in the World-Wide "Weighted" Rankings Mixed Modes) as per DX Magazine (Jan./Feb. issue):

2012 Rank	2011 Prefix	2012 Country	2011 Rank	2012 Rank	2011 Prefix	2011 Country	2012 Rank
1	P5	North Korea	1	11	PY0S	St. Peter and Paul	16
2	KP1	Navassa Island	2	12	KH5K	Kingman Reef	18
3	3Y/B	Bouvet	3	13	ZL9	Auckland/Campbell	15
4	FT5Z	Amsterdam	6	14	KH5	Palmyra	17
5	VK0/H	Heard Island	4	15	SV/A	Mount Athos	14
6	FT5/W	Crozet	7	16	E3	Eritrea	24
7	BS7H	Scarborough	8	17	BV9P	Pratas Island	21
8	VP8/S	South Sandwich	9	18	FR/JE	Juan de Nova/Europa	20
9	ZS8	Marion Island	10	19	VP8/G	South Georgia	22

10 FT5T Tromelin Island 13 20 KH3 Johnston Island 23

The "Top 100" is on the DX Publishing, Inc. Web site at:
http://www.dxpub.net/MOST-WANTED-SURVEY.html

EY, TAJIKISTAN. Nodir, EY8MM, from Dushanbe, will be active during the CQ 160 Meter CW Contest (January 25-27th) as a Single-Op entry. QSL K1BV via direct, by the Bureau or LoTW. Check out his home page at:
http://www.ey8mm.com

FR, REUNION ISLAND. Operator Pierre/F8APV will once again return to Reunion Island (AF-016) this time with St�phane/F8EOI and be active as FR/F8APV and FR/F8EOI between January 21st and February 8th. Activity will be active on 40-10 meters, using a Buddipole antenna system (longer than standard with telescopic long whip) and with a focus on 30 meters CW and 20 meters SSB. QSL via their home callsigns. ADDED NOTE: Pierre will accept skeds at: pierre.goasguen.f8apv@gmail.com

FY, FRENCH GUYANA. Marc, F1HAR, will be active as FY5KE in the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/Single-Band (15m)/High-Power entry. QSL via LoTW, by the REF Bureau or direct to FY5KE.

GB6, ENGLAND (Special Event). Operator Herbie/G6XOU and friends will be operating as GB6WLB between January 19-27th, as part of the RNLI SOS Radio week. They will operate on most HF bands from Walton on the Naze, in Essex, England. (EU-005, WAB TM22, Loc. JO01PU). Herbie is a keen PSK operator, and this call has been registered as EPC #19125. QSL via G6XOU - please see QRZ.com for details. All logs will be uploaded to eQSL.cc. Event details are on the Web site at <www.sosradioweek.org.uk>.

IOTA NEWS.....
EU-145. Operators Colin/G3VCQ, Andy/M0GAV and Sharon/M3VCQ will be active as CT7ACG (callsign pending) from Culatra Island (DIA Ai-01, DIP AL-001, PIP ST-019, WLOTA 0144) between July 26-29th. Activity will include an entry in the RSGB IOTA Contest (July 27-28th). Outside of the contest, look for the team members to be active on all bands and modes. QSL direct or by the Bureau to CT7ACG. Look for updates at:
http://www.sheffield-live.co.uk

NA-143. Joe, K5KUA, will once again activate Galveston Island (USI TX001S, Galveston county, Texas) between January 18-21st. Activity will be CW only on 40-10 meters, mainly 40/20m as conditions and time permits. QSL via K5KUA, direct or by the Bureau.

SA-050. Jose, CE8DMT, is now active from Puerto Williams on Navarino Island. His length of stay is unknown at this time. Activity has been on 40 and 15 meters SSB. QSL via his home callsign.

SA-096. (A CALL FOR HELP/Donations) Lutz, DK8UH, Secretary & QSL Manager of GDXF, informs OPDX readers [edited]: "The GDXF has supported the LU6W DXpedition, which a short time ago activated

the South American IOTA group SA-096 for the first time ever.
The experienced crew with Cezar/VE3LYC, Johan/PA3EXX, as well
as members of the Radio Club Puerto Madryn, experienced consider-
able difficulties on the island of Escondida. Both a team and
a boat crew member were so severely injured, that an immediate
return was required for medical attention. Items already off-
loaded had to be immediately secured and left on the island,
but were then lost to the heavy seas. This loss of several
radios, antennas, a laptop and other equipment has hit the
team hard financially. Further details can be read at:
http://lu8w.yosalite.com
The GDXF requests anyone who wishes to help to please donate
to the LU6W team. All received donations will be forwarded and
a list for accountability purposes will be published. For
donations from outside of Germany:
PayPal - schmadel@ari.uni-heidelberg.de
Or for direct transfer:
Account holder: GDXF c/o Schmadel
Bank: Volksbank Neckartal eG
BIC: GENODE61NGD
IBAN: DE116729170000262036 00 "

J3, GRENADA. Bob, G3PJT, will be active as J34G from Grenada (NA-024,
WLOTA 0718) between March 5-20th. Activity will probably be holiday style
using a K2 w/100 watts and vertical antennas. He plans to also be in the
RSGB's 75th Commonwealth Contest (March 9-10th). Look for him outside of
the contest, especially on 80 and 30 meters. QSL via his home callsign.

J7, DOMINICA. Operators Bernie/W3UR (Editor of "The Daily DX") and his
father Tony/N3ME will be active from Dominica (NA-101) between the end
of January and early February. Their schedule and callsigns are as
follows: J77A - Operator Bernie; between January 22nd-February 1st
J76A - Operator Tony; between January 22nd-February 11th
ADDED NOTE: Their special prefixes represent the year they
received their amateur radio license (1976 and 1977).
Activity will be during their spare time and on 160-6 meters using CW,
SSB and RTTY. QSL via their home callsigns, direct or by the Bureau
or LoTW.

JD1, MINAMI TORISHIMA. Take, JG8NQJ, will once again be active as JG8NQJ/JD1
from Marcus Island in the Minami Torishima (OC-073) group starting January
15th. He is there to work on the island's weather station and will stay
until mid-April. Activity will be mainly on 17/15/12/10 meters CW. QSL
via his home callsign, by the Bureau or direct to JA8CJY: Susumu 'Sin'
Sanada, 5-17, 5-4, Shin-Ei, Toyohira, Sapporo 004, Japan. Online log is
available at: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

OH0, ALAND ISLAND. Operators Juha/OH1JT, Ari/OH5DX and Tomi/OH6EI will
be active as OH0Z during the CQ 160 Meter CW Contest (January 25-27th)
as a Multi-Single entry. QSL via W0MM.

P2, PAPUA NEW GUINEA (Update). Nao, JA2VQP, who has been in PNG since
September 26, 2012, and will be there for the next two years, informs
OPDX of the following update. He is a volunteer of JICA (Japanese ODA)
teaching mathematics at the Divine Word University in Wewak, East Sepic
Province (north coast of PNG main land). He states that he has received
a full PNG license, P29NO, thanks to some advice by Renzo, P29FR. Nao,
states, "Recently, I brought my FT-857 and a antenna tuner from Japan.
There is wide space to build up antennas, but I have no materials. I
would like to start with a long wire. I would appreciate if anyone could
send me materials to make antennas. Blacking out is very frequent, and
the internet condition is really bad. I've not decided the QSL Manager
yet. I have applied for the LoTW. I'll be in Port Moresby, the capital
city of PNG, starting Jan. 19th, and stay for a week. Then I'll be able
to get other things there. I will try to be active at Wewak by the end
of this month, maybe. I can operate CW, SSB and RTTY. I am thinking of
other modes." So begin looking for P29NO in the coming months. Watch
QRZ.com for updates.

PW7, BRAZIL (Special Event). Look for members of the Natal Digital Group
<http://natal-digital-group.blogspot.com.br> to activate special event
station PW7F between January 18-20th. Activity is to celebrate the 413th
anniversary of "Fortaleza dos Reis Magos" or also known as "Forte dos Reis
Magos", located in the city of Natal, state of Rio Grande do Norte, BRAZIL.
See QRZ.com for some pictures. Operations will be on 160-10 meters using
CW, SSB and the Digital modes. Operators mentioned are Ed/PS7DX, Nazareno/
PS7NN, Mac/PS7GL, Carlos/PS7KC and Nat/PS7HD. QSL Manager is PS7HD.

CORRECT QSL ROUTE FOR V25A. Please take note that the current V25A QSL Manager is NOT W9NJB. The V25A callsign has been reassigned to KG2A in 2012, and he apparently only responds to direct QSL requests. W9NJB cannot handle these cards for 2012 and after.

POSTAL INCREASE (Italy). Gianni, I1HYW, informs OPDX that in 2013 an increase in Postal rate has reached a huge amount! He states, "Just to inform DXers of the new postal rate in force since Jan. 1st, 2013, in Italy. Within Italy the rate goes from 0.60 to 0.70 cents, within Europe, from 0.75 to 0.85 cents. From Italy to North & South America, Africa & Asia, the rate goes from 1.60 Euro to 2.00 Euro. From Italy to Australia & Oceania from 2.00 Euro to 2.50 Euro. The USDs is trading in Italy to the value of 1 Euro ?.3056 USD or 1 USD ?.7659 Euro; that means it is necessary for 3 USDs to cover postal expense to deliver a letter to North & South America, Africa & Asia and 4 USDs to Australia & Oceania. It?s embarrassing to say that, but this is unfortunately, the situation that affects not only this country but I think, the entire globe. As QSL Manager of quite a few different foreign callsigns, I am therefore sorry to say that if there isn't a sufficient postal coverage, I can't deliver your QSL cards direct, nor put them in the bureau as for that, I should pay an extra costs (ARI asks about 35 USD/year for each different foreign callsign managed by the Italian bureau). I trust, in your understanding, and I suggest eventually to join your friends and send a cumulative requests in one envelope to share the costs (at least when you QSL through I1HYW)."

LOTW UPDATE. The ARRL's Web page and Letter report: "The processing queue for Logbook of The World (LoTW) -- the ARRL's online log processing system -- has been shrinking steadily since Monday, January 7th, when the system was brought back online after the completion of previously announced maintenance involving the installation of a new database server equipped with solid state drives (SSDs). Since then, the system has been stable and, as expected, the SSDs are proving to be much faster. As of January 9th, the delay between a file being uploaded and processed is about 8 days and is dropping by one day approximately every 10 hours."

TIME TO UPDATE YOUR GS-IRC CHART. Bill, W9OL, states that this is the 15th year for his GS/IRC Chart and it's time to update the information/ data again. (U.S. Postage rates increase effective January 27, 2013) Bill states, "Please take a look at the GS-IRC Chart and let me know of any changes in postage for the country YOU reside in. There is a lot of OLD data that I have NOT received updates on. If you live in or have a friend who resides in these missing countries, please elicit his help in obtaining the new information."
The current chart resides at:
http://www.qsl.net/w9ol/IRC_Chart.htm
If you wish to download the whole file, go to:
http://www.qsl.net/w9ol/IRC_Chart.xls

QSL RECEIVED VIA LoTW: 5T0SP,5V7TH, 5W1SA, 7P8D, 8R1PY, C6AKQ, CT1JOP, FM/S35R, H7/AJ9C, HR2/NP3J, IQ3UD, J6/N7QT, JR1GMK, P40W, PJ2/K2PLF, PJ4D, RI1ANF, T77C, TG9IDX, TO9R, V31MW, V31YK, V73CW, VE3RZ and WP3A

QSLS RECEIVED VIA MAIL: 3V8BB, 5V7TH, 7Z7AB, 9Y4LAS, A45XR, C5A, C50C, C6AUM, C6AZZ, E51AIU, EL2A, EL2DT, KH2/N2NL, LZ1ANA, P29NI, P29VPB, P29VCX, TF/VE3IKV, V63PR, VU3BPZ/mm and WA4DAN/CY0

QSLS RECEIVED VIA THE BUREAU: 5R8IC, 5R8X, 6O3A, 7X2ARA, 9K2/SP4R, 9M2/SQ9UM, 9M4SLL, 9M8DX/2, 9V1VV, 9V1WW, 9V40VV, 8R1PY, 9X0TL, BD1BYV, BV2WR, BW1/VR2RR, BX2AJ, BX2AN, CE0Y/LA5UF, DA2MORSE, E51MAN, EA9/G3TXF, FM/AI5P, HF36POL, HL5BLF, HR9/AI5P, J5NAR, KH8/AI5P, LZ20HR, LZ907SKB, LZ1363PTT, MU/F5CWU, PJ5/SP6EQZ, PJ5/SP6IXF, T2XG, T6MB, T8XO, TA2DA, TC4X, TO5T, TO8A, TX4T, TX6T/P, V5/DK1CE, VP2MXF, VP6T, XF3LH, XX9TTR, YB26SEAG, YB0DJ, YB0NDT, ZD8XF and ZX8C

ST, SUDAN. Lourens, ZS6AKB, is currently active as ST2/ZS6AKB when mobile in the Darfur region of Sudan. The length of his stay is not known, but he was heard on 20 meters January 10th - between 1600-1640z on 14181 kHz. He used a FT857 with a Tarrheel 11 antenna. Lourens normally lives in a small suburb (Eastvale) of a town called Springs approximately 70 Km east of Johannesburg.

SU, EGYPT. Gerd, DJ5IW, will once again be active as SU/DJ5IW from El Fardous between January 14th and February 8th. Activity will be limited to his spare time and mainly on 40/20/17/15/12/10 meters CW only using a IC-756 PRO with 100 watts. There will be no 80m, 30m and RTTY because it is not allowed in Egypt. QSL via his home callsign.

TO1, FRENCH GUYANA. Herve, F5HRY, will be active as TO1A in the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/Single-Band (10m)/High-Power entry. QSL via LoTW.

TRIATHLON DX CONTEST. Kostas, SV1DPI, Triathlon DX Contest's Manager, is inviting everyone to participate in the "1st Triathlon DX Contest". The Triathlon will take place the first full weekend of February every year. This year it will be on Saturday, February 2nd. Kostas states, "We are trying to simulate the original Triathlon athletic event. So we involved 3 major ham radio modes, RTTY, SSB and CW. It will be a 24 hour non-stop event divided in 3 sections, each one devoted to a different mode.

We start at 0000z on Saturday, February 2nd, with RTTY until 0759z.
After that we continue from 0800z with SSB until 1559z, and finally there
is the CW part starting at 1600z until 2359z. The exchange is simple;
just 59(9) and serial number... Multipliers are the DXCC entities in
every mode and band plus the number of different Greek stations you will
work during the entire contest. There are simple mode categories and
mixed mode as well. Also you can make your own teams and participate in
team contesting also. The best of all is that the winner will get a
wonderful prize: 10 days all paid for 2 persons in Zakynthos Island
(EU-052) in Greece, offer of Xenos Hotels Group. You can find more info
as well as the complete rules in several languages at:
http://www.triathlon-dx-contest.gr
We are looking for your participation...
73... de Triathlon-DX-Contest team <dxtriathlon@gmail.com>"

VK9C, LORD HOWE ISLAND. Tomas, VK2CCC (aka LY1F), will once again be
active as VK9LL between September 22-29th. Activity will be limited to
his spare time with a focus on 160/80 meters. QSL via LoTW, and by the
Bureau or direct via VK2CCC. For updates and possibly more details,
watch the following Web pages: http://www.qrz.com/db/VK9LL
(Web page from his 2010 operation) http://www.qrz.lt/ly1df/vk9clh.htm

XV, VIETNAM (IOTA Op!). Just a reminder that operators Sei/JA7LU and
Hiroo/JA2VWG will be active as XV4LU and XV4DDD, respectively, from Phu
Quoc Island (AS-128) between January 12-16th (2013). Activity will be on
40/20/17/15/12/10 meters using SSB and RTTY. See QRZ.com for details on
QSL information.

YN, NICARAGUA. Scott, K7ZO, will once again be active as YN5ZO during
the ARRL DX SSB Contest (March 2-3nd) as a Single-Op/All-Band entry.
He usually operates "Field Day Style" using a 5 band Spiderbeam and
40m dipole on a push up mast. The radio is a TS-590 driving a KPA-500
amp. QSL via LoTW and K7ZO, direct or by the Bureau. Look for Scott
to be active before the contest as well.

Z8, SOUTH SUDAN. Ken, K4ZW, is currently active as Z81Z from Juba. His
length of stay is unknown at this time, but some reports say a month.
Activity will be 80-10 meters CW. He was heard this past week on 40/20/15
meters. QSL via his home callsign, direct or by LoTW.

ZF, CAYMAN ISLANDS. Dick, WN3R, will be once again active as ZF2RW from
Grand Cayman Island (NA-016, WLOTA 1042) between February 20-26th. Activity
will be on all HF bands and modes. QSL via his home callsign direct (see
QRZ.com).

ZK3, TOKELAU (Update). Operators Hans/DL6JGN and Guenter/DL2AWG will be
active as ZK3N from Nukunonu Atoll (OC-048) between April 23rd and May
8th. Activity will be on 80-10 meters using CW, SSB and the Digital modes.
They will be using a TS590 with a Tokyo Hy-Power solid state amp; K3 with
a 500 watt solid state amp; AV640 and Tripod Leg for 40-10 and GP for 80m.
QSL via DL2AWG. Subject to a reliable Internet connection, they will upload
their log to ClubLog on a daily basis. Otherwise, the complete log will be

uploaded upon their return. There is a ZK3N Web page available at:
http://www.tokelau2013.de

Canadian Ski Marathon 2013 -- Looking for radio operators
2013-01-13

Once again the Canadian Ski Marathon (CSM) is spooling up. This year is the 47th anniversary for the CSM. This will the 40th year for Amateur Radio supporting the event.

The CSM depends on ham radio volunteers to provide important and timely safety and logistical communications for the benefit of the skiers. The amateur radio CSM web page is at http://www.radio-1.ca and is up and running with 2013 information. The event runs between Lachute and Buckingham in western Quebec - snow or shine.

If you would like to volunteer this year, please email me (Harold VA3UNK) at radio1@admin2.ca or va3unk@gmail.com. Although I can't promise anything, assignment requests are generally are on a first-come, first-served basis.

Please join me the second weekend in February (09th-10th) and help make 47th our best year yet!

Bye for now,
Harold Hamilton, VA3UNK

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 13th January 2013

Revised Amateur Station Licence Guidelines

On 2 January, ComReg published a revised version of the Amateur Station Licence Guidelines in ComReg Document 09/45R1. The Guidelines include the following pieces of good news for licensed radio amateurs:

The new band at 472 to 479 kHz which we reported on recently is included in the Schedule of frequencies available to licensed amateurs. Three additional 3 kHz channels have been made available, on application, in the 5 MHz band, and On the 10 MHz band the power has been increased from 100 watts to 400 watts.

The latter two items were among the matters sought by the Society in its response to ComReg's 'Proposed Strategy for Managing the Radio Spectrum 2011-2013' and which ComReg undertook to consider. The Society appreciates the very satisfactory outcome on these two issues.

The revised Amateur Station Licence Guidelines is a very useful source of information for anyone interested in amateur radio. Further details will be carried in the next issue of Echo Ireland. Licensed amateurs and those interested in obtaining an amateur station licence are, however, advised to familiarise themselves with the revised guidelines which are available on a link to ComReg's Amateur Radio Information pages from the Downloads page of the IRTS website at www.irts.ie

---

New 5 MHz Channels

Three new 3 kHz channels have been allocated in the 5 MHz band to the amateur service on a secondary basis. The three new channels are centred on 5300, 5332 and 5348 kHz. In responding to the ComReg's Proposed Spectrum Strategy for 2011-2013, IRTS sought these channels and ComReg agreed to consider the matter in consultation with current users of that spectrum. We are pleased at the positive outcome of these consultations and we appreciate the efforts of ComReg in being in a position to allocate the new channels within the period of the Spectrum Strategy. There are now six 3 kHz channels at 5 MHz available to licensed amateurs. These are centred on 5280, 5300, 5332, 5348, 5400 and 5405 kHz. It is the convention to use upper sideband on this band.

It should be remembered that additional authorisation is required to operate on the 5 MHz band and application to do so must be made to ComReg on form 09/45(d).

Coolmine Radio Rally

Coolmine rally will be held at the Coolmine Community School on Sunday 10th February 2013. Doors open at 8.30am for traders and for member of the public at 9.30am. Admission is 5.00. Usual traders will attend and there will be a bring and buy sale. Tea and refreshments available all day during the event. Unlimited free car parking available. To book a table for the rally please call the following: Tom, 01 8211043 or Tony, 087 2439997. Everyone welcome to this excellent annual event.

Limerick Radio Club

The Annual Limerick Radio Club Rally will take place on Sunday 3rd March 2012 at the Radisson Blu Hotel Limerick. Doors open at 11am and admission is 5. All the usual traders will be present. Bring and Buy tables are Free of charge and will be allocated on a first come basis, they can be booked by contacting Ger McNamara EI4GXB on 087 2532512 or ei4gxb / at/gmail /dot/com.

New RSGB Manager for GI Region 8

Congratulations to Philip Hosey MI0MSO/EI8GPB recently appointed GI region 8 regional manager for RSGB. We wish him well in his new role.

Using Facebook

A new group has been formed on Facebook for amateurs wishing to organise skeds with other amateurs. So if you need a particular contact for an award, or just a chat, then go to http://www.facebook.com/groups/hamsked and have a look.

DX News

Peter K8PGJ will be active as ZF2PG from Grand Cayman Island between now and 20 January. He will operate mainly 20 and 15m SSB. QSLs go via his home call. He will also upload his logs to Logbook of the World.

Leo PP1CZ will operate from the island of Fernando de Noronha from 15-21 January. This archipelago, some 500km off the coast of Brazil, is a separate DXCC entity and while there Leo will use the callsign PY0F/PP1CZ. He will focus on 80 and 160m CW and RTTY with some SSB.

Carl SM6CPY will return to Rwanda from 15-31 January and reactivate his 9X0PY callsign. He will operate mainly CW - look for him 25 kHz up. QSL to the home call.

The island of Minami Torishima will be QRV from 15 January until 15 April. This quite rare DXCC entity will see JG8NQJ signing JG8NQJ/JD1 during that period. He plans to operate 17-10m CW during his spare time on the island. QSLs go to his home call via the bureau or direct to JA8CJY.

EI13CLAN

Any member wishing go on air with EI13CLAN should contact Dave EI6AL at dave.ei6al /at/ gmail.com or by phone on 0861000000.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Missoula Students Interview Space Station Astronaut 200 Miles Above:

Posted: 12 Jan 2013 11:21 PM PST
http://www.eham.net/articles/29631

MISSOULA, Mont. -- This is a story scores of Missoula youngsters may one day tell their grand kids. One day they talked to International Space Station astronauts as they soared over Missoula. Target Range School was home base for hundreds of kids from schools all over Missoula in an out-of-this-world radio conference. Space station astronauts sent Missoula students, their teachers and their parents a pre-taped message. "Happy new year," said commander Kevin Ford and his team. Target Range hosted a phone call to the space station using ham radio-designated frequencies. Space Station astronauts circle the globe every 90 minutes. They made connection at a strategic time. "Exactly over Missoula," said Target Range teacher Kay Ebelt, "and exactly over Target Range School, 200 miles up." Youngsters who won essay contests got to interview commander Ford.

GB2RS NEWS

Sunday 13th January 2013

The news headlines:

* 5MHz band news

* Irish amateurs get 472kHz band

* Gx100RSGB locations this week

The new variation to the UK Amateur Full Licence, allowing a wider range of privileges, came in force from 1 January 2013. Following the Christmas and New Year period, RSGB web support for the new frequencies has been updated. You will find a link at www.rsgb.org/5mhz. Whilst the RSGB continues to encourage experimental work on the 5MHz band, the experimental licensing requirement has been dropped and it is considered that the Society no longer needs to continue to run the 5MHz Experiment to the extent that it has in the past. The 5MHz Working Group has agreed that its primary role has been done and that it can be stood down as a working group. The RSGB would like to acknowledge the contribution by the 5MHz Working Group for its work in developing our presence at 5MHz. The Society also looks to its Members, indeed all UK amateurs, to act responsibly in respect of the new privileges at 5MHz.

Irish amateurs have been informed by ComReg that the band segment 472 to 479kHz is available to all licensed radio amateurs in Ireland, on a Secondary basis. Stations must not cause interference to the Primary Users, including coast stations and the aeronautical radionavigation service.

The special event callsign celebrating the RSGB Centenary, GB100RSGB, will be operated today, 13 January, by Furness ARS. On Monday and Tuesday, South Manchester Radio and Computer Club will put the station on the air in Sale. South Lancs ARC will run the station from Wigan on Wednesday and West Manchester Radio Club take up the callsign in Astley on Thursday. On Friday and Saturday the callsign will be on the air with Wirral & District ARC and then it moves to the Isle of Man as GD100RSGB on Sunday and Monday when the Isle of Man ARC runs the station. Details of how to get your QSL card or check that you are in the log appear on the RSGB website at www.rsgb.org/centenary.

A new group has been formed on Facebook for amateurs wishing to organise skeds with other amateurs. So if you need a particular contact for an award, or just a chat, then go to

www.facebook.com/groups/hamsked and have a look.

The Logbook of The World queue has been shrinking steadily since 7 January, when the system was brought back online after the installation of a new database server equipped with solid state drives. Since then, the delay between a file being uploaded and processed is about 8 days and is dropping by one day approximately every 10 hours.

The IT support group for the IOTA programme is engaged in the beta testing of a ADIF log upload module on a live test server. Additional software support is required to assist Dom Smith, M0BLF with this process, as well as other developments on the IOTA site. The RSGB is looking for a volunteer to provide software programming support for IOTA. The ideal candidate would have skills that include object oriented PHP, MySQL, Javascript and associated technologies such as AJAX, JSON, jQuery, etc and be familiar with working in a GitHub collaborative environment. A team worker, comfortable with virtual collaborative working, would be essential. Whilst someone resident in the UK would be an advantage, consideration will be given to overseas applicants. Expressions of interest, with a brief CV, should be sent to John Gould, G3WKL, by e-mail to g3wkl@btinternet.com.

UK amateur radios clubs still have time to enter the National Club of the Year competition. Kindly sponsored by Waters and Stanton, the closing date for the Regional entries is 31 January. After judging by the Regional Managers team, each of the 13 winners will go through to the national competition, the winners of which will be announced at the RSGB AGM on 20 April. Entries should go to the Regional Manager and details can be found on the Regional websites.

Copyright © RSGB 2013. Not for public release before Monday 14 January 2013 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

The Red Rose Winter Rally takes place today, Sunday 13 January, in the George H Carnell Leisure Centre, Kingsway Park, M41 7FJ. The venue is easily accessible from M60 junction 9. Doors open at 11am and there will be trade stands, special interest groups, a Bring & Buy and an RSGB bookstand. More details from Steve on 07502 295 141.

The Dover Amateur Radio Club Rally will take place on Sunday 20 January at Whitfield Village Hall, Dover CT16 3LY. Doors open at 10am and entry is £2. The auction will take place at 12.30pm. Details from Peter, M0PKH on 07775 515 890.

Also on 20 January, the Pencoed Amateur Radio Club Bring & Buy Sale will be held at Pencoed Rugby Football Club, The Verlands, Felindre Road, Pencoed CF35 5PB. Doors open at 9.30am and entry is £2. Tables are £5 each. Bookings and more information, from Gerry Day on 01656 860 761.

Now for the news of special events

The RNLI SOS Radio week runs from 19 to 27 January and more than 25 stations have registered to take part. For full details of those stations, check out the website at www.sosradioweek.org.uk.

Pontefract & District ARS will be operating GB0SRW from 19 to 27 January as part of RNLI SOS Radio week. The club will operate on the 2, 4, 20 and 40m bands. QSLs will be sent but only on receipt of a card either direct to G0BPK or via the bureau to GB0SRW. Full details are on QRZ.com.

South Tyneside Amateur Radio Club will be operating GB1SLB from the RNLI Lifeguard Station, Marine Walk, Roker, Sunderland, on 19 January. Operation will be on all HF bands from 10am to 7pm. Details can be found on QRZ.com.

Austrian amateurs will have the option of replacing their normal prefix with the special prefix OE2013 between 15 January and 18 February. This is to celebrate the Alpine Ski World Championships. Details of a special award in connection with this event can be found on the internet.

And now the DX news compiled from 425 DX News and other sources

4ZW is currently on the air from South Sudan as Z81Z. He is active on the HF bands, mostly using CW. Please QSL via his home callsign or electronically using Logbook of the World.

SM6CPY will be operational as 9X0PY from Rwanda between 15 and 31 January. Activity will be holiday style, on all bands, using mainly CW and listening up 25kHz. QSL via his home callsign, either direct or via the Bureau.

F6BLP is again active as 6W7SK from Senegal until 18 January. Operations are holiday style using an IC-7000 into a G5RV antenna, mainly on CW. QSL via F6BLP, direct or via the bureau.

Christian, F5UII will be active in his spare time as FY/F5UII from Kourou, French Guiana, from 13 to 30 January. He will operate SSB only from the FY5KE radio club's premises, typically on weekdays before 1200UTC and after 2200UTC. He also plans to spend a weekend on Ile Royale, IOTA SA-020, operating SSB with 100 watts on 10, 15, 17, 20 and 40m. QSL via his home callsign, direct or via bureau. You can follow him on Twitter, @f5uii, for updates.

Dennis, WA2USA will be active as WA2USA/4 from St George Island, IOTA NA-085, between 20 January and 27 February. He will operate mainly CW on 15, 20 and 30 metres, with some SSB on 20 and 40 metres. QSL via his home callsign, direct or via the bureau.

Copyright © RSGB 2013. Not for public release before Monday 14 January 2013 except as a GB2RS broadcast. Now the contest news

Today, 13 January, the CW Affiliated Clubs Contest takes place from 1400 to 1800UTC. Using CW on the 80m band, the exchange is signal report and serial number.

Tuesday 15th sees the 1.3GHz UK Activity Contest take place between 2000 and 2230UTC. Using all modes on the 23cm band, the exchange is signal report, serial number and locator.

The SSB leg of the Affiliated Clubs Contest takes place on 19 January from 1400 to 1800. Again on the 80m band, the exchange is signal report and serial number.

And now the solar factual data for the period from the 4th to the 10 of January, compiled by Neil Clarke, G0CAS on the 11th of January.

During the period numerous sunspot regions appeared and on the 6th, fourteen regions were visible. Most were small and quiet, even some of the larger regions remained quiet. Solar activity was low every day, with numerous small C class solar flares taking place, except on the 6th when an M1 solar flare took place, increasing activity to moderate levels. Solar flux levels responded well and increased from 143 units on the 4th to peak at 174 units by the 10th. That's the highest daily figure since the 11th of November 2011. The average was 148 units. The 90 day solar flux average on the 10th was 121, that's three units up on last week. Geomagnetic activity was very quiet every day, the most disturbed days were the 6th and 9th, with an Ap index of only 3 units. The average was Ap 2 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 290 and 360 kilometres per second. Particle densities were moderate to high most days, with 34 particles per cubic centimetre recorded on the 6th. Bz showed very little variation on any day.

And finally the solar forecast. At first the more active side of the Sun is expected to be looking our way before rotating out of view. There is a chance that solar activity could be moderate on some days, but certainly low on most days. Solar flux levels could decline dramatically and be around 110 units later in the week. Geomagnetic activity is expected to be mostly quiet, however, due to a small coronal hole activity could increase slightly during the next couple of days. MUFs during daylight hours at equal latitudes should be around 26MHz for the south and 23MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 28MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 0900 and 1300 hours.

And that's all for this week from the propagation team.

Copyright © RSGB 2013. Not for public release before Monday 14 January 2013 except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is taking part in the 80m AFS CW Contest from 1400 today and holding club net on 145.225MHz from 2000 today and next Sunday. On Tuesday there's a Morse class at 1945 plus the DVD on the Rockall DXpedition at 2030 with live commentary from team members via the internet. Friday sees the shack social from 1930, and next Saturday it's the 80m AFS SSB Contest from 1400. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR and on Friday there is a club net on GB3FR. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is planning for the March Wythall Radio Rally on Monday. There's a coffee morning on Tuesday from 11am until 1pm, while Thursday sees training classes with Dave Murphy, G8OWL. Shack and aerial work is on Friday. Contact Don, on 01214 581 603.

Lincoln Short-Wave Club is having a shack night on Wednesday, with a brainstorming session on digimodes at the same time in the BSA club. The club simplex net is on 144.325MHz from 8pm on Thursday, then the Saturday surgery and mentoring in the shack starts at 9am. For more information contact Pam Rose, G4STO, on 01427 788 356.

Now we return to the traditional listing in date order. On Monday Gloucester Amateur Radio & Electronics Society is operating on VHF. Contact Anne, 2E1GKY, on 01242 699, 595 daytime.

On Monday Stratford Upon Avon District Radio Society is holding a build-it challenge, hosted by John, G8HJS. Contact G0CHO, on 01608 664 488.

On Monday Sutton Coldfield Amateur Radio Society is on the air, having a natter and general get together. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday Derby & District Amateur Radio Society is having an illustrated talk on Colditz by Martin, G3SZJ. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is having a talk on beam benders by Terry Sheppard. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday Worcester Radio Amateurs Association continues its Foundation licence course. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday Midland Amateur Radio Society is having training classes and having a boys and their new toys session. Details from Norman,

G8BHE, on 07808 078 003.

On Wednesday South Notts Amateur Radio Club is having a talk on multimeters and basic test equipment by G4EDX. Contact Robin, G4NDM, on 01159 372 942.

Copyright © RSGB 2013. Not for public release before Monday 14 January 2013 except as a GB2RS broadcast. On Wednesday Telford & District Amateur Radio Society is holding a Morse fun night led by Richard, G0VXG. Contact Mike, G3JKX, on 01952 299 677.

On Thursday Solihull Amateur Radio Society is having a talk on SOTA by Brian Carter, G8ADD. Details from P T Gaskin, G8AYY, on 01216 287 383.

On Friday Coventry Amateur Radio Society is holding its annual dinner, 7.30 for 8pm start. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND On Monday Angel of the North Amateur Radio Club is having a talk on valves and how to use them effectively, by David Stansfield. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is holding a contest workshop on the RSGB 80m Club Contests. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday South Tyneside Amateur Radio Society is having a night on the air. All are welcome to call in and have a chat. More details from Darren, 2E0MTY, on 07511 968 073.

On Tuesday Chester & District Radio Society is holding its construction competition. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society annual dinner. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday Otley Amateur Radio Society is looking at Harry's story from School for Danger with Jack, G0SNV. Contact Paul, M0PKW, on 07768 996 370.

On Wednesday Denby Dale Radio Club is holding its constructors competition. Details from Richard, M0RBG, on 07976 220 126.

On Thursday South Manchester Radio and Computer Club is having a talk on noise measurement using SDR by Chris, G4HYG. Details from Ron, G3SVW, on 01619 693 999.

On Friday Tynemouth Amateur Radio Club is looking at amateur satellite communications. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND Today, Mid Ulster Amateur Radio Club is having a talk on amateur radio in Rhodesia/Zimbabwe and the need for homebrew radio by John, Mi0DFG / ZE5JS / Z25JS. On Tuesday there's a shack night. Contact Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND On Tuesday Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, GM1CNH, on 07740 946 192.

On Thursday Aberdeen Amateur Radio Society is having a talk by Jim MacKinnon, GM4EKC. Contact Fred Gordon, MM0ODL, on 01975 651 365.

Copyright © RSGB 2013. Not for public release before Monday 14 January 2013 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with advance notice that Radio Society of Harrow will be starting a Foundation course on Wednesday 23 January. The course runs from 7.30pm to 9.30pm for six Wednesdays, with the exam on 6 March. The cost will be £25 plus £27.50 for the exam. Students will also need a copy of the RSGB book Foundation Licence Now! The venue is quite close to Harrow-on-the-Hill train, bus and underground stations, or there is street parking nearby if travelling by car. Contact Brian, G3YKB on 01923 228 121 for more details, or to book a place.

Now for clubs that have several events this week. Today, Newbury & District Amateur Radio Society is taking part in the Affiliated Societies Team Contest CW. Next Saturday they will take part in the AFS Contest Phone. Contact Rob, G4LMW, on 01635 862 737.

Worthing & District Amateur Radio Club is taking part in the AFS contest CW today. Wednesday sees a discussion evening and next Saturday it's the AFS contest SSB. Contact John, G8FMJ, on 01273 593 232.

Farnborough & District Radio Society has an 80m slow CW net on Monday from 1pm, then a Top Band net with G2DX on 1.995MHz at 8pm. Wednesday sees slow speed CW on 1.995MHz from 8pm, to which all are welcome, and on Friday it's the 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Chelmsford Amateur Radio Society has a Top Band net on 1975kHz from 8.30pm on Tuesday. On Wednesday there's a committee meeting at Danbury Village Hall. Contact Martyn, G1EFL, on 01245 469 008.

Now we return to the traditional listing in date order. Today, Horsham Amateur Radio Club is taking part in the AFS Contest CW. Details are on the web at www.harc.org.uk.

Loughton & Epping Forest Amateur Radio Society is having its New Year's carvery dinner today. Contact Marc Litchman, G0TOC, on 02085 021 645.

Monday Coulsdon Amateur Transmitting Society is having its New Year dinner at The Belmont. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday at Radio Society of Harrow, Brian, G3YKB addresses the question: what are semiconductors? More information from Linda, G7RJL, on 02083 868 586.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Bromley & District Amateur Radio Society is holding its AGM. Details from Andy, G4WGZ, on 01689 878 089.

On Tuesday Verulam Amateur Radio Club is having a club meeting followed by a talk at 8pm. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday there will be a Royal Meteorological Society presentation on radio weather, with a look at propagation through the eyes of meteorologist Jim Bacon, G3YLA. This free event takes place at the Thomas Paine Study Centre, University of East Anglia, NR4 7TJ, meeting in the foyer at 7pm for free refreshments. The presentation commences at 7.30pm in the lecture theatre. Details are at www.facebook.com/rmets.eanglia

On Thursday Colchester Radio Amateurs is having talks by members on their other hobbies. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday Horndean & District Amateur Radio Club is having its annual quiz trophy evening. Contact Stuart, G0FYX, on 02392 472 846.

Copyright © RSGB 2013. Not for public release before Monday 14 January 2013 except as a GB2RS broadcast. On Thursday Sutton & Cheam Radio Society is having a talk on the 2O12L Olympic special event station by Bob Treacher, M0MCV and Dave Lawley, G4BUO. Details from Darren, M0PRV, on 07525 753 702.

On Friday Mid-Sussex Amateur Radio Society is having an operating evening in the shack. Details from Mike Mundy, G1TDL, on 01444 246 899.

Next Sunday East Kent Radio Society is at the Dover Amateur Radio Club Rally. Details from Karl Davies, M1DFM, on 01227 710 120.

Next Sunday Hastings Electronics and Radio Club is having its annual lunch. Details from Gordon, on 01424 431 909.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society is having a talk on RAYNET by Keith, G7NBU in the Moose Centre from 7pm on Monday, plus an HF net on 3.675MHz from 7.45pm. The Tuesday 2m net is on 145.575MHz at 7.45pm and on Thursday it's the 4m net on 70.425MHz from 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

On Tuesday Riviera Amateur Radio Club is running its 2m net from 8pm on 145.425MHz. Next Saturday they commence activities for SOS Radio Week, putting MX0RIV on the air. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417 048.

On Thursday South Bristol Amateur Radio Club is holding a committee meeting. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club is having a talk by G7AHP on Linux in amateur radio. Contact George Davis, G3ICO, on 01935 425 669.

On Friday Poole Radio Society is having an activity night. More info from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is having a natter night and 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday Llanelli Amateur Radio Society is having a social night and club raffle. Contact Craig, MW0MXT, on 01269 845 773.

On Tuesday Wrexham Amateur Radio Society is looking at Band plan information. Details from Frank Bailey, M1EYH, by email to fcbailey20@btinternet.com.

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
07 - 13 January 2013

Solar activity was at low to moderate levels. Low levels were
observed on 07-10 January and again on 12 January. Moderate levels
were observed on 11 and 13 January. At the beginning of the period,
there were 12 numbered regions on the visible disk. Most of the
regions were relatively stable producing low level C-class flares.
The most magnetically complex spot group was Region 1652 (N17,
L=184, class/area Fkc/320 on 07 January); a Fkc/BG spot group. By
early 08 January, Region 1654 (N08, L=151, class/area Fki/1100 on 11
January) rotated around the NE limb. Both Regions 1652 and 1654 were
responsible for the majority of the C-class activity that occurred
through the rest of the period. By 11 January, moderate levels were
reached as Region 1654 produced two M-class flares; an M1 at 11/0911
UTC with associated Type II (537 km/s) and Type IV radio bursts and
an M1/1f at 11/1507 UTC. Other activity on 11 January included a 174
sfu Tenflare associated with a C1 flare from Region 1654 at 11/1846
UTC. Low levels returned on 12 January. By 13 January, moderate
levels returned as Region 1652 produced two M-class flares; an M1 at
13/0050 UTC and another M1 at 13/0838 UTC with associated Type II
(649 km/s) and Type IV radio sweeps as well as an Earth-directed
CME. First seen in STEREO-A COR2 imagery at 13/0909 UTC (estimated
speed of 371 km/s), the ejecta appeared in SOHO/LASCO imagery as a
faint halo beginning at 13/1236 UTC.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels.

Geomagnetic field activity was quiet for the majority of the period
through late on 13 January. The solar wind speed, measured at the
ACE spacecraft, ranged from 272 km/s to 375 km/s while the Bz
component of the interplanetary magnetic field (IMF) did not vary
much beyond +/- 5 nT. By late on 10 January, the phi angle changed
```

from predominantly negative (towards) to positive (away) indicative of a solar sector boundary crossing. By mid day on 13 January, solar wind speed began to increase from approximately 400 km/s to 510 km/s. An increase in temperature and total field strength (10 nT) was observed as a positive polarity coronal hole high speed stream became geoeffective. Unsettled periods were observed from 13/1800-2400 UTC.

Forecast of Solar and Geomagnetic Activity
14 January - 09 February 2013

Solar activity is expected to be at low to moderate levels until Region 1654 rotates around the west limb on 20 January. Very low to low levels are expected until Regions 1652 and 1654 return beginning on 31 January. A chance for M-class flares exists from 31 January through the end of the forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels throughout the forecast period with possible high levels on 15-16 January and again on 19-20 January due to coronal hole high speed stream and CME effects.

Geomagnetic field activity is expected to be quiet to active on 14 January due to continued coronal hole high speed stream effects. Quiet levels are expected through mid-day on 17 January. By mid to late 17 January, a CME is expected to become geoeffective causing unsettled to active periods through 18 January. Conditions are expected to return to quiet levels by 19 January and continue until 09 February when a coronal hole high speed stream is expected to return.

Quite ridiculous, even for those who purport to be CB-type operators
rather than technical _REAL_ Radio Amateurs

Get the award through your skill at operating radios and not through
your skill at using the Internet.

Dohhhhhhh!!!!!

Australian Given an AMSAT Accolade:

Posted: 14 Jan 2013 01:27 AM PST
http://www.eham.net/articles/29635

It was a very humble Tony Hutchison VK5ZAI who received an award from AMSATNorth America for the voluntary work he has done for the Amateur Radio on the International Space Station (ARISS) program. In accepting the award, Tony VK5ZAI said it was a very nice honour which made him feel humble. "I look at it as a combined effort for all those that have helped over the last 20 years because I couldn't have done it alone," he said. In praise of ARISS, Tony VK5ZAI said, "They're a great group to work with and he has made many friends through it and amateur radio." He is the Australian ARISS Coordinator and a Telebridge Earth Station involved in many contacts between the ISS and schools.

Live Wire: Several Solutions to Crossed Signals:

Posted: 14 Jan 2013 01:25 AM PST
http://www.eham.net/articles/29634

Q: My neighbor is a ham operator, with three towers in his yard, and when he talks on his radio, it bleeds into my TV and telephone. I've talked to him many times about this, I've talked to the FCC, I've used filters on my phone, but nothing ever helps. I want to be able to watch TV and talk on my phone without interruptions, but I also want him to be able to use his ham radio. Is there anything that can be done so we're both happy? - C.P., Hope Mills A: Maybe. Hopefully. The American Radio Relay League, which represents amateur radio operators, and the Consumer Electronics Association have some suggestions on what to do in situations like yours. One key, they say in a jointly published guide, is to be diplomatic in your dealings with your neighbor since you may well need his cooperation in solving this problem. Since you say you want him to be able to use his equipment, too, it sounds like you're already on this, er, wavelength. Finally, the guide says, if you think the interference is caused by one or more of your neighbor's radio transmitters, talk to him about arranging a thorough test to see if that's really so. In such a test, you'd need to be using your devices while your neighbor gradually tried all of his normally used frequencies, antenna directions and power levels. All results should be carefully written down, the guide says. Once you figure out the problematic frequencies and power levels, you can work on a solution.

Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W2VU and W6SZN for the following DX information.

CQ NEWS (Ron Ochu, KO0Z, Named CQ Beginners Editor). Richard, W2VU, Editor of CQ Amateur Radio, sent out the following:
FOR IMMEDIATE RELEASE: January 14, 2013

Ron Ochu, KO0Z, Named CQ Magazine Beginners Editor

(Hicksville, NY January 14, 2013) – Ron Ochu, KO0Z, of Girard, Illinois, has been named Beginners Editor of CQ Amateur Radio magazine, Editor Rich Moseson, W2VU, announced today. He will begin writing the "Learning Curve" column as of the April 2013 issue. Ochu succeeds Rich Arland, K7SZ, who stepped down after a decade of writing various columns for several CQ Communications magazines.

Ochu is a recently-retired high school English teacher and ham radio license instructor. A ham since 1974, he has held an Extra Class license since 1982. His ham radio interests include DXing, antennas, VHF/UHF/SHF, RTTY and contesting, but notes that "nothing beats a good, down to earth ragchew with a fellow ham." In addition to ham radio, Ron enjoys photography, reading and spending time with his grandchildren. His wife, Debbie, is KC9ULA.

CQ Editor Rich Moseson said, "I am looking forward to working with Ron. His wide-ranging interests and experience both as a teacher and in working with new hams should be just the right formula for the 'Learning Curve' column, which is aimed both at new hams and at more experienced hams learning new aspects of the hobby."

"My hope is to encourage readers to discover and to experience, first hand, the many many avenues for growth and personal satisfaction that our hobby makes available," said Ochu. "I hope that my passion will be evident and perhaps even a little contagious!"

YASME NEWS (Press Release--Revised). Kip, W6SZN, sent out the revised press release that clarifies some statements made in our December 7, 2012 press release:
FOR IMMEDIATE RELEASE
(Revision to December 7, 2012 Press Release)

January 14, 2013
Temple Hills, Maryland

[The following revision of our original award announcement clarifies the relative contributions of award recipients G3PLX and SP9VRC. The Yasme Foundation apologizes for creating any confusion about the origins of PSK31.]

YASME EXCELLENCE AWARDS AND SUPPORTING GRANTS

The Yasme Excellence Award is awarded to individuals who through their own service, creativity, effort and dedication have made a significant contribution to amateur radio. The contribution may be in recognition of technical, operating or organizational achievement, as all three are necessary for amateur radio to grow and prosper. The Yasme Excellence Award is in the form of a cash grant and an individually-engraved crystal globe.

The Board of Directors of The Yasme Foundation is pleased to announce the award of the Yasme Excellence Award to the following individuals:

- George Fremin, K5TR; Tree Tyree, N6TR; Trey Garlough, N5KO; and Scott Neader, KA9FOX for their contributions to many infrastructure projects that benefit the ham community at large
- Mark Spencer, WA8SME for his instrumental work in the ARRL Teachers Institute and other training efforts, development of PIC microcontroller projects and books for amateurs, and work with leaders in student and scientific teams applying amateur radio to scientific projects and experiments
- Champ Muangamphun, E21EIC, and Pornchai Semjang, HS2JFW, for leadership in the Thai amateur community, especially during the recent flooding which helped open the door to the new Thai HF licensing and enhanced the stature of amateur radio with the Thai government
- Tomas Hood, NW7US, and Carl Luetzelschwab, K9LA, for sustained education of the amateur community regarding propagation, solar and geomagnetic physics
- David Freese, W1HKJ, for creating and maintaining the freeware software package FLDIGI, probably the most widely used digital communication software in ham radio and a frequent gateway for new hams who are more familiar with computer-based communications
- Dean Straw, N6BV, for his contributions to amateur antenna system design and the development of software tools such as HFTA to optimize system design
- Peter Martinez, G3PLX, and Pawel Jalocha, SP9VRC, for their individual and distinct contributions to digital communications technology. Peter Martinez is recognized for his invention of PSK31, a widely used digital mode that enables many amateurs to successfully communicate on HF with

very modest stations. Pawel Jalocha, SP9VRC is recognized for his contributions to the field of digital signal processing as applied to communications systems that are used by amateurs, such as the mode Olivia.
- Arie Kleingeld, PA3A; Ad Van Ginneken, PA8AD; and Arie, PA3AN for their sustained contributions to the Mercy Ships Project

Thank you for your fine work and congratulations to you all!

The Board of Directors also announces supporting grants to the following:
- WRTC 2014 (www.wrtc2014.org)

- World Wide Radio Operators Foundation (www.wwrof.org)

- Club Log (www.clublog.org)

- NCDXF Beacon Project (www.ncdxf.org)

- Yasme Scholarships (administered by ARRL) (www.arrl.org)

- Amateur Radio Association of Kosovo (SHARK)

The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing (long distance communication) and the introduction and promotion of Amateur Radio in developing countries. For additional information about The Yasme Foundation, visit our website at www.yasme.org.

*What is a digital edition?
*The digital edition of /QST/ is an electronic form of the journal. All

ARRL members have access to the digital edition of /QST/...a way to read and interact with the current issue of /QST/ anytime, anywhere. Each issue includes unique, digital-edition-only content such as video, audio features and extra content. Members can also access the digital archive for access to previous issues.

H*ow do I access the digital edition?*
/QST/ can be read online or downloaded onto some devices. Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/qst <http://www.arrl.org/qst>. Apple iOS device users (iPhone, iPad and iPod touch) can also access the digital edition from a dedicated /QST/ app. The app is free in Apple's App Store <https://itunes.apple.com/us/app/qst/id531766442?mt=8>.

To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.

Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.

Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions. Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

Go Green! Go Digital-Only.
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue.
* Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Amateur Radio Community Honors Special Member:

Posted: 14 Jan 2013 04:07 PM PST
http://www.eham.net/articles/29638

The local amateur radio community came together on Sunday to honor a special member. The Western Reserve Amateur Radio Club hosted its annual post-holiday dinner meeting in Canfield Sunday. The meeting had another purpose, to present Mike Austin of Warren with long range ham equipment that speaks. Austin is visually impaired and just passed his test to be a general class operator. Unfortunately, he was sick but the club had nothing but good things to say about his contributions.

//
The Perfect Solar Storm? Sun Eruptions to Peak in 2013:

Posted: 14 Jan 2013 04:06 PM PST
http://www.eham.net/articles/29637

Sunny, with a mild chance of catastrophe? A massive solar storm, like the one that knocked out radio communications all over the U.S. in 1958, is coming, and this time the devastation could total as much as $2 trillion, experts told FoxNews.com. Call it the perfect solar storm. Wireless networks that power Blackberrys and iPhones here on earth, as well as GPS satellites that help pilots navigate planes in the skies, could be blacked out. And electric grids that power neighborhoods and whole cities could temporarily go down, said Professor Jose Lopez, a physicist at Seton Hall University. "The concern of a strong solar flare in the direction of Earth is legit. The possibility that such a Sun burst could hit Earth could cause extensive damage as it would charge-up our electrical equipment and destroy them," Lopez told FoxNews.com

```
**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

January 16, 2013

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Will the Bands Repeat? - ARRL January VHF Contest
- Time for Top Band DX - CQ WW 160 CW
- NCJ Rule Changes and Deadline Waiver
- Radio-Sport.net - It Lives!
- Rovin - Got Your Topos Loaded?
- CW Sweepstakes - Initial Results Online
- Whither Cycle 24 - NASA Knows
- Latest WWROF Webinar - A Cut Above
- Bring On the New

==> NEW HF OPERATORS - THINGS TO DO

The SSB North American QSO Party this coming weekend is a fun way to
spend a few hours and is particularly good for young and beginning
operators - all you have to exchange is your name and state. Plus, you
can work stations on each HF band from 160 through 10 for fun all day
and night. It starts at 1800Z and you can operate for 10 of the next 12
hours, taking a break during those crucial playoff games!

BULLETINS

The log submission deadline for the North American QSO Parties will be
7 days after the running of the January-February 2013 contests,
shortened from 14 days as it was previously. All six NCJ-sponsored
contests (CW, SSB and RTTY Sprint and NAQP contests) now have a
consistent 7-day log submission deadline. (See discussion in the News
section below.)

BUSTED QSOS

The ARRL Morse code CD uses the Farnsworth method, using 18 wpm
characters sent with 5 wpm spacing, not the Koch method. (Thanks, Dan
N2DD)
```

Dennis KS0DX corrects the color code for network cabling given in the previous issue: "There are two standards, 568B and 568A. 568B (B for Bell Labs which surprisingly came first) goes like this:

- White/Orange, Orange, White/Green, Blue, White/Blue, Green, White/Brown, Brown. 568A goes like this:
- White/Green, Green, White/Orange, Blue, White/Blue, Orange, White/Brown, Brown.

A Null or Crossover cable would have 568B on one end and 568A at the other and would be used for a DTE to DCE connection such as connecting two LAN switches or back-to-back PCs. The color code provided in the previous issue is the "IW" color code used in telephone network wiring but not CAT5 or CAT6 LAN or WAN network wiring."

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Jan 19-20

- ARRL January VHF Contest
- North American QSO Party--Phone
- Linc Cundall Memorial CW Contest (Jan 16)
- NAQCC Monthly QRP Sprint--CW (Jan 17)
- Locust QSO Party--CW (Jan 17)
- LZ Open Contest--CW
- YLISSB QSO Party--Phone
- International United Teenager Contest
- HA DX Contest
- Feld-Hell Gridloc Sprint
- Run For the Bacon--CW (Jan 21)

Jan 26-27

- QRP Winter Fireside SSB Sprint (Jan 24)
- NAQCC Special 160M Sprint--CW (Jan 25)
- CQ WW 160 Meter Contest--CW (Jan 25)
- REF French Contest--CW
- BARTG RTTY Sprint
- UBA Contest--Phone
- Winter Field Day
- WAB Top Band Phone Contest
- Classic Exchange--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The rules for the North American QSO Party (NAQP) and Sprint contests were accidentally omitted from the January/February 2013 issue of the National Contest Journal (NCJ). You can now find the official rules for the 2013 NAQP contests at the NCJ website <http://ncjweb.com>. All rules for NCJ NAQP and NA Sprint contests will be published in the March/April 2013 issue of NCJ. Along with the new log submission deadline noted in the Bulletin section above, a rule change requires

that the same name must be used throughout the contest, even by multioperator stations. Note that since the rules were not printed in the magazine on time, the one-week deadline for the January and February NAQP contests is waived and will remain at two weeks. Starting with the July 2013 NAQP contests, the 7-day deadline will apply. The 7-day deadline for NA Sprint contests remains in place. (Thanks, NCJ Editor, Kirk K4RO <k4ro@k4ro.net>)

The Florida Contest Group <http://www.floridacontestgroup.org/> is hosting the 2013 Orlando Contest Dinner on February 8. Chris WF3C announces "Our speaker this year is Randy Thompson K5ZD, who will be talking to us about administering the CQ WW DX and CQ WPX contests, participating in four prior WRTCs, planning WRTC-2014, and anything else that catches his fancy." Contact Blake N4GI <blake@n4gi.com> for tickets and information by February 2.

The deadline for ordering 2012 Sweepstakes Clean Sweep <http://www.arrl.org/sweepstakes> mugs and participation pins is January 31. Mugs are $15 and pins are $8 (both include all shipping/handling charges) and will be shipped late March - early April. Pins are mode-specific, mugs are not. Get your orders in now! (Thanks, ARRL Contest Branch Manager, Sean KX9X)

CQ WW DX <http://www.cqww.com/> Director, Randy K5ZD reminds us, "this is one of those years where the CW WW contest is not on the US Thanksgiving holiday!" It will run on 23 and 24 November - the weekend BEFORE Thanksgiving which is on the 28th. This year you can have your CW WW and eat plenty of turkey, too!

John K9JK noticed something interesting in May 1976 QST about the 1975 Sweepstakes logs. It seems that there have always been log submission problems as described by K1TN on page 55. Can you imagine cross-checking all those paper logs by hand? ARRL members can access the QST online archives to download the article.

The North Coast Contesters <http://www.northcoastcontesters.com/> are proud to announce the 21st Annual Dayton Contest Dinner <http://contestdinner.com/>. Master of Ceremonies, John K1AR, will introduce a familiar featured speaker - Dr Robert Cox, K3EST! The dinner is held on Saturday of the Dayton Hamvention <http://www.hamvention.org/> weekend, 18 May at 6:30 PM in the Crowne Plaza Hotel. Be sure to order tickets in advance - no tickets will be available at the door. The Contest Dinner is just one of the festivities at the Crowne Plaza where the Contest Super Suite <http://contestsupersuite.com/> runs from Wednesday through Saturday night. (Thanks, Tim K3LR)

Tim K3LR is also rolling out the 7th straight ConTest University (CTU) <http://contestuniversity.com/> during the Hamvention on Thursday, May 16th, at the Crowne Plaza hotel. Early-bird registration rates are available now - see the CTU website for suggested topics including a topic survey <http://www.surveymonkey.com/s/8XZG5NS>. New CTU

Professors include familiar call signs such as K5GN, N0JK, K9YC, K3EST and K6MM. Returning CTU Professors with new papers this year are W3LPL, K1DG, W0YK, NC0B, N6TV, K5ZD, M0DXR and K3LR. Six different countries have hosted CTUs: USA, Germany, Italy, England, Brazil and Finland. CTU Australia will be held in a few weeks. Nearly 2000 students have attended CTUs with more than 60 CTU Professors sharing their contesting experiences. See the CTU website for discounts to speakers giving talks about contesting to their local groups!

The situation with International Reply Coupons is changing rapidly. The Daily DX <http://dailydx.com/> reports that W9OL has updated his chart of IRC and postage costs <http://www.qsl.net/w9ol/IRC_Chart.htm> around the world. He requests that you send updated information if available.

Kenwood has released information on their new TS-990S <http://www2.jvckenwood.com/en/news/2013/20130108.html>, top of the line HF+6 meter transceiver. Here are a few of the highlights:

- All down-conversion main receiver for amateur bands featuring an IP3 of +40 dBm, and five high-IP roofing filters
- The sub-receiver is an advanced version of the TS-590S receiver with up/down-conversion on main contest bands
- Full remote control via ARCP-990 control program
- Dual TFT display with band scope and built-in waterfall display
- 200 watts output with low-noise oscillators and built-in antenna tuner
- Separate digital and data mode connections

Al W5LUA and Shichirou JA6CZD made the first 24 GHz EME contact between the USA and Japan on January 2 at 1430Z. The two stations had about an hour of common window where each had 15 to 20 degrees of elevation. Congratulations to each for this significant technical and operational achievement! (From AMSAT <http://amsat.org/> Bulletin ANS-006)

The long-running Hunting Lions In the Air contest is now officially kaput due to declining interest in past years. (Thanks, Bruce WA7BNM)

Web Site of the Week - Fans of Radio-Sport.net <http://radio-sport.net/> can take heart - the website will continue operations in 2013. Jeff N1SNB is going to keep the outlet for contest news and stories going. "I plan on making the site more of a community hub for discussion, op-ed content, and contesting resources. I hope to carry on more of the great work NS3T started as well with contesting news published as it happens." Jeff expects to re-launch the site soon and is busy rebuilding it now.

WORD TO THE WISE

"No single method is ever 100%." (K4PI)

==> SIGHTS AND SOUNDS

Andy K1RA (a.k.a. W1RT/Rover) has put together a video about his roving adventures
<http://www.k1ra.us/roving/k1ra-w1rt-rover-arrl-sept-vhf-2012> in the ARRL September VHF Contest.

Well, how ARE you supposed to coil up coax? Scott N7SS directs us to a video <http://www.youtube.com/watch?v=MziOBf60Kn0> by a guy who coils cables for a living. It seems like a good video to show before the next Field Day, don't you think?

On January 19, BBC Radio 3 will be broadcasting "Between the Ears - Space Ham <http://www.uk.amsat.org/?p=12135>" via radio and on the web celebrating Amateur Radio and space exploration. The program takes a look back at advances in the amateur space program, including W5LFL, W0SL, and W4EJA.

==> RESULTS AND RECORDS

Initial results for CW Sweepstakes are online
<http://arrl.org/contest-results-articles>as are the final results for the December CW edition of the Rookie Roundup. This includes all results tables and printable line scores but not the searchable database. The initial results for Phone Sweepstakes should be available early next week. Unfortunately, the January VHF Contest certificates are running behind due to changes in the certificate layout and printing - the nice new design will be worth the wait, though! (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Bob W0BH reports that the results for the 2012 Kansas QSO Party <http://www.ksqsoparty.org/> are out along with some really nice certificates featuring the artwork of Hesston College alumnus Ashley Hager and Lorna K0WHY along with three vintage Amateur Radio postage stamps.

A new online score database <http://naqp.contesting.com/> for the NAQP CW contest is the product of a team led by Steve N2IC. It currently shows all of the NAQP CW scores - more NCJ contests will follow. (Thanks, NCJ Editor, Kirk K4RO)

Whether you fired up your "steam-powered radio" or not, take a minute to enjoy the reports and pictures from the last Classic Exchange <http://www.classicexchange.org/> contest in the "September 2012 CX Newsletter" which features pictures of homebrew rigs and some unusual commercial boat anchors. (Thanks, Mac WQ8U)

Stew Perry Top Band Distance Challenge <http://www.kkn.net/stew/> log-checker, Tree N6TR reports that "In the QRP category you have to go all the way to 15th place to find a station who's best DX is within his own continent and in the QRP Top Ten, the distances for the best DX were all over 7000 km. Five different continents were used by the QRP Top Ten to accomplish this (Asia was missing)."

Don AA5AU and Ed W0YK report that, "Results of December's 10 Meter RTTY Contest

<http://rttycontesting.com/tenmeterrttycontest/results/2012-index.html>
are now posted. Wine awards will go out in the next week, followed by
plaques and certificates in the April timeframe. With depressed 10
meter conditions, especially compared to the 2011 event, participation
was about two-thirds of last year. Still it seems everyone had a great
time and it was an opportunity to prepare for the ARRL 10 Meter Contest
on CW/SSB the following weekend, as well as the ARRL RTTY Roundup a
couple weeks later. Log checking reports (LCR) are available by request
<lcr-ten-rtty@rttycontesting.com.>." Don's notes
<http://rttycontesting.com/contestnotes/2013_arrlru.htm> for the 2013
ARRL RTTY Roundup with pictures are also available.

The Maritime Contest Club offers the Acadia Award
<http://www.maritimecontestclub.com/acadianewscotlandaward.html> to
local operators based on results for Maritime contesters. Perhaps this
will inspire your contest club to devise ways of recognizing the great
efforts of your membership? (Thanks, Tom K1KI)

Valery R5GA's Pileup <http://pileup.ru/> website has some new rate
reports available from recent CQ WW and WPX contest public logs. The
reports are available sorted by several different criteria - there are
some amazing hours! (Thanks, Bob W5OV)

OPERATING TIP

Under difficult conditions, speaking the name for a numeral in the
native language of the listener can make a big difference. The
Wikipedia website list of numbers
<http://en.wikipedia.org/wiki/List_of_numbers_in_various_languages> in
various languages will help you say "five nine" with a global savoir
faire. (Thanks, Rich KL7RA)

==> TECHNICAL TOPICS AND INFORMATION

Several good articles on the solar cycle and sunspot physics have
rotated into view in recent weeks. From the ARRL Propagation Bulletin
<http://www.arrl.org/w1aw-bulletins-archive-propagation> ARLP002 we
find two from the NASA EarthSky website: a short primer
<http://earthsky.org/space/nasas-three-minute-solar-cycle-primer> on
the cycle and a report
<http://earthsky.org/space/frank-hill-sees-future-sunspot-drop-no-new-ice-age>
on cycle progress by Frank Hill. Elsewhere, an article
<http://science.nasa.gov/science-news/science-at-nasa/2013/08jan_sunclimate/>
about the effects of solar activity on Earth's climate makes for good
reading, too. (Thanks, Dick W7WKR)

Michael NJ2X and his son Shea KC2VSR built the polarity checker
described in a recent Hands-On Radio <http://arrl.org/hands-on-radio>
column on polarity protection and made it into a very nice how-to
article
<http://www.nj2x.com/2012/12/project-anderson-powerpole-polarity.html>
that is suitable for beginning builders. It would make a nice project

for a club "build-it" night, as well, are some of the other DIY (do-it-yourself) projects on his site. A particularly good reason to build the tester is that not all automotive cigar/cigarette connectors are wired with the center positive and he also lists a number of other reasons that polarity might be reversed.

Here's a great Instructables project <http://www.instructables.com/id/Up-out-of-the-way-wire-dispenser/> on getting those rolls of wire up and out of the way, yet still accessible to the workbench.

A continuation of the article "What's All This Multiple Bandscope Stuff, Anyhow?" about using band scopes as an aid to VHF+ contesting is now available in the latest edition of the Pack Rat's "Cheese Bits <http://www.packratvhf.com/news.htm>" newsletter.

Paul W9AC has discovered "As CATV companies have transitioned from NTSC to QAM channel line-ups, high-quality field analysis meters have been showing up on the used market in big numbers. I recently acquired a used Wavetek SAM III Digital for about USD $100. Another great unit is the SAM I Analog <http://www.ham-radio.com/k6sti/sam.htm>. These units are excellent for localizing power line noise, especially when used with a scope to replicate the noise finding method recommended by Loftness and Radar Engineers."

Though AFCI <http://en.wikipedia.org/wiki/Arc-fault_circuit_interrupter> (Arc Fault Circuit Interrupter) and GFCI <http://www.cpsc.gov/cpscpub/pubs/099.pdf> (Ground-Fault Cicuit Interrupter) outlets may look similar, they are very different. AFCIs are relative newcomers and the RFI fixes for one may not be the same for the other. (Thanks, David K1TTT)

Plenty of good projects <http://hamradio-builder.hamhacker.org/> for the homebrewer are online at the Hamradio-Builder website, including this detailed description of how to build your own air-variable capacitors <http://www.qsl.net/n4dfp/buildcaps.html>.

Jim W4ENE, author of numerous articles the ELSIE <http://tonnesoftware.com/elsie.html> filter-design software, has updated a long-running discussion of audio speech processing <http://tonnesoftware.com/appnotes/speech/speechamp.html>.

IZ5OVP has designed a very inexpensive memory keyer <http://www.youtube.com/watch?v=ZAxUb6EPPtY> that anyone can use but it might take a little time to program and more time to change the messages! Back in the day, there were a number of PCB-based "memory keyers" constructed by using a knife to create the message by removing copper from the board. If the rig was cathode-keyed, there was often enough juice to create burns and pits in the copper as an added attraction! While you're practicing your technique - here's a useful training film

<http://www.youtube.com/watch?v=C8q57EQ_3SQ&feature=youtu.be> for aspiring brass pounders, too. (Thanks, Tim K3LR and Rich KL7RA)

Technical Web Site of the Week - The latest World Wide Radio Operator's Foundation <http://wwrof.org/category/webinar-archive/> (WWROF) webinar in the online archive is by tower mavens John W2GD and Don K4ZA. It covers "Things we've learned from almost 100 years of combined experience, focusing on safety, cost-savings, and problem-solving." That is a LOT of ground to cover!

==> CONVERSATION

Bring On the New

Everybody has a resolution or two, right? No doubt we all have made and broken resolutions many times over the years. What about ham radio - how many of you make a ham radio resolution - show of hands, please. OK, that's quite a few of you!

My resolution for ham radio in 2013 is quite simple - try something new. That's not necessarily just a new piece of equipment or a different contest. I mean something NEW that might change my way of thinking. It's easy to get into a rut when you think you're in a groove. Sure, I like holding a frequency and mashing F1 as much as anybody - pushing the rate meter to new heights is a fabulous thing - but I get the feeling I'm missing out on some of the fun. It's just too bad there aren't more hours in the day!

How about a new mode I've never used before? There are lots of new digital modes - seems like there is one added to FLDIGI <http://www.w1hkj.com/Fldigi.html> every week! The ones that sound like circus organs run amuck might be fun or maybe the new WSJT <http://physics.princeton.edu/pulsar/K1JT/> for HF. I feel the need to explore meteor scatter and WSPR and EME! Yeah, that's the ticket - bounce a signal off the old orb! Not really new - it's been done by hams for three score and more years - but it certainly pushes one's envelope to send a signal a half-million miles with the mother of all skips in the middle!

What are these people doing with the headbands and the VHF Yagis out in the woods? They are actually sweating and exercising...and doing ham radio? Is that allowed? I have a handheld with GPS in it, a tape-measure Yagi from a club build-an-antenna night, and the inclination to work off a few calories. So a geocaching-fox-hunt <http://www.hamconcolorado.org/wordpress/?page_id=193> - a.k.a. geo-foxing - might just be in the cards.

Or maybe I will tackle a new technology like SDR that I can really get to know and explore. Clearly, SDR is taking major strides toward becoming the new standard, about to dethrone the superheterodyne after more than eight decades of dominance. The barrier to entry is incredibly low - SDRs the size of a thumb drive (heck, they ARE thumb drives...) with an SMA connector on one end and a USB connector on the

other cost less than an extra-large pizza. And I really don't need to eat another extra-large pizza so soon after the holidays.

As new as some of these things may seem, however, most are just incremental changes to ways of doing business on the ham bands that have been around for nearly a century. Much bigger changes are just waiting for a fortuitous combination of technology and vision to change our world by giving us new ways to imagine and view and hear it. There is so much truly new happening in ham radio that it's hard to know where to begin. Ham radio 2.0 - are you ready?

So I'll get started and sure, I'll feel like a Nervous Novice for a while but then I'll get the hang of it and off to the races I'll go! That's why so many of us are ham radio "lifers" - there are and always have been lots of new things just around the corner if we can conquer our fear of not being considered an expert and give them a try. Why, I might have to say, "I don't know," and ask for instructions and read a manual - noooooooooo!!!

I will just have to cowboy up and get 'er done - I'm just kidding about that fear-conquering business. (Well, maybe mostly kidding...) I'll keep you posted on what I turn up. Maybe there will be contests! What do you bet I'll enjoy it? Ring it on up!

73, Ward N0AX

==> CONTESTS

16 January through 29 January

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American QSO Party--Phone, from Jan 19, 1800Z to Jan 20, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com>

Linc Cundall Memorial CW Contest--CW, from Jan 16, 2300Z to Jan 17, 2300Z. Multiple operating periods. Bands (MHz): 1.8-7. Exchange: See Web site. Logs due: 30 days. Rules <http://www.antiquewireless.org/>

NAQCC Monthly QRP Sprint--CW, from Jan 17, 0130Z to Jan 17, 0330Z. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Bands (MHz): 3.5-14. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

Locust QSO Party--CW, from Jan 17, 0200Z to Jan 17, 0256Z. Bands (MHz): 3.5-7. Frequencies (MHz): 3.556, 7.056. Exchange: Name, state or province or 'DX'. Logs due: Jan 31. Rules <http://www.k6vva.com/lqp>

LZ Open Contest--CW, from Jan 19, 0000Z to Jan 19, 0400Z. Bands (MHz): 3.5, 7. Exchange: 6-digit serial and serial from previous QSO. Logs due: 30 days. Rules <http://www.lzopen.com/>

YLISSB QSO Party--Phone, from Jan 19, 0000Z to Jan 20, 2359Z. Bands (MHz): 1.8-28. Exchange: Call sign, RS(T), ISSB number. Logs due: Mar 16. Rules <http://www.ylsystem.org/>

International United Teenager Contest--Phone,CW, from Jan 19, 0600Z to Jan 19, 1400Z. Bands (MHz): 3.5-28. Exchange: RS(T) and age or "RT". Logs due: 30 days. Rules <http://ur4nww.narod.ru/documents/pdf/CQUTContest_2013A.pdf>

HA DX Contest--Phone,CW, from Jan 19, 1200Z to Jan 20, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: 30 days. Rules <http://www.ha-dx.com/>

Feld-Hell Gridloc Sprint--Digital, from Jan 19, 1600Z to Jan 19, 1800Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

Run For the Bacon--CW, from Jan 21, 0200Z to Jan 21, 0400Z. Monthly on 3rd Sunday night (local). Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

QRP Winter Fireside SSB Sprint--Phone, from Jan 24, 2000Z to Jan 24, 2359Z. Bands (MHz): 3.5-28. Frequencies (MHz): QRP calling frequencies. Exchange: RS, S/P/C, QRP ARCI number or power. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

NAQCC Special 160M Sprint--CW, from Jan 25, 0130Z to Jan 25, 0330Z. Bands (MHz): 1.8. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CQ WW 160 Meter Contest--CW, from Jan 25, 2200Z to Jan 27, 2200Z. Bands (MHz): 1.8. Exchange: RST and S/P/C. Logs due: Feb 28. Rules <http://www.cq160.com/>

REF French Contest--CW, from Jan 26, 0600Z to Jan 27, 1800Z. Bands (MHz): 3.5-28. Exchange: RST and serial or department ID. Logs due: 15 days. Rules <http://concours.ref-union.org/contest>

BARTG RTTY Sprint--Digital, from Jan 26, 1200Z to Jan 27, 1200Z. Bands (MHz): 3.5-28. Exchange: Serial. Logs due: Mar 1. Rules <http://www.bartg.org.uk/>

UBA Contest--Phone, from Jan 26, 1300Z to Jan 27, 1300Z. Bands (MHz): 3.5-28. Exchange: RS, serial, and ON province. Logs due: 2 weeks. Rules <http://www.uba.be/hf/contest-rules>

Winter Field Day--Phone,CW,Digital, from Jan 26, 1700Z to Jan 27, 1700Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, RS(T), category, local temp. Logs due: Feb 28. Rules <http://www.spar-hams.org/>

WAB Top Band Phone Contest--Phone, from Jan 26, 1900Z to Jan 26, 2300Z. Bands (MHz): 1.8. Exchange: See Web site. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk/contest>

Classic Exchange--CW, from Jan 27, 1400Z to Jan 28, 0800Z. Bands (MHz): 1.8-28, 50, 144, Frequencies (MHz): CW 1.810, 3.545, 7.045, 14.045, 21.135, 28.050, 50.100, 144.100 . Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://www.classicexchange.org/>

VHF+ CONTESTS

ARRL January VHF Contest--Phone,CW, from Jan 19, 1900Z to Jan 21, 0400Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Feb 20. Rules <http://www.arrl.org/contests>

Winter Field Day--Phone,CW,Digital, from Jan 26, 1700Z to Jan 27, 1700Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, RS(T), category, local temp. Logs due: Feb 28. Rules <http://www.spar-hams.org/>

Classic Exchange--CW, from Jan 27, 1400Z to Jan 28, 0800Z. Bands (MHz): 1.8-28, 50, 144, Frequencies (MHz): CW 1.810, 3.545, 7.045, 14.045, 21.135, 28.050, 50.100, 144.100 . Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://www.classicexchange.org/>

LOG DUE DATES

16 January through 29 January

- January 17 - QRP Fox Hunt <http://www.qrpfoxhunt.org/winter_rules.htm>
- January 18 - AGB-Party Contest <http://www.ev5agb.com/contest/agb_party.htm>
- January 18 - UK DX BPSK63 Contest <http://www.ukdx.srars.org/ukdxc-psk-rules-2013.pdf>
- January 19 - PODXS 070 Club PSKFest <http://www.podxs070.com/pskfest>
- January 19 - QRP Fox Hunt <http://www.qrpfoxhunt.org/winter_rules.htm>
- January 20 - NCCC Sprint Ladder <http://www.ncccsprint.com/rules.html>
- January 20 - QRP ARCI Pet Rock Celebration <http://www.qrparci.org/content/view/8390/118/>
- January 20 - SKCC Weekend Sprintathon <http://www.skccgroup.com/operating_activities/weekend_sprintathon/>
- January 20 - North American QSO Party, CW <http://www.ncjweb.com/naqprules.php>
- January 20 - NRAU-Baltic Contest <http://www.nrau.net/nrau-baltic-contest/rules.html>
- January 20 - NAQCC Straight Key/Bug Sprint <http://naqcc.info/sprint201201.html>
- January 21 - AGCW VHF/UHF Contest <http://www.agcw.org/en/?Contests_and_CW-activities:VHF-UHF_Contest>
- January 22 - RAEM Contest <http://raem.srr.ru/contest/raem_2012/rules_eng_2012.php>
- January 22 - AGB New Year Snowball Contest

<http://www.qsl.net/eu1eu/agb_nysb.htm>
- January 26 - Feld Hell Sprint
<https://sites.google.com/site/feldhellclub/Home/contests/sprint-rules>
- January 27 - North American QSO Party, SSB
<http://www.ncjweb.com/naqprules.php>
- January 27 - Run for the Bacon QRP Contest <http://fpqrp.org/pigrun/>
- January 27 - Old New Year Contest
<http://www.radio.ru/cq/contest/rule-results/index7.shtml>
- January 28 - DARC 10-Meter Contest
<http://www.darc.de/referate/dx/contest/10m/en/rules/>
- January 29 - Stew Perry Topband Challenge <http://www.kkn.net/stew/>
- January 29 - LZ Open Contest
<http://www.lzopen.com/lz-open-contest/rules/rulesF.htm>

==> ARRL JANUARY VHF CONTEST - PERFECT FOR ARES PRACTICE, TOO

The ARRL has added a new "FM Only" category to ARRL VHF contests,
starting with the January VHF Contest, which begins this Saturday,
January 19. The contest starts at 1900 UTC and runs until Sunday night
at 0359 UTC. You'll find lots of "weak signal" VHF operators using high
power and sensitive antennas working hard to work your station on FM.
No special gear, no big expense -- you can operate in this contest and
possibly win a certificate using just the radios you already own.

It's also a perfect opportunity for ARES, SKYWARN, RACES and CERT teams
to test their ability to communicate without using a repeater, just as
you might have to in an actual emergency. Want to have even more fun?
Drive or hike to a local hilltop and you can exercise your deployment
capabilities -- it's like "Field Day In the Cold!"

You'll find lots of VHF operators hoping to work YOU! Try transmitting
a "CQ Contest" on the following frequencies: 146.550 MHz simplex;
146.580 MHz simplex; also 52.525 MHz (6 meters); 223.5 MHz (1.25
meters); and 446.0 MHz (70 cm band). Remember under the new rules,
you're limited to 100 watts or less, but that means you'll be on equal
footing with a lot of small stations. A gain antenna (like a beam or
Yagi) can really help, and a high location is a big plus, too. You'll
need to know your "grid square" as that is part of the exchange of
reports with other stations. - Les Rayburn, N1LF, Birmingham, former
Alabama SEC [See more discussion in this issue, from ARRL Contest
Update Editor Ward Silver, N0AX and from Rayburn. - ed.]

==> FLORIDA AMATEURS TO DRILL WITH STATE IN MAJOR INTEROPERABILITY EXERCISE

Florida's Division of Emergency Management <http://www.floridadisaster.org/index.asp> is running a statewide interoperable communications exercise entitled "Operation RADAR II," to be held early next month. According to the state's lead agency for disaster response, the multi-day exercise emergency communication teams will utilize mobile communications units and work from Camp Blanding in northeast Florida to establish communications networks among one another and county Emergency Operations Centers (EOC) located throughout the state. This exercise has been designed to fully integrate multiple communications systems located across Florida into an effective emergency communications network. Amateur Radio programs have been invited, and will participate, according to ARRL Northern Florida Section Manager Paul Eakin, KJ4G.

Exercise objectives include identification of shortfalls in resources, limits in capabilities, and conflicts in planning for interoperable communications; demonstration of the ability to communicate throughout the emergency response community and establish interoperable voice and data communications between federal, state, and local first responders; evaluation of response partners' ability to share necessary, appropriate data in all environments; and demonstration that all response partners can effectively share information between communication modes.

Participation is by invitation only, and entities and individuals must apply for and be registered accordingly. Eakin reports that the exercise will be like Field Day, with amateurs bringing "everything we will need to accomplish the tasks we are given, including antennas, extra coax, connectors, spare radios, computers, wire, baluns, generators (gensets), tables and chairs, pens, paper, programming software and cables and the list goes on." "We will have to set up our own equipment and antennas, build operating stations, operate and tear down."

Eakin said that amateurs will need to have an elaborate command post up and running prior to the start of the exercise. The exercise scenario is a hurricane and will be managed under the Incident Command System (ICS). The Amateur Radio unit will be operating as an "agency unit," Eakin said. It will be given tasks relating to Amateur Radio, and is shown as part of the ICS in a Power Point planning guide, which can be found here <http://www.arrl-nfl.org/PPT%20Files/OPERATION%20RADAR%20II.pptx>. HF tasks will be assigned, and digital modes testing will be enhanced in the tasking, said Eakin.

Chosen applicants will be sent an official e-mail giving instructions on how to register on the state's exercise web page to receive their credentials. Walk-ons will not be admitted at Camp Blanding without proper ID from the Florida state EOC. Eakin said that "it is a precedent set by the FL-EOC to ask Amateur Radio to come into Operation Radar at this level of responsibility to participate and assist. The outcome of our performance may very well move Amateur Radio forward in the eyes of citizens, served agencies, press and government leaders." Section Manager Eakin is also the Florida State EOC's liaison for Amateur Radio.

==> LETTERS: ON THE ORIGINS OF CERT

I read your column in the January 2013 issue of QST regarding ARES and CERT. I'd like to provide a little historical perspective indicating that an ARES/CERT affiliation existed long before FEMA adopted the concept which, in fact, was created by local government. In the early 1980's the Coronado (California) Police Department, where I served as Police Chief, had a very large and active ARES program and as we were responsible for emergency preparedness in the city our department also had an active citizen emergency preparedness program. The nearby city of San Diego, through its fire department, developed the CERT concept. Indeed I believe they were the originator of it. My department's Emergency Preparedness coordinator, Sergeant Dick Stolpe, suggested that we "marry" our ARES program into a CERT approach and we did exactly that. Sergeant Stolpe's suggestion was soon copied by multiple other cities in Southern California, which saw the advantages of a citizens emergency response team having the reliable communications services that only Amateur Radio could provide. - Jerry Boyd, N7WR, former Chief of Police, Coronado, California

==> MMSN CELEBRATES 45 YEARS OF SERVICE

Thursday, January 3, 2013, marked the 45th anniversary of the Maritime Mobile Service Network. The need for the type of volunteer service provided by the network had existed for many years. The launching of an organization to meet this need was placed on the drawing board when nine Amateur Radio operators met at the home of Chaplain Alla Winston Robertson, USN, WB4AKB (now KB5YX), on December 27, 1967. Those meeting with Robertson were: S.C. Rock, WA4YVQ; Mel White, WA4IQS; D. Freeman, K1YLI; J.G. Kincade, WA4YVX; Art Werner, K3QYQ; H. Bretches, K4DBR; L.B. Lapman, W4SAW; and G.W. Powell, WA4RRO. This group agreed to launch the Maritime Mobile Service Network, or MMSN, on January 3, 1968 at 2130 UTC on 14.320 MHz but had to move to 14.317 MHz a few weeks later to avoid excessive interference. In 1969, when the net moved to 14.313 MHz, it also established 14.300 MHz as an alternate working frequency and for years operated on either frequency depending on nearby interference, but, since before 2000, the net has been operating exclusively on 14.300 MHz.

The original purpose of the MMSN was to "Serve Those Who Serve" in the United States military during the Vietnam crisis. Since that time, the network has grown considerably in hours of operation and services

provided, and consisting of a dedicated group of radio amateurs who unselfishly volunteer their time, equipment, and efforts to serve and assist those in need of communications from foreign countries and the high seas. Our primary purpose now is that of handling legal third party traffic from maritime mobiles, both pleasure and commercial, and overseas-deployed military personnel. We also help missionaries in foreign countries, and volunteer net control stations from throughout North America maintain the network. Furthermore, these stations are assisted by relay stations to ensure total coverage of the Atlantic ocean, Mediterranean and Caribbean seas, and eastern Pacific ocean.

The network has been formally recognized for its work in handling emergency traffic by the U.S. Department of Homeland Security, the United States Coast Guard and the National Weather Service.

The Maritime Mobile Service Network has grown in hours of operation from a five-hour net operating seven days a week to the nine-hour format today, which is from 12:00 noon to 10:00 PM Eastern Daylight Time and until 9:00 PM during standard time. In the early years, phone patch traffic was heavy, with estimates of over 10,000 pieces of traffic handled each year from 1968-1977. One of our net control stations, Dave Wagner, WA2DXQ, in Fort Lauderdale, Florida, ran well over 1000 phone patches during the two-year period of 1977-1978, mostly to United States Navy (USN) ships in the Mediterranean and Red Sea but also to a few missionaries and both private and commercial vessels. Though the need for phone patch traffic has diminished considerably over the past 15 to 20 years, the need is still there. If it hadn't been for a number of our net control stations equipped with a phone patch, some rescues the net's been involved in would not have been as successful.

Many mariners in the Caribbean Islands, Central and South America and the Gulf of Mexico view the network as a resource for weather information as well as a safety valve and trusted contact point for essential communications. In 2003, Frank Kelley, N3FK (SK), said "I would be remiss if I didn't say something about a great lady who used the net to get assistance with numerous medical problems. She was Ruth Paz, HR2RP, located in San Pedro Sula, Honduras." Frank was stationed in Panama from 1975-1977, and Ruth was a net control station for the MMSN during that time. Continuing, he stated "Ruth was a nurse and was the only medical person in her area. She used the net to get medical advice, medical evacuations and medicine in and out of Honduras. While I was stationed in the Canal Zone, Ruth ran many patches to the Gorgas Army Hospital in Panama. She used the tropical disease section on Gorgas to save and help many people from Honduras, many of whom were bitten by exotic creatures. At the time Gorgas was the place for anything tropical." Today, phone patch traffic has subsided, but there remain some net control stations to help many of the missionaries and doctors in various locations with phone patching for assistance they can't otherwise obtain. Since March 2000, the net's been featured in many publications such as QST, publicizing the help

and rescues of people in life and death situations.

Notable Rescues

There have been two notable rescues effected by MMSN nearly one year apart: the S/V Hayat on March 27, 2000 off the northeast coast of Honduras, and the S/V Lorna on March 20, 2001, off the northeast coast of Venezuela and west of Trinidad. In each case, one passenger was seriously injured from gun fire from modern day pirates and thankfully both survived.

The Maritime Mobile Service Network has a legacy of service that will continue due to the selfless volunteer Amateur Radio operators donating their time to train and be ready to help each and every day. Without such devotion, the net wouldn't be able to do what it does. As a member, I want to say a big thank you to all who've served in the past as well as those serving now. It's been a great 45 years, and may the net last to see another 45 years and more.

In honor of celebrating our 45th anniversary, the Maritime Mobile Service Network <http://www.mmsn.org/> unveiled a new website design as well as announced our presence on FaceBook. We welcome everyone to visit our new-look website as well as signing our new "Guest Book" and liking us on FaceBook. -- Bobby Graves, KB5HAV, Brandon, Mississippi

==> INSIGHT: NEW FM-ONLY CATEGORY SUPPORTS ARES INTERESTS

The ARRL January VHF Contest offers an FM-Only category for the first time. The goal is, of course, to encourage new hams that have never used the "weak signal" modes to do a bit of DXing and find out what their stations are capable of. Contests are a terrific way to do just that but communicating with the target audience requires understanding their needs and expectations. Les Rayburn, N1LF, posted a thoughtful discussion on this topic to the VHF contesting reflector <http://lists.contesting.com/mailman/listinfo/VHFcontesting> - it is food for thought for all of us who participate in both emcomm and radiosport. Thanks, Les. -- Ward Silver, N0AX, Editor, ARRL Contest Update, January 2, 2013, issue

_____

As the previous Section Emergency Coordinator for Alabama, I understood that FM simplex capability translated to a greater level of capability during an emergency. Amateurs who improved their stations on simplex, also benefited by being able to reach more distant repeaters, which is a huge advantage during severe weather. Some "lessons learned" from cross-promoting FM activity during VHF contests were:
1) Tailor your message to your audience. I didn't try to pitch it as a "contest" as much as an exercise when talking to ARES, SKYWARN, and CERT groups. We encouraged them to test their ability to communicate without the aid of a repeater, as they might have to do in an emergency. We also encouraged Field Day-type operations from high locations.

2) Concentrating activity in a three- to five-hour period is going to be more successful than just putting out the dates and times for a two-day long contest. Nothing is less interesting than "dead air" to a non-contester. (It's not all that interesting to a contester, either - N0AX.)
3) It's vital that weak-signal operators monitor the FM simplex channels and participate during those concentrated activity periods. I tried to utilize the afternoon hours on Saturday, when conditions are poorest---so that operators didn't miss out on a lot of contacts on SSB and CW but that doesn't work well in June when six meters is liable to be open.
The point is that weak-signal operators often turn their nose up at FM - and this hurts the effort. If you give a new operator a taste of DX, they may become hooked for life. The best way to accomplish this is to get those "monster signals" active on FM. If your local big gun doesn't

support FM contesting, then try to change their mind on the topic. You should hear some of the reactions you get from newcomers when they discover they can communicate 75-100 miles or more on their FM rig without a repeater. This is easily possible with a high-performance weak-signal station on one end of the contact.
4) Talk up the event on your local FM nets, club meetings, etc. Tailor the message to the crowd. A DX club isn't going to respond to the same "pitch" as your local ARES team.
5) Poll your club and see who has 222 MHz FM capability. I always make it a point to schedule contacts with those operators on 223.5 MHz simplex.
6) In the last few days before the contest, make a lot of calls on 146.52 MHz and talk to operators there about the contest. They understand the concept of simplex and use it often. They're your best candidates for participation in the contest. Nothing in the rules forbids promoting the contest on 146.52 prior to the event!
7) Don't get discouraged by the naysayers. The FM-Only category is a great idea, but it needs the active support of the weak signal community to work! -- Les Rayburn, N1LF, reprinted from the January 2, 2013, issue of the ARRL Contest Update

==> LETTERS: TERT RESPONSE AND MUTUAL AID IN 911 DISPATCH COMMUNITY

You might find this article from APCO of interest. It's about the deployment (and the process) of additional personnel from unaffected 911 call centers to areas affected by storm Sandy.
http://psc.apcointl.org/2012/12/20/ny-tert-response-to-hurricane-sandy/
-- Robert Bauer, KC4HM, ARRL Life Member, kc4hm@arrl.net

==> K5GM HONORED FOR NEARLY 30 YEARS OF SERVICE TO NTS, TCC

Pete Jordahl, K5GM, of Austin, Texas, who recently retired as the ARRL National Traffic System, Cycle 4, Transcontinental Corps Director in the Central Area, was honored recently by the ARRL NTS Central Area Staff and ARRL Headquarters for his 29 plus years of service as a TCC Director.

The duties of this position include assuring that Transcontinental Corps stations are available seven days a week to make schedules with TCC stations in other parts of the United States and Canada to facilitate the movement of third party messages in service to the public. Pete has been a faithful and reliable member of the staff, and he made sure these positions were covered every day. He often covered positions himself when operator power was short. Pete retired from his position on August 1, 2012.

Jordahl received a plaque for his diligent and reliable service to ARRL and the public. Thank you, Pete! -- Richard Webb, NF5B, Chair, NTS Central Area Staff

==> NATIONAL TRAFFIC SYSTEM: BPL COUNTS THAT "COUNT"

The Counting Basics. From its inception, the intent of the Brass Pounders League (BPL) monthly award has been to recognize individual operator dedication in "handling" a significant amount of messages in proper radiogram format. An operator's monthly BPL count is self-reported - without verification -- to the Section Manager (or Section Traffic Manager) who issues award certificates and reports operator results to ARRL Headquarters. Summary results are published in QST. BPL awardee-operators attaining three (3) monthly BPL awards are eligible for the coveted medallion issued by League HQ. This article restates the long-standing policy on the proper BPL counting to be used in submitting monthly counts for the award.

The BPL award is given for each operator reporting at least 500 messages each month (total of received, sent, delivered and originated), or at least 100 originated messages, and is based on counting "points" for particular categories of message-handling:

Received - One point for each message in proper format received by the operator over the air. This point is earned whether received for relaying (sending) or for delivery to a third party (not including the receiving operator) addressee. A message received by the operator addressed to that operator counts as a received point.

Sent - One point for each properly formatted message sent by the operator over the air to another operator. This point is earned either when the operator is relaying a message, or sending an originated message (see below). A message that the operator initiates and sends only counts as a sent message point.

Delivered - One point for each message in proper format delivered by the operator to a third party addressee. This point is counted as an "off-the-air" function. If the message is addressed to the receiving station, it only counts as a received message, not also a delivered message.

Originated - Extra credit of one point is given for each message from a third party for sending by the operator over the air in the proper format. Originated messages earning the extra point are an "off-the-air" function in recognition of the public service value. BPL

counts should not include the originated extra point for messages created by the sending operator (not a third party).

Digital Station Counting

Beginning in the late 80s and early 90s, digital-mode store-and-forward operations (packet BBS and HF MBO stations) emerged as an effective method for rapidly relaying messages. Auto-forwarding of messages posted on such stations typically involves no operator intervention in actually "handling" the relay of each message. An initial NTS policy position on the proper BPL counting by auto-receiving/forwarded stations was published by HQ staff in the August 1990 issue of QST (at page 68), providing, in part: "The award is limited to those who actively, manually perform relay functions using their key, paddle, mike or keyboard. It is not for managers of automated stations where traffic introduced by others passes automatically with no operator intervention." (See also the ARRL Public Service Communications Manual, Section 10.2; and the ARRL Operating Manual for Radio Amateurs, 10th ed., at page 5-17.) This position was validated by the ARRL Board standing committee having jurisdiction over the National Traffic System.

In the March 1991 issue of QST (at page 70), additional guidelines sought to clarify the issue, adding, in part: "Installing and maintaining a voice repeater is a big job, as is maintaining a packet, AMTOR or other type of BBS. But it's the message handling itself, not the provision of the medium that we recognize with the BPL. BBS System Operators (SysOps) are not excluded from BPL recognition . . . A SysOp who manually transfers a radiogram from an NTS net . . . into his BBS files for autoforwarding, earns two BPL points: one for receiving it on the net and the second for "sending" it to the BBS for further relay down the road. When a radiogram is posted on the BBS and the SysOp takes it for delivery or relay to a local net, he may count one point for receiving the message over Amateur Radio and one point for the delivery . . . or for sending, if he transmits it to another amateur manually, not automatically. If the SysOp has to manually modify a radiogram posted by a user (to edit an improperly constructed header, for instance), we allow two BPL points - one for receiving it and one for sending it. The key is manual intervention, which we reward with BPL credits." Parallel articles emphasizing this policy guidance appeared in several additional League publications that same year.

Counts Need to "Count"

For the BPL award (and the Medallion) to retain its distinguished character, it is important that volunteer report integrity remain true to the award's intent by proper and consistent counting. It is hoped that this restatement will help serve that end. This guidance will be added to the next edition of the Public Service Communications Manual. - Rob Griffin, K6YR, Chairman, Pacific Area Staff, National Traffic System and Santa Barbara Section Manager; and Steve Ewald, WV1X, ARRL Headquarters

The Indian River County (Florida) Amateur Radio Emergency Service held their annual holiday party on December 12, 2012 -- 12/12/12. When it was learned that members Eric Larabell, KF4UJO, and Lisa Lindner, KK4CIE, were being married earlier that day the party turned into a surprise wedding reception, complete with wedding cake and champagne toast! - Sherri Brower, W4STB, Southern Florida Section Manager

==> K1CE FOR A FINAL

I almost hate to bring this up after such a devastating 2012 hurricane season - the loss of life and property was of epic proportions - but NOW is the peacetime to prepare for this year's season, which runs from June 30 to November 30. The National Hurricane Conference (March 25-28, New Orleans) and the Governor's Hurricane Conference (Florida, May 5-10, Ft. Lauderdale) will once again be good venues for learning and training, planning and networking. Meeting details to come. Attendees can count on a robust Amateur Radio presence, which is sure to include major related forums and coffee klatches, exhibits and presentations. And, of course, get your stations ready, and prepare your household and neighborhood disaster response and survival kits and plans. Now is the time to start a CERT team in your neighborhood - see January QST's Public Service column on that topic for ideas.

Last but not least, remember our friends and colleagues in other hurricane-prone areas of Region 2 - Bermuda, Bahamas, the Caribbean, Central America, and Mexico - as you plan and prepare your hurricane response capability for this season coming up. I just returned from a week of touring several Caribbean island-nations, and listened to their residents talk of more severe weather and storms from climate change, destruction and lives lost from previous storms and how they count on the United States for aid and assistance following such calamities. They are poorer than us, and do not have the response planning and resources that we have here in the U.S. Be prepared to assist on nets such as the Hurricane Watch Net, VoIP Hurricane Net, and the network operations of WX4NHC, the famous group of operators at the National Hurricane Center in Miami, Florida, whether it is relaying transmissions and messages or standing by and conveying situation reports from affected stations to the media to make the public aware of the plights of our fellow radio amateurs and the residents of other affected countries. But, always bear in mind perhaps the Number One tenet in disaster response and emergency communications: Never transmit unless instructed to do so by net control or stations in the affected areas. Listen more, transmit only if truly necessary.

Hope to see some of you at the upcoming hurricane conferences this spring. Happy New Year! 73, Rick K1CE

HamRadioNow: Gary and the Giz on the Fizz

Posted: 14 Jan 2013 02:01 PM PST
http://forums.qrz.com/showthread.php?375800-HamRadioNow-Gary-and-the-Giz-on-the-Fizz&goto=newpost

HAMRADIONOW.tv

Episodes 50

Gary and the Giz on the Fizz

Fair warning: this is for TWiT Fans, KN4AQ fans, or both. Gary wangled himself a guest appearance as the "Chatroom Celebrity of the Week" on the Giz Fizz. That's the 'show' hosted by Dick DeBartolo, the Giz Wiz, a program that follows "The Tech Guy" on Saturday on TWiT. It almost didn't happen! See all the nail-biting drama, and get some background on Gary's so-called career in show-biz.

Here are some links to other places that HAMRADIONOW intersected with TWiT:

The TWiT Tour. Gary and Cyndi visited the TWiT Brickhouse in early 2012, snagged in interview with Leo Laporte W6TWT, and got an exclusive and extensive tour of the TWiT studios from Studio Manager JammerB (John Slanina).
The Tech Guy. Early on in the annals of HAMRADIONOW, Gary got in on the phone lines to talk to Leo on his Tech Guy radio show. Leo gave us advice on places to host the video episodes (Blip.tv, where we host the show today, in addition to YouTube). And he gave the show a great plug.
Ham Nation. Gary was the original "Guest Host" on Ham Nation in 2011, taking over the show along with Gordo and George when Bob Hiel was out of town. His eight appearances are scattered from Episode 5 through Episode 38. You can find direct links on the HAMRADIONOW.tv home page.

Watch this episode at our web site, www.HamRadioNow.tv.

2013 AM Rally Announcement - Feb 16th-17th

Posted: 16 Jan 2013 04:42 AM PST
http://forums.qrz.com/showthread.php?375992-2013-AM-Rally-Announcement-Feb-16th-17th&goto=newpost

Announcing the 2013

Amplitude Modulation Transmitter Rally

Contest and Operating Event On the HF Amateur Bands (160 meters to 10 meters)

Date: Saturday, February 16th 6:00AM EST to

Monday, February 18th 02:00AM EST (11:00 PM PST Sunday, 2/17)

Sponsored by: AMFone.net (http://www.amfone.net) - Your definitive source for AM and related information and by Radio Engineering Associates (http://www.radioassociates.com) Products for the professional and radio amateur.

The purpose of this event is to encourage the use of Amplitude Modulation on the Amateur Radio Bands, and to highlight various types of AM equipment in use today. This event is open to any and all radio amateurs who are running full carrier amplitude modulation (standard AM), and any type of equipment may be used.

Commonly used AM Frequencies: 160 Meters: 1880-1885, 1930, 1945, 1975-1995.

80 Meters: 3730-3740, 3870-3885. 40 Meters: 7160, 7280-7295. 20 Meters: 14286.

15 Meters: 21425 10 Meters: 29000-29200.

These commonly used frequencies can be good starting points. As activity grows, expand to other frequencies to prevent congestion and excessively large round tables. As always, PLEASE be considerate of existing QSOs and Nets, and ensure that the frequency is clear before calling ☐CQ, the A.M. Transmitter Rally☐.

Points are to be awarded as follows:

a) 1 point for each station worked a specific band. If you work the same station on more than one band, you get 1 point for each band.

b) 1 point for each state, country or Canadian Province worked.

Note: Both you and the station with whom you are QSOing must be using AM.

Logging: Note, the log format is the same as last year□s event. We also have free logging software (see below).

The following information must be included in your log for each contact to be counted:

Time (local), Frequency, Call Sign, First Name, Their Location (city, state, country), Their Equipment.

Log Format: Each item should appear in a separate column, and in the column order shown below:

Logging Notes: The CAT: line is the station category (a-g), and should be included in the first column (somewhere) if the station is to be entered in a particular category. Example: CAT:A

Logging States and Countries: The □State/Province□ log column must contain the 2 letter state or Canadian province code unless the country is not Canada or the US. In these instances, the 2 letter country code must be entered in the □Country□ column. We use software that reads the logs, and will look for 2 letter state and country codes, and add them into your score.

Free, simple logging software: We have created a free, simple to use logging program to facilitate logging for the A.M.T.R. and, if you wish, it will automatically upload your log to our logging server. This program is available for free download. See www.classeradio.com/amtrlog.htm

Using Excel for logging: Template logs are here: www.classeradio.com/amtrlog.xls (excel)

www.classeradio.com/amtrlog.csv (csv). Any program that can generate a comma separated values file in the order shown in the logging example may be used.

à Please let us know about anything outstanding, unusual or unique you hear.

A description of your station equipment, power and any other interesting features should also be included as part of your submission along with your mailing and email addresses. Pictures may also be emailed to us.

If at all possible, please use electronic submission of logs using our Logging program, Excel or CSV (comma separated values) formats. Email Excel or CSV logs to: amtr@radioassociates.com

If you do not own, or cannot use a computer, paper logs may be mailed to: Radio Engineering Associates

AMTR
Logging

79 Tyler Road

Townsend, MA 01469

Recognition will be given for the following areas:

1) Overall highest points: 1st, 2nd and 3rd place (all scores will be published)

2) Highest points in each of the following categories for stations as follows (all scores will be published):

a) Using a classic commercial AM Amateur transmitter (KW1, Desk KW, Collins 32V3, DX-100, etc.)

b) Using a converted AM Broadcast Transmitter.

c) Using a military transmitter.

d) Using a home built vacuum tube transmitter (vacuum tubes in the RF amplifier and modulator).

e) Using a home built solid state transmitter.

f) Using a low level transmitter and linear amplifier.

g) Using anything not covered by the above.

Note: Recognition will be given to stations that show up in many other folks☐ logs, even if these operators did not send in a log themselves. This is to emphasize the spirit and importance of operating during the event, even if one is not actively participating in the ☐contest☐.

In addition to points, recognitions will be made on an ad-hoc basis, depending on the specific situation. Examples of these are:

a) Unusually good operating practices, facilitating contacts, etc.

b) Very unusual or unique equipment

c) Most clip leads in the transmitter

d) Most hum or incidental FM

e) Longest transmission heard

f) Highest weight to power ratio

Etc, etc, etc.

MMMonVHF Newsletter No. 1/ WEEK 03 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2013-01-16
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

144.370 is the general calling frequency for MS in Region 1. However,
in many countries this particular frequency suffers from birdies,
often related to Cable TV networks. An option would be to shift the
general calling frequency to another one (144.375 or 144.365),
but in order to start this initiative I would like to inquire whether
or not the "370 birdy" is a general phenomena experienced throughout Europe.
If not, moving from 370 to another frequency might introduce new birdies
to stations who do not experience issues now.

In order to make a thorough inventory, I need your assistance:

Please send me an email:
1. Tell me if you like the general calling frequency to be shifted
(or if you do NOT like it to be shifted)
2. Would 365 and/or 375 be a suitable alternative?
3. Please include call sign and locator.

send to: pa3biy at ziggo dot nl

Many thanks,

Peter, PA3BIY

Best VHF DX Expedition of the Year

The MMMonVHF VHF-DX-Portal is happy to invite all VHF enthusiasts and VHF-DX'ers
to join the survey to find the "Best VHF DX Expedition of the Year"
The aim of the survey is to thank the very hard effort of those, who organized
and carried out so many nice expeditions and trips all around the world on the

VHF bands in the past year.
Participation Period: 01. January last year to 31. December last year
Voting Period: 01. January current year to 20. January current year

Please login and take a minute to participate at the voting.

Working K5QE in the ARRL Jan VHF contest from EM31CJ
Hello to everyone in the EME community. This year, the ARRL January
VHF Contest will be held Jan 19th and 20th. We want to work as many EME
stations on 2M and 432 as we can to increase our grid count. Please help
us with this event by working us on JT65b or CW. Thank you very much.
The 2M EME station is 8 x 18 all H-pol with a full 1500W of output power
and a tower mounted preamp. As usual, we will be operating 144.142MHz Second
Sequence. Our moonrise times are really bad for this contest. The contest
starts at 1900Z on Saturday, but the moon rises at 1815Z just before the
contest starts. So, on Saturday, we will be looking for callers on 2M EME,
but we will not be able to do much CQing because the tropo station needs to
be working rovers and fixed stations. IF we see someone calling us on Saturday,
we will respond as soon as we can. Our moonset is at 0730Z(=1:30AM Sunday night
local time). For the last few hours of our moon time, we will be looking
specifically for US, JA, VK, and ZL stations, so if you are in Oceania or
the US, look for us then. On Sunday, Jan 20th, we have moonrise at
1845Z(= 12:45PM local time). The mid afternoon in the contest is usually a
very slow time, so we are going to concentrate on EME from our moonrise until
the end of the contest, which is technically 0400Z on Monday(=10PM local time).
Hence US stations and Oceania stations can work us right up to the end of the contest.
Because we are a Multi-Multi station, we will be watching the N0UK EME reflector.
Because of the ARRL's rules, we can not post on the logger. If you see us, please
spot us on the N0UK logger along with our frequency. If you are not in the contest,
you can post freely to the reflectors. So, you can talk to us, we just can't talk back.
If you don&#65533;t see us on 144.142MHz, please check back later because we may just be
doing
a bit of Search & Pounce or working a local station on tropo.
We also have a good 432 EME station. The TX power is 1KW and the antenna is 16 x 28el M2
all H-pol.
This antenna works very well. So, if you have anything on 432, look for us on 432.070MHz.
IF Faraday is not bad, we have a good chance to work you. We will take the Second Sequence

and we will call CQ whenever we can. If you can, please try to work us on 432. IF we hear a CW caller on 432, we will switch to CW and make every effort to work you.
Good luck to all in the contest and we hope to see you there. Thank you.

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV from 4 April to 18 April 2013 however, for Central Europe the EME window will open only around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.

Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will
be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

A New Website for the RSGB:

Posted: 16 Jan 2013 03:25 AM PST
http://www.eham.net/articles/29640

A team of volunteers lead by Alan Messenger, G0TLK is well on the way to developing a new website. The intention is that the new site should replace the existing one later in the year and we are now at the stage where your input is needed. We need your comments on the appeal and content of the new site and what additional features it should provide and, importantly, any bugs that you find. The more Member feedback we receive the better the final version will be and, after you have visited the site, a form is provide to capture your comments. We would stress that this is a Beta or 'production prototype' version. It is by no means complete and there is already a list of enhancements in train for inclusion in the coming weeks.

RNLI Barmouth Receives a Fantastic Donation from M.A.R.S:

Posted: 16 Jan 2013 03:23 AM PST
http://www.eham.net/articles/29639

RNLI Barmouth receives a fantastic donation from M.A.R.S. Members of Meirion Amateur Radio Society recently presented a cheque for the amazing amount of 520 to the Chairman of RNLI Barmouth and District Fundraisers, Wendy Ponsford. M.A.R.S. is a small club that was formed to promote amateur radio in south Gwynedd. The membership comes from a wide range of backgrounds and ages and is an exceptionally enthusiastic and active society. Last year saw the beginning of a partnership between M.A.R.S. and the Barmouth branch of the RNLI. During the last week of January 2009 M.A.R.S. worked very hard raising money for the RNLI by making contact with as many other amateur radio enthusiasts around the world as they were able to in the allotted time. They worked through the night and amassed the amazing sum of 407 that was much more than they had expected.

Tony's 10 Metre Band Report

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/0IJo35I4xJA/january_17.htm?utm_source=feedburner&utm_medium=email

Not a bad week at all, I had to raise the entry to the list to 5 or more contacts. XV1X (Vietnam) unsurprisingly did well all week along with Z81Z (South Sudan), JX9JKA (Jan Mayen Is) and RI1ANF (South Shetlands, Antarctica) and others. Sunday afternoon from here in the UK was good to North USA and Canada

HK, COLOMBIA
Lothar,DK8LRF, will show up again as HK3JCL from Restrepo at the foot of the Cordillera Oriental (Loc FJ34fg) working in SSB on 10m/15m/17m/20m/40m between January 18 and March 31. QSL via homecall.
See also: http://qrz.com/db/HK3JCL

I, ITALY
The special event station II7IADO (ARMI-975) is active until March 31. QSL via ClubLog (OQRS), LoTW. See also: http://www.armi.ta.it

KH0, NORTHERN MARIANA ISLANDS, OC-086
Joe,JA1LZR, tries to work North America in CW on the lowbands signing NH0Z from Jan 22-28. He also plans to join the CQWW 160m Contest. QSL via JJ2VLY.

PA, THE NETHERLANDS
The Straight Key Century Club (SKCC) member Jan,PA3CLQ (SKCC #2765) has the special callsign PH6SKCC (SKCC #5031) from Jan 1-28. Jan is also using the club call PI4OTC of the "Netherlands Old Timers Club" and the club call PI4RAG of the "Radio Amateurs Geertruidenberg". He is working in CW on 80m and 40m. QSLs via homecall. See: http://www.skccgroup.com

PY, BRAZIL
The special event station PW7F celebrates the 413th anniversary of the "Fortaleza dos Reis Magos" in SSB, CW and digital modes on 10m-160m on Jan 18/19/20. OPs will be Ed,PS7DX, Nazareno,PS7NN, Carlos,PS7KC, Mac,PS7GL, and Nat,PS7HD. QSL via PS7HD. See: http://www.ps7dx.qsl.br

ST, SUDAN
Lourens,ZS6AKB, is currently active as ST2/ZS6AKB when mobile in the Darfur region. He normally lives in a small suburb of a town called Springs approx. 70 km east of Johannesburg. The length of his stay is not known. He was spotted on 14181 kHz on Jan 10 from 1600-1640 UTC using a FT857 with a Tarrheel 11 antenna. QSL via homecall.

SU, EGYPT
Gerd,SU/DJ5IW, will be QRV again from Egypt on 20m and above starting in the second half of January. The manmade noise in SU is S9 which makes it very difficult to hear weak stations. QSL via homecall.

TT, CHAD
Sergiy,US3EZ, will be a very coveted QSO partner signing TT8/US3EZ until March. QSL via homecall.

UA, RUSSIA
Several special event stations are active (or will be) from Russia:
UE70Q Jan 18 until Mar 2

Occasion: 70th anniversary of the liberation of Voronezh city
UE70DP until Feb 23
Occasion: Victory of the Soviet troops over Nazi forces at Stalingrad
UE75VV until Jan 31
Occasion: 75th birthday of V.S. Vysotsky
RK70SF until Feb 23
Occasion: 70th anniversary of the liberation from the Nazi forces
RA70MK until Feb 20
Occasion: 70th anniversary of the beginning of the defeat of the
Nazi forces at Stalingrad
R70SGG until Feb 20
Occasion: 70th anniversary of the beginning of the defeat of the
Nazi forces at Stalingrad
R350FP until Mar 31
Occasion: 350th anniversary of Pensa city
No QSL route is known for these stations but you may try it via bureau.

V3, BELIZE
Gerd,DJ4KW, is signing V31YN on 160m-10m till Jan 24. QSL via homecall.

VP8/A, ANTARCTICA, AN-016
Craig,VK6JJJ, is a member of the "Antarctica Australian National
Antarctic Research Expedition 2013/14" and will be active as VK0JJJ
from Mawson Base in the Mac Robertson Land until January 2014.
His equipment includes a SDR transceiver Flex 5000A, an Emtron DX-2SP
linear amplifiers, a MFJ-986 tuner and a Heil Headset. His antenna is
a sloping Delta Loop. He will work with QRO on 160m-6m with emphasis
put on 6m in SSB and digital modes. QSL via K7CO.

XV, LAOS
The license for Bruce,XW4XR, has been renewed and he is active before
his return to Vietnam. He plans to repair his antennas for the lowbands
and will travel to Laos several times throughout the year. Bruce is
working in Vietnam and holds the callsign 3W3B. QSLs via E21EIC.

YA, AFGHANISTAN
Eric,K9GY (T6MO), is back in Afghanistan now. He brought some new
lowband antennas and hopes to show up on the bands soon. If possible
he could join the CQWW 160m Contest at the end of January. He has to
return to the US in early May, perhaps he manages to visit Dayton.

Iliam,LZ1ZF (T6LG), tries to hand out band points on the lowbands
every day for the next few months. He has installed some new receiving
antennas but will leave the country in early March. QSL via homecall.
See also: http://t6lg.com

YU, SERBIA
The "Old Timers Club" of the Amateur Radio Union of Serbia (YU0OTC)
celebrates its 15th anniversary in 2013 and plans to use the special
call YU15OTC almost every day in all modes on all bands. QSL via YU6A.

Z8, SOUTH SUDAN
Ken,K4ZW, is active in CW on 80m-10m signing Z81Z from Juba. The length
of his stay is not known. QSL direct via homecall, LoTW.

AFRICAN TOUR: Peter,HA3AUI, is once again heading to Western Africa. Listen
for him to be active as 6W2SC from Senegal and J5UAP from Guinea-Bissau
between Jan 17 and Mar 10. Peter has used these callsigns before.
His equipment includes an Elecraft K3 with 500 watts, a Spiderbeam and
verticals. He will work mainly in CW and digital modes on 40m-10m but
may work also in other modes upon request. He also plans to activate
some IOTAs and WFF references. See also: http://cqafrica.net
QSL direct via HA3AUI or use his OQRS (available after his return).

DX Sound Clips: Tom (K8CX) has put his collection of DX sound clips of
135 major DXpeditions of the past 15 years online. He is still looking
for more clips (k8cx@hamgallery.com). See also: http://hamgallery.com

DXCC: Following DXpedition has been approved for DXCC credit: 3D2C

Postage info: Bill,W9OL, published a list concerning IRCs and Greenstamps at
http://www.qsl.net/w9ol/IRC_Chart.htm

Call for donations for the LU6W DXpedition: The German DX Foundation (GDXF)
also supported the LU6W DXpedition, which activated the last
South American IOTA group SA-096 for the first time a few days ago.
The experienced crew with Cezar,VE3LYC, Johan,PA3EXX, and members
of the Radio Club Puerto Madryn had to fight with many difficulties
on Escondida Island. A team and a boat member were injured so that they
had to return for medical reasons. The equipment on the island was
secured provisionally and was a robbery of the heavy seas. The loss of
multiple radios, antennas, a laptop and other equipment is very hard
for the team. More details can be read at: http://lu8w.yosalite.com
The GDXF invites all who can and want to help the LU6W team with
donations. All donations received will be forwarded and published.
Please use following account for donations from Europe:
BIC: GENODE61NGD
IBAN: DE11 6729 1700 0026 2036 00
Purpose: LU6W help
Dr. Lutz D. Schmadel, DK8UH, secretary, GDXF
PayPal: schmadel@ari.uni-heidelberg.de

World Castles Award Program: The "World Castles Award Program" is existing
for four years now. For this reason they are celebrating the
WCA Happy Birthday (WCA HBD) on Jan 19/20. See: http://www.wcagroup.org

WAP Directories: The new release of the WAP WADA and WAP WADA Directories
as well as the WAP Check Program of IK6CAC have been uploaded to the
WAP website: http://www.waponline.it

SILENT KEY: John Dack,W7KH (ex W7GUV), passed away at the age of 91 years
on Jan 7. John was licensed since 1938 and sat at the top of DXCC Mixed
standings with 398 DXCC entities.
Our condolences and sympathy are with his family and friends.
We do not want to be sad that we lost him, but grateful that we could

get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jan 19 LZ Open Contest
Jan 19/20 HA DX Contest
Jan 19/20 North American QSO Party

The K3Y QRP Challenge is not an official part of the SKCC anymore. However,
it will take place on Jan 18, 0001 UTC until Jan 31, 2359 UTC.
See also: http://www.qrpchallenge.com

The results of the CQMM DX Contest (Apr 12-22, 2012) were published online:
http://www.cwjf.com.br

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-016, FR, Reunion Island: Pierre,FR/F8APV, and Stephane,FR/F8EOI, will be
QRV from Reunion Island (DIFO FR-001, WFF FFF-011, WLOTA 1812) between
Jan 21 and Feb 9. They will work with bud dipoles on 40m-10m with
emphasis on 30m (CW) and 20m (SSB). QSLs via homecalls (bureau/direct).
Sked requests are welcome via: pierre.goasguen.f8apv@gmail.com

AS-101, HS, Malay Peninsula East group: Eddy,ON4AFU, plans to visit
Koh Samui (WLOTA 1384) from Jan 21 until Feb 18. He will be QRV as
HS0ZJF/8 with 100 watts and wire antenna only in CW on 40m-10m.
He also plans to activate the IOTA group AS-126 later.
More information will follow in DXNL 1820. QSL via ON4AFU.

EU-089, CU8, Western group: Hermann,HB9CRV, and Rudolf,HB9CQL, will show up
from Flores Island (WLOTA 0947) between Jan 22 and Feb 8. They will use
the callsigns CT8/HB9CQL and CT8/CT3FN until Jan 25 and after that
CR2V especially on the lowbands. QSL via HB9CRV.

NA-001, C6, Great Bahama Bank group: George,W4BUW (C6AGH),
Joseph,W8GEX (C6DX), Janet,W8CAA (C6AYL), and Joe,AA4NN (C6A/AA4NN),
chose Great Exuma for their next DXpedition from Jan 20-27. They want
to work with three stations in SSB, CW and RTTY on 160m-10m.
QSLs via homecalls.

NA-085, W4, Florida State North West (Bay to Wakulla County) group:
Dennis,WA2USA/4, will be active from St. George Island (USi FL0076S)
from Jan 20 until Feb 27. He also plans to activate the lighthouse
there. His main activities will be in CW on 30m, 20m and 15m and
in SSB on 40m and 20m. He will work on all bands during the upcoming
ARRL International DX CW Contest and the NAQP RTTY Contest.

See also: http://wa2usa.com

NA-101, J7, Dominica: Bernie,W3UR, and Tony,N3ME, and their wives are
planning to visit Dominica Island from Jan 22 until Feb 11. Besides of
relaxing they will work as J76A and J77A in holiday style where the
numbers 76 and 77 correspond to the year in which both got their first
licenses. They will work with Elecraft K3 and wires in CW, SSB and RTTY
on 160m-6m and want to take part in the WPX RTTY Contest as J76A.
QSL for J76A via N3ME and for J77A via W3UR.

NA-143, W5, Texas State East (Matagorda to Jefferson County) group:
Joe,K5KUA/5, will be QRV again from Galveston Island (USi TX001S)
working in CW on 40m-10m from Jan 18-21. QSL via K5KUA (bureau/direct).

OC-073, JD1, Minami Torishima: Take,JG8NQJ/JD1, is handing out IOTA points
from Marcus Island (Loc QL64xg) until mid April. He is working in a
meteorological base and only active on the bands during his spare time.
His focus lies in CW on 17m and also on 15m/12m/10m in CW.
Bureau QSLs via JG8NQJ. Direct QSLs via JA8CJY.
Log search: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

SA-050, CE8/9, Magallanes & Antartica Chilena Province group: Jose,CE8DMT,
is active from Puerto Williams on Navarino Island. The length of his
stay is not known but he has been spotted in SSB on 40m and 15m.
QSL via homecall.

NON-IOTA: Gil,F4FET/p, is activating the lighthouse "Boulogne sur mer,
south west pier" (ARLHS FRA-089) only in SSB on the HF bands until
Jan 31. QSO's count also for WFF reference FFF-043. QSL via homecall.

WFF activities:
6WFF: Peter,HA3AUI, is working from Senegal again in January. He will
try to work as 6W2SC/p from 6WFF-005 on Jan 16/17.
QSL direct via HA3AUI or use his OQRS (available after his return).

==> + 2012 MARKS ALL-TIME HIGH FOR AMATEUR RADIO LICENSES

As 2012 came to a close, ARRL VEC Manager Maria Somma, AB1FM, had a
good reason to cheer: The number of radio amateurs in the US reached an
all-time high of almost 710,000. "2012 was definitely a banner year for
the number of Amateur Radio operators here in the US," she said. "It is
amazing to see these new numbers and to know that Amateur Radio is
experiencing such a healthy trend."

In looking at new and upgraded licenses, as well as licensees per
ARRL Division, Somma also crunched the numbers looking for growth
within each license class -- and all of Amateur Radio -- over the last
40 years. "This is an all-time high for Technician, General and Amateur
Extra class licensees," she said. "When looking at the three current
license classes, the number of Technicians, Generals and Amateur Extras
peaked in December at 345,369, 163,370 and 130,736, respectively."
```

Somma explained that the total number of US amateurs in the FCC database also continues to grow each year: "As of December 31, 2012, the number of licensees reached an all-time high of 709,575; year-end totals were 702,056 for 2011 and 696,041 for 2010. The number of licensees increased at an average rate of 21 per day, while the number of US licensees has increased by 7 percent since 2008!" More than 3000 new licenses were issued in 2012 than in 2011, while upgraded license activity remained steady in 2012. Read more here <http://www.arrl.org/news/2012-marks-all-time-high-for-amateur-radio-licenses>.

==> + ON THE AIR: 2012 BROUGHT INCREASE IN DXCC APPLICATIONS, ARRL QSL BUREAU CARD PROCESSING

With the coming of more sunspots comes more DX. And when more amateurs work DX, the ARRL's Membership and Volunteer Programs Department -- especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus -- goes into high gear. "In 2012, we saw an increase in the number of cards received from ARRL members that were sent to foreign QSL bureaus, as well as the number of cards we sent out to the bureaus," said Membership and Volunteer Programs Administrative Manager Sharon Taratula. "In addition, the number of DXCC applications -- including those for initial awards and endorsements -- also increased." Read more here <http://www.arrl.org/news/2012-brought-increase-in-dxcc-applications-arrl-qsl-bureau-card-processing>.

==> + ARRL BOARD OF DIRECTORS: 2013 ANNUAL MEETING SET FOR JANUARY 18-19 IN NEW ORLEANS, AGENDA ANNOUNCED

ARRL policy is made by its Board of Directors. The 15 voting members of the Board are the Directors who are elected by the ARRL members in their respective divisions. The Board meets in January and July, usually in the Hartford area; however, this year, the meeting will take place in New Orleans, Louisiana. ARRL members also elect Vice Directors who may attend the meetings. ARRL Directors and Vice Directors are volunteers who work hard to represent the ARRL in their Divisions, to represent the members who elect them on policy issues and to conduct the committee work that is so important to good decision-making.

This month's Board Meeting activities will begin on Thursday, January 17 with meetings of two standing committees, the Administration & Finance (A&F) Committee and the Programs & Services Committee. Each is made up of five Directors and a Vice Director, with the treasurer serving as an additional member of the A&F Committee. The Board Meeting itself begins on Friday morning, January 18 and is expected to run through Saturday afternoon. Read more here <http://www.arrl.org/news/2013-annual-meeting-of-the-arrl-board-of-directors-set-for-january-18-19-in-new-orleans-agenda-annou>.

==> + CHECK OUT THE FEBRUARY ISSUE OF QST

The February issue of QST takes a look at how Canada's Dominion Radio Astrophysical Observatory (DRAO) measures and processes the 10.7 centimeter solar flux and why this number is important to hams. As radio amateurs, we are interested in the Sun and how it affects the ionosphere. By gauging the Sun's activity -- primarily in the form of sunspots and solar flux -- hams can predict how the bands will perform and what the maximum useable frequency (MUF) might be, paving the way to good DX on the higher bands. So grab your print edition of QST -- or cozy up to your computer or tablet to read the digital version <http://www.arrl.org/news/digital-edition-of-february-em-qst-em-now-available>
-- and discover all the fun that is Amateur Radio.

In their article "The Penticton Solar Flux Receiver," John White, VA7JW, and DRAO's Dr Ken Tapping delve into the mystery and science of the 10.7 centimeter solar flux, the measurement of the total amount of solar radio emission in a 100 megahertz-wide band that is centered on a frequency of 2800 MHz, or 10.7 centimeters. While the print article is full of information, more is available <http://www.nxtbook.com/nxtbooks/arrl/qst_201302/index.php#/40> in the digital edition of the February issue of QST. While many amateurs know how long to make their wire antennas for each band, they might not know just how high up to place them. QST Technical Editor Joel R. Hallas, W1ZR, tackles this very question in his article "How High Should You Hang that Wire Antenna?"

The aftermath of October's Hurricane Sandy wreaked havoc in New York and New Jersey. This "superstorm" brought together Amateur Radio operators from all over the region who not only volunteered their time and equipment to provide communications support, but also to the humanitarian relief effort. In his article "Disaster on Long Island," Bob Myers, K2TV, tells the story of how one local club reached out to their communities and put their talents to use. The ARRL will celebrate 100 years in 2014 and ARRL Volunteer Historian Mike Marinaro, WN1M, has been busy preserving and conserving the many Amateur Radio artifacts that the League has in its possession. In his article "A Professional Approach to Amateur History," he tells of what he, other volunteers and ARRL staff have been doing to document and display the League's extensive collection.

QST Technical Editor Joel R. Hallas, W1ZR, takes a look at the TEN-TEC Model 418 100 W HF and 6 meter linear amplifier in this month's Product Review. He says this amplifier "can provide a handy 13 dB boost to low power radios if used where enough dc power is available. While the model 418 is designed as a companion to the soon-to-be-released Argonaut IV 5 W transceiver, it can also operate seamlessly with other transceivers of the same power class." ARRL Test Engineer Bob Allison, WB1GCM, checked out the Rigol Technologies DSA815-TG spectrum analyzer, saying that it "is a lightweight, portable spectrum analyzer that is affordable for serious experimenters and self-employed service technicians. It has many uses in the amateur workshop." You can find video overviews of both the TEN-TEC amplifier

<http://www.nxtbook.com/nxtbooks/arrl/qst_201302/index.php#/58> and the Rigol Technologies spectrum analyzer <http://www.nxtbook.com/nxtbooks/arrl/qst_201302/index.php#/62> in the digital edition of the February issue of QST.

Of course, there are the usual columns you know and have come to expect in the February QST: Happenings, Hints & Kinks, The Doctor is In, Short Takes, Vintage Radio, How's DX? and more, including lots of new books and products. Look for your February issue in your mailbox and in your inbox. QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join, or to renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + DAYTON HAMVENTION®: HAMVENTION AWARDS NOMINATION DEADLINE EXTENDED TO FEBRUARY 15

There is still time to nominate a radio amateur for the 2013 Dayton Hamvention® Awards: Amateur of the Year, Club of the Year, the Special Achievement Award and the Technical Excellence Award. The deadline for nominations has been extended to Friday, February 15. Anyone may nominate a person or club for these awards, and all Amateur Radio operators are eligible to receive these awards. The winners will be recognized at the 2013 Dayton Hamvention, which runs May 17-19. Read more here <http://www.arrl.org/news/hamvention-awards-nomination-deadline-extended-to-february-15>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Solar activity pulled back over the past week, following a stellar performance in the week prior. The average daily sunspot numbers were down 34.3 points to 129, but the average daily solar flux actually rose 9.7 points to 157.4. The current prediction for solar flux is 135 on January 17-18, 130 and 125 on January 19-20, 120 on January 21-23, 130 on January 24-25, 135 on January 26-28, 130 and 135 on January 29-30, 140 on January 31-February 1, 150 on February 2, 155 on February 3-4, and back down to 150 on February 5-11. The predicted planetary A index is 12 on January 17, 8 on January 18-19, 5 on January 20-21, 8 on January 22-23, 5 on January 24-February 4, 8 on February 5, 5 on February 6-8, 8 on February 9-10 and back down to 5 on February 11 through the beginning of March. The most active geomagnetic day this past week was January 13, but only in relation to very, very quiet recent conditions. The mid-latitude A index was 10, while the K index only reached 4 in one 3-hour period. The college A index (from Fairbanks, Alaska) was 11 and 12 on January 13-14, with the K index reaching 4 in two 3-hour periods on February 13, and 5 in one 3-hour period on February 14. Look for more on the ARRL website on Friday, January 18. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + SILENT KEY: #1 MIXED DXCC JOHN DACK, W7KH (SK)

On Monday, January 7, John Dack, W7KH, of Seattle, Washington, passed away. He was 91. An ARRL Life Member, Dack sat at the top of the DXCC mixed standings with 398 entities, including all 340 current entities and 58 deleted entities. He worked every DXCC entity except Damau Diu (CR8), French Indochina (FI8) and Manchuria (C9). South Sudan (ST0) was the last new DX entity in Dack's log; he worked ST0R in August 2011.

Dack was profiled in the September 2011 issue of QST in the "How's DX? <http://p1k.arrl.org/pubs_archive/139266>" column [Editor's note: You must be an ARRL member and logged on to the ARRL website to read this article]. First licensed in 1938 when he was 17, Dack became interested in Amateur Radio due to some neighbors who were hams. "John remembered working Mexico, and this may have been the beginning of his interest in working DX, as he felt 'like he had just worked Tibet,' which he later did," wrote "How's DX?" conductor Bernie McClenny, W3UR. "Despite being [at the time] 90 years old, he still seems to be on top of his game and gets on the air about twice a week. There are no computers at W7KH and John still gets his DX news from the paper version of QRZ DX. All of his logs are still done with paper and pencil."

==> THIS WEEK IN RADIOSPORT

This week:

- January 18 -- NCCC Sprint Ladder
- January 19 -- Feld Hell Sprint; LZ Open Contest
- January 19-20 -- North American QSO Party (SSB); Hungarian DX Contest; YL-ISSB QSO Party (SSB); AWA Linc Cundall Memorial CW Contest
- January 19-21 -- ARRL January VHF Contest <http://www.arrl.org/news/get-in-on-the-winter-fun-with-the-arrl-january-vhf-contest>
- January 21 -- Run for the Bacon QRP Contest
- January 23 -- SKCC Sprint
- January 23-24 -- CWops Mini-CWT Test

Next week:

- January 25 -- NAQCC Straight Key/Bug Sprint; NCCC Sprint Ladder
- January 25-27 -- CQ 160 Meter Contest (CW)
- January 26 -- WAB 1.8 MHz Phone Contest
- January 26-27 -- BARTG RTTY Sprint; REF Contest (CW); UBA DX Contest (SSB); SPAR Winter Field Day
- January 27 -- QRP ARCI Fireside SSB Sprint
- January 27-28 -- Classic Exchange (CW)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page

<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 18-19 -- ARRL North Texas Section Convention
<http://www.arrl.org/hamfests/north-texas-section-convention-cowtown-hamfest-
1>,
Fort Worth, Texas
- January 19 -- ARRL Southern Florida Section Convention
<http://www.arrl.org/hamfests/southern-florida-section-convention-3>,
Fort Myers, Florida
- January 25-26 -- ARRL Mississippi State Convention
<http://www.arrl.org/hamfests/mississippi-state-convention-capital-city-hamfe
st>,
Jackson, Mississippi
- January 26-27 -- ARRL Puerto Rico State Convention
<http://www.arrl.org/hamfests/puerto-rico-state-convention>, Hatillo,
Puerto Rico
- February 2 -- ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-2>, North
Charleston, South Carolina; ARRL Virginia State Convention
<http://www.arrl.org/hamfests/virginia-state-convention-frostfest-1>,
Richmond, Virginia
- February 8-10 -- ARRL Southeastern Division Convention
<http://www.arrl.org/hamfests/southeastern-division-convention-orlando-hamcat
ion-1>,
Orlando, Florida
- February 15-16 -- ARRL Arizona State Convention
<http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-1>,
Yuma, Arizona
- February 16 -- ARRL Arkansas State Convention
<http://www.arrl.org/hamfests/arkansas-state-convention-winterfest>,
Hoxie, Arkansas
- February 23 -- ARRL Vermont State Convention
<http://www.arrl.org/hamfests/vermont-state-convention-ham-con-3>,
South Burlington, Vermont
- March 8-9 -- ARRL Oklahoma Section Convention
<http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfe
st-1>,
Claremore, Oklahoma; ARRL Louisiana Section Convention
<http://www.arrl.org/hamfests/louisiana-section-convention-acadiana-53rd-annu
al-hamfest>,

NZART Headquarters Infoline Issue 265

18 January 2013

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Examination Database update - immediate

· Amateur Radio Junk Sale – Wanganui

· Te Puke Amateur Radio Club Junk Sale

Debby Says…Happy new year to everyone, nice to have you back.

The year has not started well with the sudden passing of our immediate past President Roy Symon ZL2KH.

ZL2KH - Roy was elected to NZART Council in 2003, as Central Region Councillor, a position he held until 2009 when he was elected as President. Roy resigned from this position in February last year due to health problems.

I attended Roy’s funeral as a representative for NZART as Vaughan ZL1TGC (President) and Stuart ZL2TW (Vice-President) were unable to due to work commitments. Stuart was able to see Roy in Waikato Hospital a couple of weeks ago. While frail, Roy still enjoyed a laugh and very quick witted, two traits we will have fond memories of Roy for.

Our sympathies go to Jill his wife and family.

Exam Update - I am pleased to advise the much awaited examination generation software has been published.

This can be found on….

http://www.nzart.org.nz/exam/download-examination-files/

Could ALL branches please make note of this and advise your Examination Supervisors ASAP. This is to be downloaded and used now and for all future examinations.

Subscriptions for 2013 are now passed due, therefore if you have not paid you will not receive Break In, at the beginning of February.

Talk soon…Debby ZL2DL

Amateur Radio Junk Sale – WANGANUI

>Date: Saturday May 4th, 2013.

Venue: Wanganui Intermediate School Hall, Dublin Street

Start: Auction starts at 10am.

Lots accepted from 4pm on Friday 3rd May 2013.

SALE CONDITIONS:

Sellers pay 15% commission with a max of $20 on any one item.

Accounts will be run. (to be settled on sale day before goods uplifted)

Bids will be possible only by registered bidder number.

Bidders must register with a $5 fee. This will also cover the sale catalogue.

Cash, Cheque or EFTPOS accepted.

Clean out your shack and help us kick-off this iconic sale again!

For further information contact Graham Hawtree ZL2AHR PH: 06 3447501 grahamandval1@xtra.co.nz

or Jeff Howe ZL2THO PH: 06 3444302 howejef@clear.net.nz

Te Puke Amateur Radio Club Junk Sale

>Date: 2 March 2013

Venue: Paengaroa Community Hall, Old Coach Road, Paengaroa

GPS Coordinates 37.49S 176.24E

Start: Venue open from 06.30am, Sale starts 10.00am

$20 for a 1.8m long table, $25 on the day. $12 for ½ a table, $15 on the day.

Overnight parking available for Motorhomes and hot breakfast from 07.30am ($9.50)

For more information & table bookings, contact Syd Rowe ZL1LWR, Ph: 07 533 1029 or e-mail: syd.rowe@xtra.co.nz

Jock White Memorial Field Day Contest

When: Saturday and Sunday February 23rd and 24th 2013.

Times: (NZDT): 1500 to 2400 Saturday then 0600 to 1500 Sunday

Home stations can also operate in the contest but are strongly encouraged to make a minimum of either 50 phone or 25 CW contacts on 80m and/or 40m and submit logs.

Why not combine the event with a club BBQ / Picnic?

Rules: For the latest version please see:
http://www.nzart.org.nz/activities/contest-rules/rules-jock-white-field-day/
Team leaders must be familiar with the rules as on the NZART web site.

Bands, Modes and Power

40 and/or 80 metres, PHONE (SSB) and/or CW, 100 watts maximum.

Stations using two transmitters may operate simultaneously on both bands, however only one transmitter may be operated any one band at any one time. Single transmitter stations may operate on one or both bands.

Sections

Categories:

• Single Operator – unassisted by any other person.

• CW only – single band or two bands

• Phone only – single band or two bands

• 80m only

• Single-transmitter station 40m and 80m

• QRP – 5 watts maximum (WM Hall Memorial Cup)

• Home stations

• Overseas stations in the South Pacific area

Branch Number

If you intend to operate with a branch number that is not that of your 'home' branch, please check the branch number section of the rules carefully. If you need any help or clarification please contact me at my e-mail address below.

I am looking forward to hearing you on, I will be active as part of the Marlborough, ZL2KS team.

Stuart Watchman

ZL2TW, manager.

clareandstuart@xtra.co.nz

NEWS RELEASE JANUARY 17, 2013 – I. R. A.

The national association of Icelandic Radio Amateurs, Í.R.A., is pleased to announce that as of January 16, 2013 Icelandic Radio Amateurs have been granted operating privileges on 472-479 kHz (630 meters). In addition, The Post and Telecom Administration in Iceland (PTA), recently extended temporary permits as of January 1, 2013 on the following bands: 160 meters (1850-1900 kHz), 60 meters (5.260-5.410 MHz) and on 4 meters (70.000-70.200

MHz).

A NEW 630 METER ALLOCATION

This allocation is on 472-479 kHz. Access is granted on secondary basis. Maximum power is 5W EIRP and maximum bandwidth is 1 kHz. This new allocation is open to the “G” license class (higher). A previous temporary allocation on 493-510 kHz was closed on December 31, 2012.

160 METER ALLOCATION RENEWED

The temporary allocation on 1850-1900 kHz has been renewed for the calendar year 2013. Access is granted on secondary basis. This allocation may only be used during the duration of 10 designated international amateur radio contests. Licensees need to apply to the PTA for a special permit, which is open to both license classes.

60 METER ALLOCATION RENEWED

The temporary allocation on 5.260-5.410 MHz has been renewed for the calendar years 2013 and 2014. Access is granted on secondary basis. Permissible modes are USB, CW and PSK-31. Maximum bandwidth is 3 kHz. Power limit is 100W. Licensees need to apply to the PTA for a special permit, which is open to both license classes.

4 METER ALLOCATION RENEWED

The temporary allocation on 70.000-70.200 MHz has been renewed for the calendar years 2013 and 2014. Access is granted on secondary basis. Maximum bandwidth is 16 kHz and power limit is 100W.

Licensees need to apply to the PTA for a special permit, which is open to both license classes.

Respectfully yours,

Jónas Bjarnason, TF3JB,

President of Í.R.A.

Cowtown Hamfest and ARRL North Texas Section Convention Jan 18-19, 2013

Posted: 16 Jan 2013 07:44 PM PST
http://forums.qrz.com/showthread.php?376100-Cowtown-Hamfest-and-ARRL-North-Texas-Section-Convention-Jan-18-19-2013&goto=newpost

COWTOWN HAMFEST 2013

LOCKHEED MARTIN RECREATION AREA

3400 Bryant Irvin Road

Fort Worth, Texas 76109

Cowtown Hamfest and ARRL North Texas Section Convention, the original Hamfest in the Fort Worth Metroplex occurs in January. The event date, January 18-19, 2013 at Lockheed Martin Recreation Area, 3400 Bryant Irvin Road, Fort Worth, Texas 76109.

Doors open Friday afternoon the 18th at 3:00 pm and will remain open until 8:00 pm. Saturday morning the 19th it opens at 8:00 am and will close at 3:00 pm. Catered food will be available Friday and Saturday. Morning coffee and breakfast snacks will also be available. Door prizes will be awarded through out the event. The prizes will be announced via the website and here next month.

The event will feature large vendor areas over 100 tables and outdoor tailgate flea market. Several well known commercial vendors will be present. Vendors should go to the website for table availability and or contact Kevin Vickers at vickersdc@aol.com. A complete set of educational programs will be conducted through out Saturday and VE Testing will be done both Friday and Saturday. Talk-in is 147.28 tone, 110.9. Volunteers are needed. Volunteer by contacting David Forbes at KC5UYR@compuserve.com .

The Fest will be available online at WWW.BATC.TV and will be streamed both days. Once at the site pick ☐member streams☐, then select ☐K5PHD☐. You will be linked up and can watch and listen. If you cannot come in person please connect online to watch the events.

The Hamfest is open to everyone. It will have something for all. Those who are ham radio operators present and past are encouraged to attend. In past years, the response has been overwhelming. The radio club expects no less this year. There is no better time to find friends new and old. The best part of a Hamfest is visiting with your friends and finding out what has been happening to them in their lives.

Cowtown Hamfest is sponsored by the Lockheed Martin Amateur Radio Club, W5SJZ and LMRA. Website is located at www.cowtownhamfest.org and personal contact can be made with David Forbes, KC5UYR, KC5UYR@compuserve.com or info@cowtownhamfest.com .

Amateur Radio Newsline(tm) Report 1849 - January 18 2013

Amateur Radio Newsline report number 1849 with a release date of January 18 2013 to follow in 5-4-3-2-1.

The following is a Q-S-T. Developers of free D V digital audio say a change in the FCC Amateur Service rules is needed; the Sun wakes up and hurls a large C-M-E toward Earth; the ARRL holkds it first Board of Directors meeting of 2013 and the FCC to hold open hearings on the impact to communications caused by hurricane Sandy. All this and more on Amateur Radio Newsline(tm) report number 1849 coming your way right now.

(Billboard Cart Here)

EMERGING HAM RADIO TECHNOLOGY: DEVELOPERS OF CODEC 2 DERIVED FREE DV SAY A RULES FCC PART 97 RULES CHANGE IS REQUIRED

The Codec2 digital voice project has developed a new program called FreeDV. This is a system to encode digital voice on any two-way radio using only 1.125 KHz of bandwidth. But says Codec 2 researcher Bruce Perens, K6BP, FCC regulations aren't up-to-speed with the challenges of software-defined radio and Open Source architecture:
--

K6BP: "One of the changes we (need to) make is bandwidth based regulation. Rather than what (the) FCC does today in that it grants permission piecemeal permission to use a different modulation letter (suffix) and if you change the letter you have to go back to FCC for permission."

--

According to Perens there will be a filing of a 24 page request to the FCC that will propose the regulatory agency make several changes to the Part 97 rules. Among this will be to allow all digital modulation schemes and all published digital codes on the ham radio bands. It will also push for a change to bandwidth-based regulation of the Amateur Service rather than the mode segmented way that the hobby is governed today. And he points to our neighbor to the North and its success with Regulation by Bandwidth:

--

K6BP: ".Now contrast this to Canada. Canada (regulators) say here's 6 kHz, do what you want with those 6 kHz. Makes more sense today."

--

You might remember that it was only a few years ago when the ARRL proposed a similar bandwidth based regulatory change that was widely criticized by many of its members as well as the overall United States ham radio community. At that time the League said that its petition would provide the Amateur Radio Service the flexibility to experiment with new digital transmission methods while permitting present operating modes to continue to be used for as long as there were hams who wish to use them.

Back then the overall ham radio community shouted the idea down. But this is 2013 and technology has reached a point where some change may be desired to accommodate digital telephony on the High Frequency bands as well as on VHF and UHF. It will be interesting to see where this takes ham radio in the months and years ahead. (Codec 2 - FreeDV)

**

PROPAGATION: SUN EMITS LARGE CME ON JANUARY 13

A huge sun eruption on Sunday January 13th at 07:24 GMT unleashed a wave of solar plasma aimed at Earth that may amplify the planet's northern lights displays and possibly cause difficulty in High Frequency radio communications. Amateur Radio Newslines Stephan Kinford, N8WB, has the latest:

--

The solar eruption, called a coronal mass ejection or CME was expected to take about three days to reach Earth bringing it in sometime between midday Wednesday the 16th and when this newscast goes to air. The good news is that scientists say that this particular event is not strong enough to interfere with satellites on-orbit or electrical systems on Earth.

Observations from NASA's twin Solar Terrestrial Relations Observatory or STEREO spacecraft showed that the CME moved away from sun at speeds of 275 miles per second. This equates to about 990,000 miles per hour.

NASA officials said that solar eruptions at this speed are fairly typical and have not caused substantial geomagnetic storms in the past. They explain that geomagnetic storms occur when the charged solar particles interact with the Earth's magnetic field. At that point they hold the potential to cause problems for satellites in space, communications systems , and terrestrial power grids.

Two particularly active sunspot regions, called AR 11652 and AR 11654, have produced four low-level M-class flares since January 11th. NASA says that the sun is in an active phase of Solar Cycle 24 and is expected to reach its peak sometime this year.

The bottom line is that should you find the High Frequency bands kind of dead for a few days you might want to switch to 6 or 2 meters and beam North. When these solar storms hit, you never know what signals you might hear through Auroral Propagation.

For the Amateur Radio Newsline, Im Stephan Kinford, N8WB, in Wadsworth, Ohio.

--

The most powerful solar eruptions are X-class flares. They have the most significant effect on Earth because they can cause long lasting radiation storms in the Earth's upper atmosphere and trigger severe radio blackouts. But solar storms similar to this eruption mostly produce supercharged northern and southern polar lights and possibly short lived communications blackouts on the high frequency bands while possibly bringing enhanced communications at 50 MHz and above. (spaceweather, others)

**

LEADERSHIP: ARRL BOD MEETS IN NEW ORLEANS JAN 18 - 19

The ARRL Board of Directors will be holding its first annual meeting in New Orleans, Louisiana beginning on Friday, January 18th and likely continuing through Saturday, January 19th.

The ARRL Board meets twice a year and from the looks of the agenda for this January gathering it appears as if the leadership of the United States national amateur radio society has a lot of work cut out for it.

You can see the entire agenda at tinyurl.com/arrl-january-2013 and we will have more on the outcome of this conclave in future Amateur Radio Newsline reports. (ARRL)

**

RADIO LAW: FCC TO FREE UP 5 GHZ FOR EXPANDED BROADBAND

FCC Chairman Julius Genachowski says that the commission will begin a government-wide effort to increase broadband speeds and alleviate Wi-Fi congestion at major hubs, such as airports, convention centers and large conferences. In addition, this would also increase speed and capacity for Wi-Fi in homes where multiple users and devices are often on a network at the same time.

Genachowski made the announcement at last weeks Consumer Electronics Show in Las Vegas, Nevada. There he said that the FCC will take the first steps next month to free some 195 MHz of spectrum in the 5 GHz band. This will be the largest block of spectrum to be made available for expansion of broadband since 2003.

According to the FCC, this effort should increase spectrum available for ultra-high-speed, high-capacity Wi-Fi by up to 35 percent. This should enable higher data speeds and greater capacity that will likely

be most notable in the area of improved High Definition video distribution. (RW)

**

EMERGING TECHNOLOGY: SPRINT AGREES TO MAKE SOME PHONES FM RADIO RECEIVERS

Sprint says it has come to preliminary arrangement with the radio industry to enable an FM radio receiver chip to be included in some Android and Windows smart phones. In announcing the agreement Sprint said that FM radio could be delivered through the NextRadio tuner application or other radio apps or services.

Currently, radio stations can be streamed over phones, but the inclusion of this technology would allow the phones to receive over-the-air broadcasts. This is something broadcasters have been pushing for both radio and digital TV.

The company made the announcement at the recent Consumer Electronics Show in Las Vegas, Nevada. Sprint says that it will begin including this feature over the next three years. This agreement marks the first time a United States wireless carrier will offer the ability to access local FM radio on a broad array of its devices. (B&C)

**

RADIO FROM SPACE: RUSSIA TO LAUNCH MOON PROBE IN 2025

Russia appears to be getting back into the space-race. According to published news reports, that nation will resume its long dormant program to explore the moon by sending an unmanned probe there in 2015.

The spacecraft will be called Luna-Glob which translates to Moon-Globe in English. According to the Interfax news agency, Roskosmos director Vladimir Popovkin said says the exploration payload will be carried by the first rocket to blast off from a new facility that Russia is building in its far eastern Amur region.

Popovkin is the head of Russia's space agency. He and other Russian space officials have said Luna-Glob would consist of an orbital module and a probe that would land on the moon. Once there it will radio back information about samples it takes from the Lunar surface.

The last successful Russian launch of an unmanned probe to the moon was in the 1970s. Unfortunately that nation has suffered setbacks in its space program in recent years, including unsuccessful satellite launches and the failure of a Mars probe in 2011. More is on the web at tinyurl.com/russia-moon-mission and we will have more space related news for you later on in this week's Amateur Radio Newsline report. (Published news reports)

RADIO LAW: FCC TO HOLD HEARINGS IN WAKE OF HURRICANE SANDY

In the wake of Superstorm Sandy, Federal Communications Chairman Julius Genachowski announced plans to convene a series of field hearings. These to examine challenges to the nation's communications networks during natural disasters and in other times of crisis. Amateur Radio Newsline's Buill Pasternak, WA6ITF, has the details:

--

The FCC says that these first hearings will facilitate a wider national dialogue about the resiliency of communications networks by focusing on the impact of hurricane Sandy. It will also help form recommendations and actions to strengthen wired and wireless networks in the face of such large-scale emergencies.

The first of these hearings are slated for February 5th from 9 a.m. to 1 p.m. Eastern time at the Alexander Hamilton U.S. Customs House in New York City. This will be followed by an afternoon session from 2:30 to 6:30 p.m. at the Stevens Institute of Technology located in Hoboken, New Jersey.

The FCC adds that it will attempt to accommodate as many attendees as possible; however, admittance will be limited to seating availability. The Commission will provide audio or video coverage of the meeting over the Internet from the FCC's Web page at www.fcc.gov/live.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

As this report is being prepaid its unknown if representatives of any of the numerous ham radio groups involved in providing emergency communications during and after hurricane Sandy plan to attend. (FCC)

**

PUBLIC SERVICE: HAM RADIO AND THE EAGLE CAP EXTREME SLED DOG RACE

Amateur radio will once again be providing communications for the Eagle Cap Extreme Sled Dog Race through the rugged Wallowa Mountains in Northeastern Oregon. This year two systems are to be linked to cover the race area.

The Eagle Cap Extreme Sled Dog Race first utilized amateur radio as its primary means of communication around the race course in 2009. The technology provided by the volunteer radio amateurs gave a big boost to logistical and strategic planning plus an extra measure of safety for volunteers, race officials, spectators, and the sled teams.

This years Eagle Cap Extreme is slated for January 23rd to the 26th and been described as challenging, fun and beautiful by participants and fans alike. If you can't be there in person, be advised that all communications during the event can be heard on the DAWGGONE Echolink conference provided by the DODROPIN conference server permitting those who want to listen in.

More is on-line at www.eaglecapextreme.com/ (KB7DZR)

**

PUBLIC SERVICE: CANADIAN SKI MARATHON 2013 LOOKING FOR RADIO OPERATORS

Also, the Canadian Ski Marathon is spooling up with ham radio an important part of this evwent. The race is slated for the weekend of February 9th and 10th and it depends on ham radio volunteers to provide timely safety and logistical communications for the benefit of the skiers.

The event runs between Lachute and Buckingham in western Quebec regardless of weather conditions. This year is the 47th anniversary for the marathon and the 40th year for Amateur Radio supporting the event.

If you would like to volunteer this year, please email Harold Hamilton, VA3UNK to radio1 (at) admin2 (dot) ca or va3unk (at) gmail (com) com. More information is on-line at the Canadian Ski Marathon amateur radio webpage. Its in cyberspace at www.radio-1.ca. (VA3UNK)

RADIO LAW: ILLINOIS GUARANTEES BROADCASTERS ACCESS IN EMERGENCIES

Broadcasters in Illinois have been guaranteed the right to serve the public in times of crisis. Amateur Radio's Cheryl Lasek, K9BIK, reports:

--

A new law assuring Illinois broadcasters and cable operators that they will have the emergency credentials necessary to gain access to their operations while also allowing the delivery of fuel to power emergency generators during disasters has unanimously passed both Illinois houses of the Illinois legislature. The bill titled Illinois HB-5528, was sponsored by Representative John Bradley in the Illinois House and Senators Antonio Munoz and Kirk Dillard in the Senate.

The Illinois state measure recognizes the important role local broadcasters serve in times of emergencies and disasters and ensures that key personnel needed to keep stations operational during times of

emergencies will have access to their facilities. It also insures fuel needed to power emergency generators will be allowed to be delivered.

Dennis Lyle is the President of the Illinois Broadcasters Association. He credited law enforcement officials as well as the Illinois Emergency Management Agency for supporting the passage of the bill. Also crucial was a lack of objections from the City of Chicago, the Illinois Sheriff's Association or the Illinois Emergency Management Agency.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

The Illinois Broadcasters Association says that it will now work with the states Emergency Management Agency to design a training curriculum that personnel must complete before being issued emergency access credentials. (RW)

HAM HAPPENINGS: N3A TO CELEBRATE 2nd INAUGURATION OF PRESIDENT OBAMA

The District of Columbia Amateur Radio Society has announced that it will be activating special event station N3A. This for the inauguration of Barack Obama on his second term as President of the United States.

The station will be operational through January 22nd operating from the District of Columbia, Maryland and Virginia. Listen out for N3A on SSB, CW, RTTY and various digital modes. There is no fixed operating schedule, so please check the various on-line sources for activity. QSL electronically via Logbook of the World or by the U.S. Postal Service mail and include an SASE. (W3DQ)

**

HAM HAPPENINGS: EARLYBIRD REGISTRATION FOR DAYTON CONTEST UNIVERSITY

Early bird registration is now open for 2013 Dayton Contest University to be held all day on Thursday May 16th at the Crowne Plaza Hotel in Dayton, Ohio. 2013 will be the seventh year in a row for Contest University in Dayton. Early signups will have the opportunity to help select this years class outline topics. A list of suggested topics as well as registration information is on the web at contestuniversity.com (K3LR)

**

HAM HAPPENINGS: DAYTON CONTEST DINNER TICKETS NOW AVAILABLE

The North Coast Contesters have announced that the 21st Annual Dayton Contest Dinner will be held on Saturday night, May 18th also at the Crowne Plaza Hotel. Master of Ceremonies is CQ Contest Hall of Fame member and World Wide Radio Operators Foundation Chairman, John Dorr,

K1AR. Dr. Robert G. Cox, K3EST, will be the featured speaker. The CQ Contest Hall of Fame inductions for 2013 will take place at this dinner. Tickets are only available for pre-purchase only on-line at contestdinner.com. There will be no tickets for sale at the door. (K3LR)

**

NAMES IN THE NEWS: KO0Z NAMED CQ BEGINNERS EDITOR

Ron Ochu, KO0Z, of Girard, Illinois, has been named Beginners Editor of CQ Amateur Radio magazine, Ochu will begin writing the "Learning Curve" column as of the April 2013 issue. Ochu succeeds Rich Arland, K7SZ, who stepped down after a decade of writing various columns for several CQ Communications magazines. (CQ)

**

NAMES IN THE NEWS: AUSTRALIAN HAM GIVEN AN AMSAT ACCOLADE

Tony Hutchisson VK5ZAI, has received an award from AMSAT North America. THis for the voluntary work he has done for the Amateur Radio on the International Space Station program.

Hutchisson is the Australian ARISS Coordinator and a Telebridge Earth Station involved in many contacts between the International Space Stations and schools taking part in the program. In accepting the award VK5ZAI said it was a very nice honor which made him feel humble. (VK3PC)

CHANGING OF THE GUARD: FORMER ABC ENGINEERING SUPERVISOR AND QST TECHNICAL EDITOR STU COHEN N1SC - S.K.

Yet another changing of the guard in amateur radio. This with the sad news that former QST Technical Editor Stuart Cohen, N1SC, of Colbert, Washington, passed away January 4th following a long battle with cancer.

Better known as Stu Cohen, he was first licensed in 1954 as K2IOC, Cohen enjoyed operating CW and chasing DX on 40 and 20 meters. He also was active on 75 meters AM.

Cohen came to ARRL Headquarters in 2002 after a highly successful career in television broadcasting. Prior to his service with the League, Cohen was an Emmy winning Engineering Supervisor at ABC-TV in Los Angeles where he worked from 1974 to 1993. After leaving the ARRL in 2005, he continued his relationship with the League, becoming a Technical Advisor.

Services for Stu Cohen, N1SC, were scheduled to take place on Wednesday, January 9th at the Charles Francis Adams Memorial Chapel in Portland, Oregon. At the time of his passing he was age 70. (ARRL)

**

WORLDBEAT: LED LIGHTS JAM CITY BUSES

The Swedish national amateur radio society the S-S-A reports on a case of LED lights in a shop jamming the VHF radio used by buses. The lighting in shop windows at a business called Punkt House jammed the city bus system which uses 167.0375 MHz for communications and dispatch.

The lights causing the problem were LED spotlight lamps. It was found they did not conform to the regulations on Electromagnetic Compatibility and they are now being replaced. The full story in Google English is on-line at tinyurl.com/LED-VHF-Interference, (Southgate)

**

HAM RADIO IN SPACE: SA AMSAT ACCELERATING CUBESAT PROJECT

South Africa AMSAT has decided to accelerate its CubeSat project and expects to have the first prototype version of the transponder and control system on the table for testing by end February.

As part of South Africa's contribution to the African Resource and Environmental Management Constellation of satellites, the South African National Space Agency or SANSA, in collaboration with local industry and academic experts, have been in discussions on the specifications for the new satellite called Zed A-ARMC1. Specifically in regard to its benefits for South Africa and the continent. South Africa AMSAT is making a presentation to SANSA to have an amateur payload included in the project.

Deon Coetzee, ZR1DE, last year demonstrated a locally designed space frame. He is currently working on the second prototype. Full details are on the web at www.amsatsa.org.za. (SARL)

**

HAM RADIO IN SPACE: NEW ARISS ISS CONTACT SCHEDULING

A reminder that a new process is in place for schools in the United States to schedule a ham radio contact with crew members on the International Space Station. For a US school to have an ARISS contact,

it must fill out a proposal, submit it to NASA, and see if it is approved. Once a school gets the go ahead, it will be put on the list and an ARISS mentor will be assigned to assist.

NASA will have two open windows a year for schools to submit a proposal. A school or whomever is representing the school must first go to NASA to get the proposal material. To do so, contact Teaching >From Space to JSC-TFS-ARISS (at) mail.nasa.gov. (ANS)

**

DX

In DX, members of the 'Buddies in the Caribbean' suitcase mini-DXpedition group are going to Barbados and will be active between January 29th and February 6th. All members will use Buddipole portable antennas at 100 watts or less. Several teams will be battery-only, field portable either from Barbados beaches or from scenic mountain tops and will sign their own call stroke P. QSL via Logbook of the world or direct to each operator with an SASE.

KX9X will be operational stroke 4 from Dewees Island on Friday, February 1st from 1500 to 2000 hours UTC. Dewees Island counts as SC-042 in the US Islands program, is part of NA-110 for Islands on the Air and has never been operational according to the US Islands website. He will operate QRP with portable antennas on SSB and CW only. QSL as directed on the air.

Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the current 8Z1Z operation is from the Republic of the South Sudan has been approved for DXCC credit. This operation began on January 8th. Also approved was the 3D2C operation from Conway Reef that took place back in 2012.

G3PJT will be on the air from Grenada from March 5th to the 20th as J34G and active on High Frequency bands. QSL via his home call.

N3ME and W3UR will be active from the island of Dominica through February 11th operating as J76A and J77A respectively. They will be on 160 through 6 meters using CW, SSB and RTTY. QSL J76A via N3ME and J77A via W3UR. Both will also accept electronic confirmation using Logbook of the World.

Lastly, WN3R will be on the air from Grand Cayman Island February 20th to the 26th as ZF2RW. Listen out for him on 40 through 6 meters and QSL via WN3R.

(Above from various DX news sources)

**

THAT FINAL ITEM: PACK YOUR HAM GEAR AND MOVE TO MARS

And finally this week, you might want to call this the ultimate one-way DXpedition. While not specifically directed to the ham radio community, the Netherlands based nonprofit organization Mars One, has released its basic astronaut requirements setting the stage for a televised global selection process that will begin later this year. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

Mars One hopes to put the first settlers on the red planet by 2023. The organization is not looking for scientists or former jet jockeys as colonists. Rather anyone who is at least 18 years old can apply to become a Mars pioneer.

Officials at Mars One say that the most important criteria are intelligence, good mental and physical health and dedication to the project. Those selected as its astronauts will undergo eight years of training before launch.

Norbert Kraft is Mars One's chief medical director and a former NASA researcher. He is quoted as saying that gone are the days when bravery and the number of hours flying a supersonic jet were the top criteria. Kraft says that now a days space exploration planners are more concerned with how well each astronaut works and lives with the others, in the long journey from Earth to Mars and for a lifetime of challenges that would lie ahead.

Mars One plans to launch a series of robotic cargo missions between 2016 and 2021. These would be used to build a habitable outpost ahead of the arrival of the first four colonists in 2023. More settlers would then arrive every two years thereafter. And less we forget to mention, this will be a one way trip as there are no plans to return the pioneers to Earth.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, staying on this side of any RF pile-up here on Planet Earth in Scottsdale, Arizona.

--

If you think you have the right stuff to help colonize Mars you can learn more about the selection process at www.thenextgiantleap.com. And if we might speculate a bit, it will be interesting to see if anyone from the world wide ham radio community will pack up their station and take advantage of this truly rare and exotic DX location. And we also guess all QSL's would go electronically on this one. (Mars One, space.com, others)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is

>From Tad Cook, K7RA
Seattle, WA January 18, 2013
To all radio amateurs

SB PROP ARL ARLP003
ARLP003 Propagation de K7RA

Solar activity pulled back over the past week, following a stellar performance in the week prior. Average daily sunspot numbers were down 34.3 points to 129, but average daily solar flux actually rose 9.7 points to 157.4. This was because solar flux values seemed to lag behind last week's activity, raising this week's average in the first few days of the current week.

The current prediction is for solar flux at 125 on January 18-20, 120 on January 21-22, 115 on January 23-24, 130 on January 25, 135 on January 26-28, 130 and 135 on January 29-30, 140 on January 31 through February 1, 150 on February 2, 155 on February 3-4, 150 on February 5-11, then 145, 140, 135, 140 and 145 on February 12-16.

The predicted planetary A index is 10, 15 and 18 on January 18-20, 8 on January 21-22, 5 on January 23 through February 4, 8 on February 5, 5 on February 6-8, 8 on February 9-10, and 5 on February 11 through the beginning of March.

The most active geomagnetic day was January 13, but only in relation to very, very quiet recent conditions. The mid-latitude A index was 10, and the K index only reached 4 in one three-hour period. The college A index (from Fairbanks, Alaska) was 11 and 12 on January 13-14, with the K index reaching 4 in two 3-hour periods on February 13 and 5 in one 3-hour period on February 14. The reading before that K index of 5 had a K index of 0.

There is a possibility of aurora on Sunday, January 20. NOAA reports the geomagnetic field is expected to be at minor storm levels today (January 18), active levels on January 19, and minor storm levels again on January 20.

A strong solar wind on January 17 was from the waning effects of a CME (coronal mass ejection) on January 13. On January 19 solar wind

may rise again as the result of a coronal hole rotating into geo-effective position. A January 16 CME could cause a rise in geomagnetic activity on January 20. Effects should decrease into background levels by mid-day (UTC) on January 20.

The Australian Space Forecast Centre issued a warning at 2335Z on January 17 about increased geomagnetic activity January 19-20 due to a CME. For January 19 they predict quiet to unsettled conditions, but with active to minor storm periods after 1200Z. For January 20 they predict unsettled to active conditions, with minor storm levels possible.

OK1HH predicts geomagnetic activity will be quiet on January 18-19, mostly quiet on January 20-21, quiet to unsettled January 22-23, mostly quiet January 24-26, quiet January 27 through February 1, mostly quiet February 2-3, quiet to active February 4-5, quiet February 6-7, quiet to unsettled February 8-9, active to disturbed February 10-11.

Jon Utley, K7CO reports that on January 11 he was in the state of New York, and using a 5 element monoband Yagi at 100 feet he worked XV1X at 1334Z and XW4XR at 1600Z on 10 meter CW long path.

Also on January 11, Jeff Hartley, N8II in West Virginia reported, "I have operated every evening this week with poorer than expected results. Before Thursday January 10, 12 and 10 meters were closed here very shortly after sunset to all areas. A45XR was S9 on 10 meter long path Sunday morning January 6, but the band was never open well to Europe unless I rechecked it a bit late. VR2XMT was about S5-7 on 12 meter SSB long path as well Sunday. All of the higher bands still seem to close pretty early including 20 meters both west and north by 0200Z, but I expect by today things are better. On 10 meters Thursday, KH6 was heard until past 2250Z and there were west coast and South American stations on 10 until around 2230Z. I have been looking for Asia long path QSOs on 20 and 30 meters without much luck, but did manage to catch UK8OM on 30 meters short path around 0100Z."

Rick Radke, W9WS of Balsam Lake, Wisconsin wrote: "Just wanted to share an experience I had on Wednesday January 9. I was checking the bands for DX. As usual, I start on 10 and work on down to 20 to see what's open. Nothing was 'happening,' in fact there were very few signals at all. So I went to 40 just looking for a ragchew and out of nowhere there was ER4DX calling CQ with a big signal. We exchanged 59 reports and went our ways. This was 1400 local (2000Z) on a sunny afternoon in northern Wisconsin, a good three hours before grayline on this end. In almost 50 years of hamming I've never seen 5K+ miles of 40 meter propagation mid-day. Nothing special here, running 1 kW to a vertical with a bunch of radials."

That is an interesting time to work Moldova. ER4DX is Vasily Romanyuk, and just doing an internet search with his callsign yields

some clues that he operates a pretty serious big gun station. For instance, using a popular search engine to search that callsign, then hitting the Images option leads to many photos of big antennas.

W6ELprop indicates that between ER4DX and W9WS on 40 meters on that date signals may have taken a 10 dB jump from 2000-2030Z, and another 10 dB by 2230Z. I used 45.456 deg N, 92.42 deg W for Rick's location, and using the grid locator from an image of a ER4DX QSL card (KN38vk), the AMSAT tool at http://www.amsat.org/amsat/toys/gridconv.html shows 48.438 deg N, 27.792 deg E. at the other end. W6ELprop shows this is a 5,016 mile or 8,073 km path, and about 6 hours after sunset at 2030Z in Moldova. So conditions were probably favorable, and ER4DX was probably putting out a big signal, perhaps with a large 40 meter Yagi.

Using today's date (January 18) shows that first 10 dB bump moving out by 30 minutes, to happen around 2030-2100Z instead of 2000-2030Z.

Reg Beck, VE7IG of Williams Lake, British Columbia on January 12 wrote: "I had the long path openings on 10 and 12 meters for 3 days here before they petered out. I still saw W6 stations working long path after it closed for me after the 3 days. A4, A6, A9 and 7Z1 were worked on 10 meters; A4, A6, A7 were worked on 12 meters. What was very surprising to me was the immediate resurgence of 160 meter propagation right after the 10 meter long path propagation stopped. Europeans all over the band and easily worked just like during the sunspot minimum with relatively low noise levels. Pretty amazing propagation up here in the northern end of the Pacific Northwest."

Reg is way up north in British Columbia, not down near the border. Seattle is 47.7 degrees north latitude, Vancouver BC is 49.2 degrees, and VE7IG is just north of 52 degrees in Williams Lake.

Oleh Kernytskyy, KD7WPJ in Salt Lake City, Utah wrote: "Solar flux was 170 on January 12. I called CQ with 5 watts and an indoor dipole on 28.060 MHz from Salt Lake City, and immediately received a response from Fred, N3FLL in West Chester, PA. He also operated QRP - 5 watts and used a dipole. I was impressed with this contact, because the eastern direction is blocked by the Wasatch Mountains."

In another email, Oleh wrote: "We had solar flux 158 and K=2 on January 13. It produced a short opening on 28 MHz. I had a QSO with CE2AWW, using 5 watts and indoor dipole. The distance between our stations was 5707 miles."

Jon Jones, N0JK wrote with 6 meter E-skip news from Kansas: "Heard the WR7NV/b DM25 and K0YW DM69 on Es around 0130 UTC on January 14 while I was mobile near El Dorado, Kansas EM17. The Nevada beacon was in for over 30 minutes."

And finally, in last week's Propagation Forecast Bulletin ARLP002 we mistakenly put Carl, K9LA in Indianapolis. Carl is in Fort Wayne, Indiana.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

WIANEWS WEEK COMMENCING JANUARY 20 2013.

CB harassment proven

Crackdown on illegal repeaters and jammers.

WIA joins the conversation on 2UE Sydney

Centre Victoria RadioFest Kyneton Feb 10,

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JAN 20 2013.

CB harassment proven

A man who broadcast a woman's address and phone number over CB radio as a
place of ill-repute, has been ordered by the Queensland's Civil and Administrative
Tribunal to pay her compensation.

After the man's antics on a CB repeater, truck drivers began arriving at
the Queensland property or called the woman aged her sixties.

The Queensland Tribunal found that that the sexually harassment and racial
vilification over CB radio had occurred since 2008.

It ordered the defendant to pay the woman $10,000 in compensation.

The man also put pictures on YouTube. In an earlier court case he was ordered to remove the offending YouTube material, keep the peace towards the woman and put on a good behaviour bond.

(Jim Linton VK3PC)

Crackdown on illegal repeaters and jammers.

Australia's communications regulator is pushing ahead with a major overhaul of the infrastructure it uses to keep tabs on spectrum usage and to identify sources of interference.

Tender documents released this week sought technology to significantly overhaul infrastructure used by the Australian Communications and Media Authority's Interference Management and Monitoring Section at fixed and roving locations.

As this is a copywrite news story from ITnews.com.au we suggest you take your browsers to their sight for the story.

(spotted by vk3dn and vk4bat)

JOINS THE CONVERSATION

What does WIA President Phil Waite, Robert Broomhead from our news service, ATV Guru Ralph Parkhurst VK3LL and unnamed VK7 Ham and yours truly VK4BB have in common?

Well Wednesday night Phil was a guest for an hour on Radio 2UE with host Murray Wilton and we joined him both in the studio and by phone from across Australia.

Currently we are awaiting legal permission to rebroadcast the show via WIA front page news, wia.org.au and bring you a little more here on WIA National News.

This was late notice but we did manage to get it out on the VK1WIA TWITTER A/C http://twitter.com/VK1WIA

And some shared it on the FaceBook platform.

HAMS ACROSS AUSTRALIA.

VKG Roundup http://www.police.nsw.gov.au/news

It's just 5 weeks to the Mini Contest University at Wyong. That means you have less than 2 weeks to register if you want to be in the prize draw for the DX book.

Registrations are filling fast so please register soon to avoid disappointment.

The program is now complete with the latest presentation being on RTTY contesting, so we have a full and interesting program to fill Saturday.

For all details on the Mini Contest University and the Wyong Field Day, please go to www.fieldday.org.au on the web.

73 & "see you at Wyong" this is Ed VK2JI

Help grow amateur radio

Become a radio amateur, learn something new. Or perhaps you know someone who could join the exciting communications hobby through the Foundation Licence.

Amateur Radio Victoria at its centrally located and well equipped Ashburton office has weekend quality training classes and assessments.

For inquiries and enrolments for February the 23rd and 24th please contact Barry Robinson VK3PV on 0428 516 001 or foundation@amateurradio.com.au

The Centre Victoria RadioFest

Only weeks left to the Centre Victoria RadioFest No 6, at the Kyneton Racecourse on Sunday February 10, only an hour from Melbourne, Ballarat and Bendigo.

This year includes a Homebrew Competition that is open to all. Bring along your home-built product for display and be judged by Drew Diamond VK3XU. The Mini-lectures program of presenters will talk about the milli--metre bands, summits of the air, things in orbit, and home brewing.

Want to have a trading spot at this major event? Then please be quick to join in the action at the Kyneton Racecourse, on Sunday February the 10th.

To secure a table visit the convenient and easy online shop via the main Amateur Radio Victoria website.

For general inquiries call Ross Pittard VK3CE on 0408 533 107, and for Club Corner displays Tony Hambling VK3VTH on 0423 635 152.

The Club Corner is open to all clubs and organisations to mount a display. A free table is on offer.

Commercial sellers are flocking to gain exposure in the Traders Hall, the Second-hand Market to sell pre-loved gear and components, and a variety of displays at the Club Corner.

The ever popular Mini-lecture Program has four different and interesting topics. There's also a full demonstration of Elecraft gear.

See you at the Centre Victoria RadioFest, on Sunday February the 10th.

For more details including how get second-hand sellers book a space, and the timing of talks, check out the website

www.radiofest.amateurradio.com.au

I'm Barry Robinson VK3PV and you are listening to VK1WIA.

News from Central Queensland

Clairview Gathering

The Clairview Gathering is a yearly event where Radio Amateurs meet
at a spot on the coast between Rockhampton and Mackay to relax, talk
radio, re-establish acquaintances and participate in the world renown
Saturday Night Mega-Auction. There might even be some fox-hunting and
there will definitely be RAFFLES ! There is a rumour going about that
George/VK4HAN might be getting a hair-cut again.
The Gathering is one of the main revenue raisers for the
Rockhampton and District Amateur Radio Club Inc. and
Mackay Amateur Radio Association.

It happens in 2013 during the first weekend in May from
Friday evening 3rd to Sunday morn 5th May.
Those who are keen to chill out completely in one of the most relaxing
and laid back venues in the cosmos arrive earlier and stay later.

The Clairview Gathering is so popular that on-site accommodation is
close to being booked out already, so if you want to go you will have to
very quick. Otherwise there are nice camp,
caravan or motor-home sites available too.

For further details contact RADAR Club Secretary Clive VK4ACC
on home phone 07 49271216 or mobile 0429632815

To book your camping spot contact the Clairview Beach Holiday Park
on 07 49560190

DISCUSSION POINT

What use is an f-call?

Over time I've spoken with lots of different people with varying levels of
experience and confidence. Some of those people see everything as an
opportunity where others are hesitant because they fear that what they're
about to attempt might fail.

Obviously in real-life outside amateur radio these same kinds of differences
appear, but what I find fascinating in my experience is that this is not true
for the same people.

Someone who is confident in amateur radio might not be outside the hobby and vice versa.

The thing that struck me about amateur radio early on is that it's all about people. Sure the level of technical competence is on average higher among amateurs than it is in the general population, but among my peers in this hobby are people from all walks of life, both young and old, unskilled and highly experienced, fun and serious.

The more I meet people in this hobby, the more I find to learn and enjoy.

If you're listening to this and you've got a project in mind, but you're not sure what to do about it, I'd like to encourage you to contact another amateur. You'll find that the more you talk about your project, the better you'll be able to explain it, the easier it will be to talk about it, the higher the chance of finding another amateur, or even a whole group of them, who share your particular interest.

If you're looking for inspiration, search YouTube for the ARRL video, "Join the DIY Magic of Amateur Radio".

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

OFCOM THANKS RSGB FOR OLYMPIC HELP

The Radio Society of Great Britain has received a thank-you letter from U-K telecommunications regulator Ofcom. This in appreciation for the national societies assistance in the area of communications during the London 2012 Olympic Games.

In the note, Ofcom's Peter Bury says that the games have come to an end he wanted to express his warm thanks and appreciation for the contribution that the RSGB made to the outstanding success of wireless communications during the event.

According to Bury, one of the critical challenges for Britain was to find enough people with the right skills in radio engineering and interference management to support the needs of the Games. He says that Ofcom could not have found enough people from its own resources and we therefore sought help from you and other agencies to help us find expert staff.

The Fuel Cell Energy Corporation has announced a project using a stationary fuel-cell power plant to support Microsoft's latest data-centre research project. The power plant will use renewable biogas generated by a wastewater-treatment facility as the fuel source

to generate ultra-clean and carbon-neutral
electricity to power Microsoft's Data-Plant
project in Cheyenne, Wyoming. This sub-megawatt
power-plant project will enable Microsoft to
evaluate the effectiveness of using Fuel Cell
Energy power plants to efficiently power future
sustainable data centres.

The sub-megawatt Direct Fuel Cell power plant
will be installed at the Dry Creek Water
Reclamation Facility in Cheyenne, Wyoming by the
spring 2013. The fuel cell plant will provide
200 kilowatts of power

Reason To Be Fearful

Andy Thomas G0SFJ has published his third novel in which 'ham' radio plays
a part.

Called "Reason To Be Fearful", this terse, bleak, gritty novel of lies and
layers of deception centres on a young trafficked woman from Transnistria.

Anastasia, 'Nastya' to her friends, holds the balance of power in the British
Secret Intelligence Service between Bea, the Chinese expert and art historian,
and 'Ammer, the radio ham who is Head of Russia.

In action from Tiraspol to Tallinn, from a brothel in Berlin to a bar in
Bangalore, on board the International Space Station and the Chinese Station
Tiangong, Nastya brings the "Dima" trilogy to its startling conclusion.

The book will be on sale from Amazon.

https://www.createspace.com/4080517

In the event that a giant asteroid is headed
toward Earth, you'd better hope that it's
blindingly white. Why you ask? This is because
one researcher believes that such a pale colored
asteroid would reflect sunlight. So by bouncing
a lot of photons off its surface could create
enough of a force to push the asteroid into a different direction.

Sung Wook Paek is a graduate student in MIT's
Department of Aeronautics and Astronautics. He
says that if timed just right, pellets full of
paint powder, launched in two rounds from a
spacecraft at relatively close distance, would
cover the front and back of an asteroid.

==========

NEWS FROM ARNEWSLINE USA

FCC PROPOSES 3.5 GHZ CITIZENS BROADBAND SERVICE

First there was the old Class A and Class B Citizens radio of the 1940's.
Then came 11 Meter Class D Citizens Radio Service in 1958.
Next was the Family Radio Service authorized in the United States since 1996.
That was followed in 2000 by MURS or the Multi Use Radio Service.
Now in 2013, the FCC is proposing to create a new Citizens Broadband Service
and it's like nothing else the regulatory agency has ever attempted before.

Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

Just before years end on Wednesday December 26th the FCC announced a proposal to make available 100 MHz of shared spectrum in the 3.5 GHz band using small cell and database technologies. The FCC calls the new service in the 3550 to 3650 MHz band the "Citizens Broadband Service" or C-B-S and proposes three tiers of service.

These will be known as Incumbent Access; Priority Access and General Authorized Access.

Incumbent Access would consist solely of authorized federal and grandfathered licensed Fixed Satellite Service 3.5 GHz band users. They would be protected from the other tiers by regulation and technical means. This would include the use of exclusion zones where other C-B-S uses would not be permitted.

Priority Access level would be given to small cell use by certain critical quality-of-service dependent users at specific target locations. This might include hospitals, utilities, state and local governments. It might also include users with a distinct need for reliable, prioritized access to broadband spectrum at specific, localized facilities.

Lastly, the General Authorized Access or G-A-A level would allow opportunistic use of the spectrum for a variety of residential, business and enterprise purposes. These users would have to protect Level 1 Incumbent Access and Level 2 Priority Access users through technologies including geolocation. Also as the lowest level users they would not have any expectation of protection from harmful interference to this user base.

PHONESAT LAUNCH NOW RESCHEDULED FOR FEBRUARY

The PhoneSat CubeSat, originally planned for a December 2012
launch, now looks like it will fly aboard a new commercial
rocket from Orbital Sciences Corporation in February.
Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

The PhoneSat series of micro sat flights is a technology demonstration mission ultimately consisting of three 1 Unit CubeSats to be placed on-orbit in succession. The flights are intended to prove that a smartphone can be used to perform many of the functions required of a spacecraft bus.

The first satellite is built around the Nexus smartphone which will be running the Android operating system and will be enclosed in a standard 1 Unit CubeSat structure. The main function of the phone is to act as the On-board Computer, but the mission will also utilize the phone's

Secure Digital card for data storage.

The bird will also have a 5 Megapixel camera for Earth Observation, and 3-axis accelerometer and 3-axis magnetometer for attitude determination.

Ham radio wise, PhoneSat 1 carries an amateur radio payload that will downlink on 437.425 MHz It must be noted that this overall design was chosen as one of the winners in the Aerospace category of Popular Science magazine "Best of What's New in 2012" awards. It's also quite a lot of flight hardware for such a tiny bird.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Also planned for this launch is the commercial DOVE-1 satellite for a technology demonstration Nano satellite based on the triple CubeSat form factor. Dove-1 plans to transmit its telemetry and image data to the ground 145.825 MHz in the amateur radio band although this is a commercial mission.

SALE OF NON CERTIFIED DEVICES BRINGS $14000 FINE

The FCC has affirmed a $14,000 Forfeiture Order to LawMate Technology Co., Ltd. This for its alleged marketing of unauthorized radio frequency devices for more than two years. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the details:

On July 15, 2009, the Enforcement Bureau's Spectrum Enforcement Division released the $14,000 Notice of Apparent Liability for Forfeiture after it found that that LawMate manufactured and marketed two models of wireless video transmitters in the United States before obtaining FCC certifications for the models. The finding was based on LawMate's own admission in response to a letter of inquiry.

LawMate responded on November 14, 2009. At that time LawMate declared that that it was willing to pay a penalty for its violations but requested cancellation or reduction of the proposed forfeiture amount based on certain remedial efforts that LawMate stated it intended to implement. It also claimed financial hardship, and asserted that it had a past history of compliance with the FCC rules.

Now in affirming the NAL, the FCC says that it carefully considered LawMate's and find no basis for reduction or cancellation of the proposed forfeiture. It noted that LawMate's contention that it planned to undertake certain remedial measures to ensure future compliance with the rules was not a valid reason for a downward reduction of the fine. It also noted that LawMate claim that payment of the forfeiture would place undue stress on the company's financial situation was not accompanied by proper documentation.

ANOTHER NEW SOURCE OF LIGHT ANNOUNCED

A new and more efficient way to light your way is on the horizon. Amateur Radio Newsline's Skeeter Nash, N5ASH, reports:

Scientists at the Wake Forest University have created a new type of light bulb that promises to be just as efficient as LED equivalents, but without any of the drawbacks.

The new field-induced polymer electroluminescent bulbs or FIPEL for short, produce light when an electric current is passed through its Nano-engineered plastic layers. The team says that the new type of bulbs are malleable, allowing them to take any shape like compact fluorescent lamps. They also won't shatter like traditional bulbs, nor will they generate the same hum or flicker.

The inventor of FIPEL is Dr. David Carroll. He believes that his new solution is superior to LED bulbs because there is a limit to how much brightness you can get out of them. If you run too much current through an LED they can short out and melt. Not only that, the light generated by FIPEL bulbs is closer to natural sunlight, unlike the bluish tint generated by LEDs.

Any worries about longevity are also put to rest by Dr. Carroll. He claims to have had a field-induced polymer electroluminescent prototype lamp working in his laboratory for almost a decade.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH.

As for when the technology will make the jump to a commercial product? The research team says that a corporate partner is interested in producing the new bulbs at scale, with the first run expected in 2013.

(CGC, earthsignals.com, TheVerge.com)

OPERATIONAL NEWS - DATELINE 2013

VK ROSS HULL MEMORIAL VHF-UHF ALL JANUARY

ZL Jock White Memorial Field Day Contest Sat and Sun Feb 23 and 24.

WW International Museums Weekends June 15/16 and 22/23

Many radio clubs took part in the International Museums Weekend in 2012.

In 2013, this event will take place on the double weekends of 15 & 16 and 22 & 23 June. Radio amateurs are encouraged to participate by setting up stations in their local museums.

Organiser Harry, M1BYT asks that all those intending to take part in the event should register their museum via the web form on the website www.ukradioamateur.co.uk/imw

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Z 81 Z is currently on the air from South Sudan on the HF bands, mostly using CW.

Please QSL via 4 Z W his home callsign or electronically using
Logbook of the World.

Operational as 9X0PY from Rwanda until 31st January.
Activity will be holiday style, on all bands, using mainly CW and listening
up 25kHz. QSL via his home callsign sm 6 cpy , either direct or via the
Bureau.

Logbook of The World speeds up

The Logbook of The World queue has been shrinking steadily
since 7th January, when the system was brought back online
after the installation of a new database server equipped
with solid state drives.

Since then, the delay between a file being uploaded and
processed is about 8 days and is dropping by one day
approximately every 10 hours.

A stronger ATV signal from VK3RTV

The digital amateur television repeater VK3RTV that serves Melbourne and
Geelong now has a stronger signal making its reception a lot easier.

Repeater custodian Peter Cossins VK3BFG reports that the VK3RTV output has
been increased, with a new power amplifier and supply.

The latest upgrade, which will fill in some marginal reception areas and
expand the Mt Dandenong repeater general coverage, has been funded by the
system users.

Peter VK3BFG imported the PA in kit-form to build it up, provided the heat sinking,
worked on the input and output arrangements, and homebrewed its control system.

He explained that the PA consists of a dual FET push-pull amplifier has built-in over voltage, temperature and VSWR protection, and a high current FET switch.

The system is sequenced so the fans come on first, then the DC supply and followed by the RF drive.

Peter VK3BFG found on installation it had to be throttled back to boost the signal only by an 8 dB gain, as there was a high return loss on the transmit antennas.

New antennas are already spare on the tower and once transferred over, a further 3 or 4 dB is possible, but reports already show the increase is very noticeable.

Signal reports will be welcome on the 2-metre 147.400 MHz ATV liaison frequency.

WW SPECIAL INTEREST GROUPS --- ILLW

ILLW heading toward a record

The International Lighthouse and Lightship Weekend continued to grow from its first event held in August 1998 that attracted 158 stations in 40 countries.

Many of the amateur stations in the original activations at the historic maritime structures have been with the fun event since, and joined over the years by many hundreds more.

The sponsors, the Ayr Amateur Radio Group Scotland, thanks all entrants for their loyalty, and looks for another record year as we move towards the magic 500 registrations.

The event is always held on the 3rd full weekend in August, aiming to promote public awareness of the former navigation structures and give amateur radio some good publicity.

To register or find out more about the next event on August the 18th and 19th visit the website www.illw.net

AMATEUR RADIO ENTERING ITS SECOND CENTURY OF DISASTER COMMUNICATIONS IS THEME OF WORLD AMATEUR RADIO DAY 2013

Each year on April 18th, radio amateurs around the world celebrate World Amateur Radio Day. In 1913, the first recorded instance of amateur radio being used to provide communications in a natural disaster took place during severe flooding in the Midwest of the United States. This in part led to the formation of the International Amateur Radio Union in 1925.

Now, event planners say that activities surrounding World Amateur Radio Day 2013 can be a great opportunity to spread the word about what amateurs are doing in the field of disaster communications in the 21st Century.

More is on-line at www.iaru-r2.org/world-amateur-radio-day-2013

(IARU via arnewsline)

REWIND

A BELATED HAPPY 65 TO THE TRANSISTOR

And finally this week, a belated happy birthday to an electronic device whose invention revolutionized telecommunications and made possible the technology that we have today. Of course we are talking about the transistor as we hear from Amateur Radio Newslines Bruce Tennant, K6PZW:

On December 16, 1947, Bell Labs researchers William Shockley, John Bardeen and Walter Brattain created an amplifier from a germanium crystal that boosted the level of an input signal by 100 times. Various researchers had tried to develop a solid-state alternative to the vacuum tubes during World War II but none had succeeded. The Bell Labs Trio demonstrated it for lab officials a week later on December 23 where Shockley deemed it a magnificent Christmas present.

Bell Labs announced the invention of the transistor six months later. The device went on to become one of the signature scientific achievements of the 20th century, ranking up with splitting the atom, manned flight, and the discovery of DNA. One could argue, in fact, that the transistor was the most important breakthrough of the 20th century because subsequent advances in those other fields relied on the computing power made possible through integrated circuits and semiconductors. In essence, information has become a science itself.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

As a result of their achievement Electronics Magazine put a photo the three men on its cover. The three went on to share the Nobel Prize for physics in

1956. John Bardeen became a laureate a second time in 1972 for his work on superconductivity. And very apropos the entire story is on-line at tinyurl.com/transistor-comes-alive

//
Propagation Forecast Bulletin #03 de K7RA:

Posted: 18 Jan 2013 02:03 AM PST
http://www.eham.net/articles/29652

Solar activity pulled back over the past week, following a stellar performance in the week prior. Average daily sunspot numbers were down 34.3 points to 129, but average daily solar flux actually rose 9.7 points to 157.4. This was because solar flux values seemed to lag behind last week's activity, raising this week's average in the first few days of the current week.

//
Irish Amateurs Get 472 kHz Band:

Posted: 18 Jan 2013 01:45 AM PST
http://www.eham.net/articles/29651

Irish amateurs have been informed by ComReg that the band segment 472 to 479kHz is available to all licensed radio amateurs in Ireland, on a Secondary basis. Stations must not cause interference to the Primary Users, including coast stations and the aeronautical radio navigation service.

//
DX News -- ARRL DX Bulletin #03:

Posted: 17 Jan 2013 10:06 AM PST
http://www.eham.net/articles/29650

This week's bulletin was made possible with information provided by NC1L, PS7DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

2012 Marks All-Time High for Amateur Radio Licenses:

Posted: 17 Jan 2013 10:06 AM PST
http://www.eham.net/articles/29648

As 2012 came to a close, ARRL VEC Manager Maria Somma, AB1FM, had a good reason to cheer: The number of radio amateurs in the US reached an all-time high of almost 710,000. "2012 was definitely a banner year for the number of Amateur Radio operators here in the US," she said. "It is amazing to see these new numbers and to know that Amateur Radio is experiencing such a healthy trend."

//
2012 Brought Increase in DXCC Applications, ARRL QSL Bureau Card Processing

Posted: 17 Jan 2013 10:05 AM PST
http://www.eham.net/articles/29647

With the coming of more sunspots comes more DX. And when more amateurs work DX, the ARRL's Membership and Volunteer Programs Department -- especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus -- goes into high gear.

//
ARRL Board of Directors: 2013 Meeting Set for Jan 18-19 in New Orleans:

Posted: 17 Jan 2013 10:05 AM PST
http://www.eham.net/articles/29646

ARRL policy is made by its Board of Directors. The 15 voting members of the Board are the Directors who are elected by the ARRL members in their respective divisions. The Board meets in January and July, usually in the Hartford area; however, this year, the meeting will take place in New Orleans, Louisiana.

//
Dayton Hamvention Awards Nomination Deadline Extended to February 15:

Posted: 17 Jan 2013 10:04 AM PST
http://www.eham.net/articles/29645

There is still time to nominate a radio amateur for the 2013 Dayton Hamvention Awards: Amateur of the Year, Club of the Year, the Special Achievement Award and the Technical Excellence Award. The deadline for nominations has been extended to Friday, February 15.

//
Number One Mixed DXCC John Dack, W7KH (SK):

Posted: 17 Jan 2013 10:04 AM PST
http://www.eham.net/articles/29644

On Monday, January 7, John Dack, W7KH, of Seattle, Washington, passed away. He was 91. An ARRL Life Member, Dack sat at the top of the DXCC mixed standings with 398 entities, including all 340 current entities and 58 deleted entities. He worked every DXCC entity except Damau Diu (CR8), French Indochina (FI8) and Manchuria (C9). South Sudan

(ST0) was the last new DX entity in Dack's log; he worked ST0R in August 2011.

Yebbut.....
They need a permit to use 1850-1900 kHz (is that all they have?) - and
that's only for the ten contests, and for 4m.

These days, why are some administrations so miserly about 160m? [And
when can we have our bottom 10kz back?]

OTOH, they seem to have been granted all of 5.260-5.410 MHz (albeit
again with a special permit).

SARL NEWS SUNDAY 20 January 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

RE-APPLICATION FOR AN AMATEUR LICENSE

RADIO EXAMINATION DETAILS ANNOUNCED

BURSARIES FOR CLASS A RAE STUDENTS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

RE-APPLICATION FOR AN AMATEUR LICENCE

In SARL NEWS of 25 November, the Council of the SARL alerted radio amateurs that they would have to re-apply for their license every 5 years. Here is an excerpt of the announcement: "All Radio Amateurs will be required to re-apply for a license for the period of 1 April 2013 till 31 March 2018. Payment of the annual license fee can be made annually for the full 5 year period in which case a discounted rate applies. Stay tuned to SARL News or visit www.sarl.org.za frequently. New information will be published as soon as it comes to hand."

Last week ICASA published the Government Gazette with the requirements. Every Radio Amateur is required to reapply for his or her license by 25 January 2013. The SARL has prepared a simplified form which has been approved by ICASA. It is available on www.sarl.org.za.

No fees are required and no new examinations. Simply complete the form, scan it and send by Email or ordinary mail to ICASA. The SARL web has full detail of the email and postal address. There is also a guideline on how to fill in the form.

Yesterday SARL Letter number 2 for January 2013 has been mailed to all members with email addresses also containing the information and a PDF copy of the form.

Club committees please note that repeater and other licenses must also be renewed.

RADIO EXAMINATION DETAILS ANNOUNCED

The SARL RAE Manager, Gideon Jannasch, ZS4GJA, has announced the details of the 2013 RAE. The May examination will be held on 16 May 2013 and the October examination on 17 October 2013.

Get full details on www.sarl.org.za and select licensing from the left hand menu and follow the links.

Invigilators and HF Assessors need to register as soon as possible. Full details and all the forms are available on the SARL web under licensing. Select the RAE Administration button.

A new Regulation study guide is also available which contains a summary of all regulations pertaining to amateur radio. Students need to study this guide for the RAE.

Any question regarding the RAE should be sent to Gideon with email address rae@sarl.org.za.

BURSARIES FOR CLASS A RAE STUDENTS

The South African Amateur Radio Development Trust has made four bursaries available from the Tony Reumerman ZS6AOG Bursary fund, two for the May exam and two for the October exam. Each bursary is valued at R1 000. On passing the RAE the student also receives an ARRL Basic Antenna Book valued at R350.

Full details and a bursary application form are available on www.amateurradio.org.za. The closing date for bursary applications for the May examination is 31 January 2013.

ADF BREAKS THROUGH THE R30 000 MARK

This week the SARL Antenna Defence Fund increased to R30 050 edging closer to the R50 000 target. Thanks to all who have contributed. To see a list of donors and to find out how to add your name and donation visit www.sarl.org.za and select Antenna Defence Fund from the left hand menu. This past week the Pretoria Amateur Radio Club made a substantial donation. The SARL appreciates your support.

PACK YOUR AMATEUR GEAR AND MOVE TO MARS

You might want to call this the ultimate one-way DXpedition. While not specifically directed to the amateur radio community, the Netherlands based nonprofit organization Mars One, has released its basic astronaut requirements setting the stage for a televised global selection process that will begin later this year.

Mars One hopes to put the first settlers on the red planet by 2023. The organization is not looking for scientists or former jet jockeys as colonists. Rather anyone who is at least 18 years old can apply to become a Mars pioneer.

Officials at Mars One say that the most important criteria are intelligence, good mental and physical health and dedication to the project. Those selected as its astronauts will undergo eight years of training before launch.

Norbert Kraft is Mars One's chief medical director and a former NASA researcher. He is quoted as saying that gone are the days when bravery and the number of hours flying a supersonic jet were the top criteria. Kraft says that now a days space exploration planners are more concerned with how well each astronaut works and lives with the others, in the long journey from Earth to Mars and for a lifetime of challenges that would lie ahead.

Newsline reports that Mars One plans to launch a series of robotic cargo missions between 2016 and 2021. These would be used to build a habitable outpost ahead of the arrival of the first four colonists in 2023. More settlers would then arrive every two years thereafter. And less we forget to mention, this will be a one way trip as there are no plans to return the pioneers to Earth.

NEW MEMBERS

The SARL welcomes 7 radio amateurs who joined our organisation as members. We trust that they will enjoy a long and happy relationship wit the SARL. They are:

Johan Latsky, ZSL1055 John Gallie, ZSL1056 A F Barnard, ZR1TAS Michael Corke, ZS1RJQ Carl Kies, ZS1ZK Daniel du Toit, ZS6DZ David Kirkham, G4SNS

CONTEST NEWS

The SARL Summer QRP Contest is on the air next Saturday afternoon; that is 26 January from 12:00 to 15:00 UTC. The rules for the contest have been changed, so please check the 2013 Contest Manual.

The AWA CW Activity day takes place from 10:00 UTC on Saturday 2 February until 10:00 UTC on Sunday 3 February. It is CW activity on 20, 40 and 80 metres using QRP or 100 watts. The exchange is a RST report, the operators name and grid locator.

The SARL National Field Day takes place from 10:00 UTC on Saturday 9 February to 10:00 UTC on Sunday 10 February. This is an ideal weekend for a Radio Club outing and getting the members into camp. The contest allows SSB, CW and digital working on 160, 80, 40, 20, 15 and 10 metres. There are six categories of entry to choose from to suit your club.

The exchange is the number of transmitters, the Field Day operating class and the Provincial abbreviation. Equipment for the Field Station

may only be set up in the 24 hours prior to the starting time of the contest. This restriction applies to antennas, masts, towers and transmitting equipment, but excludes accommodation such as a caravan, tent, etc.

The rules for the Field Day contest have been changed. Consult the 2013 SARL Contest Manual for the complete rules of all the contest.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at low to moderate levels. Big sunspot AR 1 654 harbors energy for X-class flares but has up to date failed to produce a major eruption.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 72.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be frequent 10 m openings in the afternoon, especially on sunlit paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 20 January - Last day of the PEARS National VHF/UHF contest. 26 January - SARL Summer QRP Contest 12:00 to 15:00 UTC. 31 January - Last day for submission of nominations for councilors for the next term and motions for the 2013 AGM. 31 January - Last day for submission of a brief outline of a proposed paper at the SA AMSAT Space Symposium on 18 May 2013 to saamsat@sarl.org.za. 31 January - Last day to submit applications for a SAARDT bursary by RAE students. Details from www.amateurradio.org.za. 2-3 February - AWA CW Activity. 9-10 February - SARL National Field Days. 23 February - SARL Youth Sprint 10:00 to 12:00 CAT with a special event starting at 09:00.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

http://forums.qrz.com/showthread.php?376375-HamRadioNow-GNU-Radio-(fromthe-DCC)-A-Tale-of-Two-Three-Hamfests&goto=newpost

HAMRADIONOW.tv

Episodes 51 and 52

Episode 51: Introduction to GNU Radio

The four-hour "deep dive" from the DCC

What's GNU? Oh, not much. What's GNU with you? OK, sorry, it's an old joke. The GNU Radio Project is a development and experimentation platform for the software behind Software Defined Radio. You'll find a more complete description here. Tom Rondeau KB3UKZ is the project leader, and he presents this four-hour talk as the Sunday Seminar from the 2012 ARRL & TAPR Digital Communications Conference, held last September in Atlanta.

We've got one more program to release from the DCC ☐ the Saturday Banquet keynote. That'll be coming up in about a week.

Episode 52: A Tale of Two... Three Hamfests

Sunday Is Dead. Long Live Friday!As more hamfests abandon Sunday in favor of Friday, Gary talks to the chairmen of two of them ☐ the newly reborn Miami Hamfest (aka Tropical Hamboree), and Charlotte. Then he dissects the Shelby NC hamfests's move back to the county fairgrounds they abandoned five years ago. Let the Hamfest Season begin!

Watch these episodes at our web site, www.HamRadioNow.tv.

http://forums.qrz.com/showthread.php?376199-Amateur-Radio-Newsline-Report-1849--January-18-2013&goto=newpost

Amateur Radio Newsline☐ Report 1849 ☐ January 18 2013

Amateur Radio Newsline report number 1849 with a release date of January 18 2013 to follow in 5-4-3-2-1.

The following is a Q-S-T. Developers of free D V digital audio say a change in the FCC Amateur Service rules is needed; the Sun wakes up and hurls a large C-M-E toward Earth; the ARRL holkds it first Board of Directors meeting of 2013 and the FCC to hold open hearings on the impact to communications caused by hurricane Sandy. All this and more on Amateur Radio Newsline☐ report number 1849 coming your way right now.

EMERGING HAM RADIO TECHNOLOGY: DEVELOPERS OF CODEC 2 DERIVED FREE DV SAY A RULES FCC PART 97 RULES CHANGE IS REQUIRED

The Codec2 digital voice project has developed a new program called FreeDV. This is a system to encode digital voice on any two-way radio using only 1.125 KHz of bandwidth. But says Codec 2 researcher Bruce Perens, K6BP, FCC regulations aren't up-to-speed with the challenges of software-defined radio and Open Source architecture:

GB4LBC - RNLI SOS Radio Week Special Event Station

Posted: 19 Jan 2013 09:40 AM PST
http://forums.qrz.com/showthread.php?376378-GB4LBC-RNLI-SOS-Radio-Week-Special-Event-Station&goto=newpost

Welcome to the Special Event Station GB4LBC

19th January 2012 to 27th January 2013.

This station is part of the RNLI SOS Radio Week Event and will be operating from

St. Bees Lifeboat Station, Cumbria.

Locator: IO84EL WAB: NX91

GB4LBC, will again, for the second year running, be part of the four Cumbrian Lifeboat Stations activated.

Last year resulted in over 1800 contacts for the four stations involved ie GB1, 2, 4, and 5 LBC (Life Boats Cumbria)and a "second edition" certificate for working all four Cumbrian Lifeboat Stations will be available again this year.

For information about how to make a donation and the awards/qsl's available please see below.

Last year GB4LBC, in conjunction with the three other stations hosted in Cumbria

helped to raise in excess of £2000 for the four RNLI Stations supported.

Help us to make a difference and raise even more this year, either by using the text option or link to the Just Giving page below:

Text:

Send code EGQC76 followed by a space and then amount in £ eg EGQC76 £5 to 70070

Just Giving:

http://www.justgiving.com/Elizabeth-Waller1

RNLI - Royal National Lifeboat Institution

Charity Registration No. 209603

Further details on the event and how to get involved can be found on :

http://www.sosradioweek.org.uk.

A full list of registered stations can be found on the ☐Stations☐ page.

To-date, SOS Radio Week events have raised over £10,000 for the RNLI and we☐d like to give that a significant boost this time too.

The RNLI is the charity that saves lives at sea. Its volunteer lifeboat crews rescue an average of 22 people every day and RNLI lifeguards provide a seasonal lifeguard service on selected beaches. The RNLI is an independent charity, funded by voluntary donations. They could not save lives at sea without your support.

About St Bees RNLI Inshore Lifeboat

The first St Bees Inshore Lifeboat was commisioned in 1970, following local fund raising. From the early days when the crew operated a Class D boat from a boathouse which was basically a single garage, the station has grown until it now operates an Atlantic 85 boat, The Joy Morris MBE , named after the beneficiary whose legacy funded the purchase of the boat.

The boathouse too has developed and is now a purpose built building which has full facilities for housing and servicing the boat plus comprehensive facilities for the crew.

Awards and QSL Cards:

G4USW is the qsl manager for all four stations taking part in Cumbria (see also GB5LBC), so if working all, or some of the four stations, please consider qsl'ing direct supplying an SASE as this will be the quickest means, and the preferred method.

****

If you work all four stations please contact G4USW by email g4usw1@sky.com for a certificate to say you have done so. The preferred method is to send by .jpeg via email, but, as some do not have email facility postage can be undertaken.

If want QSL by post then please let G4USW know. There will be postage/packaging cost of £1.50 UK EURO countries 2 Euros, other locations $2 green stamps. Please contact by email if extra information is needed g4usw1@sky.com

ANY extra monetary amount sent will be gratefully received and fully donated to the RNLI the Certificate itself is FREE by email method. Payment as mentioned above for hard copy versions is to cover cost of hardbacked envelope and postage.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th-January, through Sunday, 20th-January there were 215 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TK, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9L, VP2E, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5H, TANZANIA. Serge, F6AML, will be active as 5H1Z from Zanzibar (AF-032) between January 20th and February 28th. Activity will be on 40-10 meters using CW and SSB. During his time there, he may be active from Mafia

Island (AF-054), Pemba Island (AF-063) and an island in the AF-075 IOTA group. His equipment is a FT857D with a 400w amp into a HF6V with 8 radials. QSL via his home callsign, direct (see QRZ.com) or by the Bureau (he suggests Bureau E-mail request <qsldxped@yahoo.fr>).

5X, UGANDA (Update). Members of the F6KOP team are expected to be active as 5X8C between February 6-18th, from a location some 20 Km from Entebbe airport. The latest report states that the team is now complete with the last operators Jean-Louis/F5NHJ and David/EI9FBB. Unfortunately, Frank, F4AJQ, will not be able to operate from 5X and is now the team leader of the "Back Office" in France. Operators Seb/F5UFX and Alain/F6ENO are now team leaders of the DXpedition to 5X. Mode leaders are Bernard/F9IE (CW), Flo/F5CWU (SSB) and Jean-Paul/F8BJI (RTTY). The current DXpedition team is as follows:
CW Team #1: Seb/F5UFX, Dave/K4SV, Patrick/F2DX and Norbert/DJ7JC
CW Team #2: Alain/F6ENO, Jean-Marc/F8IXZ, Stephane/F5UOW and Jean-Jacques/F5NKX
SSB Team #1: Gerard/F2JD, Gerard/F2VX, Eric/ON7RN and Fran&#65533;ois/ON4LO
SSB Team #2: Michel/FM5CD, Lars/DF1LON, Uwe/DL8OBF and David/EI9FBB
RTTY Team: Jean-Paul/F8BJI, Hans/DL1YFF, Jean-Louis/F5NHJ and Michel/F5EOT
Mixed Mode Team: Flo/F5CWU, Valery/RG8K, Mike/UA9KGH/1 and Bernard/F9IE

John, F5VHQ, will join the team on February 13th, which will complete the 25. The two pilots stations are: Thierry/F4TTR for the French speaking people and Andre/V51B, for the English speaking Hams. All the matters are booked and papers are in hand. Look for the first signals expected on February 8th, around noon. The main focus will be on the low bands, with two dedicated K3 radios. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. Suggested frequencies were published in OPDX.1081. The last hand to control the gear and finish the packaging is scheduled at the F6KOP QTH on January 26-27th. The group is still looking for donations/ funds, and they would like to "thank a lot firms, sellers, DX Bulletins editors, associations, hams and all of you who helped" them in this new F6KOP adventure. Those who want help them can go to their donors page at: http://www.5x2013.com/index.php/help-us
Also, don't forget to sign their Guest book at:
http://www.5x2013.com/index.php/guestbook
You can subscribe to the mail diary at: f5nql@aol.com
Yann, F1NGP, will be their QSL Manager (100% OK Direct, ClubLog's OQRS, Bureau and LoTW). For more details and updates, see:
http://www.5x2013.com

60 METER NEWS.....
* Johan, SM0TSC, has been given an experimental license for six months to put Sweden on 60 meters (5 MHz). He is allowed to operate on 5310, 5320, 5380 and 5390 center frequency plus 1.5 KHz, maximum of 3 kHz bandwidth and 100 watts. For skeds on any mode, E-mail him at:
sm0tsc@hflink.net

* Peter, OX3XR, reports that Greenland has now gotten the following frequency band for 5 MHz: 5250-5450 kHz. He will soon be active

using a dipole on 5 MHz.

9G, GHANA. Marcel, AI6MS, reports [edited]: "I will be operating portable from January-May 2013 in Ghana, West Africa, as 9G5MS with my Yaesu FT-857D. Anyone is welcome to make a contact, though priority will be given to schools, universities, and prescheduled contacts. I am volunteering with a non-profit called 'Medicine on the Move' and will be using amateur radio in the classroom for the students from the 'AvTech Academy' in Kpong, Ghana. QSL cards are tentatively planned and can be expected in the 2nd half of 2013 if requested. I hope to be operating during the ARRL School Club Roundup as well."

9Y, TRINIDAD AND TOBAGO (Cancelled). Jim, N6TJ, has cancelled his activity as 9Y4W from Scarborough, Tobago Island (SA-009, WLOTA 0412), for the ARRL DX CW Contest (February 16-17th). His host on Tobago has a broken tower and there is no time to fix it before the contest.

A3, TONGA (Update). Werner, DJ9KH, will be active from Tongatapu Island (OC-049) between February 13-23rd, and Vava'u Island (OC-064) between February 24th and March 2nd. His callsigns will be A31WH (OC-049) and A31WH/p (OC-064). He will pick up his license as soon as he arrives in Tonga. His equipment will be a K3 with 100 watts and wire-antennas (loops and verticals). Activity will be on the HF bands, depending on propagation. Suggested frequencies are:
CW - 1826.5, 3505, 7020, 10105, 14024, 18080, 21024, 24894 and 28024 kHz
SSB - 3799, 7070, 14190, 18145, 21290, 24950 and 28490 kHz
RTTY - 10140, 14080, 18110, 21080, 24920 and 28080 kHz

QSL via his home callsign, direct or by the DARC Bureau. He plans to update on <http://www.tonga2013.de/> every day and give information about planned activities, modes and frequencies. He doesn't use an online-log, LoTW and e-QSL.

DAYTON HAMVENTION NEWS. Tim, K3LR, reports that the 2013 Dayton TopBand dinner will be held on Friday evening May 17th, at the Crowne Plaza in the Presidential Ballroom - downtown Dayton, Ohio. Top Band Social hour is at 6:15 PM and Dinner starts at 7:15 PM. Noted Top Band enthusiast - Larry "Tree" Tyree, N6TR will give a program. Reservations are available online with credit cards and PayPal. Use the "contact us" information if you need to make other arrangements. All of the details are available here: http://topbanddinner.com
Scroll down to make your reservations. Four nights of great hospitality are also at the Crowne Plaza Contest Super Suite. Details are here: http://contestsupersuite.com

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting the following operation for DXCC credit:
Z81Z – Republic of South Sudan; Current operation commencing January 8, 2013

FRENCH SOUTHERN INDIAN OCEAN TOUR. Gildas, TU5KG, is once again traveling through the South Indian Ocean on a fishing boat. As in past years, he

will be sailing in both the Kerguelen and Crozet Island regions, and may activate the islands (if he goes ashore) using his new callsigns - FT5XT (Kerguelen) and FT5WQ (Crozet). When at sea, he will sign as callsign/mm. QSL via F4DXW, direct only. View his QSL card on QRZ.com.

H40, TEMOTU PROVINCE. Sigi, DK9FN, will once again return to the Temotu Province for a fifth time and be active as H40FN, but this time from Lata, Nendo Island (OC-100) between December 21st and January 6th (2014). QSL via HA8DD, direct only. More details will be forthcoming. Watch the QRZ.com Web site at: http://www.qrz.com/db/H40FN

IO5, ITALY (Special Event/AAW Week). Leo, IW5EFX, informs OPDX that he will be active as IO5SP during the month of February and 10th Antarctic Activity Week (AAW). The suffix stands for "South Pole". A special QSL will be
sent 100% via the Bureau. See info on QRZ.com. He also mentions to look for IO5ANT during the AAWeek from National Antarctic Museum in Siena, Italy. QSL will be sent 100% via the Bureau.

IOTA NEWS.............
EU-006. Members of the Westnet DX Group will once again be active as EJ7NET from the Aran Islands between May 10-15th. Operators mentioned are Declan/EI6FR, Tony/EI3HA, Tony/EI2GX, Liam/EI7DSB, Dermot/EI5IQ, Tony/EI2KC, Bernhard/HB9ASZ, Rolf/HB9DGV, Gordon/ MM0BIM, Barry/GM3YEH, John/GM0DJG and Allan/GM3OZB. Activity will be on all HF bands and modes. QSL via LoTW, or direct to Declan, EI6FR. NO eQSL or Bureau QSLs.

EU-016. Operators ON2AV, Danny/ON4CEZ and Jan/ON7JA will active as 9A/OO7T/p from Brac Island (ACIA IC-657, CIA-04, IOCA CI-010, MIA MC-042, WLOTA 0416), Croatia, between July 24th and August 2nd. Activity will be on all bands and modes. They will also be an entry in the RSGB IOTA Contest (July 27-28th). QSL is 100% via the Bureau. No e-QSL.

EU-123. Operators Ken/G0ORH and David/G3KLH will be active as MM3I from Arran Island (IOSA CL01, SCOTIA CS14), in the Clyde Islands IOTA group between July 22-30th. Activity will include an entry in the RSGB IOTA Contest (July 27-28th). Look for activity on 30/17/12 meters outside of the contest. They also plan some activity on 60 meters (5 MHz). QSL via G0ORH.

OC-285. Ralph, H44RK (aka 5W0W), is going to activate Sikaiana Atoll. Dates have not been provided. Ralph is currently active from Apia, Somoa, until March 3rd. He is looking for 2-3 operators, but 1 operator must be CW POC. If interested, contact Ralph at <ralph.honiara@gmail.com> or NR6M at <turvin2009@yahoo.com>.

SA-096. (Correction) In OPDX.1095, the Web page for the LU6W DXpedition was listed wrong which could have an impact on donations. It should have been: http://lu6w.yosalite.com

J5, GUINEA BISSAU. Members of Verona DX Team will once again return to
Cumura to help with the mission work and be active as J52HF between
February 10th and March 2nd. In their spare time, they will be on air
on the HF bands and 50 MHz, SSB only. Operators mentioned are Livio/IZ3BUR,
Libero/IK3RBE, Enzo/IK3VVD, Ilario/IZ3STA and Milena/IK3VZJ. QSL via
I3LDP. More details should be forthcoming, but you can view details and
pictures from their 2012 DXpedition at:
http://www.ari.verona.it/veronadxteam/en

NH0, MARIANA ISLANDS. Joe, JA1LZR, will be active as NH0Z during the CQ
160 Meter CW Contest (January 25-27th) as a Single-Op entry. Activity
will be from Tinian Island (OC-086, USI NI003S, WLOTA 3108). QSL via
JJ2VLY (see QRZ.com).

P4, ARUBA. Helmut, DF7ZS, will once again be active (possibly as P41P)
from Aruba (SA-036) between March 26th and April 3rd. Activity will
include the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band
entry. Some casual operations will take place before and after the contest
on 17/12 meters. The callsign for the WPX contest is still tentative.
QSL via his home callsign. Watch his home page at: http://www.df7zs.de

PF100, THE NETHERLANDS (Special Event). Operator Fred, PA0FAW, (ISWL
Member PA-11092, FISTS #9858), will be operating with the special call-
sign PF100ZOO between February 1-28th. Activity is to commemorate the
100th anniversary of the very well known Arnhem Zoo (Official
name is Burgers Zoo). Operations will mainly be CW and SSB, with some
Digital modes. Fred will once again be active from the De Hoge Veluwe
National Park (WFF PAFF-005) and from Grid Locator Squares: JO21WX,
JO22VA and JO32AA. QSL via PA0FAW, by the Bureau, direct and eQSL.cc.
(No LOTW). SWL reports are always welcome and appreciated. See QRZ.com.

PJ2, CURACAO. Operators Mike/W1USN, Bob/AA1M and Scott/W1SSR will be
active as PJ2/homecall from Curacao (SA-099, WLOTA LH-0942) between
March 8-22th. Activity will be on all bands 160-10 meters using CW,
SSB, PSK and RTTY. QSL via their home callsign, direct CBA or by the
Bureau.

2O12W QSL STATUS. Glyn, GW0ANA, reports: "I would advise that all direct QSL cards have now been sent out, also log uploaded to LoTW and eQSL. The direct QSLs were delayed due to problems on design due to Olympic Logo authorization having to go to Olympic committee. All logos now approved and cards printed and gone out."

TIME TO UPDATE YOUR GS-IRC CHART (Update). Bill, W9OL, informs OPDX that he has made many updates to his GS/IRC Chart. He states, "It's the New Year and many countries are raising their postal prices, and it's time to update the cost of QSLing. Please take a look at the GS-IRC Chart and let me know of any changes in postage for the country YOU reside in. There is a lot of OLD data that I have NOT received updates on. If you live in or have a friend who resides in these missing countries, please elicit his help in obtaining the new information.
The current chart resides at:
http://www.qsl.net/w9ol/IRC_Chart.htm
If you wish to download the whole file, go to:
http://www.qsl.net/w9ol/IRC_Chart.xls

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!!!!

S7, SEYCHELLES. Operators of the Uruguay DX Group (Mario/CX4CR and Bert/CX3AN) plan a 2013 DXpedition to the Seychelles. However, Mario had developed some health problem and ended up with a triple by-pass. At the moment he is recovering 100% and again on the bands. Bert will go ahead with the plans, but alone for this year's DXpedition. Look for him to be active as S79AN from Pointe Larue on Mahe Island (AF-024) between February 4-11th. Activity will be holiday style on 80-6 meters, including 30/17/12 meters, using CW and SSB. He will try to operate as much as he can. QSL via CX3AN direct only (see QRZ.com). NO Bureau or eQSL.

SI9, SWEDEN. Operators Raf/ON5RZ, Dirk/ON7DS and Jean/ON4JW will operate as SI9AM between January 23-28th, from the "King Chulalongkorn Memorial" the largest Thai Pavilion in the world outside Thailand in Raganda, Sweden. The trio plan to be an entry in the UBA DX Contest (January 26-27th). Outside of the contest, they will be active on 160-10 meters using CW, SSB and FM. Suggested frequencies are:
CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
FM - 145.550 MHz and repeater RV49 - 145.612 MHz
QSL via SM3CVM, direct or by the Bureau. Bureau cards can be requested by E-mail at: info(at)si9am.se
Visit the SI9AM Web page at: http://www.si9am.se
Look at their special page at: http://www.si9am.tk

TC16, TURKEY (Special Event). Members of the Turkish Radio Amateur Club (TRAC) from the Bursa Branch (the YM3KB team) are currently activating the special callsign TC16BURSA as of January 10th through March 10th. Activity will be on all the bands under the terms of propagation, using CW, SSB, PSK snd ROS modes. Station information about actively working bands, frequencies and modes will be announced online on their Facebook page <https://www.facebook.com/trac.bursasubesi> and their QRZ.com page <http://www.qrz.com/db/TC16BURSA>. QSL direct to POB 76, Gencosman, BURSA, 16105 Turkey.

TCSWAT 2013 ACTIVITIES ANNOUNCED. Bekir, TA2RX, informs OPDX that the members of the "TC Special Wireless Activity Team" (TCSWAT) have announced their activities for 2013 to activate several special callsigns in memory of those who lost their lives in WWI and some other upcoming anniversaries. The "Giresun Radio Amateurs and Nature Sports Club" (GITRAD) will also join them on two more such activities listed below. The TCSWAT might be organizing some foreign DXpeditions again, if they can get the permissions. The current agenda and callsigns are as follows:
January 15-31st - TC150RC; 150th Year of Robert College
February 1-28th - TC1BW; In memory of TA1BW (SK) - Asil Feri
March 16-18th - TC18M; In memory of the Naval Victory of March 18, 1915
April 1-15th - TC47A; In memory of the 47th Giresun Volunteer Regiment
April 20-25th - TC57A; Scouts Camp in "Memory of Martyrs", Çanakkale
June 28-30th - Friedrichshafen HamFest (TCSWAT hopes to see you there)
July 1-31st - TC150RC; 150th Year of Robert College
August 26-31st - TC42A; In Memory of the 42th Giresun Volunteer Regiment
October 14-30th - TC90TC; 90th Anniversary of the Turkish Republic
November 1-17th - TC301B; 30th Anniversary of the Turkish Republic of Northern Cyprus
December 20-25th- TC9SAM; Scouts Camp in Memory of Martyrs, Erzurum
** Also look for TC0C and TC2C to be in various contests. TC2C was active this past weekend from YM2SFT club station during the HA DX Contest as Multi-Op/Single-Transmitter/Low-Power entry. Look for more activities that might be announced as they come along.

TM10, FRANCE (AAW Special Event). Look for special event station TM10AAW to be on air on February 2-3th, 8-10th and 15-24th. Activity is to celebrate the 10th Antarctic Activity Week (AAW). Operations will be made by François, F8DVD, from his QTH in Mâcon, in the eastern part of France, 60 km north of Lyon. The reference for the WAP program is 235. Operations will be on 40-10 meters, mostly SSB. QSL via F8DVD, direct (SAE + 1 IRC or 2 USDs) or by the Bureau.

TO22, GUADELOUPE. French operators Michel/F6GWV and Gildas/F6HMQ will be active as TO22C from Guadeloupe between February 17th and March 3rd. Activity will be on all bands, but with a focus on 160 meters. QSL via F6HMQ.

UN, KAZAKHSTAN. Tony, RT9T (ex-RX9TL), will be active as UN/RT9T during the CQ 160 Meter CW Contest (January 25-27th). QSL via his home callsign. Look for activity before the contest.

VK9C, COCOS KEELING ISLANDS. Operators Chris/GM3WOJ (ZK2V) and Keith/GM4YXI (ZK2X) will be active signing VK9C/GM2MP from Cocos Keeling Island (OC-003) between March 30th and April 13th. Activity will be on SSB and CW, with some RTTY. It is hoped to have a real-time logging system and daily LoTW uploads if possible. More details to follow ...

VK9N, NORFOLK ISLAND. Ten operators and members of the Oceania DX Group (ODXG) will be active as VK9NT from Norfolk Island (OC-005) between May 3-13th. Planning is now well underway with accommodations and air travel booked. The group plans to have 4 stations covering all bands 80-10 meters

on CW, SSB and RTTY. Operators mentioned are Chris/VK3QB (Team Leader), Luke/VK3HJ, Lee/VK3GK, Benton/VK3CBV, Allan/VK2CA (QSL Manager/Webmaster), Catherine/VK4GH, John/VK4IO, Roy/VK3GB, Peter/VK3IJ and Graeme/VK3GL. An "Online QSL Request Service" will be available for Bureau, and direct cards on ClubLog which is the PREFERRED method. If for some reason you cannot use the OQRS or LoTW, QSL can go direct to VK2CA. For more details and updates, visit the VK9NT Web page at: http://vk9nt.odxg.org

VP5, TURKS AND CAICOS ISLANDS. Jeff, K0UU (ex-WV3B), will be active as VP5/K0UU from Grand Turk Island (NA-003) between February 13-21st. Activity will be focused on the 30/17/12 meters and the ARRL DX CW Contest (February 16-17th) signing with the special callsign VQ5RP. QSL via LoTW or K0UU, (direct or by the Bureau).

Z6, KOSOVO. Marijan, S56A, will be active as Z6/S56A from Batlava Lake during the CQ 160 Meter CW Contest (January 25-27th) as a Low-Power entry. QSL via S56A.

ZS8, MARION ISLAND. Reports indicate that David, ZS1BCE, has been appointed to be the new radio technician on Marion Island (AF-021) for one year between April and May (2014). David is expected to depart from Cape Town on April 15th, and radio activity will start about four weeks later. Operations will only be on SSB and on most HF bands. Currently, he does not have a ZS8 callsign, but he plans to applied for ZS8D. QSL via Pierre, ZS1HF, who was the last operator from Marion as ZS8M.

Radio News Bulletin
Sunday 20th January 2013

IRTS AGM, Dinner and Radio Rally

This year the 81st IRTS AGM is hosted by Shannon Basin Radio Club. The event takes place in the Shamrock Lodge Hotel in Athlone. Tickets for the Dinner on Saturday night (8.00 for 8.30pm) will be available at 30 Euro each from Brian EI8IU QTHR and through IRTS Committee Members.Dress code, as usual, is smart/casual.Menu details is available from the irts website. More updates to follow.

Return of IRTS Award Trophies

It is time once again to recall all trophies presented at last years IRTS, AGM.

Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday 10 th February or to any IRTS Committee Member before end of February 2013.

This will allow for any engraving to be done, or to allow any repairs as needed. Early return will be appreciated. Peter EI4HX ei4hxperimental/at /eircom/dot/net. More details to follow next week.

Greenland Gets Full 5 MHz Allocation

Greenland has changed to a full 5 MHz band allocation of 5250 to 5450 kHz. This replaces the channelised arrangement first introduced in February 2008. This development is particularly interesting as this is the frequency segment in which WRC-15 will be considering a worldwide allocation to the amateur service. Let's hope more countries follow this lead.

Coolmine Radio Rally

Coolmine rally will be held at the Coolmine Community School on Sunday 10th February 2013. Doors open at 8.30am for traders and for member of the public at 9.00am. Admission is 5.00. Usual traders will attend and there will be a bring and buy sale. Tea and refreshments available all day during the event. Unlimited free car parking available. To book a

table for the rally please call the following: Tom, 01 8211043 or Tony, 087 2439997. Everyone welcome to this excellent annual event.

Lagan Valley Amateur Radio Rally

The Lagan Valley Amateur Radio Rally rally takes place Saturday March 2nd at The Village Centre,7 Ballynahinch Road, Hillsborough BT26 6AR Doors open 11:30 a.m. Admission is £3.00. Everyone Welcome.

Lough Erne Rally

The thirty second Lough Erne Rally is only nine weeks away - on Sunday 24 March.

>From the first Enniskillen Rally back in 1982 this rally has been a great gathering of radio amateurs and experimenters from the whole of Ireland. This 2013 Rally will be the sixth held in the SHARE Centre near Lisnaskea in County Fermanagh.

The Radio Amateur Old Timers Association had a stand at last year's Rally and recruited a large number of new members. The Lough Erne Amateur Radio Club again offers amateur radio clubs and organisations a stand at this year's rally to promote their particular interest to this rally's usually wide and numerous attendance.

Contact Iain Mi0IIG, Rally Organiser. Tel 028/048 -6632-6693. Email iain -at-learc.eu

---

South Eastern Amateur Radio Group

The next monthly meeting of the South Eastern Amateur Radio Group will take place in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford on Monday the 28th January at 8.30 p.m. The meeting will be preceded by a committee meeting at 8.00 pm sharp. Plans for club activities for 2013 will hopefully be discussed at the meeting and will include the possibility of running a CW course for those interested and also the running of a refresher course for anyone who wishes to re-sit the next exam. Membership subscriptions are now due for 2013. The South Eastern Amateur Radio Group is open for anyone to join that has an interest in amateur radio or anything related to the hobby. You don't have to be a licensed operator to join. SWL's are just as welcome to join. Cost is 30 normally and 20 for students, unemployed and those in receipt of pension. Membership should be paid by the end of March. Anyone who paid in November or December are automatically fully paid up for the year 2013. You can give your payment to any committee member or you can pay at the next general meeting on the 28th January.

For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter.

EI13CLAN

Any member wishing go on air with EI13CLAN should contact Dave EI6AL at dave.ei6al /at/ gmail.com or by phone on 0861000000.

DX News

A group of American operators will be active from the Bahamas from 20-27 January. Calls to look out for will include C6AGH and C6DX. They plan to have three stations on the air on all bands 160-10m.

The Indian Ocean DXCC entity of Reunion Island will be visited by two French amateurs who will operate as FR/F8APV and FR/F8EOI from 21 January until 8 February. They will focus mainly on 30m CW and 20m SSB. QSLs go via their home calls.

Bernie W3UR, the well-known editor of 'The Daily DX', together with his father Tony N3ME, will be on the Caribbean island of Dominica using the callsigns J77A and J76A respectively. J77A will be active from 22 January until 1 February and J76A from 22 January until 11 February

Peter HA3AUI has returned to Africa and is at present active as 6W2SC in Senegal. He also plans to travel to Guinea-Bissau where he will reactivate his J5UAP callsign. Exact dates are not available but he will be in Africa until around 10 March. QSLs go to his home call.

The F6KOP, Radio Club de Provins team will be QRV from Uganda signing 5X8C from February 6th to the 18th. Previously QRV as 5H1C, J5C, PJ4C, XT2C, TS7C, TO7C, TK7C, 5V7C to name a few, this multi-national team will run 6 high power stations simultaneously on all bands/modesfrom 160m to 10m. Unfortunately 6m is not allowed by the UCC (Uganda Communications Commission).

IRTS member, Dave Deane, EI9FBB is a team member on this DXpedition and I'm sure he'll pay special attention to getting as many EI's as possible into the log. See: http://www.5x2013.com for full information.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ham Radio Alive and Well:

Posted: 20 Jan 2013 03:54 AM PST
http://www.eham.net/articles/29654

The Internet hasn't buried amateur radio, but some wonder: Will young people keep the hobby alive? LONGMONT -- Sebastian Wessels sat in his "Ham Shack" -- basically a children's playhouse in his yard he's converted to be the base for his amateur radio operations -- and tweaked a dial. Out of the speakers came two Japanese voices having a conversation with each other. "The last guy I talked to was in Grenada," said Wessels, a South African native who has had his ham radio license since 1991. Then he still lived in his native land; he got an American license when he moved to the U.S. in 1996. Wessels is a database administrator for IBM by trade and a self-described "ham," as ham radio operators call themselves. The tiny building he operates out of -- with a "Ham Shack" sign posted outside -- is jammed with all manner of hardware, cables and computer screens. One of those displays a computer program he has that tracks, automatically, all of the people all over the world he's talked to, and, when he communicates with someone new, brings up information on that person based on their call sign. If the phrase "ham radio" seems like a blast from the past in this age of the Internet and smart phones, think again: According to the latest numbers from the National Association for Amateur Radio, there were 704,236 amateur radio license holders in the U.S. as of March 2012, an all-time high. That figure is up from 662,600 in 2005. But is it a hobby that is being embraced by young people? That depends on who you talk to.

Dedicated Ham Keeping Morse Code Alive:

Posted: 19 Jan 2013 09:51 AM PST
http://www.eham.net/articles/29653

GLACE BAY, Nova Scotia -- On Dec.17, 1902, from the seaside Table Head radio station at Glace Bay, Nova Scotia, Guglielmo Marconi made the first radio transmission from North America to Europe. This Morse code transmission completed his tests. A year before, Marconi had transmitted Morse code successfully from Poldhu, Cornwall in the U.K. to a receiving station on Signal Hill, Newfoundland. The Morse code signals were blasted from Table Head using an awe-inspiring 35-kW spark-gap transmitter. They were emitted at 500 kHz from a square vertical curtain array antenna, strung between four massive wooden 64-meter towers. This was brute-force

broadcasting, using the same engineering paradigm that chose monstrous Saturn V rockets to take men to the moon decades later.

GB2RS NEWS

Sunday 20th January 2013

The news headlines:

* GD100RSGB on the air this week

* More countries get onto 472kHz

* Greenland on 5MHz

The special event callsign celebrating the RSGB Centenary, GD100RSGB, will be operated today, 20 January, and tomorrow, the 21st, by the Isle of Man ARC. Tuesday 22nd sees the Chester & District ARC take over at Waverton and on the 23rd and 24th the callsign moves to Bolton, with the Bolton Wireless Club. Next Friday, 25th, Southport & District ARC takes the callsign to Scarisbrick and, next weekend, Warrington ARC will run the callsign from Grappenhall. Details of how to get your QSL card or check that you are in the log appear on the website www.rsgb.org/centenary.

The national association of Icelandic Radio Amateurs has announced that amateurs in that country have been granted operating privileges on 472 to 479kHz. Access is granted on a Secondary basis, with a maximum power of 5W EIRP. Maximum bandwidth is 1kHz. This new allocation is open to the G licence class and higher. In addition, the regulatory authority recently extended temporary permits for 1850 to 1900kHz, 5.26 to 5.41MHz and 70 to 70.2MHz.

Greenland has now moved to a full band allocation of 5250 to 5450kHz from its previous channelised status, according to recent news received from Peter, OX3XR.

As a part of the RSGB programme during our Centenary year, we have been offered the opportunity to submit an article to the Journal of the Institute of Telecommunications Professionals. This quarterly publication generally carries an article of historic interest, and the suggestion is that we aim at the publication that comes out just prior to our Anniversary Day, 5th July 2013. We are looking for a small group of volunteers to scope, research and draft the article. The draft is required by the ITP Editorial Board by April 2013. Please contact John Gould, G3WKL, vie email to centenary@rsgb.org.uk if you are interested in getting involved in this project.

Yesterday, 19 January, BBC Radio Three transmitted the Between the Ears edition entitled Space Ham, which was a celebration of amateur radio enthusiasts who have eavesdropped on space exploration. The idea for the programme came when a Radio Three producer visited the National Trust Lizard Marconi Wireless Station last summer. The programme is available online this week on www.bbc.co.uk/programmes/b006x2tq.

And now for the details of rallies and events for the coming week

With a weekend of snow forecast and major disruption on both road and rail networks, please check that the rally or event is still taking place before you travel any distance.

The Dover Amateur Radio Club Rally will take place today, 20 January, at the Whitfield Village Hall, Dover CT16 3LY. Doors open at 10am and entry is £2. The auction will take place at 12.30pm. Details from Peter, M0PKH on 07775 515 890.

Copyright © RSGB 2013. Not for public release before Monday 21 January 2013 except as a GB2RS broadcast. Also today, 20 January, the Pencoed Amateur Radio Club Bring & Buy Sale will be held at Pencoed Rugby Football Club, The Verlands, Felindre Road, Pencoed CF35 5PB. Doors open at 9.30am and entry is £2. Tables are £5 each. Bookings and more information from Gerry Day on 01656 860 761.

Horncastle Winter Rally will take place on 27 January at the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10.30am, half an hour earlier for disabled visitors. Admission is £1.50. There is plenty of free car parking, plenty of traders and good catering facilities. For more information contact Tony, G3ZPU on 01507 527 835.

Now for the news of special events

The RNLI SOS Radio Week runs until 27 January and more than 40 stations have registered to take part. For full details of those stations, check out the website, www.sosradioweek.org.uk. Anybody working one of the registered stations can apply for the Worked SOS Radio Week Award.

Pontefract & District ARS will be operating GB0SRW until 27 January as part of the RNLI SOS Radio week. The club will operate on the 2, 4, 20 and 40m bands. QSLs will be sent but only on receipt of a card either direct to G0BPK or via the bureau to GB0SRW. Full details are on QRZ.com.

And now the DX news compiled from 425 DX News and other sources

Members of the 'Buddies in the Caribbean' suitcase mini-DXpedition group are going to Barbados, IOTA reference NA- 021, and will be active between 29 January and 6 February. All members will use Buddipole portable antennas at 100 watts or less. Several teams will be battery-only, field portable either from Barbados beaches or from scenic mountain tops and will sign their own call stroke P. QSL via Logbook of The World or direct to each operator with an SASE.

Carl, SM6CPY is in Rwanda until 31 January, reactivating his 9X0PY callsign. He will operate mainly CW, look for him 25kHz up. QSL to his home callsign.

The island of Minami Torishima, IOTA OC-073, will be on the air until 15 April. This quite rare DXCC entity will see JG8NQJ signing JG8NQJ/JD1 during that period. He plans to operate 17-10m CW during his spare time on the island. QSLs go to his home callsign via the bureau or direct to JA8CJY.

Pierre, FR/F8APV and Stephane, FR/F8EOI will be on the air from Reunion Island, which is IOTA reference AF-016, between 21 January and 9 February. They will work with Buddipoles on 10 to 40m, with emphasis on 30m CW and 20m SSB. QSLs via their home callsigns either via the bureau or direct.

Hermann, HB9CRV and Rudolf, HB9CQL will be on Flores Island, EU-089, between 22 January and 8 February. They will use the callsigns CT8/HB9CQL and CT8/CT3FN until 25 January and after that CR2V, especially on the low bands. QSL via HB9CRV.

Now the contest news

The 50MHz UK Activity Contest takes place on 22 January from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

Also on 22 January, the SHF UK Activity Contest takes place from 2000 to 2230UTC. Again using all modes on the 2.3 to 10GHz bands the exchange is signal report, serial number and locator.

Copyright © RSGB 2013. Not for public release before Monday 21 January 2013 except as a GB2RS broadcast. The CQ WW 160m DX Contest takes place for the 48 hours starting 10pm on Friday 25th. Work the contiguous 48 States plus Canada only, giving a signal report and CQ Zone, which is 14 for the UK. USA stations will send a signal report and their 2-letter State code, while Canadian stations will send a signal report and their 3-letter Province code. There are five different operating categories with various power levels and number of operators, but there are strict rules regarding the use of DX spotting in three of them, so please check the rules beforehand. This is the CW leg of the contest. The SSB leg takes place next month.

The BARTG RTTY Sprint takes place for 24 hours on the 26th and 27th, starting at 1200UTC. Please note that this is no longer a qualifying event in the HF Championship. Single band entries are not allowed. Using the bands between 3.5 and 28MHz, the contest exchange is serial number only. Full rules can be found on the BARTG website, www.bartg.org.uk.

You don't have to be an active member of the Worked All Britain awards scheme to take part in the WAB 1.8MHz Phone Contest on the evening of Saturday 26th, between 1900 and 2300UTC. Exchange a signal report, a serial number and your WAB square, which is the first, second, third

and sixth digits of your 8-digit National Grid Reference.

And now the solar factual data for the period from Friday the 11th to Thursday the 17th of January, compiled by Neil Clarke, G0CAS on Friday the 20th of January.

Sunspot groups gradually disappeared from ten groups at the start of the period to only five by the end. Two large and magnetically complex groups remained visible every day but failed to produce any sizeable flares. They did though produce two small M class solar flares on the 11th and again on the 13th. Numerous C class solar flares took place every day except for the 17th when solar activity was very low. Solar flux levels declined from 172 units on the 11th to 123 by the 17th. The average was 150 units. The 90 day solar flux average on the 17th was 123, that's two units up on last week. X-ray flux levels declined from B9 units on the 11th to B2.9 by the 17th. The average was B5.9 units. Geomagnetic activity was quiet every day till the 17th when a coronal mass ejection arrived that departed the Sun on the 13th and the Ap index was 15 units. The average was Ap 7 units. Solar wind data from the ACE spacecraft saw solar wind speeds increased from 280 kilometres per second on the 11th to 550 by the 15th. Particle densities were around or slightly above 10 particles per cubic centimetre every day but on the 17th increased to 45 particles per cubic centimetre. Bz showed little variation except for the 17th which varied between minus 14 and plus 11 nanoTeslas.

And finally the solar forecast for the coming week. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be at low levels with only occasional C class solar flares taking place most days. There is only a small chance of any large solar flares occurring. Solar flux levels should decline and be in the 110's for most of the week. Geomagnetic activity could be unsettled today due to a coronal mass ejection that departed the Sun on the 16th, otherwise, conditions are expected to be at quiet levels. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 32MHz. The optimum working frequency with a 90 per cent success rate of about 24MHz. The best time to try this path will be between 110 and 1600 hours.

And that's all for this week from the propagation team.

Copyright © RSGB 2013. Not for public release before Monday 21 January 2013 except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found on the RSGB

website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is holding its holding club net on 145.225MHz from 2000 today and next Sunday. Friday sees the shack social from 1930. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR and on Friday there is a club net on GB3FR. Contact the FELCC Information Line on 07554 362 020 for more information.

Lincoln Short-Wave Club is holding a committee meeting on Monday at the Shack. On Wednesday there's a formal meeting at the BSA Club from 20.15. The club simplex net is on 144.325MHz from 8pm on Thursday, then the Saturday surgery and mentoring in the shack starts at 9am. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is reviewing club equipment on Monday. There's a coffee morning on Tuesday from 11am until 1pm, while Thursday sees training classes with Dave Murphy, G8OWL. Shack and aerial work is on Friday. Contact Mick Cleary, G7RRP, on 07595 696 359.

Now we return to the traditional listing in date order. On Monday Aldridge & Barr Beacon Amateur Radio Club is having a review of 2012. Contact Albert, G0KFS, on 01922 614 169.

On Monday Gloucester Amateur Radio & Electronics Society is operating on HF plus having a workshop and construction evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday Sutton Coldfield Amateur Radio Society is running an open net from 7.30pm on 145.250.00MHz. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday Derby & District Amateur Radio Society is seeing a video. Contact Richard Buckby, email radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is watching the Sunderland flying boat video. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday Worcester Radio Amateurs Association is having a construction evening and taking registrations for the Foundation course. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Tuesday Wythall Radio Club is holding a Morse class at 1945, then announcing the Christmas Contest results from 2030. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday Midland Amateur Radio Society is planning its training, rally visits and events. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Notts Amateur Radio Club is having a talk on PowerPoint by M0RIA. Contact Robin, G4NDM, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is holding a bowls evening with refreshments by G0EYX. Contact Mike, G3JKX, on 01952 299 677.

On Friday Coventry Amateur Radio Society is having a quiz night. Contact John, G8SEQ, on 07958 777 363.

Copyright © RSGB 2013. Not for public release before Monday 21 January 2013 except as a GB2RS broadcast.

NEWS FOR THE NORTH OF ENGLAND On Monday Angel of the North Amateur Radio Club is having a talk on linear amplifiers and how to use them effectively by David Stansfield. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a talk by John, G4LKD on how computers work. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday South Tyneside Amateur Radio Society is having a club night on the air. Places are still available on the Foundation and Intermediate courses. Details from Darren, 2E0MTY, on 07511 968 073.

On Monday Workington and District Radio and IT Group is having a talk on datamodes by Alex, G7KSE. For more information contact Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday Chester & District Radio Society is operating the RSGB Centenary SES. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society is having a club night. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday Otley Amateur Radio Society continues its Intermediate Training and is taking part in the UKAC 50MHz Contest. Contact Paul, M0PKW, on 07768 996 370.

Denby Dale Radio Club is on the air on Wednesday on 145.575MHz from 1930, and taking part in the WAB 1.8MHz phone contest from Cartworth Moor next Saturday. Details from Richard, M0RBG, on 07976 220 126.

On Thursday South Manchester Radio and Computer Club is having a talk on Arduino by Ian, M0BXR. Details from Ron, G3SVW, on 01619 693 999.

On Friday East Cleveland Amateur Radio Club is holding a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND On Tuesday Mid Ulster Amateur Radio Club is having a shack night. Next Saturday sees the start of a weekend event, putting the club callsign MN0VFW on the air for RNLI SOS Week from Kinnego Bay, Lough Neagh. Contact Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND On Tuesday Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Ayr Amateur Radio Group is having a presentation on pervasive radio. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday Lothians Radio Society is having a talk on kite aerial photography by James Gentles, GM4WZP. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

On Thursday Aberdeen Amateur Radio Society is having a construction night. Contact Fred Gordon, MM0ODL, on 01975 651 365.

Copyright © RSGB 2013. Not for public release before Monday 21 January 2013 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. East Kent Radio Society is at the Dover Amateur Radio Club Rally today. On Monday there's a talk by Ann Thomas on the wildlife of Madagascar. Details from Karl Davies, M1DFM, on 01227 710 120.

On Sunday Hastings Electronics and Radio Club is holding its annual club lunch today. On Wednesday there's a talk on hospital radio by Wendy Butler. Details from Gordon, on 01424 431 909.

Farnborough & District Radio Society has an 80m slow CW net on Monday from 1pm, then a Top Band net with G2DX on 1.995MHz at 8pm. Thursday sees a talk on general radio circuits and theory, and on Friday it's the 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Now we return to the traditional listing in date order. On Monday Braintree & District Amateur Radio Society has part 1 of a talk and demo on equipment safety testing. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club is having at talk on war electronics by Bob, M6BRG. Contact Dave, G4XDU, on 01628 625 720.

On Monday Surrey Radio Contact Club is holding a natter and fix it night. Contact John, G3MCX, on 02086 883 322.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Chelmsford Amateur Radio Society is holding a 10m net on 28.375MHz from 8:30pm. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday Dorking & District Radio Society is having an introduction to datamodes by Andrew Vine, M0GJH. Contact Garth, G3NPC, on 01737 359 472.

On Wednesday Crawley Amateur Radio Club is holding its AGM. More information from John, G3VLH, on 01342 714 402.

On Wednesday Newbury & District Amateur Radio Society is having a surplus equipment sale. Contact Rob, G4LMW, on 01635 862 737.

On Wednesday Worthing & District Amateur Radio Club is having a talk on electronic logbooks by Graham, G4FNL. Contact John, G8FMJ, on 01273 593 232.

On Thursday Reading & District Amateur Radio Club is having a talk on nuclear bunkers in the Thames Valley by David Oliver. Details from Pete, G8FRC, on 01189 695 697.

On Friday Cambridge & District Amateur Radio Club is holding its AGM. Contact Ron, G3KBR, on 01223 501 712.

On Friday Fort Purbrook Amateur Radio Club is having a book exchange, junk sale and bring & buy to raise funds for the club. Contact Neil Hoare, M0NEH, on 02392 378 559.

On Friday Itchen Valley Amateur Radio Club is having a talk by Mike, G0JMI of Alton Antennas. Details from Liz, M0ACL, on 02380 254 599.

On Friday Mid-Sussex Amateur Radio Society is having a talk on the Titan Missile Museum by Phil, G4UDU. Details from Mike Mundy, G1TDL, on 01444 246 899.

On Friday Wimbledon & District Amateur Radio Society is on the air. Contact Andrew Maish, G4ADM, on 02083 353 434.

Copyright © RSGB 2013. Not for public release before Monday 21 January 2013 except as a GB2RS broadcast.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week. Exeter Amateur Radio Society is holding its HF net on 3.675MHz from 7.45pm. The Tuesday 2m net is on 145.575MHz at 7.45pm and on Thursday it's the 4m net on 70.425MHz from 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

Riviera Amateur Radio Club is holding a club meeting at HQ on Tuesday from 19:30. Wednesday sees the 2m net from 20:00 on 145.425MHz. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

Now we return to the traditional listing in date order. On Monday Appledore & District Amateur Radio Club iis having a talk on erecting & installing a Hex Beam by John, M0JKL. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is having a talk on Wouxun programming. Contact Tony, G0WMB, on 01454 417 048.

On Thursday South Bristol Amateur Radio Club is looking at computers and radio with David, G7PKJ and Tom, M3TWJ. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having a talk. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club is having members' mini talks. Contact George Davis, G3ICO, on 01935 425 669.

On Friday Poole Radio Society is having an activity night. More info from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is holding its construction competitions for kit built and homebrew projects. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday Dragon Amateur Radio Club is analysing the club contest logs. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Monday Llanelli Amateur Radio Society is having a DVD night. Contact Craig, MW0MXT, on 01269 845 773.

On Thursday Aberystwyth & District Amateur Radio Society is having a club night on the air on 145.500MHz then 145.550MHz. Details from Ray, GW7AGG, on 01970 611 853.

# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
14 - 20 January 2013

Solar activity was predominantly at low levels with very low levels
observed on 17 January. The largest flares of the period were a
C6/Sf flare at 14/0122 UTC from Region 1652 (N17, L=184, class/area
Fkc/320 on 07 January) and a C5/Sf flare at 18/1707 UTC from Region
1654 (N08, L=151, class/area Fki/1100 on 11 January). The C5 flare
had an associated Type II radio sweep (1695 km/s). On 16 January, a
long duration C2 flare was observed from Region 1650 (S30, L=193,
class/area Eho/250 on 07 January) which had decayed to plage by the
time of the event. A partial halo, coronal mass ejection (CME), with
the majority of the ejecta off the SW limb, was first seen in
SOHO/LASCO C2 imagery at 16/1900 UTC (estimated plane-of-sky speed
of 728 km/s). This event was likely associated with a filament
eruption near Region 1650.

A greater than 10 MeV proton enhancement was observed at
geosynchronous orbit beginning late on 16 January, peaked at 2 pfu
at 17/1415 UTC, and declined to background levels by approximately
18/0600 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels on 14-16 January and again on 19-20 January. High
levels were observed on 17-18 January in response to a shock arrival
from the 13 January CME.

Geomagnetic field activity ranged from quiet to active levels. The
period began under the influence of a positive polarity coronal hole
high speed stream (CH HSS). Solar wind speeds increased from
approximately 480 km/s to 590 km/s early on 14 January, but started
to decrease by late on 14 January. The geomagnetic field responded
with quiet to unsettled levels with an isolated minor storm period
observed at high latitudes. As solar wind speeds continued to
decrease to around 400 km/s by early on 16 January, mostly quiet
conditions were observed. By 17 January, total field values (Bt)
```

increased to 16 nT while the Bz component of the interplanetary magnetic field switched from maximum values of approximately +10 nT to -14 nT indicative of the arrival of 13 January CME. The geomagnetic field responded with quiet to active levels with periods of active to minor storm levels at high latitudes. By mid-day on 18 January, total field had decreased to around 7 nT as the CME effects waned. By 19 January, a small shock was observed in ACE data at approximately 19/1647 UTC. A corresponding sudden impulse was observed in the Boulder magnetometer (21 nT) at 19/1733 UTC. The shock arrival was consistent with the arrival of a glancing blow from the 16 January CME. Only quiet to unsettled conditions were observed from 18-20 January with periods of minor storming on 20 January at high latitudes.

Forecast of Solar and Geomagnetic Activity
21 January - 16 February 2013

Solar activity is expected to be at very low to low levels until 30 January. A chance for M-class flares exists from 31 January through 15 February when Regions 1652 and 1654 return to the visible disk. By 16 February, very low to low levels are expected.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels through 23 January. A chance for an increase to high levels on 24-25 January is expected due to CH HSS activity. A return to low normal levels is expected from 26 January through 09 February. Moderate to high levels are expected from 10-12 February due to activity from another CH HSS. Normal levels are expected again by 13 February through the end of the forecast period.

Geomagnetic field activity is expected to be mostly quiet through the forecast period with unsettled periods expected on 23 January and 9-10 February due to CH HSS effects.

2012 Brought Increase in DXCC Applications, ARRL QSL Bureau Card Processing

Posted: 20 Jan 2013 05:57 PM PST
http://forums.qrz.com/showthread.php?376606-2012-Brought-Increase-in-DXCC-Applications-ARRL-QSL-Bureau-Card-Processing&goto=newpost

With the coming of more sunspots comes more DX. And when more amateurs work DX, the ARRL☐s Membership and Volunteer Programs Department -- especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus -- goes into high gear.

☐In 2012, we saw an increase in the number of cards received from ARRL members that were sent to foreign QSL bureaus, as well as the number of cards we sent out to the bureaus,☐ said Membership and Volunteer Programs Administrative Manager Sharon Taratula. ☐In addition, the number of DXCC applications -- including those for initial awards and endorsements -- also increased.☐

http://www.eham.net/articles/29655

Tucked away in a small, unassuming room in the bowels of the Scotts Bluff County Administrative Building, sits Hugh Dunne with his ham radio and computer. The radio connection is fuzzy at first, until he fiddles with the knobs to hone in on the right signal. He is making his weekly check of the amateur radio network that connects him with other emergency coordinators in the state. In early January, Hugh Dunne was presented with a certificate of appreciation during a meeting of the Region 22 Local Emergency Planning Committee for his voluntary services as the amateur radio coordinator, a position he has held since 2001.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

CWops improves its bi-monthly CWT activity

Posted: 22 Jan 2013 08:42 AM PST
http://forums.qrz.com/showthread.php?376811-CWops-improves-its-bi-monthly-CWT-activity&goto=newpost

CW fans are invited to join in the "CWT," an hour-long event that's held on the second and fourth Wednesdays (U.S. time) of each month. The "CW Test" is a test, not necessarily a contest, and is designed to offer something for everyone. You can get on and make a few contacts with fellow CW enthusiasts or you can wet your competitive juices and try for a high score. Three 60-minute sessions are held, at 1300z, 1900z and 0300z (Thursday) on all non-WARC bands, 160 - 10m.

NEW for 2013, we will present awards for CWT participation. Stations earn one point for each CWT session in which ten or more contacts are made. You don't have to be a CWops member to earn points, but you must be a member at the end of the year when the awards are presented. To earn a Gold award, you need 60 points, Silver, 40, and Bronze 24. Stay tuned for details on the awards which will be very nice. This will be an ongoing program, but a first-year 2013 award will be very special. Our objective is to encourage CWT participation--you don't have to be competitive to earn points, just active.

The first rule of CW operating is to have fun and to share the fun.

For more information about CWops go to: www.cwops.org.

AX prefix on Australia's national day

Posted: 21 Jan 2013 10:34 AM PST
http://forums.qrz.com/showthread.php?376677-AX-prefix-on-Australia-s-national-day&goto=newpost

AX prefix on Australia's national day

The Australian Communications and Media Authority automatically allows radio amateurs to substitute their normal VK callsign prefix with the letters AX every Australia Day, which is Saturday January 26. This gives them a chance to be part of the national day around the country which commemorates the first settlement at Port Jackson, now part of Sydney, in 1788.

Many will celebrate the day with a variety of events and night fireworks, a few receive a well deserved Australia Day honour, or become a new citizen.

Those radio amateurs using AX are strongly encouraged to have a QSL card under their alternate callsign, which is also automatically available on ANZAC Day April 25, and World Telecommunication Day May 17.

The ACMA, on the recommendation of the Wireless Institute of Australia, may also issue special event callsigns with the AX prefix on occasions of special national or international significance. This occurred during the Sydney 2000 Olympics and saw AX3GAMES and AX3MCG issued for the Melbourne Commwealth Games in 2006.

Longmont Company Finds Global Niche Catering to Ham Radio Enthusiasts:

Posted: 22 Jan 2013 03:07 AM PST
http://www.eham.net/articles/29658

RF Concepts' Alpha amplifiers are considered top of the line: Hardman recalled, explaining what led her to get her first ham license in her native South Africa in 1977. That man, Gordon Hardman, later became her husband, and he also works at RF Concepts as vice president of engineering. The two came to the United States in 1981 and moved to Colorado in 1983. RF Concepts repairs and rebuilds ham radio amplifiers of all types, but the vast majority of the company's revenues come from the manufacture and sale of Alpha amplifiers, known in ham radio circles as the top of the line. "Alpha amplifiers have been continuously manufactured in the U.S. since the early '70s, and they have a worldwide reputation," Molly Hardman said.

CWops Improves Bi-Monthly CWT Activity:

Posted: 22 Jan 2013 03:02 AM PST
http://www.eham.net/articles/29656

CW fans are invited to join in the "CWT," an hour-long event that's held on the second and fourth Wednesdays (U.S. time) of each month. The "CW Test" is a test, not necessarily a contest, and is designed to offer something for everyone. You can get on and make a few contacts with fellow CW enthusiasts or you can wet your competitive juices and try for a high score. Three 60-minute sessions are held, at 1300z, 1900z and 0300z (Thursday) on all non-WARC bands, 160 - 10m.

Vomarc hamfest sonoma, ca april 27, 2013

Posted: 21 Jan 2013 07:39 PM PST
http://forums.qrz.com/showthread.php?376756-Vomarc-hamfest-sonoma-ca-april-27-2013&goto=newpost

Normal 0 The Valley of the Moon Amateur Radio Club, W6AJF, is holding its annual ARRL Hamfest Saturday, April 27, 2013 from 8 a.m. to noon. The hamfest will be held at the Sonoma Valley Veterans☐ Memorial Building, 126 First Street West, Sonoma, California, just one block north of the central Sonoma Plaza. Admission is free for the hamfest, and ☐hams☐ are encouraged to bring the entire family. Raffle tickets will be distributed at no cost to each person registering, with door prize drawings held every half hour.

After the hamfest you can take a short walk to the center of town and visit the historic Sonoma Mission and Barracks, General Vallejo☐s Home State Park and the many shops and restaurants surrounding the Plaza. The event will include a walk-in Volunteer Examiner exam session with registration starting at 9 a.m. with testing for all license elements immediately following.

For those people looking for a real electronics bargain, there will be a radio and electronics swap meet with both indoor and outdoor spaces available and mounds of electronics goodies for sale. Sellers can start setting up at 7 a.m. with spaces renting for $10. Space will be made available at no charge for amateur radio organizations or other public service agencies for informational tables and displays. Vendors making an advance registration will receive a complementary breakfast.

The club will serve a full breakfast from 8 to 10 a.m., including eggs, sausage, all-you-can-eat pancakes, juice and coffee or tea for $6. Ongoing demonstrations will include an operating low power QRP station, phone and digital radio stations, emergency communications vehicles from several local public safety agencies, a display of homebuilt equipment, the club swap table and a beginner's D.F., or direction finding, transmitter hunt. Guest operators are welcome to sit in and make a few contacts during the morning. There will be PSK-31, APRS and other digital mode demonstrations ongoing during the hamfest.

For a map and printed directions to the hamfest, send a business size SASE to VOMARC, 358 Patten St., Sonoma, CA 95476, or visit the club website at http://vomarc.org/ and click on the ☐Events☐ link. Talk-in will be on

145.35, -600, with a PL of 88.5. For more information call Darrel, WD6BOR
at 707-996-4494, or email wd6bor@vom.com.

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: FG ; Guadeloupe ; Square: FK96 ; start 2013-02-15

Activity from FG4KH FK96HF again

FG4KH will be on air by the middle of the next month for a small activity in EME and tropo
from
Guadeloupe Island. The set up will be light this year with FT897, 200w, LNA and only H pol
on
the 2 x 3WL DK7ZB. I will try to make some tropo QSO to south America and Cara?bean area.
I will be QRV also time to time on the HF bands from 80 to 10 meters
Cu soon from the French West Indies
Philippe F1DUZ

SOURCE: Phillipe F1DUZ, direct to MMMonVHF

** DXCC: TX ; Clipperton ; Square: DK50 ; start 2013-03-01

I am planning to have at least 1kw output and low loss feedline to a 6M8GJ with
manual elevation. There are very good windows with EU moonsets. PSE read my webpage
for more details and procedures. I will transmit in the first sequence JT65A when operating
EME.
This is about the only way anyone from EU will ever work Clipperton on 6m, so please be

ready!

SOURCE: tnx for Info Lance, W7GJ, direct to MMMonVHF

** DXCC: DL ; Germany ; Square: JO44 ; start 2013-03-01

DL0AT qrv from JO44HI
Aktivate the Lighthouse Westerhever with big power on the top on the lighthouse.
2x7 ele es 2x 9 ele with 2x 750 watts. FED: 260; LH 0063

SOURCE: tnx to Andy, DG3XA, direct to MMMonVHF

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV from 4 April to 18 April 2013 however, for Central Europe the EME window will open only around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often

as possible. We can't resist.... With this expedition we support projects via BEBO Bakery
http://www.bebobakery.com

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT, Anssi OH9FKJ and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will
be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

AX Prefix on Australia Day:

Posted: 23 Jan 2013 02:08 AM PST
http://www.eham.net/articles/29659

The Australian Communications and Media Authority automatically allows radio amateurs to substitute their normal VK callsign prefix with the letters AX every Australia Day, which is Saturday January 26. This gives them a chance to be part of the national day around the country which commemorates the first settlement at Port Jackson, now part of Sydney, in 1788. Many will celebrate the day with a variety of events and night fireworks, a few receive a well deserved Australia Day honour, or become a new citizen. Those radio amateurs using AX are strongly encouraged to have a QSL card under their alternate callsign, which is also automatically available on ANZAC Day April 25, and World Telecommunication Day May 17.

Top Ham Radio Contest Website Radio-Sport.Net Re-Launches

Posted: 22 Jan 2013 07:22 AM PST
http://forums.qrz.com/showthread.php?376799-Top-Ham-Radio-Contest-Website-Radio-Sport-Net-Re-Launches&goto=newpost

HAVERHILL, MA -- January 23, 2012

Those who enjoy ham radio contesting are getting an exciting new platform to share their opinions, ideas, stories and photographs. Well, it may not be totally new, but it is certainly revitalized and rejuvenated. Radio-Sport.net, operated by long-time editor Jamie Dupree, NS3T, has been re-launched under the new management of Jeff Demers, N1SNB along with Washington Square Media Group.

The new website will contain a robust content archiving system to increase user☐s ability to locate legacy content, increased guest commentary, and a dynamic call sign tag cloud to permit viewing of information regarding trending contesters and events. The new site will also provide advertisers with a new ad delivery system.

The site is being designed for ongoing discussions and comments, with the ability to join the discussions easily. Users will be able to add opinions, news and even share photographs. It is designed as an interactive platform for everything ham radio contesting related. The site is a must visit online location for those involved in the hobby.

Editor Jeff Demers commented "We are pleased to continue the awesome tradition of Jamie, NS3T and now to build upon it". Demers continued ☐Contesting has been an incredible passion for me. I may not be a competitive contester but I enjoy the activity and camaraderie. Continuing to bring great information to the contesting audience will be tremendous fun for my team."

Radio-Sport.net is commercially supported by 4O3A Station, RigExpert, Remote Ham Radio, Spiderbeam and K1EL WKUSB Keyers. Advertisers looking to support the activity can visit the website for details.

The history of ham radio contesting goes back to nearly the beginning of ham radio. This world-wide activity continues in popularity to this day involving individuals and teams. The Radio-Sport.net tradition continues into the new year with new management, new information, new features, and new accessibility.

Special Event Station for Recall LaGrange Set for May 5th

Posted: 21 Jan 2013 09:59 PM PST
http://forums.qrz.com/showthread.php?376766-Special-Event-Station-for-Recall-LaGrange-Set-for-May-5th&goto=newpost

FOR IMMEDIATE RELEASE

Bankhead Amateur Radio Club, Inc., N4IDX, to sponsor and operate a Special Event Station in May 2013

DESCRIPTION

Bankhead Amateur Radio Club, Inc., N4IDX, is proud and honored to sponsor and operate a Special Event Station, under callsign N4C (November-4-Charlie) for the annually remembrance event "Recall LaGrange" on Saturday, May 4th, 2013.

INFORMATION REGARDING "RECALL LaGRANGE" EVENT

"On April 28, 1863, Colonel Florence M. Cornyn and his "Destroying Angels" of the Northern Army swept through the valley and in flames of fire, LaGrange, the college, the village and the life within was gone!"

In 1818-1819, 150 people purchased land on the spur of the Cumberland Mountain 400 ft. above the surrounding valley. The earliest settlers, who were the wealthiest people in the valley, used the land as a summer resort which they called ☐Rocky Hill.☐ As the settlement became more permanent, the people demanded a place to educate their sons and daughters. The Methodist church stepped in, and donations were collected to build a church for worship and schools for education. They called it ☐LaGrange☐ meaning ☐The Place,☐ as the view from the area was breathtaking, and still is, today!

The Baptist church built the Lafayette Female Academy and opened its doors in 1825. The Methodist church soon followed having LaGrange College built and ready to open by January 10, 1829. The school opened on January 11, 1830, although it did not receive its charter from the legislature until eight days later (January 19, 1830), making Lagrange College the first all-male College in the state of Alabama.

LaGrange was a liberal arts institution. In the first two months of its operation, there were 70 students enrolled. By 1849, that number had increased to 139. Student life was strictly supervised. The students were required to attend church every Sunday as well as prayer services that were held twice per day. The first degree went to J.D. Malone of Limestone County, AL. Although some records are missing, it is estimated that more than 140 degrees were awarded to students from 1838-1854.

The first president of Lagrange College was Dr. Robert Paine. Dr. Paine was a young Methodist preacher who later became a bishop. Dr. Pain preferred that the students and staff call him a ☐superintendent☐ rather than ☐president.☐ The college had sufficient support and thrived while Paine was president. In 1846 Dr. Paine was elected bishop. Upon Paine☐s departure, the enrollment and financial support of Lagrange decreased drastically. Dr. Edward Wadsworth, a native of North Carolina, became the new president. After the death of his wife, Wadsworth resigned his position in 1852 and re-entered the ministry. Dr. James W. Hardy stepped in as the third president, but died suddenly in 1853 at the age of 38. Reverend Smith W. Moore took the role of acting president upon Hardy☐s death only until a replacement could be located. In 1854, Dr. Richard H. Rivers was instated as the fourth president of the college.

The college had financial trouble that extended from the time of the economic panic in 1837. Repairs needed on buildings and enrollment drastically dropping only furthered the financial troubles. A proposal came from a Florence, AL judge suggesting that the college be moved across the river. The plan was presented to the Board of Trustees who eventually approved the plan in 1855. The city of Florence would not allow the college to retain its name resulting in the decision to rename the college to Florence Wesleyan University (later changed to Florence State Teachers College and today called The University Of North Alabama). The move sparked controversy and hard feelings, and there was a continuing effort to keep Lagrange running until the fall of 1857. The next year, the school became Lagrange College and Military Academy, under Major James W. Robertson as superintendent. In 1860 the name became simply LaGrange Military Academy. LaGrange began teaching military tactics and strategy and was a source for many local confederate units at the start of the Civil War in 1861.

With the start of the civil war in 1861, many of the students from Lagrange Military Academy enlisted in the Confederate army by way of local infantries, cavalries, and cannon brigades such as the 16th, 27th, and 36th Alabama infantry. The doors of the college, as far as instruction was concerned, were closed in 1862. (Instructors and locals were still allowed to visit the library at the college.) On April 28th 1863, Union troops lead by Col. Florence M. Cornyn, also known as Cornyn and his ☐destroying angles☐, set fire to multiple structures as they passed through the Tennessee Valley. Sadly, Cornyn☐s men torched both the Lagrange Military Academy building as well as the Lafayette Female academy. Some of Cornyn☐s men say that the order was given to torch the college, others say the order was to leave the college be. All that is known is that Cornyn☐s men set fire to the buildings in 1863. Cornyn was later assassinated by one of the

men under his command in a courtroom as he prepared to go on trial for war crimes.

In 1904, there was a reunion of surviving teachers and students from Lagrange College. At the reunion, it was decided that there would be an effort to try and get full reimbursement from the U.S. Government for the destruction of the college. A Board of Trustees was organized, and bills were introduced in congress for compensation for the loss of the college (H.R. 11502 January 30, 1904 stated, ☐the Secretary of the Treasury, he, and he in hereby, authorized and directed to pay, out of any money in the Treasury of the United States not otherwise appropriated, to the trustees of the Lagrange College, of Colbert County, Alabama, the sum of thirty thousand dollars, in full compensation for the use, occupation, and destruction of property by the Federal forces during the late civil war.☐) According to records obtained by the Lagrange Living Historical Association, the people of LaGrange were to be compensated for their losses. However, the money was never received and neither the LLHA, nor the U.S. Department of the Treasury has been able to locate or determine what happened to the money. In 1997, The Department of the Treasury searched their archives for ☐Case No. 12407 Lagrange College vs. The United States☐ with negative results. During the time that the claims were made by the original Board of Trustees in 1904, all government agencies made requests for funding directly to Congress which would lead to the assumption that the Court of Claims would have submitted the request for a reimbursement payment directly to congress. There are still people today who are looking for the missing money and paperwork.

Today, LaGrange stands as a historical landmark with a dedicated group of people striving to keep the memory of the college alive as well as working toward the ultimate goal of seeing Lagrange rebuilt. You can visitLagrange College Site Park simply by taking a drive down Alabama Highway 157 near the White Oak community of NW Alabama. The Historical Association has erected a dogtrot style log cabin by the entrance on the highway. If you turn at the cabin and follow the road up (take the Left fork), you will run straight into the College Site Park. The park today has markers showing the location of the original college as well as two log cabins (the Bonner House Bed and Breakfast, and The College Site Welcome Center), a slave kitchen restored and rebuilt on the grounds, a log church, several outbuildings, a barbershop, and a pavilion with a gorgeous overlook of the valley. A short drive down a gravel road will lead you to the Lagrange Cemetery.

The town of LaGrange is often referred to as the ☐City of the Dead☐ because its cemetery is the only remaining remnant from the original town. This beautiful and mysterious cemetery is one of the only clues remaining from the Civil War that can inform us of the families who lived on the mountain. There are currently 150 graves which are known to LLHA, but it is estimated that there are more than 200 graves in the cemetery. LLHA is making every effort to put names and headstones on the 50 or so unmarked graves. The cemetery bears many names and legends as well as interesting stories.

Sadly, the cemetery has fallen victim to the times as well as vandalism. There used to be stone crypts covering most of the graves, but only a few remain intact. A rose bush that had been growing for over 160 years was stolen by vandals. The magnificent Ricks marker has shifted as well as the outer walls sustaining damaged. The LLHA has, over time located graves, added headstones, put up fences, and replaced stolen and vandalized plants and flowers, but this is an ongoing process. LLHA does an incredible job with limited funds and resources. The group gladly accepts donations toward maintenance of the park and cemetery. If you are ever in the Shoals, be sure to check out the LaGrange College Site Park and Antebellum Cemetery.

FOR MORE INFORMATION REGARDING "RECALL LAGRANGE" OR THE LAGRANGE LIVING HISTORICAL ASSOCIATION, VISIT www.recall-lagrange.00me.com.

Bands, Frequencies, and other information will be posted soon. Please check the SES page at N4IDX.com for continuing updates and information.

//
AX prefix on Australia's national day

Posted: 21 Jan 2013 10:34 AM PST
http://forums.qrz.com/showthread.php?376677-AX-prefix-on-Australia-s-national-day&goto=new post

AX prefix on Australia's national day

The Australian Communications and Media Authority automatically allows radio amateurs to substitute their normal VK callsign prefix with the letters AX every Australia Day, which is Saturday January 26. This gives them a chance to be part of the national day around the country which commemorates the first settlement at Port Jackson, now part of Sydney, in 1788.

Many will celebrate the day with a variety of events and night fireworks, a few receive a well deserved Australia Day honour, or become a new citizen.

Those radio amateurs using AX are strongly encouraged to have a QSL card under their alternate callsign, which is also automatically available on ANZAC Day April 25, and World Telecommunication Day May 17.

The ACMA, on the recommendation of the Wireless Institute of Australia, may also issue special event callsigns with the AX prefix on occasions of special national or international significance. This occurred during the Sydney 2000 Olympics and saw AX3GAMES and AX3MCG issued for the Melbourne Commwealth Games in 2006.

UN, KAZAKHSTAN
Tony,UN/RT9T (RX9TL), will join the CQWW 160m CW Contest as RT9T from
CQ zone 17. He will be QRV on HF before and after the contest.
QSL via RT9T (QRZ.com).

VE, CANADA
VE3COLD is the special callsign of Rick,VE3ZUP, during the "Society
for the Preservation of Amateur Radio Winter Field Day" on Jan 26/27.
QSL via LoTW and direct.
See also: http://www.spar-hams.org/contests/winterfd

VK, AUSTRALIA
The special event station AX5CE will be QRV during the "Australia Day"
from Jan 25 (1330 UTC) until Jan 26 (1329 UTC). QSL via VK5CE.

VP8/A, ANTARCTICA
Robert is active as LU1ZG from the Ejercito General Belgrano II Base.
He has been spotted in SSB on 20m between 0425 and 0510 UTC.
QSL via LU4DXU.

Z6, KOSOVA
Mario,Z6/S56A, plans to join the CQWW 160m CW Contest as SO/LP.
QSL via homecall.

60m: Johan,SM0TSC, has got an experimental license for six months to work on 60m (5310, 5320, 5380 and 5390kHz; +-1.5 kHz). Skeds are possible via e-mail to sm0tsc[at]hflink.net
---
Peter,OX3XR, reports that the frequency range 5250-5450 kHz has been allocated to amateur radio in Greenland and he wants to show up with a dipole soon.

10th Antarctic Activity Week (AAW): The 10th Antarctic Activity Week will take place in February. Rules and announced operations can be found at: http://www.waponline.it/Default.aspx?tabid=113

WW Iron Ham Contest results: The results of the WW Iron Ham Contest have been published at: http://www.araucariadx.com/ih

Ham Radio and CW in Movies: Producer Steven Spielberg has used amateur radio or Morse code in three of his last four movies: Super 8 (2011), The Adventures of Tin Tin (2011) and Lincoln (2012). Spielberg got advice from radio amateurs. See also: http://www.cqdx.ru/ham/ham_radio/morse-code-plays-role-in-new-spielberg-movie

YASME Foundation: The YASME Foundation is a non-profit organization which supports scientific and educational projects related to amateur radio, including DX and the introduction and promotion of amateur radio in developing countries. See also: http://www.yasme.org

INDEXA: Obviously, for a given reason, the International DX Association (INDEXA) has adapted its production conditions. The Hellenic Amateur Radio Association of Australia (HARAOA) has no funds for the ZL9HR DXpedition paid to the participant, but retained for future personal activities. Anyone applying for a future INDEXA funding must promise to pay remaining funds to the participants or to return them to the main sponsors.
See: http://www.indexa.org and http://www.indexa.org/support.html

DXCC: Following DXpedition was approved for DXCC credit: Z81Z

OPs wanted: Ralph,H44RK, plans to activate the Sikaiana atoll. He is looking for 2 or 3 other OPs, if you are interested please contact Ralph via ralph.honiara[at]gmail.com or NR6M at turvin2009[at]yahoo.com

SILENT KEY: With regret, the DARC has learned that his honorary member Dr. Walter Schlink,DL3OAP, has died at the age of 77 years on Jan 18. He was a DARC member for over 40 years and very active in several committees and also in the DARC Board.
Hans-Peter Guenther,DL9XW, died on Dec 27. He founded the DARC chapter Emsland based in Lingen in 1948 and got his firs radio amateur license in 1952. DL9XW was the DARC DLD manager since 1959 and member of the DARC committee for DX and HF Contesting.
Our condolences and sympathy are with their families and friends.

We do not want to be sad that we lost them, but grateful that we could
get to know them as a radio friend. We will always keep them in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jan 25-27 CQWW 160m Contest
Jan 26/27 REF Contest
Jan 26/27 BARTG RTTY Sprint
Jan 26/27 UBA DX Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-008, FT*W, Crozet & AF-048, FT*X, Kerguelen Islands: Gildas,TU5KG, is
working from the Austral Islands and often active maritime mobile but
tries to become active from the islands as well. He will sign FT5WQ
from Crozet Island and FT5XT from Kerguelen. QSL only direct via F4DXW.

AF-014, CT3, Madeira archipelago: Dirk,DO7DP, is travelling to the island
of Madeira (Loc IM12jr) from Jan 26 until Feb 9 and will show up as
CS9/DO7DP in SSB and PSK31 on 40m, 20m, 15m and 10m. QSL via DO7DP.
See also: http://www.do7dp.de

AF-032, 5H, Zanzibar Island: Sam,F6AML, is visiting Zanzibar (WLOTA 1980)
from Jan 20 until Feb 28. He will sign 5H1Z in SSB and CW on 40m-10m
working with his FT857D and verticals during his spare time. He will
also try to activate the IOTA groups AF-054, AF-063 and AF-075.
QSL via F6AML (bureau/direct), no eQSL.

EU-002, OH0, Aland Islands: The Radiosporting Team (OPs: Juha,OH1JT,
Ari,OH5DX, and Tomi,OH6EI) signs OH0Z from Mariehamn on Fasta Aland
(OHFF-037, WLOTA 1373) during the CQWW 160m Contest. QSL via W0MM.

EU-089, CU8, Western group: Antonio,CU8AS, Rudi,HB9CQL, and Hermann,CT3FN/
HB9CRV, will show up as CR2W in the CQWW 160m Contest. The QTH (station
of CU8AS) is situated near the lighthouse of Albarnaz (WLOTA 0947,
Loc HM49jm). QSL via HB9CRV. See also: http://www.to-mk.com/neu

NA-016, ZF, Cayman Island: Theodore,K8AQM, will be QRV as ZF2TA from the
Caymans working in CW and SSB on 20m-10m between Jan 26 and Feb 2.
QSL via K8AQM (bureau/direct/LoTW).

NA-021, 8P, Barbados: A few members of the "Buddies in the Caribbean" are
planning a mini DXpedition to Barbados (WLOTA 0999) from Jan 29 until
Feb 6. Mike,KC4VG (8P9VG), Weymouth,K8EAB (8P9EA), Paul,KB9AVO (8P9DG),
Daniel,WZ1P (8P9WZ), Budd,W3FF (8P9FF), Chris,W6HFP (8P9HF),
Guy,N7UN (8P9UN), and Steve,WG0AT (8P9RT), will be active with 3 fixed

and several portable stations (battery powered using the suffix /p)
working in CW, SSB, RTTY and PSK on 160m-10m. They will use mainly
Buddipoles. QSLs via LoTW or via the OP's homecalls (see QRZ.com).

NA-099, KP4, Puerto Rico: The ARRL HQ Station W1AW announced to show up as
W1AW/KP4 from Puerto Rico (WLOTA 2802) on Jan 26/27.
QSL direct via W1AW.

SA-022, LU, Buenos Aires (Bahia Anegada) Province group: 12 members of the
Bahia Blanca DX Group (LU3DXG) are planning to activate Isla Gama.
L22D will operate with four stations in CW/SSB/PSK31 on all HF bands
from Jan 24-27. QSL via LU7DSY (bureau/direct).

==> + ARRL BOARD HOLDS 2013 ANNUAL MEETING

The ARRL Board of Directors held its 2013 Annual Meeting January
18-19 in New Orleans, Louisiana. At the meeting, the Board set its
legislative objectives for the 113th Congress, bestowed awards,
approved the organization's amended financial plan, elected members to
the Executive Committee and ARRL Foundation, and more. A detailed look
at all the Board's actions, including the official minutes from the
meeting, is forthcoming.

==> + AMATEUR RADIO AND SCOUTING: BSA TO OFFER AMATEUR RADIO OPERATOR
RATING STRIP

The Boy Scouts of America (BSA) has approved an Amateur Radio
Operator rating strip for Scouts and Scouters to wear on their
uniforms. According to BSA Communication Services Director Jim Wilson,
K5ND, the strip recognizes the Scout or Scouter's availability as an
Amateur Radio operator for communication services for events and
```

activities, as well as emergencies. All registered youth members and adult leaders who also hold a valid FCC-issued Amateur Radio license of any class are eligible to wear the rating strip. Read more here <http://www.arrl.org/news/bsa-to-offer-amateur-radio-operator-rating-strip>.

==> + ARRL SCHOLARSHIP DEADLINE IS FEBRUARY 1

The application deadline for ARRL Foundation Scholarships <http://www.arrl.org/scholarship-program> is fast approaching. The deadline for applications is February 1, 2013. According to ARRL Foundation Secretary Mary Hobart, K1MMH, the 2013 collection of scholarship awards is bigger than ever, with eight new scholarships added in 2012. "The annual awards range from $500 to $2500, while the Goldfarb Scholarship can total upwards of $10,000 each year," Hobart explained. "The estimated total dollar amount of all awards in excess of $80,000." Scholarship recipients will be announced in May 2013 via letter and on the ARRL website <http://www.arrl.org/annual-scholarship-winners>.

"The message today is clear -- there is still time to apply for one of the many scholarships administered by the ARRL Foundation," Hobart said. "If you know a young radio amateur who is pursuing higher education, please encourage him or her to apply. If you are a club officer, add this information to your website. With several new awards added every year, highly qualified young hams should review the list of available scholarships <http://www.arrl.org/scholarship-descriptions>, complete the electronic application form <http://www.arrl.org/scholarship-application> and submit it -- along with a recent academic transcript -- before February 1."

Information about all of the ARRL Foundation awards -- including descriptions <http://www.arrl.org/scholarship-descriptions> and selection criteria <http://www.arrl.org/summary-of-scholarship-requirements>, application forms <http://www.arrl.org/scholarship-application> and instructions <http://www.arrl.org/scholarship-program> -- is available on the ARRL Foundation website <http://www.arrl.org/the-arrl-foundation-overview>. The ARRL Foundation is an IRS-designated 501(c)(3) organization dedicated to Amateur Radio.

==> THE DOCTOR IS IN: MORE POWER FOR EME STATIONS

Carl Hasbargen, KN0WS, of St Paul, Minnesota, wrote to the ARRL's Doctor, wanting to know how to use more transmit power for the new Earth-Moon-Earth (EME) station that he plans to build later this year. In the past, he has used a portable generator to power a 180 W, 432 MHz linear amplifier into a quad Yagi antenna system. While Hasbargen was successful using that setup to make a contact via the Moon, he figures additional transmit power would be helpful. He told the Doctor that he would like to be able to use his current generator.

Hasbargen asked "If I have two identical model solid state linear amplifiers, each capable of amplifying a 25 W input into a 180 W output, can I simply take the 50 W from my transceiver, divide the power using a commercial antenna power divider to drive each linear amplifier, then combine the two 180 W outputs from the pair of amplifiers back through another power divider (used backwards as a coupler) to produce a final 360 W to the antenna?"

Here's what the Doctor had to say:

If you pull off the covers of many high power solid state amplifiers, you will see that is exactly how they are constructed internally (see photo). While it seems like a straightforward idea, the main issue, especially at EME frequencies, is relative phase delay. While a single dual-module amplifier is relatively easy to build and test as an integrated system, your separate amplifiers were not built with that in mind. At 70 centimeters, a wavelength is 70 centimeters long, but 1/10 of a wavelength is only 7, about 5 centimeters, or 2 inches in coax.

I would think you would want tolerances to accumulate to well less than that for reasonable operation, and with independent assembly and device selection (not selected as matched components) and alignment, I would be surprised if two randomly selected amplifiers would be that close. If you have the capability to phase match them, the difference, if any, could be accommodated in a short length of coax, preferably on the input side.

If the amplifiers are linear and can amplify at very low levels, it would be safe...to drive them with an input splitter and measure the power at each output. If they are the same and you put them in a combiner and the level is twice each, less the attenuation of the combiner, you are probably good to go. I would bring up the power slowly and watch for heating and other undesired effects.

Of course, in real life, each of the power divider/combiners will introduce a little loss, so don't expect the full 360 W -- still it should be close.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <http://groups.yahoo.com/group/AlleghenyValleyRadio/post?postID=zpPOqQ_tDRUgz8PtrOLu7ReN8SebO3NBKYSpUQMK52ADP9llBYDxeNcBsVrABCPPnXowtP8cnIt4> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is In" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> + ON THE AIR: ICELANDIC AMATEURS GET MF PRIVILEGES

According to the Íslenskir Radíóamatörar (ÍRA) -- Iceland's IARU Member-Society -- radio amateurs in Iceland now have operating privileges on 472-479 kHz, or 630 meters, as of January 16. Amateurs in Germany, Sweden, the Netherlands, New Zealand and Monaco already have operating privileges in this portion of the MF spectrum. Delegates at

the 2012 World Radiocommunication Conference approved this method of addressing Agenda Item 1.23, as the Conference considered a possible allocation of approximately 15 kilohertz between 415 and 526.5 kHz. After discussions and taking into account spectrum conflicts with the Maritime Mobile Service, delegates ultimately decided to allocate 472-479 kHz to the Amateur Radio Service on a secondary basis. Read more here <http://www.arrl.org/news/icelandic-amateurs-get-mf-privileges>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: The average daily sunspot numbers this past week dropped nearly 73 points to 56.4, while the average daily solar flux declined nearly 47 points to 110.7. The average geomagnetic indices were up about 50 percent, but it was still very quiet. The difference was mostly due to events on January 17 when the planetary A index was 13 -- higher than in recent weeks, but still moderate. The cause of the mild disturbance was the arrival of a coronal mass ejection (CME). The predicted solar flux from the NOAA/USAF January 23 forecast has the 10.7 centimeter flux values at 105 on January 24, 100 on January 25-28, 95 on January 29-30, 100 on January 31-February 1, 110 on February 2, 120 on February 3-4, 125 on February 5-8, 120 on February 9-14, and 115 on February 15. It doesn't look like a return to solar flux values around 170 -- where it was on January 9-12 -- is expected any time soon. But those high levels that we saw earlier in the month weren't predicted, either. Looking back, 135 was predicted for January 9 in the November 25-December 9 daily forecasts, then downgraded to 110 on December 10-16, then increased to 115 on December 17-30, downgraded to 105 on December 31-January 2, increased to 115 on January 3, 135 on January 4, 130 on January 5-6, 145 on January 7, and 150 on January 8. The final result? On January 9, we saw 169.3, far above any of the predictions over the previous 45 days, which were revised eight times. The predicted planetary A index is 5 on January 24, 8 on January 25-26, 5 on January 27-February 8, 8 on February 9-10, and 5 on February 11-18. Look for more on the ARRL website on Friday, January 25. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + POSTAGE RATES TO RISE THIS MONTH

Beginning Sunday, January 27, it will cost more to mail first class letters, postcards and packages within the US. The cost to mail a first class letter will be 46 cents, while the cost to mail a postcard will be 33 cents, an increase of 1 cent for each; this is the third increase for postcard postage in less than two years. This month, the USPS will also introduce a First Class Mail Global Forever Stamp that will allow customers to mail 1-ounce letters anywhere in the world for one set price of $1.10. The cost to mail flat-rate Priority Mail packages and letters will also increase. Click here <http://about.usps.com/news/national-releases/2012/pr12_114.htm> for

more information on all the postal increases.

==> + DXCC DESK APPROVES TWO LAOTIAN OPERATIONS

ARRL DXCC Manager Bill Moore, NC1L, reports that the 2010-2011 XWPA operation and the current XW4XR operation in Laos have been approved for DXCC credit. "If you have had these operations rejected in a recent application, please send an e-mail <bmoore@arrl.org> to the ARRL DXCC Desk," Moore said. "Once updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts, as well as online in the daily listings <http://www.arrl.org/dxcc>."

==> THIS WEEK IN RADIOSPORT

This week:

- January 25 -- NAQCC Straight Key/Bug Sprint; NCCC Sprint Ladder
- January 25-27 -- CQ 160 Meter Contest (CW)
- January 26-27 -- BARTG RTTY Sprint; REF Contest (CW); UBA DX Contest (SSB); SPAR Winter Field Day
- January 27 -- QRP ARCI Fireside SSB Sprint
- January 27-28 -- Classic Exchange (CW)

Next week:

- February 1 -- NCCC Sprint Ladder
- February 2 -- Minnesota QSO Party; AGCW Straight Key Party
- February 2-3 -- Vermont QSO Party; Mexico RTTY International Contest; 10-10 International Winter Contest (SSB); Black Sea Cup International; EPC WW DX Contest
- February 2-4 -- Delaware QSO Party
- February 3 -- North American Sprint (CW)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 25-26 -- ARRL Mississippi State Convention <http://www.arrl.org/hamfests/mississippi-state-convention-capital-city-hamfest>, Jackson, Mississippi
- January 26-27 -- ARRL Puerto Rico State Convention <http://www.arrl.org/hamfests/puerto-rico-state-convention>, Hatillo, Puerto Rico
- February 2 -- ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-2>, North Charleston, South Carolina; ARRL Virginia State Convention

<http://www.arrl.org/hamfests/virginia-state-convention-frostfest-1>,

Orlando Amateur Radio Club organizes the 67th HamCation® Amateur Radio and Computer Show in Orlando, Florida

The theme for the 2013 Orlando HamCation®:

☐Ham Radio exploring new horizons☐.

The Central Florida Fairgrounds is the center of activity on

February 8, 9 and 10 (Friday, Saturday and Sunday) 2013,

for people interested in Amateur Radio and electronics.

With over 150 commercial vendors booths, 400 swap tables together with the largest Tailgate Area in the southeast US, to show and sell amateur radios equipment, parts, computer hardware and software and other interesting items for a growing group of radio and computer enthusiasts.

Special interest groups related to Ham Radio also have a place at the Central Florida Fairgrounds.

Forums at the 2013 Orlando HamCation® this year will accommodate a wide area of Ham Groups in ☐The Village☐ that will address various subjects of interest and other issues important to today☐s Radio Amateurs.
Organizations such as ARRL, the American Radio Relay League, MARS, the Military Affiliate Radio System, Florida Weak Signal Society, and QCWA, the Quarter Century Wireless Association, will have membership meetings during HamCation®.

The Orlando HamCation® will have an Amateur radio station with the call K4H on the air to serve the Ham Radio community as a special event station.

Last year the Orlando HamCation® welcomed over 12,000 visitors. The Central Fairgrounds was very well populated, as was the Tailgate area around the buildings. Some area Ham Radio Emergency groups showed their mobile Emergency vehicles in Orlando.

The Orlando HamCation® is a major Ham Radio event; this year acting as the ARRL South Eastern Convention host. Visitors come from all over the world to participate in this event.

Updated information is available at the HamCation® website, www.hamcation.com and also on Facebook, the name is hamcation,

and on Twitter: @hamcation.

Detailed information is as follows:

The Orlando HamCation® is for Ham Radio operators and people interested in Amateur Radio, computers, and electronics. Activities are found in the Commercial building, Craft building, Swaps building and surrounding areas at the Fairgrounds (known as the ☐Tailgate☐) and ☐The Village☐ the place where most of the Forums will be held.

The 67th HamCation® will be open to the public February 8, 9 and 10, 2013. Friday, noon to 6 pm, Saturday, 9 am to 5 pm and Sunday, 9 am to 2 pm. Admission is $12.00. Parking is free.

Organized by the Orlando Amateur Radio Club. Site: Central Florida Fairgrounds, 4603 West Colonial Drive (SR-50), Orlando FL 32808.

Driving directions: I-4 Westbound Exit 83C, I-4 Eastbound Exit 83B. Go to SR 50 (West Colonial Drive).

RV $25 per night, no reserved spots. FCC license Exams administered Saturday, pre-registered only.

Talk-In amateur radio frequencies: Repeaters 146.760 (-600) no tone, back-up 147.015 (+600) 103.5 tone, and 146.570 (-600) D-Star.

Information: www.hamcation.com, email: info@hamcation.com

Phone: (407) 841-0874. Outside Florida call (800) 214-7541, or write Orlando HamCation,P.O. Box 547811, Orlando FL 32485-7811.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JAN 27 2013.

Last week the WIA was asked to provide urgent supporting technical
information to its recent submissions to the NSW Planning System Review
Proposed changes to State-wide Streamlined Approvals Code. On the wia.org.au
site you will find an attached document "Amateur Radio Antenna Masts -
Information for NSW Planning & Infrastructure", written for the WIA by
Roger Harrison VK2ZRH, at very short notice.

Here now is Roger:-

"Well - it seems that our campaign to have the NSW Planning department include provisions for amateur radio masts and antennas in the planning laws currently being revised has had some effect.

The NSW Minister for Planning and Infrastructure, the honourable Brad Hazzard MP, has asked the Planning department to - quote - pay particular attention to this issue in finalising the State Environmental Planning Policy amendment - end quote.

How do I know that ? Well, late in November I wrote to my local member about my disappointment that exemptions for antenna masts for amateur radio use will not be considered in the current Planning System Review, despite many submissions to the Review over the past year. My local member subsequently acknowledged my letter, saying that he asked the Planning Minister for advice on the subject.

On Tuesday last, 22nd January, I received a letter from my local member enclosing a response to him from the Minister for Planning. After acknowledging the valuable work performed by amateurs during natural disasters and other emergencies when traditional infrastructure fails, the Minister's letter went on to explain that the current State Environmental Planning Policy - Exempt and Complying Development Codes (or SEPP) - allows antennas and aerials to be erected on most lots in NSW to a height of 1.8 metres above the highest point of the roof on a dwelling - ". . . this includes antennas which may be erected at ground level, such as those used by amateur radio operators. In situations where there is a two storey dwelling, this allows for the erection of an antenna that is around 10 metres high."

So, I guess we're expected to live in two storey McMansions . . . All those submissions you sent in should have made it abundantly clear that that 1.8 metre limit didn't cut it for amateur radio.

The Minister went on to say that - quote - amateur radio operators raised concerns regarding the Codes SEPP and the ability to erect radio masts and antenna. Each submission is currently being reviewed and I have asked the Department to pay particular attention to this issue in finalizing the SEPP amendment.

If you wrote to your local member, you may have received a letter from the Minister to your local member along the same lines.

The Institute wrote to the Planning department in November, seeking a meeting to discuss the issue of amateur radio masts before the new regulations were set in stone.

The Planning department replied in December, saying that as they were reviewing submissions to the draft Codes SEPP, they thought there was limited value in discussing the issue at this stage.

However, the department's reply to President Phil Wait VK2ASD revealed that, of the 200 submissions received on the draft Codes SEPP, over 40 were from radio amateurs !! That effort made amateur radio operators the largest single group of respondents out of those from local councils, town planners, architects, developers, businesses, community groups, uncle Tom Cobley and

all.

The department's letter to the Institute included the name and number of an officer to contact to discuss our concerns.

The week before last, President Phil Wait called the contact officer and had a chat. The officer invited the Institute to provide technical reasons why radio amateurs wanted masts and antennas of 10 metres or 15 metres and to set out arguments and requirements supporting the case. And to submit it within days.

Phil briefed me on his discussion with the planning officer and asked me to put something together. The submission and a covering letter were completed and submitted on Monday 21st January. They were posted on wia.org.au the same day - thank you Robert Broomhead VK3DN.

If you're unhappy about something; if you want to change things: it pays to make yourself heard.

Are we there yet ? Well, no. But keep your fingers crossed.

I must congratulate and thank everyone - individual amateurs and radio clubs alike - who went to the effort of making a submission during all the phases of the Planning System Review and also writing to your local members. I exhorted you to GET CRACKING, and you did.

I would also like to acknowledge the assistance of Jim Linton VK3PC who provided some valuable background material when I embarked on this saga.

The annual Great Gathering of hams - the Wyong Field Day - is but four weeks away, where we can compare letters we've received about radio masts from our local members and the Minister for Planning. Do they all sing from the same song sheet ?

The Wyong Field Day promoters have exhorted us all to "be there or be square!"

(submitted by roger vk2zrh)

FreeDV broadcast

Following the successful relay of the VK1WI and the AARNSW morning broadcast, using the new FreeDV digital voice mode on 40 metres a second test is now planned.

Tonight's broadcast, Sunday the 27th of January, will be relayed, once again from the Central Coast by Ed, VK2JI using the FreeDV mode however this will be on a different frequency. As many of the spots below 7.2MHz are taken up by nets and general SSB usage, this trial will be sent on 7.240MHz LSBFreeDV plus or minus QRM from the broadcast stations.

Ed hopes to find a small channel between the commercial stations.

Reports of the transmission are very welcome and should be posted to the digitalvoice (all one word) Google group list.

For those who wish to try to receive the test transmission and have the audio from their rig connected to a PC for RTTY or PSK etc. all that is needed is the free software from www.freedv.org

(SOURCED TO VK2WI NEWS)

Socialise - 27 January 2013

Have you prepared for the last weekend in May; the 2013 WIA AGM and Conference?

Meeting and speaking with fellow Amateurs is a rejuvenating experience that cements friendships and opens the door to interactions beyond a QSO or a QSL card. With tours of club facilities and tourist attractions throughout Fremantle you'll have the opportunity to share your wonder with other visitors to the state and enjoy the hospitality that VK6 has to offer.

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

You'll find all the information online at the VK6 conference site, conference.vk6.net

HAMS ACROSS AUSTRALIA.

ARNSW Anniversary BBQ.

Those who have received their membership badge will have seen included in the posting an early notification of an Anniversary BBQ which is to be conducted by ARNSW on Sunday the 10th of March at the Dural site.

Al VK2VEC is collecting names of those who will be attending.

You can email your RSVP to office@arnsw.org.au or telephone 02 9651 1490

Hornsby and Districts Amateur Radio Club is pleased to announce that their new repeater VK 2 RHT is now on air at Chatswood, operating in both FM and P25 mode, also known as APCO-25.

It transmits on 438.350 MHz, and has a minus 5.4 MHz offset, meaning users must transmit on 432.950 MHz

For FM users the repeater requires a 91.5 Hz tone. It also transmits the same 91.5 Hz tone while in FM mode. This will prevent FM users hearing the P25 signals.

For P25 users, the hexadecimal Network Access Code or NAC, is the default 293.

Whilst with HADARC, they set up camp in a park in West Pennant Hills over the weekend, in a battle of the best with other fanatics across Australia.

The Hornsby And District Amateur Radio Club took part in an annual Field Day Radio Contest, which tests the readiness of ham radio operators to provide communications at very short notice and to make as many contacts with other radio operators throughout NSW.

The Hornsby Advocate reporting this story have a great photo of VK2JCC Colin Christie at Pennant Hills. About 15 members of the 70-strong club took to the park for about eight hours on Saturday and VK2JCC said that the group made good contact with areas as far as Wollongong, South Australia, Tasmania and Queensland.

ARNSW at its Dural site will be conducting the next Foundation course on Saturday the 23 March and assessments for all license grades on Sunday 24th.

Prior booking required by email to education@arnsw.org.au or call 02 9651 1490 and leave contact details.

Candidates need to bring passport photo.

The Centre Victoria RadioFest

The theme for the biggest Victorian event, held on February the 10th, is home brewing, with three speakers to touch on the subject, and it includes a free homebrew competition open to all.

If you are looking for good value, then visit and talk to those in the dedicated Traders Hall, or the second-hand market place.

A full display of the Elecraft K-line will be on show thanks to Gary Gregory VK4FD, as well as vintage radio and club displays.

Hot breakfast is available from 8am, access to toilets at 7am, free tea and coffee all day.

See you at the Centre Victoria RadioFest when the doors open at 10am in two weeks on Sunday February the 10th.

I'm Barry Robinson VK3PV and you are listening to VK1WIA.

Homebrew and Constructors Group meeting

The next gathering of this group will be at 2pm this Saturday, February the 2nd.

The venue is Amateur Radio Victoria, 40g Victory Boulevard, Ashburton.

It will include a ?show and tell? display of homebrewed gear.

Guest speaker is Peter Cossins VK3BFG. He will present on the evolvement in Melbourne of slow scan television. All are welcome to attend.

SILENT KEY

#1 MIXED DXCC JOHN DACK, W7KH (SK)

Monday, January 7, John Dack, W7KH, of Seattle, Washington, passed away.

He was 91.

An ARRL Life Member, Dack sat at the very TOP of the DXCC mixed standings with 398 entities, including all 340 current entities and 58 deleted entities.

He worked every DXCC entity except Damau Diu (CR8), French Indochina (FI8) and Manchuria (C9).

South Sudan (ST0) was the last new DX entity in Dack's log; he worked ST0R in August 2011.

JOHN DACK, W7KH SILENT KEY

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

LITTLE NIPPER

HMV was founded in 1921 with its first store on London's Oxford Street, its trademark dog and gramophone image is taken from a 1898 oil painting, His Master's Voice, which features Nipper the dog listening to an early gramophone recording.

HMV was at the forefront of music/record sales for years, thru the 2nd world war singles, microgroove, tape, cassettes, 8 track cartridges CD's mp3's and it would appear the later, digital downloading of mp3 songs has seen its final demise!

HMV's 239 stores are administration and a 25%-off sale is in full swing certainly through the UK.

LED LIGHTS JAM CITY BUSES

The Swedish national amateur radio society the S-S-A reports on a case of LED lights in a shop jamming the VHF radio used by buses. The lighting in shop windows at a business called Punkt House jammed the city bus system which uses 167.0375 MHz for communications and dispatch.

The lights causing the problem were LED spotlight lamps. It was found they did not conform to the regulations on Electromagnetic Compatibility and they are now being replaced. The full story in Google English is on-line

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

With the coming of more sunspots comes more DX. And when more amateurs work DX, the ARRL's Membership and Volunteer Programs Department -- especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus -- goes into high gear.

"In 2012, we saw an increase in the number of cards received from ARRL members that were sent to foreign QSL bureaus, as well as the number of cards we sent out to the bureaus," said Membership and Volunteer Programs Administrative Manager Sharon Taratula.

"In addition, the number of DXCC applications -- including those for initial awards and endorsements -- also increased."

BROADCAST MONITORING SWL AND SCANNER NEWS

Nautel Ltd., one of the world's leading broadcast transmitter manufacturers, has received orders for 21 additional medium wave AM transmitters and associated equipment from India.

The orders for 100 kW and 200 kW transmitters join an earlier-announced order of six 300 kW DRM transmitters from All India Radio as the world's largest digital radio deployment to date.

All transmitters in the system will be configured for DRM30 transmission and will be used in 27 locations throughout India.

The transition to digital broadcasting will allow AIR to use alternate platforms such as podcasting, SMS, webcasting and mobile services, and offer

a 24-hour news channel along with other programming.

Additional services such as Interactive Text Transmission and disaster warning are also planned.

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

DIY electronic kit founder Entrepreneur of the Year

ICQpodcast.com say that Limor Fried started selling her DIY electronic kits at university and created a multi-million dollar business, "Adafruit."

Her success resulted in Limor being named 2012 Entrepreneur of the Year by Entrepreneur magazine.

Limor started her company in her MIT dorm room by selling electronics kits to her friends, making about $10 on each kit.

Soon she moved to New York and in October moved from a 2,000 square foot office to a sprawling 12,000 square foot loft in Soho.

Entrepreneur says with $10,000 her parents had allocated for her tuition, Fried bought a bulk quantity of parts and began assembling and selling her kits, making about $10 on each unit.

As orders increased, she hired friends; before she knew it, she was designing a new project every week around newfangled components like gyrometric sensors, solar panels and thermal printers.

Entrepreneur of 2012: Limor Fried

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

PACK YOUR HAM GEAR AND MOVE TO MARS

You might want to call this the ultimate one-way DXpedition.

While not specifically directed to the ham radio community, the Netherlands based non-profit organization "Mars One", has released its basic astronaut requirements setting the stage for a televised global selection process that will begin later this year.

Amateur Radio Newsline's Norm Seeley, KI7UP, told us that Mars One hopes to put the first settlers on the red planet by 2023.

The organization is not looking for scientists or former jet jockeys as colonists. Rather anyone who is at least 18 years old can apply to become a Mars pioneer.

Officials at Mars One say that the most important criteria are intelligence, good mental and physical health and dedication to the project. Those selected as its astronauts will undergo eight years of training before launch.

Norbert Kraft is Mars One's chief medical director and a former NASA researcher. He is quoted as saying that gone are the days when bravery and the number of hours flying a supersonic jet were the top criteria. Kraft says that now a days space exploration planners are more concerned with how well each astronaut works and lives with the others, in the long journey from Earth to Mars and for a lifetime of challenges that would lie ahead.

Mars One plans to launch a series of robotic cargo missions between 2016 and 2021. These would be used to build a habitable outpost ahead of the arrival of the first four colonists in 2023. More settlers would then arrive every two years thereafter. And less we forget to mention, this will be a one way trip as there are no plans to return the pioneers to Earth.

If you think you have the right stuff to help colonize Mars you can learn more about the selection process at www.thenextgiantleap.com

(Mars One, space.com, others via arnewsline.org)

RUSSIA TO LAUNCH MOON PROBE IN 2025

Russia appears to be getting back into the space-race. According to published news reports, that nation will resume its long dormant program to explore the moon by sending an unmanned probe there in 2015.

The spacecraft will be called Luna-Glob which translates to Moon-Globe in English. According to the Interfax news agency, Roskosmos director Vladimir Popovkin said says the exploration payload will be carried by the first rocket to blast off from a new facility that Russia is building in its far eastern Amur region.

Popovkin is the head of Russia's space agency. He and other Russian space officials have said Luna-Glob would consist of an orbital module and a probe that would land on the moon. Once there it will radio back information about samples it takes from the Lunar surface.

The last successful Russian launch of an unmanned probe to the moon was in the 1970s. Unfortunately that nation has suffered setbacks in its space program in recent years, including unsuccessful satellite launches and the failure of a Mars probe in 2011.

SA AMSAT ACCELERATING CUBESAT PROJECT

South Africa AMSAT has decided to accelerate its CubeSat project and expects to have the first prototype version of transponder and control system on the table for testing by end February.

As part of South Africa's contribution to the African Resource and Environmental Management Constellation of satellites, the South African National Space Agency or SANSA, in collaboration with local industry and academic experts, have been in discussions on the specifications for the new satellite called Zed A-ARMC1. Specifically in regard to its benefits for South Africa and the continent. South Africa AMSAT is making a presentation to SANSA to have an amateur payload included in the project.

Deon Coetzee, ZR1DE, last year demonstrated a locally designed space frame. He is currently working on the second prototype.

WARP DRiVE SCOTTY

The SSTL Space Blog reports on WARP DRiVE (Water Alcohol Resistojet Propulsion) a novel new propulsion system that will help the STRaND-1 CubeSat to perform manoeuvres

STRaND-1 is the first CubeSat to have two types of propulsion system.

As well as the WARP DRiVE, it will be equipped with a pulsed plasma thruster system which will provide full-axis control with low power, mass and volume requirements.

WARP DRiVE works by pushing water alcohol out of a tiny hole to produce thrust.

WW SPECIAL INTEREST GROUPS --- ILLW

ILLW heading toward a record

The International Lighthouse and Lightship Weekend continued to grow from its first event held in August 1998 that attracted 158 stations in 40 countries.

Many of the amateur stations in the original activations at the historic maritime structures have been with the fun event since, and joined over the years by many hundreds more.

The sponsors, the Ayr Amateur Radio Group Scotland, thanks all entrants for their loyalty, and looks for another record year as we move towards the magic 500 registrations.

The event is always held on the 3rd full weekend in August, aiming to promote public awareness of the former navigation structures and give amateur radio some good publicity.

To register or find out more about the next event on August the 18th and 19th visit the website www.illw.net

Tasmanian Bush Fires operations

WICEN in Tasmania was finally stood down after 20 continuous days of operation at the Incident Management Centre at Cambridge, near Hobart airport. Operations have now been wound back.

WICEN was posted by the Tasmania Fire Services to mainly control the busy 80MHz radio traffic during massive fires.

Although those the major fires, which started on the 3rd January on the Tasman Peninsula and in the Derwent Valley, are still active, one being classified as contained and the other controlled.

The days serviced by WICEN and other southern Tasmanian radio amateurs varied between 12 and 24 hours.

WICEN Tasmania (South) Operations Coordinator Rod Finlayson VK7TRF reports that 24 radio amateurs contributed to the effort, totalling 666 hours at the radio desk, plus time in logistical support keeping up the supply of operators to the task.

Seven operators did in excess of 45 hours each, including three more than 60 hours and one working a total of almost 80 hours.

WICEN Tasmania (South) Secretary, Roger Nichols VK7ARN, said initially, there were two operators on each of the two networks, but this was wound back to one on each after ten days.

Roger VK7ARN said workloads gradually declined and, over the last few days, consisted mainly of aircraft tracking, ensuring each aircraft's position and situation was known at least half hourly.

This effort was enabled by having a core group of trained and experienced operators who were able to guide others until sufficiently familiar with the task.

A key learning issue was knowledge of the working of, and roles within, an Incident Management Team made up of Fire, Parks and Forestry personnel.

Roger VK7ARN said, "This was particularly complex in this case because two incidents were being managed within the one centre.

"All reports to date are of a high level of satisfaction by the 'powers that be' for a job very well done.

"Though this particular campaign has ended, it's still a long way to go to the end of the bushfire season in an even drier environment."

WICEN has at least now a larger pool of experience to draw on if the need arises.

(Jim Linton VK3PC, Chairman, IARU Region 3, Disaster Communications Committee)

REWIND

The Kansas City Star are reporting on an almost 76 year old transmitter 'brought back from the grave'.

Larry Woodworth pulled a lever to begin transmitting and watched as his radio roared to life this month.

First came a loud buzz as 2,300 volts rushed through its system.

Then he watched the mercury vapour in the vacuum tubes burn bright violet.

"This is W-9-bravo-sierra-papa," he said, giving the amateur radio's call letters. "W9BSP. Olathe, Kansas, Ensor Museum."

For the first time in years, the radio that Marshall Ensor had built was transmitting again.

Ensor, a long time Olathe dairy farmer, high school teacher & radio operator, built the amateur radio in 1936 and 1937. He is remembered by some as a pioneer for teaching others about amateur radio, and his old house, now the Ensor Farmsite and Museum, is listed as a National Historic Site and on the Register of Kansas Places for his contributions.

But the radio he transmitted on to teach others hadn't been used since 1972, two years after his death. Since then Ensor's old radio equipment had fallen into disrepair.

Work on repairing Ensor's old equipment began after Harry Krout, one of Ensor's former students, visited the museum.

"He made an observation that the old equipment was a sorry mess to look at because he remembered it from when it was all in new condition."

It took almost 150 hours over three years to get the radio in working condition. They had to replace almost 90 per cent of its wiring and rebuild many of its components. Plus, the radio had to have certain safety modifications made, because "the level of safety concern in 1937 was quite a bit different than it is today."

And now that Ensor's old radio is back in commission, Woodworth plans on transmitting from it periodically during the months when the museum is open.

Amateur Radio Newsline(tm) Report 1850 - January 25 2013

Amateur Radio Newsline report number 1850 with a release date of January 25 2013 to follow in 5-4-3-2-1.

The following is a QST. Hams in Iceland and Greenland get new spectrum; hams down-under get use of special prefix for Australia Day; the United States hits yet another all time high in Amateur Service license holders; AMSAT North America's main website hacked and two operations from Laos get DXCC credit. Find out the details are on Amateur Radio Newsline(tm) report number 1850 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: HAMS IN ICELAND AND GREENLAND GET NEW SPECTRUM

We begin this week with news that hams in Iceland have some new frequencies to use. Here's Jeremy Boot, G4NJH, with the details:

--

The national association of Icelandic Radio Amateurs has announced that amateurs in that country have been granted operating privileges on 472 to 479kHz.

Access is granted on a Secondary basis, with a maximum power of 5W EIRP. Maximum bandwidth is 1kHz. This new allocation is open to the G license class and higher.

In addition, the regulatory authority recently extended temporary permits for 1850 to 1900kHz, 5.26 to 5.41MHz and 70 to 70.2MHz.

I'm Jeremy Boot and you are listening to the Amateur Radio Newsline.

--

Also, some good news for the ham radio community in Greenland. OX3XR reports that nation has now moved to a full band allocation of 5.250 to 5.450 MHz from its previous channelized status. (GB2RS, OX3XR)

**

RESTRUCTURING: SWEDISH HAMS GAIN TEMPORARY SHARED ACCESS TO THE 5 MHZ BAND

The IARU Region 1 newsletter that Sweden is now issuing its radio amateurs with temporary permits for operation in the 5.3 MHz or 60 meter band.

According to Anders Larsson, SM6CNN, that nations telecommunications regulator the PTS has begun to issue permits for experimental transmitters at 5.310 to 5.313, 5.320 to 5.323, 5.380 to 5.383 and 5.390 to 5.393 MHz. Maximum bandwidth is limited to 3 kHz independent of type of modulation with a maximum output 100 watt peak envelope power.

Holders of a Swedish amateur service call sign may use that call sign to identify. Also, it is permitted to make contact with other, presumably non ham radio permit holders.

There are however some restrictions. Mobile use is not permitted. Also, this operation must respect all other traffic in the band and not cause any interference to it.

The P-T-S will require payment of yet unspecified administration fee and the permits it issues will only be good for a time period of 6 months.

More information is at www.iaru-r1.org. (IARU)

**

RESCUE RADIO: BROADCASTER JOINS HUNT FOR MISSING CHILD IN SINGAPORE

Broadcast radio is playing a major role in the hunt for a missing child in Singapore. This as all four stations under the Star Radio Group have joined in the search for six-year-old William Yau Zhen Zhong, who has been missing since Wednesday, January 16th.

Suria FM, 988 FM, Red FM and Capital FM are running public service announcements every alternate hour to ask that their combined 4.3 million listeners to join in the search. Other information and a picture of the missing boy have been uploaded to the stations' websites as well as their Facebook and Twitter pages.

Star Radio Group deputy chief broadcasting officer Kudsia Kahar appealed to the public to call the authorities if they see William. Kahar says that the only way to locate him is to cast a wide net. As such, she said that the Star Radio Group is 100 per cent committed in doing its part to try and find him. Kudsia added that she sympathized with the missing child's parents and understood their anguish. (Asia One)

**

HAM HAPPENINGS: ACMA TO PERMIT AX PREFIX ON AUSTRALIA'S NATIONAL DAY

The Australian Communications and Media Authority will once again permit V-K radio amateurs to substitute their normal VK callsign prefix with the letters AX on Australia Day, which is Saturday January 26.

This once a year permit gives Australian hams a chance to be part of the national holiday which commemorates the first settlement at Port Jackson in 1788 which is now a part of the city of Sydney.

It should be noted that the AX prefixed has been used for other special events. Mostly those on occasions of national or international significance to Australia. For example, this occurred during the Sydney 2000 Olympics and saw AX3GAMES take to the ham radio bands. The call AX3MCG was issued for the Melbourne Commonwealth Games in 2006. (VK3PC)

**

2012 MARKS ALL-TIME HIGH FOR AMATEUR RADIO LICENSES

Back in the United States the number of radio amateurs in the United States has reached an all-time high of almost 710,000. This according to figures released last week by ARRL VEC Manager Maria Somma, AB1FM. Amateur Radio Newsline's Heather Embee, KB3TZD, has the details:

--

In looking at new and upgraded licenses, as well as licensees per ARRL Division, VEC Manager Somma took a close look at the numbers looking for growth within each license class and all of Amateur Radio over the last 40 years. When looking at the three current license classes, the number of Technicians, Generals and Amateur Extras peaked in December at 345,369, 163,370 and 130,736, respectively.

Somma says that the total number of US amateurs in the FCC database also continues to grow each year, As of December 31, 2012,the number of licensees reached an all-time high of 709,575 as opposed to 702,056 at the end of 2011 and 696,041 for 2010. In other words, the number of United States licensed radio amateurs increased at an average rate of 21 per day.

Somma said that more than 3000 new licenses were issued in 2012 than in 2011, while upgraded license activity remained steady throughout the year. All in all, a very good year for growth in the United States amateur radio ranks.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, in Berwick, Pennsylvania.

--

The ARRL has a more in-depth report about this continued growth pattern. You can read it on line at tinyurl.com/2012-license-increase. (ARRL Letter)

**

RESCUE RADIO: FEMA SAYS IPAS USE RISING

According to news reports, a growing number of emergency managers are using FEMA's Integrated Public Alert and Warning System or IPAWS to send emergency alerts.

IPAWS now has some 148 operational users. 93 of those have the authority to send an alert to the public using the FEMA-IPAWS Web-based message origination system through the Commercial Mobile Alert Service or EAS. With Commercial Mobile Alert Service on board, major and rural cellphone carriers tie into IPAWS to send 90-character text-based alerts.

According to the latest figures, some 20 messages were sent over the Commercial Mobile Alert Service and 81 were sent using EAS. Of the EAS messages, many of those were required weekly or monthly tests also known as the R-M-T. (RW)

(5 sec pause here)

**

RADIO AND THE NET: AMSAT-NA WEBSITE COMPROMISED BY HACKING

Hackers have hit AMSAT North America, Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

AMSAT North America says that on or about January 20th its main web site at www.amsat.org was compromised by a hacker. The attack took the form of the contents of the supporting database, including non-public information, being posted on other publicly available web sites.

According to AMSAT, the main site was developed roughly 10 years ago by a group of AMSAT volunteers under a more benign Internet environment of the time. The team that built that site is no longer associated with AMSAT, so work has been underway over the last several months to move to a modern, maintainable, and very secure infrastructure. AMSAT says that this recent breach will accelerate that activity.

In the interim, www.amsat.org will have limited content. Neither the AMSAT store nor the Fox project web site were affected by this breach. Mail services remain operational.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

A spokesperson tells Amateur Radio Newsline that the AMSAT Store is still open for business, and can be reached directly at store.amsat.org/catalog (AMSAT NA)

**

COMMUNICATIONS NEWS: NOT ENOUGH CELLULAR AND BROADBAND AT PRESIDENTIAL INAUGURATION

Many who attended the Inauguration of President Obama for his second term in office on Monday, January 21st were reportedly unhappy with cellular telephone and broadband service from the National Mall. And this included some heavyweights in Congress.

One of these was Senator Claire McCaskill who at the end the festivities got on-line to tweet her apologies to those waiting for commentary via the Senators Twitter account. Senator McCaskill is a member of the Senate Commerce Committee, which oversees wireless companies and their networks..

But the sense from broadband provider ATT, Verizon, T-Mobile and Sprint was that their networks performed as well as they could have given the heavy demand. This given the enormous number of attendees, many of whom were simultaneously trying to share pictures and messages with others. This in turn created a strain on the finite amount of broadband available to handle the traffic from an ever-increasing number of smartphones and tablet computer that are in common use these days.

More about this situation can be found on-line at tinyurl.com/inauguration-cellphone-problem. (Politico, other published reports)

**

RADIO HAPPENINGS: NAB BROADCAST ENGINEERING CONFERENCE TOPICS ANNOUNCED

The National Association of Broadcasters has released a list of topics for its Broadcast Engineering Conference for its trade show this spring.

For radio broadcasters some of the more interesting programs include Advanced Technologies for Radio; IP for Radio; Spectrum Matters; Technical Regulatory Issues; Radio Receiver Technologies; AM Band Revitalization; Cloud Based Storage and Distribution and Planning for Safety.

Also planned is a special RF Boot Camp called Understanding Radio and Television Transmission. This is designed for personnel who might be unfamiliar with transmission technology but should have a solid acquaintance with it such as station and network I-T personnel or small station management.

The National Association of Broadcasters Convention is slated for April 6th to the 11th in Las Vegas, Nevada. (RW)

**

RADIO SCOUTING: GOOD NEWS FOR SCOUTS INVOLVED IN RADIO

Some good news for scouts involved in radio and radio communications. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the details:

--

The national Boy Scouts of America is now recognizing any youth or adult who has an amateur radio license with a special patch that can be displayed on the uniform.

The patch, in the form of a strip, has the words: "Amateur Radio Operator" on it and will soon be, if it's not there already, available at local Scout shops or through regional Scouting supply operations.

Jim Wilson, K5ND, is the BSA's director of communications services, but known in the ham community as chairman of the national Radio Scouting Committee and national Jamboree on the Air organizer.

Wilson says the recognition came from discussions that began some months ago with the scout committee that selects awards and insignia for the scout uniform.

He says research shows amateur radio was recognized by the Scouts as early as the 1940s...

"There were some proficiency badges or awards that Scouting offered -one of which was a Scout Radioman personal interest badge that was for senior Scouts and Explorer Scouts," Wilson says.

"And, you can actually find those badges in copies of the old handbooks and things like that."

Wilson says from those discussions came the first of the recommendations for the recently adopted Morse Code Interpreter strip.

But Wilson says the awards committee came back after that was approved and asked whether the Radio Scouting Committee could draft something else to recognize ham radio. Thus was born the Amateur Radio Operator patch.

"You can put this strip on your uniform and then that way be recognized for your ability to help in communication around events or around emergencies or just as a recognition that you've got this license," Wilson says.

And, where does the patch go?

"The right sleeve of the uniform underneath the U.S. flag there, a patrol or den emblem, and then there's the unit quality award and it goes right under those three items or if you only have two of them

under the first two," Wilson says.

Wilson, who also is the volunteer coordinator for this year's K2BSA operation at the national BSA Jamboree at the Becthel Summit Reserve in West Virginia, says you can find out more at the K2BSA website.

We have a link (http://www.k2bsa.net/operator-rating) to that within this story published on our website arnewsline.org

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Last year the Boy Scouts of America Awards and Insignia Committee introduced the Morse Code Interpreter Strip. This based on the recommendation of the organizations National Radio Scouting Committee. (NT3V)

**

HAM HAPPENINGS: SHELBY HAMFEST RETURNS TO CLEVELAND COUNTY FAIRGROUNDS

The Shelby Hamfest is headed back to its former home at North Carolina's Cleveland County Fairgrounds. This after spending the last five years in Dallas, North Carolina.

The Shelby Hamfest moved to Dallas in 2008 after contract disagreements between the Shelby Amateur Radio Club and the Cleveland County Fair Association. That situation has now been resolved and will bring the famed hamfest back to the Fair Grounds on Labor Day weekend which this year is August 31st and September 1st.

For more information keep an eye on the events website. You will find it in cyberspace at www.shelbyhamfest.org. You can also follow the event Facebook at www.facebook.com/ShelbyHamfest. (goupstate.com, Shelby Hamfest)

**

HAM HAPPENINGS: TICKETS AVAILABLE FOR DAYTON TOPBAND DINNER

Reservations and tickets are now available for the 24th Annual Dayton TopBand dinner slated for Friday evening May 17th. This year's venue is the Presidential Ballroom of the Crowne Plaza hotel in downtown Dayton, Ohio. Social hour is at 6:15 PM and the dinner begins at 7:15 PM. All times are Eastern Daylight. Noted Top Band enthusiast Larry "Tree" Tyree, N6TR, will be this years featured speaker. More is on-line at topbanddinner.com (K3LR)

**

HAM HAPPENINGS: VIENNA WIRELESS WINTERFEST FEBRUARY 24TH

The 37th annual Vienna Wireless Winterfest takes place on Sunday, February 24th. The venue this year is the Northern Virginia Community College in Annandale, Virginia. Talk-in will be on the 146.91 repeater. For more information please visit viennawireless.org/winterfest.php (Via e-mail)

**

NAMES IN THE NEWS: W2LPT HONORED WITH QCWA 75 YEAR AWARD

Some names in the news. First up is Quarter Century Wireless Association Palm Beach Chapter member Seymour "Sy" Levine, W2LPT. He was to be presented with the prestigious 75 Year Award from QCWA National Headquarters.

W2LPT was first licensed in 1938 in New York City. The ceremony was to take place at the Veterans Administration Hospital in Riviera Beach, Florida on January 23rd. In addition to the award, Levine was also to be presented with a Life Membership in the National QCWA. (W2TMT)

**

NAMES IN THE NEWS: WAYNE MILLS, N7NG, NAMED CQ MAGAZINE DX EDITOR

Renowned DXer, DXpeditioner and contester Wayne Mills, N7NG, of Jackson, Wyoming, has been named CQ magazine's new DX Editor.

First licensed in 1953 at age 11, Mills began DXing in 1956 and went on his first DXpedition in 1985. He was part of the Zed-A-1-A team that reintroduced amateur radio to Albania in 1991, and the inaugural operation from the newly-independent Republic of Kosovo in 2008.

>From 2000 to 2007, Mills was manager of the ARRL's Membership Services Department and worked on developing the Logbook of the World electronic confirmation system. He also set several contesting records over the years, but says he considers himself much more of a DXer than a contester.

N7NG will begin writing the CQ DX column as of the magazine's April 2013 issue. Mills who was a 1999 inductee into the CQ DX Hall of Fame succeeds Carl Smith, N4AA, who has stepped down after writing the magazine's DX column for 13 years. (CQ)

HAM RADIO IN SPACE: AMSAT-DC WORKSHOP ON PORTABLE SATELLITE GROUND STATIONS

The AMSAT-DC Group is planning a Spring Workshop on portable satellite ground stations slated to take place on Saturday, March 23, at the NASA Goddard Space Flight Center in Greenbelt, Maryland. This will a nearly all-day workshop for those who wish to learn more about satellite operations and develop their own portable ground stations.

Participants will be encouraged to bring their projects to assemble, show, and explain to others.

For more information please contact Pat Kilroy by e-mail to n8pk (at) amsat (dot) org. Registration information will be announced on or before February 15th by the AMSAT News Service and posted to the Calendar of Events at www.amsat.org (ANS, N8PK, Southgate)

**

RADIO IN SPACE: NASA TRANSMITS MONA LISA IMAGE TO ORBITER AT THE MOON

As part of the first demonstration of laser communication with a satellite orbiting the moon, scientists with NASA's Lunar Reconnaissance Orbiter program have successfully transmitted an image of the Mona Lisa to the spacecraft from Earth using only a high powered laser.

The digitized image traveled some 240,000 miles form from the Next Generation Satellite Laser Ranging station at NASA's Goddard Space Flight Center in Greenbelt, Maryland to the Lunar Orbiter Laser Altimeter instrument on the spacecraft. By transmitting the image piggyback on laser pulses that are routinely sent to track the devices position, the team achieved simultaneous laser communication and satellite location. The success of the laser transmission was verified by returning the image to Earth using the spacecraft's radio telemetry system.

Typically, satellites that go beyond Earth orbit use radio for tracking and communication. The Lunar Reconnaissance Orbiter is the only satellite in orbit around a celestial body other than Earth to be tracked by laser as well. One of many stories on this latest accomplishment can be read on-line at tinyurl.com/mona-lisa-moon (NASA, others)

**

SPACE EXPLORATION: NASA TO ADD EXPANDABLE MODULE TO THE ISS

NASA has officially signed a contract to attach an inflatable private module to the International Space Station. Under the agreement announced on January 11th, NASA will pay $17.8 million to the Nevada based private spaceflight firm Bigelow Aerospace for the company's Expandable Activity Module or BEAM which will be attached to the orbital lab as a technology demonstration.

BEAM is likely to be similar to Bigelow's Genesis 1 and Genesis 2 prototypes, which the company launched to orbit in 2006 and 2007, respectively. Both Genesis modules are 14.4 feet long by 8.3 feet wide, with about 406 cubic feet of pressurized volume.

NASA officials have said that BEAM could be on orbit about two years after getting official approval. The module will likely be launched by one of the agency's contract cargo carriers such as SpaceX or Orbital Sciences Corporation. More is on-line at tinyurl.com/new-iss-module and bigelowaerospace.com. (NASA, Bigelow Aerospace)

**

DXCC NEWS: TWO LAOS OPERATIONS GET DXCC CREDIT

ARRL Awards Branch Manager Bill Moore, NC1L, reports that the 2010 to 2011 XWPA and the current XW4XR operations from Laos have been approved for DXCC credit. Cards for those operations can now be submitted and will be counted toward your DXCC standing.

And yes, XWPA is the correct callsign. There was no number designator in it. For more background on this strange but very legitimate callsign take your web browser to http://dx-world.net/2010/xwpa-laos (DXCC, DX World)

**

DX

In other DX news, members of Verona DX Team will return to Cumura, Gunia Bissau between February 10th and March 2nd. This to help with the mission work and be operate whenever possible, They will use the call J52HF and operate on the HF bands as well as 50 MHz using SSB only. More details including QSL routing should be forthcoming.

F6AM, will be active as 5H1Z from Zanzibar through February 28th. Operations will be on 40-10 meters using CW and SSB. During his time there, he may also operate from Mafia Island, Pemba Island and an island in the AF-075 Islands On The Air group. QSL via his home callsign, direct as listed on QRZ.com or via the bureau.

N6TJ has cancelled his operation as 9Y4W from Scarborough, Tobago Island for the ARRL DX CW Contest that runs February 16th and 17th. His host on Tobago has a broken tower and there is no time to repair it before the contest.

DF7ZS will be active from Aruba possibly using the call P41P between March 26th and April 3rd including the CQ World Wide WPX SSB Contest on March 30th and 31st. Some casual operations will take place before and after the contest on 17 and 12 meters. QSL via his home callsign.

F6GWV and F6HMQ will be active as TO22C from Guadeloupe between February 17th and March 3rd. Operations will be on all bands, but with a focus on 160 meters. QSL via F6HMQ.

GM3WOJ and GM4YXI will be active signing VK9C/GM2MP from Cocos Keeling Island between March 30th and April 13th. Operation will be on SSB and CW, with some RTTY. They hope to have a real-time logging system and upload daily to Logbook of the World if conditions permit.

Lastly, AI6MS reports that will be operating portable from Ghana as 9G5MS through May. Marcel explains that he is a volunteer with the non-profit organization called 'Medicine on the Move' and will be using amateur radio in the classroom for the students from the AvTech Academy. Because of this priority will be given for QSO's will be given to schools, universities, and prescheduled contacts. QSL cards are tentatively planned and can be expected in the 2nd half of 2013 if requested. Yours goes as directed on the air.

(Above from various DX news sources)

**

THAT FINAL ITEM: THE 21ST CENTURY PHONE BOOTH EMERGES IN NYC

And finally this week, in the wake of Superstorm Sandy, the humble phone booth took on renewed importance in the Metro New York area. This as cut-off residents used pay phones to try to connect with one another during and after the emergency. Now, this old but reliable form of public communications is getting a major facelift as we hear from Amateur Radio Newsline's Cheryl Lasek, K9BIK.

--

New York City has officially launched a plan to transform pay phones into giant touch screens that provide city information, emergency broadcasts and local business deals. Located in the same places as existing phone booths, the new platforms are to be operated as a partnership between New York City, Cisco Corporation and City 24/7.

These smart screens were tested in a pilot project but now are live across the city and appear to be very reliable. Soon, there will be 250 of the new devices in all five New York City boroughs. This means that a person strolling through a given area would only have to pause a moment to tap on the public screen to find information about the closest subway or a city park. While there, he or she might also tap on the "deals" icon to bring up a list of coupons for nearby shops and restaurants that could instantly be transferred to a smartphone or other wireless device.

But maps and coupons are only one dimension of the new platforms role. Like traditional phone booths they will also serve as a communication tool during emergencies but in a far more sophisticated way. For instance, in the event of another disaster like Hurricane Sandy, the screens will become two-way distress devices that let citizens call for help or receive instructions about how to find safety.

Welcome to the phone booth of the 21st century.

For the Amateur Radio Newsline, I'm Cheryl, Lasek, K9BIK, wondering if these new public communications tools will be coming our way out here in Zion, Illinois.

--

The companies that designed the new system say that they do plan to expand to other cities in the future, but we do not know if Cheryl's hometown will be one of them. That said, lots more about this new dimension in public communications can be found at tinyurl.com/new-video-phone-booths (GIGOM.COM)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go a reminder that the Dayton Hamvention is seeking nominations for its 2013 Radio Amateur of the Year, Technical Achievement, Special Achievement and the Radio Club of the Year awards. The cutoff date to submit nominations is February 15th. More information and official nominating forms are now on-line at www.Hamvention.org/awards.PHP.

For now, with Bill Pasternak, WA6ITF, at the editors' desk, I'm David Black, KB4KCH, at the South-East Bureau in Birmingham, Alabama, saying 73 and we thank you for listening.

>From Tad Cook, K7RA
Seattle, WA January 25, 2013
To all radio amateurs

SB PROP ARL ARLP004
ARLP004 Propagation de K7RA

Average daily sunspot numbers over the past week were less than half the value for the previous week, dropping nearly 73 points to 56.4. Average daily solar flux declined as well, nearly 47 points to 110.7. Average geomagnetic indices were up about 50%, but still very quiet. The higher average was due to events on January 17, when the planetary A index was 13, higher than recent measures, but still moderate. The cause of the mild disturbance was the arrival of a CME, or Coronal Mass Ejection.

Predicted solar flux from the January 24 forecast from NOAA and USAF has 10.7 cm flux values at 100 on January 25-26, 95 on January 27-30, 100 on January 31 through February 1, 110 on February 2, 120 on February 3-4, 125 on February 5-8, 120 on February 9-14, 115 and 110 on February 15-16, and 105 on February 17-18.

It doesn't look like a return to solar flux values around 170 (where it was on January 9-12) is expected any time soon. But those high levels earlier in the month weren't predicted either.

Looking back, a flux reading of 135 was predicted for January 9 in the November 25 through December 9 daily forecasts, then downgraded to 110 on December 10-16, then increased to 115 on December 17-30, downgraded to 105 on December 31 through January 2, increased to 115 on January 3, 135 on January 4, 130 on January 5-6, 145 on January 7, and 150 on January 8. The final result? 169.3 on January 9, far above any predictions over the previous 45 days, which were revised eight times.

The forecasts are issued daily, usually after 2100 UTC and posted at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html.

The predicted planetary A index from the same January 24 forecast is 8, 15, 20 and 12 on January 25-28, 5 on January 29 through February

8, 8 on February 9-10, 5 on February 11-18 and 8 on February 19. The January 25-28 levels are higher then predicted a day earlier, on January 23. In that earlier forecast, planetary A index for those same four days was 8, 8, 5 and 5.

F.K. Janda, OK1HH of the Czech Republic expects the geomagnetic field will be quiet to unsettled on January 25-26, quiet January 27-28, mostly quiet January 29, quiet on January 30-31, mostly quiet February 1-2, quiet on February 3, mostly quiet February 4, quiet on February 5-6, quiet to unsettled February 7-8, quiet to active February 9-10, mostly quiet February 11-12, quiet to active February 13-14, active to disturbed on February 15, and quiet to unsettled February 16.

Jeff Hartley, N8II of Shepherdstown, West Virginia wrote, "It has been a pretty boring winter for DX. I did work four VK3s in a row from 2225-2255Z including one mobile who was S6 and a QRP 5 W to 1/2 wave vertical who was S5 with QSB on 20M SSB long path Thursday (January 24), so that path was very good. 12 and 10 seemed dead at that time and only South America was heard on 15. No European signals were heard on 160 around then and again at 0050Z (nothing on 80 also at 0050Z). But, if the K stays low, the lower flux should help the CQWW 160 contest this weekend."

Unfortunately, the forecast for this weekend has some geomagnetic activity, with the planetary A index on February 25-27 at 8, 15 and 20.

The 160 meter contest Jeff referred to is the CW weekend of the CQ World Wide 160-Meter Contest. The contest page at http://www.cq160.com/) says it runs from 2200 GMT today (Friday, January 25) to 2200 GMT Sunday. By the way, 2200 GMT (Greenwich Mean Time) for our purposes is the same as 2200Z or 2200 UTC. On the West Coast, this is long before sunset, at 2:00 PM PST.

On January 19, Jeff wrote: "Friday morning January 18 I had a chance to operate and had some very strong signals on 10 phone from the UK with small stations mostly S7-9. Even 5 and 10 watt stations were good copy. This was starting about 1330Z and the EU opening ended after 1600Z. Countries worked in EU started with SP, DL, EI, G, GM then later PA, ON, F and the DLs were about the only ones left at 1610Z. Friday evening was noticeably better than all this past week, but did not get to the radio until 0040Z. At that time 15 was in good shape to JA with the loudest, JH1GEX S9. BW2AK was heard and 9V1YC who was about S3-4 was worked easily thru a pile up. 15 was still open to JA at 0115Z, normally by 24Z, 15 seems closed to everywhere. 17 was also quite good into JA around 0100-0130Z with JA9YYY S9 on SSB.

The HA DX contest started at 12Z Saturday with lots of EU and Russian activity. Russians are usually only easy to work very early in the day on 20 and about nil on 15 and higher. At 1315Z when I

started thru 1430Z, Russians had good signals on 20 CW but there was deep rapid QSB making copying dits and sometimes whole letters/numbers very difficult. I worked about three Ural mountain area UA9s and found UN2E about S3 plus quite a few from UA3, about four from UA4 and some loud ones near St Petersburg from UA1. The deep QSB was even a problem on signals as close as Germany as well as the Hungarians. YE1ZAT called in around 1545Z with a good signal. 15 was open pretty well to EU, but 10 was barely open at all to very southern EU, I heard T77BL working AA3B.

"In the afternoon, I briefly operated in the NAQP phone contest before heading off to work. At 1835-1900Z, 10M had a good number of loud signals with one VE6 hitting 30 dB over S9. Many UT stations were worked along with stations from CO, AZ, WA, ID, MT and NM; only W6TA and K6LA who was weak were worked in CA. 15 was wide open to TX and was a bit of a struggle to work west coast stations with Midwest stations beating me out consistently."

In a January 18 email titled "Outstanding 160M propagation Jan 11-12 in Ohio," Robert Elek, W3HKK of Johnstown, Ohio wrote: "Worked more Europeans than ever around their sunrise on Jan 11 and 12, plus KL7 and VP2 earlier in the night. Huge signals! Received my first 599 reports from Europe (two of them!) as well as two SWL cards from Russia for that activity. The rig: 100w to quarter wave 40 ft vertical inverted L with 22x65 ft radials.)

"I was excited for the weekend conditions but Jan 13-14-15 turned out to be stinko for DX. Amazing how things change on Top Band. Gotta get 'em while you can."

Thanks, Robert.

Don't miss "The Penticton Solar Flux Receiver," an article on pages 39-46 in the February 2013 issue of QST. This gives a great explanation about where the solar flux numbers in our bulletin originate. It answered questions I had about the process, such as how they handle readings that go off the scale during a space weather event.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for January 17 through 23 were 74, 56, 46, 48, 50, 53, and 68, with a mean of 56.4. 10.7 cm flux was 122.7, 115.2, 106.7, 106.6, 108.3, 110.3, and 104.9, with a mean of 110.7. Estimated planetary A indices were 13, 9, 7, 9, 4, 1, and 1, with a mean of 6.3. Estimated mid-latitude A indices were 12, 7, 9, 8, 4, 1, and 1, with a mean of 6.

Black Sea Cup International

Posted: 25 Jan 2013 02:52 AM PST
http://forums.qrz.com/showthread.php?377152-Black-Sea-Cup-International&goto=newpost

BSCC (Black Sea Contest Club)

International HF Cup of Black Sea is carried out by BSCC (Black Sea Contest
Club).

The aim of the competition is to make as many contacts with hams around the world as possible, especially with the radio stations from Black Sea region countries, members of BSCC, BSCC Headquarters□ station, radio clubs and the headquarters of the national amateur radio organizations - members of the IARU (HQ-stations).

From : 02 February 2013 y. 12:00 UTC

To: 03 February 2013 y. 11:59 UTC

Eligibility: All licensed amateur radio operators worldwide

Objective: To promote Black Sea HAM radio spirit by contacting as many HAMs
as possible all over the World using all HF bands (excluding WARC)

Date and Contest Period: The first full weekend of February, beginning 1200
UTC Saturday and ending 1200 UTC Sunday (February 02-03, 2013)

.:: ENTRY CATEGORIES ::.

The general separate classes of Entries:

· Black Sea Countries (see Appendix 1)

· HQ stations (national organizations - IARU members and HQ of clubs)

· Worldwide

· Black Sea Contest Club members

1. Single Operator categories:

- SSB HP (exceeding 100 W);

- CW HP (exceeding 100 W);

- Mixed mode HP (exceeding 100 W);

- SSB LP (up to 100 W);

- CW LP (up to 100 W);

- Mixed mode LP (up to 100 W);

- Mixed mode SB 160m (any power);

- Mixed mode SB 80m (any power);

- Mixed mode SB 40m (any power);

- Mixed mode SB 20m (any power);

- Mixed mode SB 15m (any power);

- Mixed mode SB 10m (any power);

- Mixed mode QRP (up to 5 W). Use YourCall/QRP for this entry. This category will be created in case if there will be more than 10 contester-logs submitted. Otherwise all participants will be put into Mixed mode LP.

All duties (operation and logging) must be performed by a single person..
There are no restrictions for choosing software for logging. Usage of packet and cluster is allowed. It□s mandatory to follow Terms and Limitations of participant□s national Amateur radio license. Only one transmitting signal is allowed at any given time.

2. Multi Operators, one transmitter, mixed mode (MS)

Station must remain on same band/mode for at least 10 minutes before change to another one. Only one signal is allowed at any given time. All contesters must follow the amateur radio regulations of their country at all times. Violation of this rule will lead to re-classification of the station as CheckLog category.

3. HQ-stations.

There are two types of HQ-stations in this Contest:

· HQ-Stations of national organizations

· HQ-Stations of Clubs

HQ-stations must have only one transmitted signal per band/mode (160 CW, 160 Phone, 80 CW, 80 Phone, etc) at any time. All stations involved in HQ operation must be located in the same ITU zone. Only one HQ station signal is allowed at any given time. All contesters must follow the amateur radio regulations of their country at all times.

4. SWL.

SWL contesters may use all HF bands (excluding WARC). This Category will be created if there are more than 10 SWL-contester-logs submitted.

.:: CONTEST-NUMBERS ::.

HQ-stations send RS (T) and abbreviation of the radio club, for example - 59 (9) UCC for Ukrainian Contest Club, 59 (9) AGB for Activity Group of Belarus or the abbreviation of its national organization ☐ IARU member, for example - 59 (9) UARL the Headquarters of the Ukrainian Amateur Radio League, 59 (9) BSCC ☐ for BSCC Headquarters. Participants from Black Sea Region countries transmit RS (T) and number of ITU zone. BSCC members transmit RS (T), BS (Black Sea) and membership number, for example: 59 (9)BS17 for a BSCC member with membership number 17.

Other participants send RS (T) and number of their ITU zone. For each valid QSO report must include control numbers in full.

With any participants only one QSO can be made on each band and each mode. Only contacts made in proper band segments/modes are valid. On each band Phone QSO made in phone band segment and CW QSO made in CW band segment are valid.. Cross-mode, cross-band QSO, as well as communication through the repeaters are not valid. Participants must comply with regional frequency plan and stay in recommended for contests band segments.

Use of non-amateur radio means of communication (for example: telephone or Internet) to facilitate the QSO is contrary to the spirit and rules of the Contest.

Recommended Contest call - "CQ Black Sea Cup" in phone or "CQ BS" in CW.

.:: POINTS ::.

· QSOs with your ITU-zone (including HQ-stations) ☐ 1 point

· QSOs with other ITU-zones within your continent ☐ 3 points.

· QSOs with ITU-zones outside your continent ☐ 5 points.

· QSO with Black Sea Region Countries and Members of BSCC ☐ 10 points

.:: MULTIPLIERS (the summary of) ::.

· ITU-zones,

· HQ-stations,

· Black Sea area countries,

· BSCC-members

On each band (no difference which mode)

Exception: HQ-stations, BSCC-members cannot be additionally used for ITU zone Multiplier.

.:: SUMMERY SHEET ::.

Total score of the Contest: the total number of QSO points multiplied by the total number of multipliers worked.

.:: TROPHY ::.

The Trophies will be awarded to the absolute Winners in each Entry and HQ. A certificate will be awarded to the high scoring entry in each category in each DXCC country.

Additional awards may be made at the discretion of each country□s IARU member society, amateur radio clubs and private persons.

List of major awards (plaques)

«Worldwide»

SSB HP (exceeding 100 W)

CW HP (exceeding 100 W)

Mixed mode HP (exceeding 100 W)

SSB LP (up to 100 W)

CW LP (up to 100 W)

Mixed mode LP (up to 100 W)

Mixed mode QRP (up to 5 W)

Multi Operators, one transmitter, mixed mode (MS)

«Black Sea Countries»

SSB HP (exceeding 100 W)

CW HP (exceeding 100 W)

Mixed mode HP (exceeding 100 W)

SSB LP (up to 100 W)

CW LP (up to 100 W)

Mixed mode LP (up to 100 W)

Mixed mode QRP (up to 5 W)

Multi Operators, one transmitter, mixed mode (MS)

«Black Sea Contest Club members»

SSB HP (exceeding 100 W)

CW HP (exceeding 100 W)

Mixed mode HP (exceeding 100 W)

SSB LP (up to 100 W)

CW LP (up to 100 W)

Mixed mode LP (up to 100 W)

Mixed mode QRP (up to 5 W)

Multi Operators, one transmitter, mixed mode (MS)

4.«HQ stations» national organizations - IARU members and HQ of clubs

.:: LOGS ::.

The Logs must be postmarked or emailed no later than 30 days after the end of the contest. The Paper-logs submitted after 12 days after the end of the contest will not be classified in official results. Electronic logs must be in Cabrillo file format and submitted as e-mail Appendix or on 3.5□ diskette. Electronic files must use the participant□s callsign as the file name. Email entries must include the callsign used during the contest in the SUBJECT line of the email.

Paper-logs must be in chronological order (please no separation by band or mode) and contain of band, mode, date, time-UTC, callsign, numbers-send and number-receive, multipliers and points for each QSO. Multipliers should be marked in the paper log only the first time they worked on each band. Paper logs with more than 500 QSO□s must include dupes-sheets (an alpha-numeric list of all callsigns worked, broken down by band and mode.) All paper entries must include an official summary sheet or reasonable facsimile thereof with complete contest information

(Download AATest: here)

SD by EI5DI - official site

SD sets the standard for fast, simple logging and editing in the major international contests and in dozens of others worldwide. It is intended for single-op unassisted entries, on both SSB and CW. It runs on Windows, from Windows 95 to Windows 7, on Linux/Wine, and on Apple Mac with either Bootcamp or Parallels - using a character-based user interface.

(Download SD: http://www.ei5di.com/sd/sdsetup.exe)

SP7DQR SWL Contest Software (SWL_DQR_Log) - official site

SP7DQR, Marek Niedzielski, created a program specialized for use by SWL's in contesting. The program offers the possibilty to change the settings of the input parameters. Due to that feature the program can be used in at least 90% of the international contests having a SWL section. Latest version: 1.2.0 , now with dupe check.

Amateur Radio Club Picnic:

Posted: 25 Jan 2013 07:34 AM PST
http://www.eham.net/articles/29672

What was the first "Social Network"? Facebook? Twitter? AOL chat rooms? If you answered with any of those you are incorrect. The answer is amateur radio (ham radio). Hams have been socializing globally for the better part of a century, yes, almost 100 years. While cell phones, texting, IM and email may be the new standards of communications, they have one tremendous Achilles heel. Infrastructure! Remember the 2004 hurricane season? Unplug your phone line, take the battery out of your cell phone and disconnect your internet. Now get a message to a friend or relative thousands of miles away. Short of using the pony express you would be hard pressed to get that message thru, at least in any reasonable time frame. Solution? Amateur Radio. Amateur Radio operators have been doing just that for many years. On 9/11 ham radio was there in support of the communications breakdown and overloaded systems in New York. In the aftermath of Hurricane Katrina, the recent tornados across the U.S., and just last year in the Northeast after Hurricane Sandy devasated the area, hams where there. Whether a simple message to a parent that their child is safe and sound or a critical message that urgent care is needed, radio will work.

//
Propagation Forecast Bulletin #04 de K7RA:

Posted: 25 Jan 2013 07:27 AM PST
http://www.eham.net/articles/29671

Average daily sunspot numbers over the past week were less than half the value for the previous week, dropping nearly 73 points to 56.4. Average daily solar flux declined as well, nearly 47 points to 110.7. Average geomagnetic indices were up about 50%, but still very quiet. The higher average was due to events on January 17, when the planetary A index was 13, higher than recent measures, but still moderate. The cause of the mild disturbance was the arrival of a CME, or Coronal Mass Ejection.

SARL NEWS SUNDAY 27 January 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that the keys of two radio amateurs became silent recently. They are those of: Les Smith, ZS1GR, due to a massive stroke on Saturday 5th January, and Hein Frohnapfel, ZS6HFJ, member of the Noordwes Amateur Radio Club on Friday 25 January.

We extend sincere condolences to the families and friends of the deceased.

(PAUSE)

IN THE NEWS TODAY:

RE-APPLICATION FOR AN AMATEUR LICENCE

CLUBS AND HF ASSESSORS MUST REGISTER FOR THE MAY RAE AS SOON AS POSSIBLE

ADF GETS A MAJOR BOOST

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

RE-APPLICATION FOR AN AMATEUR LICENCE

ICASA recently published a Government Gazette with the requirements that every Radio Amateur must re-apply for his or her license by 25 January 2013. The SARL prepared a simplified form which has been approved by ICASA. It is available on www.sarl.org.za. If you missed the deadline, you can still complete the form and post or email the application to ICASA. Also fill in the section for late application and

state "Just become aware of the requirement to reapply for my amateur license"

No fees are required and no new examinations. Simply complete the form, scan it and send by email or ordinary mail to ICASA. The SARL web has full detail of the email and postal address. There is also a guideline on how to fill in the form.

CLUBS AND HF ASSESSORS MUST REGISTER FOR THE MAY RAE AS SOON AS POSSIBLE

The SARL RAE Manager, Gideon Jannasch, ZS4GJA, last week announced the details of the 2013 RAE. The May examination will be held on 16 May 2013 and the October examination on 17 October 2013. Clubs wishing to manage an examination centre must complete the application form as soon as possible and mail it to rae@sarl.org.za. HF Assessors must also register as soon as possible.

Full details and all the forms are available on the SARL web under licensing. Select the RAE Administration button.

A new Regulation study guide is also available which contains a summary of all regulations pertaining to amateur radio. Any questions regarding the RAE should be sent to Gideon at rae@sarl.org.za.

ADF GETS A MAJOR BOOST

This week the SARL Antenna Defence Fund increased to R37 100 edging closer to the R50 000 target. To see a list of donors and to find out how to add your name and donation visit www.sarl.org.za and select Antenna Defence Fund from the left hand menu. This past week the Secunda Amateur Radio Club made a substantial donation. Our first contribution from industry came from Radio Accessories & Data Modems who made a R6 000 donation to the fund. Sam Ford and all the other donors, the SARL appreciates your support.

SA AMSAT CALL FOR PAPERS

Towards the end of last year SA AMSAT issued the first call for papers for the 2013 SA AMSAT Space Symposium which will be held at the Innovation Hub in Pretoria on 18 May 2013. The theme of the conference is "Space - a challenging Amateur Radio frontier".

If you are planning to submit a paper please send in a brief synopsis of the proposed paper by 31 January to saamsat@intekom.co.za. For more information visit www.amsatsa.org.za.

AMERICAN SCOUTS GET SPECIAL BADGE IF THEY ARE RADIO AMATEURS

The National Boy Scouts of America is now recognizing any youth or adult who has an amateur radio license with a special patch that can be displayed on the uniform. The patch, in the form of a strip, has the words: "Amateur Radio Operator" on it.

Jim Wilson, K5ND, is the BSA's director of communications services, but known in the amateur community as chairman of the national Radio Scouting Committee and national Jamboree on the Air organizer says that the recognition came from discussions that began some months ago with the scout committee that selects awards and insignia for the scout uniform. He says research shows amateur radio was recognized by the Scouts as early as the 1940s. At the time of writing SARLNEWS it could not be established if there is such a recognition for South African Scouts and Girl Guides and Voortrekkers but it is worth following it up by those involved.

MOTIONS FOR DISCUSSION AT THE SARL ANNUAL GENERAL MEETING

The closing date for motions and discussion items at the SARL Annual General Meeting is 31 January 2013. A motion must include a full motivation and must be signed by a proposer and seconder who both must be members of the South African Radio League. The address to email items for the AGM Agenda is secretary@sarl.org.za.

WAYNE MILLS, N7NG, NAMED CQ MAGAZINE DX EDITOR

Renowned DXer, DXpeditioner and contester Wayne Mills, N7NG, of Jackson, Wyoming, has been named CQ magazine's new DX Editor.

First licensed in 1953 at age 11, Mills began DXing in 1956 and went on his first DXpedition in 1985. He was part of the Zed-A-1-A team that reintroduced amateur radio to Albania in 1991, and the inaugural operation from the newly-independent Republic of Kosovo in 2008.

>From 2000 to 2007, Mills was manager of the ARRL's Membership Services Department and worked on developing the Logbook of the World electronic confirmation system. He also set several contesting records over the years, but says he considers himself much more of a DXer than a contester.

N7NG will begin writing the CQ DX column as of the magazine's April 2013 issue. Mills who was a 1999 inductee into the CQ DX Hall of Fame succeeds Carl Smith, N4AA, who has stepped down after writing the magazine's DX column for 13 years.

NEW MEMBERS

The SARL welcomes 8 new radio amateurs WHO joined our organization as members. They are:

Peter Scott - ZR1KW Leon Uys - ZS6ALU Jacques Swanepoel - ZS6WDL Machael Castelyn - ZS6BML David Schofield - ZS6DOG Mev J Snyman - ZS6JAQ CC Mc Kenzie - ZS6AUF Charles Derel van der Spuy Louw - ZR1ABA

The SARL's membership is at present 1674.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at low to very low levels. None of the currently visible sunspots

are actively flaring.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 47.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 20 January - Last day of the PEARS National VHF/UHF contest. 26 January - SARL Summer QRP Contest 12:00 to 15:00 UTC. 31 January - Last day for submission of nominations for councilors for the next term and motions for the 2013 AGM. 31 January - Last day for submission of a brief outline of a proposed paper at the SA AMSAT Space Symposium on 18 May 2013 to saamsat@sarl.org.za. 31 January - Last day to submit applications for a SAARDT bursary by RAE students. Details from www.amateurradio.org.za. 2-3 February - AWA CW Activity. 9-10 February - SARL National Field Days. 23 February - SARL Youth Sprint 10:00 to 12:00 CAT with a special event starting at 09:00.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

5th EPC WW DX Contest 2013

Posted: 25 Jan 2013 08:51 PM PST
http://forums.qrz.com/showthread.php?377272-5th-EPC-WW-DX-Contest-2013&goto=newpost

Dear Fellow Radio Amateurs,

The European PSK Club has the honour to invite radio amateurs from all over the world to participate in the 5th EPC WW DX Contest 2013. The objective of the EPC WW DX Contest is to establish as many contacts as possible between radio amateurs around the world by using only the BPSK63 mode (all HF bands except WARC bands). Everybody can work everybody for QSO and multiplier credit. The next EPC WW DX Contest will be held from 12:00 UTC on 02.02.2013 to 12:00 UTC until 03.02.2013. This is an excellent opportunity to increase your BPKS63 count as well as accumulating contacts for other EPC awards for countries, prefixes, suffixes, etc. For more info please visit http://www.epcwwdx.srars.org

Since 2013 we only accept logs submitted through UA9QCQ web interface at http://ua9qcq.com/

We dont accept logs sent via e-mail any longer! All logs must be submitted no later than 5 days after the contest (to 23:59 UTC 8 February 2013 inclusive).

Contest Rules, software and sample cabrillo:

Special Event - BSA Merit Badge W4B this weekend

Posted: 25 Jan 2013 06:29 PM PST
http://forums.qrz.com/showthread.php?377257-Special-Event-BSA-Merit-Badge-W4B-this-weekend&goto=newpost

Let's create a dog pile!!!

A little late but wanted to alert everyone to a special 1x1 call event for our National Capitol Area Council (NCAC) local Troop 1344 who will be taking the Radio Merit Badge this weekend. We'll have a special event station 'hovering on 20M os if you hear W4B please reply for our Scouts to see what amateur radio is all about!!

Hear you on the air....

73'

Ham Radio Operators Take Part In Winter Field Day:

Posted: 26 Jan 2013 02:22 AM PST
http://www.eham.net/articles/29673

The Hoosier Lakes Radio Club will be participating in the 2013 Winter Field Day tomorrow in the Marsh Supermarket parking lot, Warsaw. Club members will begin putting up antennas starting at 9 a.m. Saturday from where they will be transmitting signals for a 24-hour period, beginning at noon. The 2013 Winter Field Day from the Society for the Preservation of Amateur Radio website is held for the purpose of familiarizing most Amateur Radio operators with setting up emergency-style communications and making as many contacts as possible during the 24 hour period. Since emergencies and natural disasters don't always happen in the summer, during Winter Field Day frigid winds, icy limbs and bitter cold replace the thunderstorms and blistering heat of summer.

DX Bulletin No. 1097
BID: $OPDX.1097
January 28, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, W2GB, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K5KV, KH6BZF, N7OU, K8GI, K8YSE, NE8Z/HC1MD, W8GEX & 60m News, W9ILY, AT International, ES1CW, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, F8AEJ, HP1AC, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, JK1KSB, JQ2GYU, OH2BH, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PY2LCD, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th-January, through Sunday, 27th-January there were 220 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP8/s, VP9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5V, TOGO. Jackie, F8AEJ, will be active as 5V7JD from Lome between February 4th and March 15th. Activity will be holiday style (visiting his son), using a FT897D with a "AT-897 Plus Tuner" into a 6 band Conrad windom

antenna (used at CN2CDJ; see QRZ.com). He informs OPDX that he will do mostly digital modes. QSL via his home callsign, direct or eQSL. Log will be posted on ClubLog.

6V, SENEGAL. Vladimir "Vlad", RK4FF, will once again be active as 6V7S from Le Calao in Ngaparou at least four times during 2013. His schedule is as follows: February 11th-April 3rd, May 13th-May 30th, July 1-16th and October 22nd-November 27th. Activity will probably be on 80/40/20/ 15/10 meters using CW, SSB and RTTY. QSL via RK4FF.

C6, BAHAMAS. Look for operators Tom/N1GN and William/NE1B to be active as C6ANM from Nassau (NA-001, FL15) during the CQ 160 Meter SSB Contest (February 22-24th) as a Multi-Single entry. QSL via LoTW. They will also be active before and after the contest. Also, operators Tom/N1GN, William/ NE1B, Mike/N1IW and Paul/K1VK will be active as C6ANM during the ARRL DX SSB Contest (March 2-3rd) as a Multi-Multi entry. QSL via LoTW and look for operations on all bands and modes before contest.

CQ NEWS (Wayne Mills, N7NG, Named CQ DX Editor). Richard, W2VU, Editor of CQ Amateur Radio, reported on January 22nd: "Renowned DXer, DXpeditioner and contester Wayne Mills, N7NG, of Jackson, Wyoming, has been named CQ magazine's DX Editor, magazine Editor Rich Moseson, W2VU, announced today. Mills - a 1999 inductee into the CQ DX Hall of Fame - succeeds Carl Smith, N4AA, who has stepped down after writing the magazine's DX column for 13 years.
Licensed in 1953 at age 11, Wayne began DXing in 1956 and went on his first DXpedition in 1985. He was part of the ZA1A team that reintroduced amateur radio to Albania in 1991, and the inaugural operation from the newly-independent Republic of Kosovo in 2008. From 2000 to 2007, Wayne was manager of the ARRL's Membership Services Department and worked on developing the Logbook of the World electronic confirmation system. Wayne also set several contesting records over the years, but says he considers himself much more of a DXer than a contester.
'I am looking forward to working closely with Wayne,' said CQ Editor Rich Moseson, W2VU, 'and to sharing with our readers his depth of knowledge and first-hand experience with so many aspects of DXing. We at CQ also thank Carl for his many contributions to the magazine and to all of amateur radio over the past 13 years. We wish him all the best in the future.'
'Following in Carl's footsteps will be difficult,' noted Mills, 'but going forward as the new CQ DX column editor, I will attempt to discuss items of current interest such as DXpedition funding, pileup behavior and maybe the many aspects of remote control DXing.'
Mills will begin writing the CQ DX column as of the magazine's April 2013 issue."
ADDED NOTE FROM KB8NW: Your editor has known Carl Smith, N4AA, for many years. Carl has always amazed me with all the hard work he put in for the DX community (writing the "QRZ DX" bulletin, "The DX Magazine" and the DX column for CQ Magazine). Where does he find the time?? I guess he deserves this break. Thanks Carl for the many years as DX editor for CQ Magazine.

D4, CAPE VERDE. Mats, SM7GIB, will be active as D44TIB from Cape Verde (AF-086) between February 25th and March 8th. Activity will be holiday style using a wire vertical on 160-10 meters. QSL via his home callsign.

DX ACROSS AFRICA. In January 2013, Jon, TF3ZA, and a team of 15 adventurers will attempt to drive from Reykjavik, Iceland to Cape Town, South Africa on a heavy duty ex-military 4x4 Bedford MK truck. Their planned route through the African continent is approximately 20,000km, and they estimate it will take them 6 months to reach Cape Town. They will depart Reykjavik in early January 2013 and update their Web site with news of their DXpedition. The operation is to last for approximately six months from 20 DXCC entities in Africa. Jon is in the process of obtaining licenses to operate from the following DXCC entities: CN2ZA, 5T0ZA, 6W/TF3ZA, 3XY0ZA, TU2ZA (pending), 9G0ZA, 5V7ZA, TY0ZA (pending), TJ0ZA (pending), TR0ZA (pending), TN0ZA (pending), 9Q0ZA (pending), 9J0ZA, Z2/TF3ZA, A20ZA and ZS/TF3ZA. Activity will be active on 160-6 meters using CW and SSB. Suggested frequencies are:
CW - 1824, 3524, 7024, 10124, 18074, 21024, 24894 and 28024 kHz
SSB - 3780, 7080, 14180, 18140, 21280, 24940 and 28480 kHz
6m - 50094/CW and 50110/SSB
The preferred QSL method is via LoTW. All logs will be uploaded to LoTW as soon as possible. The usage of Logbook Of The World is strongly encouraged, it's free, easy to set up and the fastest way to confirm your QSOs. An alternative QSL method is via OQRS. The OQRS system will be embedded on the Web site AFTER the expedition in August 2013. Direct QSL cards is the 3rd option. Send your QSL card with a Self Addressed Envelope and sufficient return postage, 2 USD per 50gr. (IRC will NOT be accepted), to: J[illegible]n [illegible]g[illegible]st Erlingsson, [illegible]lftam[illegible]ri 14, 108 Reykjav[illegible]k,
Iceland. Bureau cards should be sent via TF3ZA. An online log search will be available on the Web page, as well as tracking the team and their complete route. The Web page is at: http://www.dxacrossafrica.com
There is also a Twitter page: http://twitter.com/DXAcrossAfrica

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting the following operations for DXCC credit:
5V7TH - Togo; 2012 operation
S07EA - Western Sahara; 2006-2007 operations
XW4XR - Laos; Current Operations
XWPA - Laos; 2010[illegible]2011 operations

"If you have had these operations rejected in a recent application, please send an E-mail <bmoore@arrl.org> to the ARRL DXCC Desk," Moore said. "Once updated, results will appear in Logbook of The World (LoTW) accounts, as well as online in the daily listings."

DXCC NEWS (2013 Pending Applications). Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "Each year at this time DXCC is busy finishing up applications from the previous year. I have been getting questions from hams asking about applications that were sent for 2013.
Until DXCC completes applications for the 2012 calendar year, we cannot begin processing applications for 2013. Applicants can still submit their

applications, but they need to be held pending completion of 2012.
Normally, completion of the previous year happens on or by March 1 so
please use this date as a guide as to when DXCC begins processing the
2013 applications.
Note: This applies to all Digital and LoTW applications as well as for
paper carde submissions.
Send questions to bmoore@arrl.org
73 es DX!"

EQ95, ESTONIA (Special Event/Contest). Toomas, ES5RY, will be active
with the special callsign ES95Q during the ARRL DX CW Contest (February
16-17th) as a Single-Op/All-Band/Low-Power entry. QSL via ES5RY. Activity
will be from station ES6Q. The special callsign is to celebrate 95th
anniversary of Estonia.

FK, NEW CALEDONIA. Seiji "OKU", JK1KSB, will be active as FK/JK1KSB from
New Caledonia between January 29th and February 3rd. Activity will be
holiday style on 80-10 meters using CW , RTTY and PSK31. Oku will use
100 watts into a ATU and long wire. He may only operate between 1300-
1830z during January 29th and February 1st due to limitation of the
hotel. QSL via JK1KSB, by the address on QRZ.com.

GREAT READS ON THE WEB (A Dream Come True!). Read an interesting article
called "ZL9HR Campbell Island DXpedition 2012: A DXer's Dream Come True!"
by Glenn, KE4KY, who was one of the ZL9HR operators at:
http://www.ke4ky.net/p/zl9hr-campbell-island-dxpedition-2012.html

HC, ECUADOR. YL Elena, RC5A, will be active as HC2/RC5A between February
5th and March 9th. Activity will be on 160-6 meters, including 30/17/12
meters, using CW and SSB. Operation will also include the ARRL DX CW
Contest (February 16-17th) as a Single-Op/All-Band/Low-Power entry.
QSL via RC5A, direct or by the Bureau.

IOTA NEWS.............
EU-006. (OPDX.1096 QSL Correction) Members of the Westnet DX Group
will once again be active as EJ7NET from the Aran Islands
between May 10-15th. The QSL is via LoTW, or via Declan,
EI6FR via direct or by the Bureau.

EU-068. Members of the Charente DX Group will be active as TM0SI from
Sein Island (DIFM AT007, WLOTA 2721) between April 27th and
May 4th. Activity will be on all bands and modes. QSL via F5EOT,
direct or by the Bureau (sent in October). LoTW will be done
as soon as possible. Visit CDXG's Web page at:
http://www.cdxg.org

NA-171. Look for XF2E to be active from Venados Island between April
21-26th. QSL via IT9EJW. No other details available.

NA-180. Operators Enrique/XE2AA (V32EE), Hernan (V31HU) and Ismael
(V31MV) will be active from Twin Cayes between April 6-12th.
QSL via IT9EJW. No other details available.

SA-096. (Correction/Lets Try This Again) In OPDX.1095 and OPDX.1096,
the Web pages for the LU6W DXpedition was listed wrong which
could have an impact on donations. It should have been:
http://lu6w.yolasite.com

JD1, OGASAWARA. Three JA operators will be active from Chichijima Island
(AS-031) in the Ogasawara group between April 28th and May 5th. Callsigns
to be used are JD1BLC (Operator Toshi/JP1IOF) and JD1YBT (World Wide Club
station). Activity will be on 160-6 meters using CW, SSB, RTTY and FM.
QSL JD1BLC via JP1IOF direct or by the Bureau to JD1BLC. QSL JD1YBT via
JP1IOF direct or by the Bureau to JD1YBT. LoTW will also be available.

KH6BZF PROPAGATION FORECAST/REPORT (January 28th-February 3rd)....

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will be active as KP2MM during
the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band entry.
QSL via LoTW. For more details, see: http://www.n2tta.info

KP2, U.S. VIRGIN ISLANDS. Three JA operators will be active from the
KP2M rental shack on St. Croix Island (NA-106) between April 3-9th.
Operators mentioned are Yoshi (QSL K1HP/KP2 via JE2EHP), Taka (QSL
KP2/JF1BVG via JF1BVG) and Toshi (QSL WH7P/KP2 via JP1IOF). Activity
will be on all bands and all modes. Both Bureau and direct cards are
accepted via JA home callsigns. LoTW and OQRS will also be available.

NH0, MARIANA ISLANDS (Update). By the time you read this, most members
of the Tinian Radio Space Club who are active as NH0J will be heading
home to Japan except for Joe/JA1LZR and Kit/JA1NVF. They will continue
to be active as NH0Z and AH0J, respectively, from Tinian Island (OC-086,
USI NI003S, WLOTA 3108) until Tuesday morning (Monday evening in USA).
NH0Z (Joe) operates mostly CW and he loves 160/80/30/12/10 meters. AH0J
(Kit) operates SSB on 75/40/20/17/15/12/10 meters. By the way, operators
of the NH0J club station this past weekend were:
JJ2VLY (YL Miho (Joe's XYL, also WS2M): SSB and RTTY
JQ2GYU (Yutaka, also WS2Y): CW and SSB, focusing on "Outside JA"
JE1KUC (Takky, also N1KU): SSB
JF7ELG (Kowata, also WA2O): SSB, focusing on JA
JL1RXW (Hiro, also KH0XG): SSB
JA1RPK (Yuki, also AD7KA): CW and SSB

The QSL routes for the stations at the site are as follows:
NH0J via JJ2VLY, NH0Z via JJ2VLY and AH0J via JA1NVF

PACIFIC TOUR. Operators Bob/W7YAQ and Bill/N7OU will return to the South Pacific again and be active between February 2-21st. Their schedule is as follows:
February 2-7th - Their callsign will be 3D2NB (W7YAQ) and 3D2OU (N7OU) from Nadi, Viti Levu Island (OC-016, WLOTA 0055), Fiji
February 8-21st - Their callsign will be 3D2RX (W7YAQ) and 3D2RO (N7OU) from Rotuma (OC-060)
Activity will be 160-10 meters, mainly CW but with some SSB and RTTY. At both QTHs their vertical antennas will be next to saltwater on a north-facing shore. During the ARRL CW DX Contest they will make a Multi-Single entry from Rotuma as 3D2RX. QSL via their home callsigns. They will be uploading their logs to LOTW as soon as they get back to the USA.

PY2, BRAZIL (Mobile Event). Look for PY2CDR/M to be on the air during the first Brazilian Bicycle/Mobile DXpedition, "long distance, low power HF," according to the coordinator Billy Dorsch, PY2LCD. The ride starts on Monday, January 28th, in Sao Sabastiao, Sao Paulo State. The trip ends on Sunday, February 3rd, in Rio De Janeiro at the Copacabana Palace Hotel. The route goes right along the coast as the map on their Web site indicates. PY2CDR/M plans to be on 40, 15 and 10 meters SSB and on the Digital modes during the 490 kilometer (304 bikes) bike ride.
Suggested frequencies are:
SSB - 7083, 21225 and 28430 kHz
PSK31 - To be determine (Digital modes will only take place when camped)
There may be live position shown on their Web site at:
http://grupocdr.com.br/dxp_en.htm
There is also a Facebook page to follow the ride along with photos which will be updated along the adventure. Visit the following at:
https://www.facebook.com/%2Fgroups%2F314408675344553%2F
All QSOs will be confirmed with a QSL via the Bureau. Please listen for PY2CDR/M and make a QSO. Please also SPOT the bike expedition on the DX Cluster.

IRCs (U.S.) DISCONTINUED! According to the "IMM Revision: Changes to Pricing and Mailing Standards for International Mailing Services" - Under "Changes to International Extra Services": "International Reply Coupons: The Postal Regulatory Commission (PRC), in its PRC Order No. 1541, approved the Postal Service's proposal to discontinue outbound international reply coupons effective January 27, 2013; however, the Postal Service will continue to exchange (redeem) international reply coupons purchased in foreign countries and presented at U.S. Post Office® facilities." Also, check under "381.1 International Reply Coupons (Description). For more, see: http://about.usps.com/postal-bulletin/2012/pb22352/html/updt_005.htm

NEW QSL ROUTE (TF4M and TF4X). Phil, G3SWH, has been appointed as QSL Manager for Thor's, TF4M, operations from September 2004 to the present. Thor has recently joined RSGB which means that cards for TF4M and TF4X can now be sent and received via the RSGB Bureau. There are log searches for both callsigns at: http://www.g3swh.org.uk/tf4m.html http://www.g3swh.org.uk/tf4x.html

QSL OH8X via OH2UA. Radio Arcala featured an international team during the CQWW 160m Contest this past weekend. Operators were Olof/G0CKD, Michael/G7VJR, Olli/OH0XX, Toni/OH2UA and Veijo/OH6KN, while Juha/OH8NC and Martti/OH2BH were bang the drums.

QSL N3A (Special Event Station) via LoTW, eQSL and direct to NW3DC (W3DQ). Check the NW3DC/N3A web page for more details. Activity was to celebrate the President's second inauguration.

QSL RECEIVED VIA LoTW: 3D2C, 3D2VB, 3V8BB, 4O3A, 6W7SK, C6ANM, CM5FZ, CT1JOP, CT3DZ, CT8/EA5KA, E77DX, EA1DR, EA1PO, EA3BOX, F8ARK, FM/KL7WA, FM/RC0F, FO/AD4LN, FS/K9EL, HF8N, HI3TEJ, HP1/IZ6BRN, J68UN, J8/W6HGF, KH7T, KL7RA, NH8S, OH6OS, OZ1ADL, P40L, PA1CC, PD7BZ, PJ4X, PJ5J, RA3DNC, RA3UT, RI1FJ, S57IIO, SA5K, SM5F, SN3R, SQ2IHP, TI2HAS, US2FX, UY0ZG, V44KAI, VE5KS, VP8KF, VQ9LA, WP2XX, YJ0VB, YU6AO, ZK1/AC4LN and ZK2VB

QSLS RECEIVED VIA MAIL: 1A0C, 2O12L, 2O12W, 3D2C, 4S7NE, 5N7M, 5W0RK, 7P8D, 9Y4/DL7VOG, EA9UG, EK7DX, HB0/HB9LCW, HI3/KL7JR, JD1BLY, NH8S, OJ0R, PJ5J, PJ7XK, TI4CF, VE2OCH, VP2MDG, VR2XMT, VP9/WW3S, W4TTO, XQ1KZ, Z21HS, Z81D, ZD7VC and ZL2IFB

QSLS RECEIVED VIA THE BUREAU: 4U1WRC, 5B/HB9AII, 5B/HB9DGV, 6Y5/K1XM, 6Y9X, 9M6LSC, CO7WT, CR2V, CS2W, CT8/CT3FN, CU2CE, CU8/CT3FN, D2QV, DH1BBO, EL2DX, EM20LTD, EN2012UEFA, EO2012WZA, ES2012ABCS, FM1FV, FP/W8TOM, HB100FLP, HB0WR, HK3Q, JY4NE, KL8DX, OD5TE, P40L, P4/W1HEO,

PJ2/K2PLF, PJ2/W5ZPA, PJ4/K4BAI, PJ4/AD8J, PJ5/K1XM, TF2LC, TF3IRA, TF3RF, TF4M, TF8GX, TF8SM, TI5/K4VAC, UT1FG/MM, V25OP, V25WY, V5/DJ2HD, V73QQ, V8AQM, VE3XL, VP2MLP, VP2MVX, VP5/NF9V, VP5/W9RN, VP9/AA1AC, YB0JS, YI9PSE, YN2AA, ZF1A, ZF2GG, ZL1BYZ, ZL7AA and ZS6C

TZ, MALI. Fernando, EA4BB (ex-Z21BB), is now active as TZ6BB from Bamako. The length of his stay is not known. Most of his activity has been on 40/20/15/12/10 meters CW. QSL via W3HNK.

XT, BURKINA FASO (Update/Dates). Members of the "Italian DXpedition Team" will be active as XT1T from Ouagadougou (Grid Loc. IK92fi), Burkina Faso, between February 21st and March 6th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1826.5, 3515, 7015, 10115, 14025, 18070, 21025, 24891 and 28025 kHz
SSB - 3760, 7145, 14220, 18145, 21295, 24945 and 28475 kHz
RTTY - 14081 kHz
6m - 50105/CW and 50125/SSB
Equipment will be 4x Elecraft K3 transceivers with 3x KPA500 amps and 1x ACOM 1000 amp into 2x Spiderbeams, 1x Yagi (20/17/15/12/10m), 1x vertical (80/40m), 1x vertical (30m), longwire (160m), 1x Cubical Quad (6m), 1x Diamond Loop RX (low bands) and 1x DHDL RX (low bands) antennas. Operators mentioned are Alfeo/I1HJT, Silvano/I2YSB, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/IK2HKT, Gino/IK2RZP and Mac/JA3USA. The pilot station is IK7JWY, and the pilot station for the 6m band is IK0FTA. Software Management (real-time log online) will be by IH9GPI. QSL I2YSB for direct QSLs and IK2CIO for Bureau QSLs (no E-mail request please). A OQRS will be available for direct cards only. Now available on their Web page is a survey for both bands and modes needs. The official Web site is: http://www.i2ysb.com/idt
Official forum is: http://www.hamradioweb.org

Z8, SOUTH SUDAN. Massimo, IZ0EGB (ex-9L1MS, EL2GB), is now living in the South Sudan and hopes to be on the air as Z81B soon. QSL via IZ0EGB.

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM during the CQ 160 Meter SSB Contest (February 22-24th) as a Single-Op/High-Power entry. QSL via K6AM, direct or by the Bureau or LoTW.

ZD8, ASCENSION ISLAND. As of January 24th, Steve, G3ZVW, is once again active as ZD8N from Georgetown until February 5th. Activity will be on 80-10 meters using CW, SSB and the Digital modes. QSL via his home callsign, by the Bureau or direct.

ZK3, TOKELAU. Dieter "Dick", DJ2EH (ex-ZD9T), is now active as ZK3T until February 20th. The DX.World.net" reports that "recent info received from the ZK3N team now confirms that ZK3T is indeed Dieter, DJ2EH", so the info on ZK3T on QRZ.com is old. Activity has been on 30/17/15 meters CW, but he is expected to focus on the low bands later. QSL via DJ2EH.

ZL, NEW ZEALAND. Members of the Quake Contesters Group will be active as ZL3X during the CQWW WPX SSB Contest (March 30-31st) as a Multi-2/High-Power entry. QSL via ZL3PAH or LoTW. Operators mentioned are Mark/

ZL3AB, Don/ZL3DMC, Byron/ZL3DXT, Geoff/ZL3GA, Chris/ZL3LF and Phil/ZL3PAH.

EI13CLAN

Any member wishing go on air with EI13CLAN should contact Dave EI6AL at dave.ei6al /at/ gmail.com or by phone on 0861000000.

DX News

K8AQM will be in the Cayman Islands until 2 February. Look for him using the callsign ZF2TA on 20-10m CW and SSB. QSL to his home call. Logs will also be uploaded to Logbook of the World.

Sam K0YAK will operate as ST2SF from the Sudan until mid-April. He hopes to be on 40-10m. QSL to his home call.

The well-known 'Buddies in the Caribbean' group are off to Barbados for their next trip. Listen for the 8P9 prefix during the period 29 January to 6 February. There will be at least eight separate callsigns in use. As usual they will have their trademark Buddipole antennas.

Prefix hunters will be interested to hear of TC16BURSA which is active until 10 March. This station is located in Bursa, Turkey and operated by members of local branch of the Turkish Radio Amateur Club.

Sean Carvin EII2CR writes to us stating he will be visiting Saipan, Northern Mariana Islands from 01 Feb until 04 Feb 2013. He will operate "Holiday Style" 40M - 10M using callsign KH0/EI2CR.

Lough Erne Rally

The thirty second Lough Erne Rally is only nine weeks away - on Sunday 24th March. More details to follow.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ham Radio Operators Prep for Potential Winter Disaster:

Posted: 27 Jan 2013 01:48 AM PST
http://www.eham.net/articles/29675

WARSAW, Ind. -- Communication; it's a must in any city or town. But when it comes to radio, some are more passionate than others. "I've got several hobbies, but this one allows me to make friends in a wider array than what I can do anywhere else," Gary McDaniel, President of the Hoosier Lakes Radio Club, said. His group is dedicated to talking over the airwaves, but often, it's more than just a hobby. They provide real-time information on everything from traffic to weather. "Rain gauges, how much rain we're getting in certain areas, the size of hail, the amount of snowfall," McDaniel Said. "A lot of different things the National Weather Service only gets from people like us that are out in the field." "They type of thing that we need for disaster when all other forms of communication fail," Ed Rock, Kosciusko County Emergency Management Director, said. And when the communication does fail, he depends on people like Gary to turn on their radios and relay potentially life-saving info. "When everything goes bad, you still have to resort to the basics," Rock said. "That's what these guys are great at."

http://news.google.com/news/url?sa=t&fd=R&usg=AFQjCNGf4l0OdxYOXegDbQYnynuB2F2dsA&url=http://www.southgatearc.org/news/january2013/re-application_for_an_amateur_radio_licence.htm

Re-application for an Amateur Radio Licence
Southgate Amateur Radio Club
South Africas regulator ICASA recently published a Government Gazette with the requirements that every Radio Amateur must re-apply for his or her license by 25 January 2013. The South African Radio League (SARL) prepared

a simplified form which has ...

GB2RS NEWS

Sunday 27th January 2013

The news headlines:

G100RSGB moves to Scotland and becomes GM100RSGB

New Centenary live feed available

More operations approved for DXCC

The special event callsign celebrating the RSGB Centenary ends its stay in Region 3 this week and moves on to Region 2, Scotland North and the Northern Isles. Today, 27 January, and tomorrow, Warring ARC close the Region 3 operations, then on Tuesday, 29 January, the callsign becomes GM100RSGB as it moves to Invergordon with the GMDX Group. Operation moves to Dalgety Bay from 30 January to 1 February, again with the GMDX Group. Finally for this week, On 2 and 3 February Dundee ARC take over the callsign from Monikie [pronounced Moneekee] in Angus.

For those who haven't tried it yet, there is a comprehensive `Am I in the log?' feature at www.rsgb.org/centenary/ that shows on which Regions and Bands you have contacted the Centenary station. Details of how to get your QSL card are also on the website. This past week another feature has been added. This is a UK and Overseas `leader board', which lists in rank order of Regions and Bands the top 100 stations that have contacted the Centenary stations. A further operating aid is the addition of an `alert' messaging system. This is to allow Centenary station operators to provide some real-time forewarning of their operating plans, see www.rsgb.org/centenary/alertsandspots. As of 22 January, just short of 9,000 QSO were in the log, covering 160m to 70cm, excluding 60m and 4m, with contacts in 89 DXCC entities on SSB, 51 on CW and 26 on data.

ARRL Awards Branch Manager Bill Moore, NC1L, reports that the 2010 to 2011 XWPA and the current XW4XR operations from Laos have been approved for DXCC credit. Cards for those operations can now be submitted and will be counted toward your DXCC standing. The callsign XWPA with no number designator is correct.

IARU Region 1 reports that a Publicly Available Specification on the limitation of the emissions of plasma TVs between 150kHz and 30MHz was voted and agreed at the last CISPR meeting. It has now been published and is available from the IARU Region 1 website, www.iaru-r1.org. This is the result of work started in 2007 by the IARU Region 1 EMC Working

Group. Even though a PAS does not have the same legal implications as a regular EMC standard, it shows the plasma industry now what could be part of a standard in the future.

And now for the details of rallies and events for the coming week

With another weekend of snow and ice forecast for much of the country and major disruption on both road and rail networks, please check that the rally or event is still taking place before you travel any distance.

Horncastle Winter Rally will take place today, 27 January, at the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10.30am and half an hour earlier for disabled visitors, admission is ?1.50. There is plenty of free car parking and good catering facilities, and there will be plenty of traders. For more information contact Tony, G3ZPU on 01507 527 835.

Next weekend, on 3 February, the 28th Canvey Radio & Electronics Rally will take place at 'The Paddocks', Long Road, Canvey Island, Essex SS8 0JA. The venue is at the southern end of the A130. Doors open at 10.30am. For more information, contact Vic Rogers, G6BHE, on 01702 308 562.

Also on 3 February, the Radio-Active Rally will be held at the Civic Hall, Nantwich, Cheshire CW5 5DG. Organised by the Mid Cheshire Amateur Radio Society, doors open at 10.30am. There will be trade stands and a Bring & Buy. More details from Simon, G8ATB, on 01270 841 506.

Now for the news of special events

Some SOS Radio Week stations will still be active today, 27 January, with a final day of operations. Check out the SOS Radio Week website for more details.

On Saturday 2nd and Sunday 3rd February, Dundee Amateur Radio Club is operating GM100RSGB portable at Monikie[pronounced Moneekee] Scout Hut. The club plan to have both VHF and HF stations active using SSB and FM with voice and CW as appropriate.

And now the DX news compiled from 425 DX News and other sources

The Indian Ocean DXCC entity of Reunion Island will be visited by two French amateurs who will operate as FR/F8APV and FR/F8EOI until 8 February. They will focus mainly on 30m CW and 20m SSB. QSLs go via their home callsigns. The IOTA reference is AF-016.

Bernie, W3UR and Tony, N3ME, will be on the Caribbean island of Dominica, IOTA NA-101, using the callsigns J77A and J76A respectively. J77A will be active until 1 February and J76A until 11 February.

Nick, RW6ACM will be active as RI1ANP from the Russian Antarctic station Progress from 1 February until the end of year. QSL via RN1ON, direct or via the bureau.

Roberto, I2JIN will be active again as YS3CW from Corinth, El Salvador until 31 January. He will operate mainly CW on the 10 to 80m bands. QSL via I2JIN, direct or via the bureau and Logbook of the World.

Sam, F6AML, is visiting Zanzibar until 28 February. He will sign 5H1Z using SSB and CW on the 10 to 40m bands working with his FT-857D and verticals during his spare time. He will also try to activate the IOTA groups AF-054, AF-063 and AF-075. QSL via F6AML via the bureau or direct, no eQSLs please.

Theodore, K8AQM, will be on the air as ZF2TA from the Caymans, NA-016, working in CW and SSB on the 10 to 20m bands until 2 February. QSL via K8AQM either via the bureau, direct or Logbook of The World.

Now the contest news

The CQ WW 160m DX Contest finishes at 10pm tonight, the 27th. Work the contiguous 48 States plus Canada only, giving a signal report and CQ Zone, which is 14 for the UK. USA stations will send a signal report and their 2-letter State code, while Canadian stations will send a signal report and their 3-letter Province code. This is the CW leg of the contest. The SSB leg takes place next month.

The BARTG RTTY Sprint finishes at 1200UTC today, the 27th. Using the bands between 3.5 and 28MHz, the contest exchange is serial number only. Full rules can be found on the BARTG website www.bartg.org.uk.

On 29 January the 70MHz UK Activity Contest takes place from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The first VHF event of the month is the final Super League event of the 2012/2013 season, the 432MHz AFS. It takes place on 3 February between 1000 and 1300UTC. The nature of 70cm means that a good takeoff makes a huge difference to your QSO potential. If you're not blessed with a good site and/or the owner of multiple long Yagis, the best way of moving yourself up the results table is to head off to a hilltop and operate portable. The exchange is signal report, serial number and locator.

The European Phase Shift Keying Club's Worldwide DX Contest takes place next weekend on 2 and 3 February from 1200 to 1200UTC. Activity is on PSK63 only. There are no fewer than 22 categories that you can enter and certificates are on offer to the winner of each of them in each DXCC Entity. Even if you don't manage to come first in your country, there are certificates for the top three in each continent. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number.

And now the solar factual data for the period from Friday the 18th to Thursday the 24th of January, compiled by Martin Harrison, G3USF, on Friday the 25th of January.

Two large and magnetically complex groups rotated off the visible Sun, leading to markedly quieter conditions. At the start of the period a C5 flare was reported but subsequent days brought only a few small C-class

flares, then none from the 21st to the 24th. Solar flux levels declined from 123 on the 17th to 103 on the 24th. The average was 108 units, compared with 150 the previous week. The 90 day solar flux average on the 24th was 120 - three units down on last week. X-ray flux levels declined from an average of B5.9 units to B2.1. The geomagnetic field was quiet or no more than slightly unsettled every day except the 18th, when the Ap index was up to 9. Ap levels as low as 1 were reported on the 22nd, 23rd and 24th, and the average over the period was less than 5 units. Solar wind data from the ACE spacecraft showed a decline from 487 kilometres per second on the 19th to 285 kilometres per second on the 23rd. Particle densities reached 28 per cubic centimetre on the 18th but were mostly in single figures. Bz ranged between plus and minus five nanoTeslas on the quiet days - apart from the 19th, which varied between minus 21 and plus 17 nanoTeslas. Aided by the low level of geomagnetic activity MUFs reached or slightly exceeded predicted values on most days. Radio aurora was reported on the 18th but only from northern Scotland.

Finally, the forecast for the coming week. The quieter side of the Sun is expected to be looking our way. Solar activity is expected to be low or very low, with only occasional C class solar flares. There is only a small chance of large solar flares. Solar flux levels should decline further, possibly below 100. However, they may start rising by the end of the week. Geomagnetic activity could be up slightly today as a consequence of a filament eruption on the 23rd but, otherwise, quiet levels are likely to prevail. MUFs during daylight hours at equal latitudes should continue to be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 33MHz. The optimum working frequency with a 90 per cent success rate is about 25MHz. The best time to try this path will be between 1200 and 1700UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Wythall Radio Club is holding its holding club net on 145.225MHz from 8pm today and next Sunday. On Monday there's a curry night at the Monsoon from 6.30pm. Tuesday sees a Morse class from 7.45pm, followed at 8.30pm by a talk on knots by Callum, M0MCX. The shack social is on Friday and, at 8am next

Sunday, the club trip departs for the MIDCARS Nantwich rally. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm and an HF net on 1.996MHz from 9pm. Friday sees a club net on GB3FR. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is having an open meeting and putting the shack on the air on Monday. There's a coffee morning on Tuesday from 11am until 1pm, while Thursday sees training classes with Dave Murphy, G8OWL. Shack and aerial work is on Friday. Contact Mick Cleary, G7RRP, on 07595 696 359.

Lincoln Short-Wave Club is having a talk at the BSA Club on Wednesday by 2E0YYY on Summits on the Air. Thursday sees the club net on 145.375MHz from 8pm. For more information contact Pam Rose, G4STO, on 01427 788 356.

Now we return to the traditional listing in date order. On Monday Gloucester Amateur Radio & Electronics Society is holding an informal meeting. Details from Anne, 2E1GKY, on 01242 699 595, daytime.

On Monday Stratford Upon Avon District Radio Society is having a hands-on computer logging tutorial. Contact G0CHO, on 01608 664 488.

On Monday Sutton Coldfield Amateur Radio Society is on the air, having a natter and general get together. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is holding a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday Worcester Radio Amateurs Association continues its Foundation course. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday Midland Amateur Radio Society is holding laptop computers and tablets training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Notts Amateur Radio Club is holding a members only forum. Contact Robin, G4NDM, on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society is having a video evening. Contact Mike, G3JKX, on 01952 299 677.

On Friday Bromsgrove & District Amateur Radio Club is having a Raspberry Pi evening. Contact Chris, M0BQE on 01905 776 869.

On Friday Coventry Amateur Radio Society is having a visit by the RSGB regional representative, Chris, G6KMQ. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND

South Manchester Radio and Computer Club is holding a technical forum on Monday and a review of special events on Thursday with Terry, G6CRF. Details from Ron, G3SVW, on 01619 693 999.

On Monday Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a talk by Peter, G3PHO on simple fault finding. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Stars Radio Club is holding a surplus bring and buy sale at St Peters Church Centre, York Avenue, Jarrow NE32 5LP. Refreshments will be available and doors open at 7pm. The sale starts at 7.45pm. Details from 2E0MTY on 07511 968 073.

On Tuesday Chester & District Radio Society is having a talk on DF by Gordon, G8MMM. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Otley Amateur Radio Society is on the air and continues its Intermediate training. Contact Paul, M0PKW, on 07768 996 370.

On Wednesday Denby Dale Radio Club is holding a Real Ale Night from 8pm at the Star Inn, Lockwood HD1 3PJ. Details from Richard, M0RBG, on 07976 220 126.

On Friday Tynemouth Amateur Radio Club is having a quiz night. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND

On Tuesday Mid Ulster Amateur Radio Club is having a shack night. Contact Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

Next Sunday Ballymena Amateur Radio Group is holding its winter Bring and Buy sale from 6.30pm onwards at the new Ahoghill Community Centre. Contact Hugh Kernohan, GI0JEV, on 02825 871 481.

NEWS FOR SCOTLAND

On Tuesday Dundee Amateur Radio Club is having a club night. Details from Paul, GM0BKC, on 07846 412 862.

On Tuesday Livingston & District Amateur Radio Society is holding Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

On Thursday Aberdeen Amateur Radio Society is holding Morse practice and is on the air. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

Next weekend, 2 and 3 February, Dundee Amateur Radio Club is portable at Monikie Scout Hut, operating the RSGB Centenary special event station GM100RSGB. Details from PaulL, GM0BKC, on 07846 412 862.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with clubs that have several events this week. Farnborough & District Radio Society has an 80m slow CW net on Monday from 1pm, then a Top Band net with G2DX on 1.995MHz at 8pm. Friday sees the 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Brede Steam Amateur Radio Society is at the shack on Tuesday and next Saturday. For more information contact Steve, on 01424 720 815.

Chelmsford Amateur Radio Society has its 80m net on 3750-3760kHz from 8.30pm on Tuesday. Next Sunday the club is at the Canvey Rally. Contact Martyn, G1EFL, on 01245 469 008.

Thames Amateur Radio Group is holding a show and tell open night on Friday. Next Sunday it's the club net on GB3DA from 8pm. Details from Pete Sipple, M0PSX, on 07940 579 116.

Worthing & District Amateur Radio Club is putting GX3WOR on the air on Wednesday. Next Sunday it's the monthly breakfast meeting at the Goring Caf&#65533; at 9am. Contact John, G8FMJ, on 01273 593 232.

Now we return to the traditional listing in date order. On Friday Crystal Palace Radio and Electronics Club is holding its AGM and Construction Contest. Contact Bob, G3OOU, on 01737 552 170.

On Tuesday Harwell Amateur Radio Society is having a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Thursday Bittern DX Group Club is meeting at Pinewood Park Leisure Club. Contact Linda, G0AJJ, on 01692 218 562.

Next Sunday South Essex Amateur Radio Society is at the Canvey Radio & Electronics Rally. Contact Dave, G4UVJ, on 01268 697 978.

NEWS FOR THE SOUTH WEST

We start with clubs that have several events this week. On Monday Exeter Amateur Radio Society is having a talk on maritime radio by John, G4AP at 7pm in the Moose Centre, plus holding its HF net on 3.675MHz from 7.45pm. The Tuesday 2m net is on 145.575MHz at 7.45pm and on Thursday it's the 4m net on 70.425MHz from 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

Thornbury & South Gloucestershire Amateur Radio Club is on the air on Wednesday, and has a 2m club net on Friday at 8pm. Contact Tony, G0WMB, on 01454 417 048.

Now we return to the traditional listing in date order. On Monday Bristol RSGB Group is holding its AGM. Details from Robin, G3TKF, on 01225 420 442.

On Tuesday Riviera Amateur Radio Club has its 2m net on 145.425MHz from 8pm. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Thursday South Bristol Amateur Radio Club is holding an open house and on the air night. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club is on the air. Contact George Davis, G3ICO, on 01935 425 669.

On Friday Poole Radio Society is having an activity night. More info from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is having a natter night and the TARS 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday Llanelli Amateur Radio Society is holding a junk sale and raffle. Details from Craig, MW0MXT, on 01269 845 773.

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
21 - 27 January 2013

Solar activity has been at very low levels for the past week. At the beginning of the summary period, Region 1654 (N08, L=151 Class/Area Fki/1100 on 11 Jan) rotated off the west limb without producing any major activity. Region 1660 (N13, L=065 Class/area Dao/220 on 25 Jan) was the only other region of magnetic complexity on the visible disk. However, very little activity was attributed to Region 1660. The remaining regions on the disk remained stable and quiet. A couple of non-Earth directed CMEs were observed during the period. On 23 January, a large filament eruption was observed off the northeast quadrant of the visible disk. LASCO C2/C3 and STEREO A/B COR2 imagery supported an associated CME with this event. SWPC forecaster analysis and WSA-Enlil models runs indicated this event was Earth directed, however very little affects would be observed upon arrival.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was normal to moderate levels during the summary period.

Geomagnetic field activity was at mostly quiet levels from 21 -25 January. On 26 January, solar wind measurements from the ACE spacecraft indicated the arrival of a coronal hole high speed stream (CH HSS), preceded by a co-rotating interaction region (CIR). The ACE measurements showed and small increase in solar wind density, followed by an increase in solar wind speed, accompanied by an enhancement in the total interplanetary magnetic field. In response to these changes, quiet to active levels were observed. As effects from the CH HSS waned, a return to quiet levels was observed on 27 January. An instrument on the ACE spacecraft called the EPAM, used to monitor energetic protons and electrons in the solar wind, indicated the possible arrival of the 23 January CME late on 26 January. Due to the arrival of the CH HSS, it was hard to discern

which effects can be attributed to the CH HSS and which can be attributed to the CME.

Forecast of Solar and Geomagnetic Activity
28 January - 23 February 2013

Solar activity is expected to be very low levels with the possibility of C-class events for the entire forecast period. Even though several of the returning regions show magnetic complexity, very little data has indicated increases in activity while these regions rotate around the far side of the disk.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be normal to high levels on 28-30 January and 11-12 February in response to CH HSS effects. Normal to moderate levels are expected for the remainder of the period.

Geomagnetic field activity is expected to be at mostly quiet levels for the entire forecast period, except for 09-10 February and 22-23 February. Quiet to active levels are expected on these days in response to CH HSS effects.

TRIATHLON DX Contest 2013

Posted: 27 Jan 2013 12:31 PM PST
http://forums.qrz.com/showthread.php?377486-TRIATHLON-DX-Contest-2013&goto=newpost

GET READY FOR the next contest

ON 02 FEB 2013

http://www.triathlon-dx-contest.gr

A triathlon is a multi sportevent involving the completion of three
continuous and sequential endurance events. The word "triathlon" is of
Greek origin from or trei (three) and or athlos (contest). While many
variations of the sport exist, triathlon, in its ham form, involves the
three most popular modes RTTY, SSB and CW. Triathletes compete for the
biggest score in its Radio Amateur variation. Amateurs around the world
will try to be the Ironham (the winner in original Triathlon called
Ironman) and contact other amateurs in as many countries as possible and
as many Greeks amateurs as possible...

Join the game for your next vacation....!!!

Keuka Lake Amateur Radio Association Key Communication Tool:

Posted: 28 Jan 2013 04:20 AM PST
http://www.eham.net/articles/29677

Radio association always on the ready in Steuben County: Bath, N.Y. -- They play an important behind the scenes role at many popular local events. They jump into action when natural disasters threaten the region. They help train the next generation of local ham radio operators. They are the Keuka Lake Amateur Radio Association (KLARA). The association, with a membership about three dozen strong, handles communication during annual hospital disaster drills, coordinating between the medical facility and Steuben County Emergency Services. According to association member Jack Kinney, KLARA was on alert last October for Hurricane Sandy and was ready to go into action if a local response would have been necessary. Additionally, Kinney noted, KLARA handles communication every year for the Keuka Lake Boat Regatta and the Wineglass Marathon. "Many people in our area don't know what we do," Kinney acknowledged. An important upcoming event for the group is the Amateur Radio Technician License exam preparation and test session Feb. 9 in the Steuben County Civil Defense Center, Route 54, Bath. Radio Technician is the entry level license for Ham Radio operators. The next two license steps are General Class and Amateur Extra Class.

BCQP 2013 update

Hi everyone,

BCQP 2013 is now just around the corner! 1600z Feb 2 to 0400z Feb 3.

I have great news about the Plaque Program. I am very pleased to
announce that we are going into BCQP 2013 with five plaque sponsors:
Top Score BC, Top Score Canada outside BC, Top YL Score, Top Score US,
and Most Federal Electoral Districts Worked

We'll still have lovely photo-based certificates for top scores in all
entry classes for BC and out-of-BC stations.

For rules and tools and background info, check these pages:

Rules: http://orcadxcc.org/bcqp_rules.html

Multipliers: http://orcadxcc.org/bcqp_districts.html

Helpful hints: http://orcadxcc.org/content/pdf/bcqp_hints.pdf

One-page summary of same-day events and required exchanges:
http://orcadxcc.org/content/pdf/weekend_sked_2013.pdf

If you or anyone you know has any questions about BCQP 2013, email me
at bcqp@orcadxcc.org. I will do my best to answer or find someone else
who can if I cannot.

I'll be running the sponsor call VA7ODX on phone. Hope to hear you. We
will have a(nother) whale of a good time!

Ontario Science Centre Demonstrates Ham Radio Digitially Remastered

Posted: 28 Jan 2013 05:36 PM PST
http://forums.qrz.com/showthread.php?377652-Ontario-Science-Centre-Demonstrates-Ham-Radio-Digitially-Remastered&goto=newpost

http://www.va3xpr.net/ontario-scienc...ly-remastered/

It☐s the same ham radio your grandfather used to use, but now digitally remastered and on display at the Ontario Science Centre!

On January 27th, the Ontario Science Centre Amateur Radio Station, which operates under the call sign VE3OSC, made it☐s first contact using Digital Mobile Radio, commonly known as DMR. Jean Moffett, VE3WAD, who is a long time volunteer operator at the VE3OSC station, made the station☐s first DMR contact with Bill Barber, NE1B, of Hudson, NH, using her newly acquired DMR radio and the VA3XPR digital DMR repeater. ☐I just love this new mode of ham radio communications☐ exclaimed Jean about using DMR. ☐It☐s so much fun talking to people all over the world and they sound so crystal clear using DMR☐ she added. Jean, who enjoys demonstrating the capabilities of amateur radio to youth visitors to the station, will now be able to provide demonstrations using DMR, exemplifying the evolution of amateur radio from its early beginnings.

DMR, which is a published standard for digital voice communications utilizing TDMA technology, enables amateur radio operators to communicate with one another, both locally and around the world, using the Motorola Amateur Radio Club☐s (MARC) World Wide network, commonly known as the DMR-MARC network. Access to DMR was launched in downtown Toronto in December 2012 using the VA3XPR digital DMR repeater and has been met with a great deal of interest an enthusiasm from the local amateur radio community.

For more information about digital voice communications using DMR or the VA3XPR digital DMR repeater, please check out the VA3XPR website.

CARIBBEAN/ATLANTIC TOUR (Press Release From OH2BH). Martti, OH2BH, sent out the following [edited]: "Press Release - January 30, 2013, Montego Bay, Jamaica --- M/S KRISTINA KATARINA

NORTHERN FOLKS AT IT AGAIN FROM THE CARIBBEAN TO THE ATLANTIC, OJ0H/MM

With the severe winter in Northern Europe, OHs are heading South as is their lifestyle of four deep seasons. Cruising in as many as nine countries in the Caribbean, they will end up meeting hams in many of their stopovers such as 6Y, P4, PJ4, YV7, J49, FM, V2 and HI.
They will be active on board their 450ft cruise ship m/s Kristina Katarina. Typically you will find them on 14.267 kHz. They will also be on CW at sea.
http://www.kristinacruises.com/en/cruises/ms-kristina-katarina

OJ0H/MM CREW: Hilkka/OH1DV (YL), Markku/OH1MV, Pekka/OH1TV, Rami/ OH2BCI, Leena/OH2BE (YL), Martti/OH2BH, Osmo/OH2KH, Heikki/OH4NS, Seppo/OH6TJ and Osmo/OH8KN.

CRUISING SCHEDULE:
January 31st - (THU) Montego Bay, Jamaica
February 1st - (FRI) at sea
February 2nd - (SAT) Oranjestad, Aruba and P43A & P49V
February 3rd - (SUN) Kralendijk, Bonaire and PJ4LS
February 4th - (MON) El Guamache, Isla Margarita, Venezuela
February 5th - (TUE) St. George's, Grenada and J39AH
February 6th - (WED) Fort-de-France, Martinique
February 7th - (THU) St. John's, Antigua, on the ruins of V26B
February 8th - (FRI) at sea
February 9th - (SAT) Santo Domingo, Dominican Republic

Following the Caribbean stint, the party will continue to Azores Islands with an additional Finnish and Estonian assemblage titled "The Atlantic and I" with participation in the ARRL CW and SSB Contests from their Atlantic outpost at CR2X and CQ8X.
QSL OJ0H/MM and CR2X & CQ8X via OH2BH."

CQ NEWS (International News Column to Debut in April). Richard, W2VU, Editor of CQ Amateur Radio, sent out the following [edited]:
"FOR IMMEDIATE RELEASE: January 29, 2013

CQ Adds International News Column, Names AA6TS International Editor

(Hicksville, NY January 29, 2013) CQ magazine will be adding a monthly international news column as of its April edition, magazine editor Rich Moseson, W2VU, announced today. It will be coordinated by new International Editor Tom Smerk, AA6TS.
'A growing number of our readers and our fans on social media are from outside the United States,' noted Moseson, 'particularly with the addition of our digital edition, which eliminates the high cost of international postage.'
'We'll be calling the column 'CQ World Wide,' ' Moseson continued, and our goals will be to both better serve our international audience and to bring more news of ham radio activities around the world to our prime reader base in the U.S.'
Smerk lives in Dulzura, California and has been active in ham radio off-and-on since 1988. For the past 25 years, he has taught business information technology for the San Diego Community College District. He is also a professional musician and formerly taught music as well. Tom enjoys 2-meter communications to keep in touch with friends during his commute to and from work; and after work, he can usually be found on the HF bands enjoying both voice and digital communications. Tom has written on various topics including business management, music and ham radio. He is active in ARES, SKYWARN, RACES, California Disaster Corps and CERT, and is a volunteer examiner as well. A committed lifelong learner, Tom's greatest joy is helping new hams enjoy the hobby.
Hams with news of events and activities outside the United States are urged to contact Tom at <aa6ts@cq-amateur-radio.com>."

D4, CAPE VERDE (Correction/Update). Mats, SM7GIB, will be active as D44TIB from Cape Verde (AF-086) until February 7th (not between February 25th and March 8th). Activity will be holiday style using a K3 into a wire vertical for 160-10 meters. Look for him to be on the radio in the early mornings and evenings - on CW. QSL via his home callsign.

TRIATHLON THIS WEEKEND (Also See OPDX.1095). Just a reminder that the "1st Triathlon DX Contest" will be held this weekend. A triathlon is a multi sport event involving the completion of three continuous and sequential endurance events. The word "triathlon" is of Greek origin from t?e?? or trei (three) and a???? or athlos (contest). While many variations of the sport exist, triathlon, in its ham form, involves the three most popular modes RTTY, SSB and CW.
Triathletes compete for the biggest score in its Radio Amateur variation.

Amateurs around the world will try to be the Ironham (the winner in
original Triathlon called Ironman) and contact other amateurs in as
many countries as possible and as many Greeks amateurs as possible...

When All Else Fails, Amateur Radio Club Stays On Air:

Posted: 29 Jan 2013 04:05 AM PST
http://www.eham.net/articles/29684

In today's technological age, being prepared means a fully charged phone battery and a backup electronic device in case that fails. Members of a local amateur radio club, though, know relying on modern communication in times of need may not always be the best option. On April 27, 2011, those in the city of Tuscaloosa and the surrounding areas were in desperate need of communication when an EF-4 tornado ravaged the city, cutting off most forms of traditional communication. Joel Black, the president of the Tuscaloosa Amateur Radio Club, said his group's radio was one of the most reliable sources of communication immediately following the tornado. Black said they were able to utilize direct two-way communications between people in the field and their agencies. "In the days after the tornado, relief shelters were manned by radio operators," Black said. "Health and welfare traffic, in addition to requests for supplies, were passed via amateur radio."

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

January 30, 2013

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Winter Keyboard Fun - CQ WPX RTTY and XE Int'l RTTY
- School Club Roundup - Class Begins Feb 11
- Contest University Coming Up Down Under
- The Tweet Sound of Ham Radio
- Operating Split - Personality
- IARU HF Championship - Full Results Online
- Handy New Computer Gadgets
- Magnetic Storm Monitor
- Beyond the Machine

NEW HF OPERATORS - THINGS TO DO

The CQ WPX RTTY Contest is becoming very popular. If you are set up to
operate on the digital modes, why not give this contest a try?
Elsewhere, February is a big month for state (and province!) QSO
parties, featuring Vermont, Minnesota, British Columbia, Delaware,
Louisiana, and New Hampshire. (That's one-tenth of Worked All States
right there!)

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

It was observed that the new Ontario sections (GTA, ONE, ONN, ONS) were
omitted from the printable line scores released with the ARRL
Sweepstakes preliminary results. The database query to generate line
scores has been repaired and new line scores are available online
<http://www.arrl.org/contest-results-articles>.

==> CONTEST SUMMARY

Complete information for all contests follows the Conversation section

February 2-3
```

- NS Weekly Sprint--CW (Feb 1)
- EPC WW PSK Contest
- Vermont QSO Party
- Ten-Ten Winter Phone QSO Party--Phone
- Black Sea Cup International
- FYBO Winter QRP Field Day
- Minnesota QSO Party
- Straight Key Party,
- British Columbia QSO Party
- Delaware QSO Party
- XE Int'l RTTY Contest
- North American Sprint--CW
- OK1WC Memorial Contest (Feb 4)
- ARS Spartan Sprint--CW (Feb 5)

February 9-10

- YL-OM Contest (Feb 8)
- YLISSB QSO Party--CW
- CQ WW RTTY WPX
- Asia-Pacific Sprint--CW
- Dutch PACC Contest
- Louisiana QSO Party
- OMISS QSO Party--Phone
- New Hampshire QSO Party
- FISTS CW Winter Sprint
- RSGB - First 1.8 MHz Contest
- AM QSO Party
- Classic Exchange--Phone
- Milwaukee FM Simplex Contest--Phone
- Maine 2m FM Simplex Challenge--Phone
- School Club Roundup (Feb 11-15)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Ed VK2JI writes that, "The land of the Kangaroo and Koala are to stage their own Contest University in February. It will form part of the Wyong Field Day <http://www.fieldday.org.au/contest_university> weekend. (A field day in Australia is what is called a Hamfest in the US). Taking place on Saturday the 23rd of February, this "Mini Contest University" is aimed at beginners to contesting to help them get involved and is the first time there has been such an event held in Australia. It is hoped that many people will come for the weekend with the Sunday "Field Day" being the largest gathering of Amateur Radio enthusiasts in the southern hemisphere, which has taken place for decades on the Central Coast of New South Wales about 50 km north of the Sydney Harbour.

Marek SP7DQR has created SWL_DQR_Log <http://sp7dqr.waw.pl/eng/index_en.html>, a contest logging program specialized for use by SWLs in contesting. Since the program is very configurable, it can be used in at least 90% of the international contests having a SWL section. The latest version (1.2.0) includes dupe

checking, too. (Thanks, Igor UV5EOZ)

A pair of European kit websites have come to our attention. Paul G0ODP recommends that we "look at Tim Walford's site <http://www.users.globalnet.co.uk/%7Ewalfor/index.htm>...some excellent kits to suit all budgets and tastes. [The kits] are basic and don't have the component positions painted on the board nor the metalwork but have good documentation and leave scope for appropriate enhancements." Chris KF6VCI points us to the list of German kits at the QRP Project website <http://qrpproject.de/UK/GermanKits.html>. An interesting designer's note about those kits is that they are "designed for the European RF environment. That means [these] kits can handle the strange BC RF levels we have to fight with."

In 1901 Guglielmo Marconi transmitted the first ever transatlantic radio signals from Poldhu <http://m5e.org/poldhu/m5e.kmz> on the western coast of the Lizard peninsula in Cornwall in the far south-west of England. Thanks to the hospitality and cooperation of the Marconi Centre <http://marconi-centre-poldhu.org.uk/> and the Poldhu Amateur Radio Club <http://gb2gm.org/>, the M5E team of Olof G0CKV, Kazu JK3GAD, Seppo OH1VR, and Oliver W6NV will again activate the Marconi Centre for the ARRL DX CW contest from the site overlooking the English Channel.

CQ Nebraska - Jeff NE0DX reports that the Heartland DX Association will NOT be sponsoring the 2013 Nebraska QSO Party <http://www.hdxa.net/neqso/> in April. If your club is interested in taking up the challenge for just this year or permanently, please contact Jeff <ne.dxcc@tconl.com>. It is not necessary to hold the contest in April - that is when it was originally scheduled.

>From CQ Communications, we learn that renowned DXer, DXpeditioner and contester Wayne Mills, N7NG, of Jackson, Wyoming, has been named CQ <http://www.cq-amateur-radio.com/> magazine's DX Editor, beginning with the April 2013 issue. Mills - a 1999 inductee into the CQ DX Hall of Fame - succeeds Carl Smith, N4AA, who has stepped down after writing the magazine's DX column for 13 years.

Here's something to shoot for...Doug K1DG reports that while several W6s have won the CQ WW Phone Contest - WA6VEF was the most recent - no W6 has ever won the present-day CQ WW CW. W6QD is the only W6 to ever win the "World Wide DX Contest" on CW, a contest sponsored by CQ's predecessor, Radio, and is generally considered to be the primordial CQWW.

Web Site of the Week - If you struggle to explain why ham radio is still relevant in a world so highly interconnected, this Wired UK online article <http://www.wired.co.uk/news/archive/2011-02/03/why-ham-radio-endures?page=1> focuses on QSL cards to tell the story in a very compelling way. "You can tweet all you want, but..." Well done! (Thanks, Tim K3LR)

WORD TO THE WISE

Extreme - the next time you try to explain ham radio contesting, try calling it "Extreme Wireless". With all the "extreme" sports on the TV channels, the characterization of radiosport as an extraordinary form of something they already know about might make a connection with your audience.

==> SIGHTS AND SOUNDS

Tim N6WIN posted this video <http://www.n6win.com/index_files/contesting.htm> of Dan N6MJ operating CW as Single-Operator, Two Radio in the recent North American QSO Party. Oh, and browsing the Internet (non-ham materials, contesters!) with a smartphone at the same time. Oh, and running at a rate of well over 100 QSOs per hour. This is why Dan was on one of the USA's WRTC-2010 operator teams!

Have you ever wondered why Marconi used kites to hold up his antennas? The beginning of this short video <http://www.youtube.com/watch?v=kDt7I5zci0Q> by Dave KM3T from the recent WM1CC operation on Cape Cod should explain the decision.

Looney Tunes fans will enjoy this Donald Duck cartoon <http://www.youtube.com/watch?v=kPsyioVsau8> - what is happening at the 2:20 mark? It sounds vaguely familiar although the note is a little rough... (Thanks, Tad K7RA)

==> RESULTS AND RECORDS

The full extended results article for the IARU HF Championship by Carl K9LA is now online at the ARRL Contest Branch Results <http://www.arrl.org/contest-results-articles> website. Preliminary results for 2012 Phone Sweepstakes by Steve N2IC, including printable line scores, will be available shortly - just in time to show your weekend breakfast group! (Thanks, Sean KX9X)

CQ World Wide Contest Director, Randy K5ZD notes, "We are closing the CQWW SSB 2012 results this week and I noticed there are still some plaques <http://www.cqww.com/plaques.htm> available for sponsorship. If you are interested in sponsoring a plaque to cover the 2012 contest (or are looking ahead to 2013), please contact John K1AR <K1AR@AOL.COM> for details. Thanks to everyone who helps to sponsor a plaque for the CQWW contest."

The total number of logs received this year for the 2012 9A (Croatia) CW Contest <http://www.9acw.org/> was 1,073. Claimed scores are now available as well. If your call sign is listed in the wrong category, please send a note to the contest director <9a5k@9a5k.com>. (Thanks, Chris 9A5K)

BARTG has posted the new 2010-2011-2012 Experts list <http://bartg.co.uk/> which is used in all of the BARTG RTTY Contests. (BARTG contest results take participant experience into account when

determining category.) BARTG has also published the results for the last SPRINT75 and HF RTTY contests on their web site. (Thanks, Arthur G1XKZ)

OPERATING TIP

A common question among contesting newcomers is whether they must submit a log for the contact to count for the other station. No, you don't need to submit a log for credit to be given. Contacts are only considered "bad" if the log-checkers can definitively show that a call sign or exchange was miscopied. Yes, some bad contacts get through but the usual policy is to assume QSOs are good unless proven bad.

==> TECHNICAL TOPICS AND INFORMATION

Chad WE9V is re-computerizing his station and passes along these tips about a couple of useful tips for station builders:

- Using USB to VGA/DVI adapters <http://www.newegg.com/Product/Product.aspx?Item=N82E16815150241> can add up to 6 monitors per PC at a cost of less than $50 each.
- For newer computers with no PCI slots, PCI-Express to Serial boards <http://www.newegg.com/Product/Product.aspx?Item=N82E16815124058> are available at $20 or less.
- Combination PCI-Express boards with serial and parallel ports <http://tinyurl.com/b749spn> are available for $25-$35. Note that compatibility with software that manipulates individual bit or control lines is by no means certain.

One area of scientific measurement of interest to hams is ambient electromagnetic noise measurement. The recent article, "Revision of the Methodology for Processing Radio Noise Measurements in the Medium-Wave Band" by Landa, et al. in IEEE Antennas and Propagation Magazine for Dec 2012 covers noise measurement below 2 MHz for radio service planning, antennas, processing techniques. The article also lists many references on noise measurement that may be of interest in their own right.

Frank W3LPL notes that "Inexpensive RG-6 with a copper clad steel (CCS) center conductor is much more widely available than solid copper, especially with desirable options such as a tough polyethylene (PE) jacket and flooded construction. CCS looks like a reasonable choice except for very long cable runs on 160 and 80 meters. A copper clad center conductor may be a problem if a device (e.g. a preamp or relay) is remotely powered through the coaxial cable. When purchasing CCS RG-6, it's very important to immediately test its loss characteristics. It appears that some unscrupulous suppliers are selling factory rejected RG-6 or selling RG-6 from unreliable manufacturers. We should be careful to purchase from trusted suppliers, [for example] on ebay they will be suppliers with 100% positive feedback. It's easy to use an MFJ-259 [antenna analyzer] to quickly check cable loss, using its cable loss mode. [The test is] more accurate if you build or purchase a

simple 50:75 ohm broadband matching transformer."

Frank measured the dc resistance of the solid copper and copper clad steel center conductors of RG-6 coax. "I also measured the quad-shield DC resistance and both cables measured the same.

- Solid copper: 0.6 ohms per 100 feet
- Copper clad steel: 1.9 ohms per 100 feet
- Quad shield: 0.3 ohms per 100 feet

"It appears that copper clad steel RG-6 is a good choice for remote powered preamps and relays except for very long cable runs."

Frank goes on to remind us, "When using a remotely powered device it's extremely important to prevent even the slightest moisture entry. RG-6 compression connectors are NOT waterproofed at the threaded end of the connector, additional waterproofing is absolutely essential. The Thomas & Betts NS500 Nut Seal <http://www.newark.com/thomas-betts/ns500/nut-snap-n-seal-connectors/dp/18C2287> costs only a few cents and it very effectively waterproofs the connector threads. The inside of the connector should be stuffed with STUF Di-Electric Filler <http://www.universal-radio.com/catalog/antsup/1218.html> to prevent moisture accumulation from condensation. The finished connection should first be wrapped with electrical tape, then a final layer of waterproofing should be applied."

A recent Instructables project describes an 8-outlet relay box <http://www.instructables.com/id/Arduilay/%22> controlled by an Arduino microprocessor. This could form the basis of all sorts of customizable shack automation projects. Another Instructables project would be particularly good for family members - it shows how to use simple electrical testers <http://www.instructables.com/id/How-to-Use-Basic-Electrical-Testers/> around the home. Knowing how to use a voltmeter to check whether a circuit is live could save a life!

Here in the Midwest and other places, the dry winter months are the static months. While there are certainly commercial products to reduce static, Don AE5K reports, "I have always had very good luck with a mixture of Downy fabric softener and water [at about a] 1:10 ratio in a plastic spray bottle. A little goes a long way and it is cheap and smells nice."

Larry N6NC added a couple of selectable antenna connections to his MN-2700 tuner by removing the direct-wire terminals and the insulating plate on which they were mounted. The internal connections ran directly to the antenna select switch. An aluminum plate with SO-239 connectors replaced the insulating plate and by carefully locating the SO-239s, the internal wiring could be reused without modification. This also makes it easy to return the tuner to its original configuration for resale. All tuners are slightly different but the same general process

can be used to add selectable antennas on many tuners.

Technical Web Site of the Week - The direction and strength of the Earth's magnetic field is important data for determining ionospheric stability. You can build your own magnetometer <http://www.directivesystems.com/PDF/MAGTALK.PDF> and hook it up to a computer for about $100. As correspondent Dave K1WHS observes, "It sure is obvious when a magnetic storm occurs!" Dave uses one for predicting auroras and chasing DX contacts on 144 MHz.

==> CONVERSATION

Beyond the Machine

After the new FM-Only and 3-Band categories were added to the ARRL VHF Contests, I was interested in whether there was an observable difference in activity. A little research on the VHF Contesting reflector turned up results that fell squarely into one of two camps: (1) No and (2) Definitely.

If you operated away from cities, you probably didn't see any significant change in activity on or off the FM simplex channels. There just aren't enough hams out there in rural and other lightly populated areas for an FM station to work a lot of other people. In fact, there generally aren't that many active VHF+ contesters in those regions, either!

However, if you are in a more populated area, the results might have been different as Les N1LF reported. "I'm happy to report that efforts to increase contest activity using the new FM-Only category during the January ARRL VHF Contest was a resounding success here in Alabama. We had two ARES groups who deployed for several hours on Saturday. One group opened the Emergency Operations Center in Shelby County at the EMA. Another group went "hilltopping" at a local high school with an elevated location. They deployed a 25-foot mast and directional antennas (Arrow-type Yagis) to test their ability to operate simplex over great distances.

"One big surprise was the number of QSO's made on 440 MHz simplex. In past attempts at involving FM operators, we had enjoyed almost no success on 440 due to low power, poor locations, and ineffective antennas. This year we worked nearly as many on 440 as on 2 meters. 6 meter FM activity here was literally nonexistent. Anyone who had 6 meters seemed to be using a "DC to Daylight" rig and would simply switch to SSB to make the contact. There is very little 6 Meter FM repeater activity here, so it's not too surprising. With no E-skip during the contact we didn't make a single contact on 6 FM.

"The real treats were three contacts late on Sunday night (9 PM, one hour before the end of the contest) when I still heard operators hanging in there and calling CQ on 146.55 and 146.58. I also learned of a FM simplex long range net here in Alabama that operates on Sunday nights at 8PM. Previously, I had been unaware of it at all. I plan to

become active on that net, and try to encourage this cadre of well equipped operators to join the fun in June.

"Hopefully CQ Communications will follow suit and add an FM-Only category to their contest as well. It's a great way to draw in newcomers. But if only works if weak signal operators embrace the mode, monitor those frequencies to give out contacts, and do some outreach work in advance of the events. ARES groups are a great place to mine for newcomers."

Similar successes were reported in the Chicago-Milwaukee area (probably no coincidence that the W9RH club sponsors an FM Simplex contest in February - see the contest listings below) and in the Northeast. Not in the Los Angeles and San Francisco area as Tim NU6S reported little FM (and VHF+ activity), so there is a lot of work to do.

VHF+ contesting is always a regional event. Unless there are huge sporadic E openings on 6 meters, there are basically five or six "different" contests going on: Northeast, Southeast, Upper Midwest, West Gulf, Northwest, and Southwest. What "works" for one region probably doesn't get the same results in another due to topography and population and operating preferences. We all have to keep our thinking caps on and not miss a chance to encourage and entice new hams to go "beyond the machine"!

73, Ward N0AX

==> CONTESTS

30 January through 12 February 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American Sprint--CW, from Feb 3, 0000Z to Feb 3, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/sprintrules.php>

School Club Roundup--Phone,CW,Digital, from Feb 11, 1300Z to Feb 15, 2359Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T), Class, S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/school-club-roundup>

NS Weekly Sprint--CW, from Feb 1, 0200Z to Feb 1, 0300Z. Bands (MHz): 1.8-14. Frequencies (MHz): Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

EPC WW PSK Contest--Digital, from Feb 2, 0000Z to Feb 3, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: 30 days. Rules <http://www.epcwwdx.srars.org/index.php/contest-rules.html>

Vermont QSO Party--Phone,CW,Digital, from Feb 2, 0000Z to Feb 3, 2400Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and VT county or S/P/C. Logs due: 30 days. Rules <http://www.ranv.org/>

Ten-Ten Winter Phone QSO Party--Phone, from Feb 2, 0001Z to Feb 3, 2359Z. Bands (MHz): 28. Exchange: Call sign, name, QTH, 10-10 number. Logs due: Feb 20. Rules <http://www.ten-ten.org/>

Black Sea Cup International--Phone,CW, from Feb 2, 1200Z to Feb 3, 1159Z. Bands (MHz): 1.8-28. Exchange: RS(T) and HQ ID, member nr or ITU zone. Logs due: 30 days. Rules <http://www.bscc.ucoz.ru/>

FYBO Winter QRP Field Day--Phone,CW, from Feb 2, 1400Z to Feb 2, 2400Z. Bands (MHz): 1.8-28. Exchange: RS(T), S/P/C, name, power, temp in deg F. Logs due: 30 days. Rules <http://www.azscqrpions.com/>

Minnesota QSO Party--Phone,CW,Digital, from Feb 2, 1400Z to Feb 2, 2400Z. Bands (MHz): 1.8-28, 50+, Frequencies (MHz): CW 1.850, 3.550, 7.050, 14.050, 21.050, 28.050; SSB 1.870, 3.850, 7.250, 14.270, 21.350, 28.450. Exchange: Name and MN county or S/P/C. Logs due: Mar 15. Rules <http://www.w0aa.org/>

Straight Key Party--CW, from Feb 2, 1600Z to Feb 2, 1900Z. Bands (MHz): 3.5. Exchange: RST, serial, category, name, age. Logs due: Feb 28. Rules <http://www.agcw.de/eucw/eu160.html>

British Columbia QSO Party--Phone,CW,Digital, from Feb 2, 1600Z to Feb 3, 0400Z. Bands (MHz): 1.8-28. Frequencies (MHz): CW 1.815,3.535,7.035,14.035,21.035,28.305; SSB 1.845,3.85,7.23,14.25,21.3,28.4; Digital per band plan. Exchange: RST and BC district or S/P/Territory or DX. Logs due: Mar 31. Rules <http://orcadxcc.org/>

Delaware QSO Party--Phone,CW,Digital, from Feb 2, 1700Z to Feb 3, 2359Z. Bands (MHz): 1.8-28, 50+, Frequencies (MHz): CW 1.825, 3.55, 7.05, 14.05, 21.05, 28.05, 50.95; SSB 1.86, 3.96, 7.26, 14.26, 21.36, 28.36, 50.135; Digital per band plan. Exchange: RS(T) and DE county or S/P/C. Logs due: 30 days. Rules <http://www.fsarc.org/>

XE Int'l RTTY Contest--Digital, from Feb 2, 1800Z to Feb 3, 1759Z. Bands (MHz): 3.5-28. Exchange: RST and XE state or serial. Logs due: 30 days. Rules <http://www.fmre.org.mx/>

OK1WC Memorial Contest--Phone,CW, from Feb 4, 1600Z to Feb 4, 1659Z. First through fourth Monday of each month. Bands (MHz): 3.5, 50, 144 - see website. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

ARS Spartan Sprint--CW, from Feb 5, 0200Z to Feb 5, 0400Z. Monthly on the first Monday evening local time. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

YL-OM Contest--Phone,CW,Digital, from Feb 8, 1400Z to Feb 10, 0200Z. Bands (MHz): 1.8-28. Exchange: Call sign, RST, serial and S/P/C. Logs

due: 30 days. Rules <http://www.ylrl.org/>

YLISSB QSO Party--CW, from Feb 9, 0000Z to Feb 10, 2359Z. Bands (MHz): 1.8-28. Exchange: Call sign, RS(T), ISSB number. Logs due: Mar 22. Rules <http://www.ylsystem.org/>

CQ WW RTTY WPX--Digital, from Feb 9, 0000Z to Feb 10, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Feb 15. Rules <http://www.cqwpxrtty.com/>

Asia-Pacific Sprint--CW, from Feb 9, 1100Z to Feb 9, 1300Z. Bands (MHz): 7,14. Exchange: RST, serial. Logs due: 7 days. Rules <http://jsfc.org/apsprint/aprule.txt>

Dutch PACC Contest--Phone,CW, from Feb 9, 1200Z to Feb 10, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and Dutch province or serial. Logs due: Mar 10. Rules <http://www.dutchpacc.com/>

Louisiana QSO Party--Phone,CW,Digital, from Feb 9, 1500Z to Feb 10, 0300Z. Bands (MHz): 3.5-28. Frequencies (MHz): CW 1.84, 3.54, 7.04, 14.04, 21.04, 28.04; Phone 1.865, 3.865, 7.255, 14.255, 21.365, 28.465; VHF 50.095, 50.135, 144.05, 144.21. Exchange: Call sign, RS(T), LA parish or S/P/C. Logs due: Mar 15. Rules <http://laqso.w5yl.org/>

OMISS QSO Party--Phone, from Feb 9, 1500Z to Feb 10, 1500Z. Bands (MHz): 3.5-28. Exchange: RS, S/P/C and OMISS nr or "DX". Logs due: Mar 30. Rules <http://www.omiss.info/>

New Hampshire QSO Party--Phone,CW,Digital, from Feb 9, 1600Z to Feb 10, 0400Z. Bands (MHz): 1.8-28. Frequencies (MHz): CW - 1.815 and band edge + 45kHz; Phone - 1.875, 3.935, 3.950, 7.235, 14.280, 21.380, 28.390. Exchange: RS(T) and NH county or S/P or "DX". Logs due: Mar 31. Rules <http://www.w1wqm.org/>

FISTS CW Winter Sprint--CW, from Feb 9, 1700Z to Feb 9, 2100Z. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, first name, FISTS nr or power. Logs due: 30 days. Rules <http://www.fists.org/>

RSGB - First 1.8 MHz Contest--Phone,CW, from Feb 9, 2100Z to Feb 10, 0100Z. Bands (MHz): 1.8. Exchange: RST, serial, UK district. Logs due: 16 days. Rules <http://www.rsgbcc.org/>

AM QSO Party--Phone, from Feb 9, 2300Z to Feb 10, 2300Z. Bands (MHz): 1.8-14. Exchange: RS, name, and S/P/C. Logs due: 4 weeks. Rules <http://www.antiquewireless.org/>

Classic Exchange--Phone, from Feb 10, 1400Z to Feb 11, 0800Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): AM--1.890, 3.880, 7.160, 7.290, 14.286, 21.420, 29.000, 50.400, 144.300; SSB--1.885, 3.870, 7.280, 14.270, 21.370, 28.390, 50.125, 144.200. Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://www.classicexchange.org/>

VHF+ CONTESTS

Milwaukee FM Simplex Contest--Phone, from Feb 10, 1900Z to Feb 10, 2130Z. Bands (MHz): 50-440. Exchange: Call sign and grid square. Logs due: Mar 10. Rules <http://www.w9rh.org/>

Maine 2m FM Simplex Challenge--Phone, from Feb 10, 1900Z to Feb 10, 2300Z. Bands (MHz): 144, Frequencies (MHz): FM simplex frequencies only. Exchange: Call sign, power, city name. Logs due: 15 days. Rules <http://www.qsl.net/ws1sm/contest.html>

Boulder County's Airwaves Taken Up By Residents Operating Ham Radio:

Posted: 30 Jan 2013 03:20 AM PST
http://www.eham.net/articles/29688

LONGMONT, Colorado -- Sebastian Wessels sat in his "Ham Shack" -- basically a children's playhouse in his yard that he's converted to the base for his amateur radio operations -- and tweaked a dial. Out of the speakers came two Japanese voices having a conversation with each other. "The last guy I talked to was in Grenada," said Wessels, a South African native who has had his ham radio license since 1991. Then he still lived in his native land; he got an American license when he moved to the U.S. in 1996. Wessels is a database administrator for IBM by trade and a self-described "ham," as amateur radio operators call themselves. The tiny building he operates out of -- with a "Ham Shack" sign posted outside -- is jammed with all manner of hardware, cables and computer screens. One of those displays a computer program he has that tracks, automatically, all of the people all over the world he's talked to, and, when he communicates with someone new, brings up information on that person based on their call sign. If the phrase "ham radio" seems like a blast from the past in this age of the Internet and smartphones, think again: According to the latest numbers from the National Association for Amateur Radio, there were 704,236 amateur radio license holders in the U.S. as of March 2012, an all-time high. That figure is up from 662,600 in 2005. But is it a hobby that is being embraced by young people? That depends on who you talk to. "We're having trouble getting them into it," said Jerry Schmidt, secretary of the Longmont Amateur Radio Club. "When I look back over my time, I was into amateur radio in 1963." Schmidt's group is doing what it can to attract younger members, including attending Boy Scout gatherings to talk about the hobby. They do have a few offspring of LARC members who have expressed an interest as well, he said.

//
CQ Adds International News Column, Names AA6TS International Editor:

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: FG ; Guadeloupe ; Square: FK96 ; start 2013-02-15

Activity from FG4KH FK96HF again

FG4KH will be on air by the middle of the next month for a small activity in EME and tropo
from
Guadeloupe Island. The set up will be light this year with FT897, 200w, LNA and only H pol
on
the 2 x 3WL DK7ZB. I will try to make some tropo QSO to south America and Cara?bean area.
I will be QRV also time to time on the HF bands from 80 to 10 meters
Cu soon from the French West Indies
Philippe F1DUZ

SOURCE: Phillipe F1DUZ, direct to MMMonVHF

** DXCC: TX ; Clipperton ; Square: DK50 ; start 2013-03-01

I am planning to have at least 1kw output and low loss feedline to a 6M8GJ with
manual elevation. There are very good windows with EU moonsets. PSE read my webpage
for more details and procedures. I will transmit in the first sequence JT65A when operating
EME.
This is about the only way anyone from EU will ever work Clipperton on 6m, so please be

ready!

SOURCE: tnx for Info Lance, W7GJ, direct to MMMonVHF

** DXCC: DL ; Germany ; Square: JO44 ; start 2013-03-01

DL0AT qrv from JO44HI
Aktivate the Lighthouse Westerhever with big power on the top on the lighthouse.
2x7 ele es 2x 9 ele with 2x 750 watts. FED: 260; LH 0063

SOURCE: tnx to Andy, DG3XA, direct to MMMonVHF

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV from 4 April to 18 April 2013 however, for Central Europe the EME window will open only around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often

as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT, Anssi OH9FKJ and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.
We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will
be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

D4, CAPE VERDE, AF-086
Mats,SM7GIB, is active as D44TIB from Cape Verde (AF-086) until Feb 6.
Mats is working holiday style on 160m-10m with his K3 and vertical.
QSL via homecall.

F, FRANCE
The special event station TM39PVJ celebrates the 17th festival
"La Percee du Vinjaune" on Feb 2/3. QSL via F8GGZ.

The special event station TM10AAW (WAP 235) will be activated on the
occasion of the 10th Antarctic Activity Week (AAW) on Feb 2/3, Feb 8-10
and Feb 15-24. Operator will be Francois,F8DVD, from his QTH Macon
(60 km north of Lyon) mainly in SSB on 10m-40m. QSL via F8DVD.
See also: http://tm10aaw.monsite-orange.fr

FK, FRENCH NEW CALEDONIA, OC-032
Oku,FK/JK1KSB, is working holiday style in CW, RTTY and PSK31 on 80-10m
until February 3. QSL via homecall.

G, ENGLAND
Some members of the UK HQ Teams (GR2HQ) celebrate the 100th anniversary
of the RSGB throughout the year by activating the special event call
G100C during the weekends (later also as GM100C from Scotland,
as GW100C from Wales and GJ100C from Jersey).
QSLs via M0OXO (OQRS), LoTW, eQSL.
See: http://www.m0oxo.com and http://www.qsl.net/gm3woj/g_100c.htm

HA, HUNGARY
The special event station HA110RAEM is activated in 2013 in memory of
Ernst Teodorovich Krenkel (1903-1971). Ernst was an Arctic explorer,
a skillful telegraphy operator and a doctor of geographical sciences.
His amateur radio callsigns were RAEM, UA3AA and U3AA.
All QSOs (CW only) will be confirmed by HA8MT.

HC, ECUADOR
YL Elena,HC2/RC5A, will be QRV in CW and SSB on 160m-6m (incl. WARC)
from Feb 5 till Mar 9. She will join the ARRL DX CW Contest (Feb 16/17)
in the SO/AB/LP category. QSL via homecall.

I, ITALY
Leo,IW5EFX, will show up as IO5SP in February during the 10th Antarctic
Activity Week (AAW). QSL via homecall.

The special event station IO5ANT is working from the National Antarctic
Museum in Siena during the AAW. QSL via IW5EFX. See: http://www.mna.it

PA, THE NETHERLANDS
Fred,PA0FAW (ISWL PA-11092, FISTS #9858), will us the special callsign
PF100ZOO mainly in CW with some SSB and digital modes to mark the
100th anniversary of the Burgers Zoo in Arnhem in February.
He will also be active from the "De Hoge Veluwe National Park"
(WFF PAFF-005, Loc JO21wx, JO22va and JO32aa). QSL via homecall.

SU, EGYPT
Gerd,SU/DJ5IW, plans to go QRT on Feb 4 or 5. The QSLs are already at
the printer but are expected to be sent only after his return from the
Clipperton Island DXpedition in April.

TA, TURKEY
The TC Special Wireless Activity Team remembers Asil Feri,TA1BW, who
passed away 10 years ago by using the special call TC1BW in February.
All QSOs will be confirmed via bureau automatically.
See also: http://www.tcswat.org

TZ, MALI
Fernando,EA4BB (ex-Z21BB), is now working as TZ6BB from Bamako. The
length of his stay is not known. He has been spotted already in CW on
40m/20m/15m/12m/10m. QSL via W3HNK, unfortunately only direct.

YI, IRAQ
Razi,YI1RZ, is working as YI1RZ/2 from Bacuba (with only 10 watts)
until Feb 4. QSL via IK2DUW.

Z8, SOUTH SUDAN
Massimo,IZ0EGB (ex-9L1MS, EL2GB), is now living in South Sudan and
hopes to hit the airwaves as Z81B soon. QSL via homecall.

ZD8, ASCENSION ISLAND, AF-003
Steve,G3ZVW, working in CW, SSB and digital modes on 80m-10m signing
ZD8N from Georgetown until Feb 5. QSL via homecall.

ZK, TOKELAU, OC-048
ZK3T who is very active on the bands at the moment is not a pirate!
Dieter,DJ2EH, was travelling to Tokelau via Australia, American Samoa
and Western Samoa since Jan 8. He will stay on Tokelau until Feb 20.
QSL via homecall.

AFRICA DXPEDITION
Jon,TF3ZA, and a team from 15 adventurers are planning to drive from
Reykjavik to Cape Town for the next six months starting in January.
They will use following callsigns: CN2ZA, 5T0ZA, 6W/TF3ZA, 3XY0ZA,
TU2ZA (pending), 9G0ZA, 5V7ZA, TY0ZA (pending), TJ0ZA (pending),
TR0ZA (pending), TN0ZA (pending), 9Q0ZA (pending), 9J0ZA, Z2/TF3ZA,
A20ZA and ZS/TF3ZA. Listen for them in CW and SSB on following QRGs:
CW: 1824, 3524, 7024, 10124, 18074, 21024, 24894, 28024 kHz
SSB: 3780, 7080, 14180, 18140, 21280, 24940, 28480 kHz
6m: 50094 (CW) and 50110 (SSB)
QSL via LoTW preferred or via the OQRS which will be installed on their
website after their trip in August. Bureau QSLs via homecalls.
Direct QSLs should be sent with SAE and 2 US$ to Jon Agust Erlingsson,
Alftamyri 14, 108 Reykjavik, Iceland.
See http://www.dxacrossafrica.com and http://twitter.com/DXAcrossAfrica

ZL9HR story: Glenn,KE4KY, published an interesting story about ZL9HR online:
http://www.ke4ky.net/p/zl9hr-campbell-island-dxpedition-2012.html

DXCC: Following DXpeditions were approved for DXCC credit: 5V7TH (2012),
XW4XR, S07EA (2006-2007) and XWPA (2010-2011)

DXpedition of the Year 2012: The website DX World.net has published the
results of their survey about the DXpedition of the Year 2012.
HK0NA received the most votes. See also:
http://dx-world.net/2013/dxpedition-of-the-year-results/#comments

OE2013SEL (Correction): OM Erwin,OE7SEL, is not the owner or QSL manager of
the special event callsign OE2013SEL (like published in DXNL 1816).

Address change: The new address of Gabor,HA3JB, is:
HA3JB, Gabor Kutasi, Koch R. utca 10/A.1/4, H-8600 Siofok, Hungary
He is the QSL manager of: SU8BHI, SU/HA3JB, SU1IE, SU3MB,
CO2WL (IOTA NA-015), CO2NO (IOTA NA-015), CO4SM (IOTA NA-056),
CO8WN (IOTA NA-015), CN2IPA, HG3IPA, HG15IPA, HG20IPA,
9H3IP (IOTA EU-023), TA4/HA3JB, IZ0UIL, YB5NS (IOTA OC-143),
YB7MRK (IOTA OC-088), YC9DEB (IOTA OC-022), CP6LA, 4S7JL (IOTA AS-003)
If you are looking for a QSL manager as well, send Gabor an e-mail to:
ha3jb [at] t-email.hu

SILENT KEY: Silvano Fabbri,C91A (IK4GRJ), was killed in a motocross accident
near Maputo on Jan 20 at the age of 60. He was living in Mozambique for
30 years and has founded a prominent telecommunication company there.
Our condolences and sympathy are with his family and friends.
We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Feb 3 North American Sprint

Triathlon DX Contest: Kostas,SV1DPI, invites everybody to join the
"1st Triathlon DX Contest" on Feb 2. See also:
http://triathlon-dx-contest.gr/contest/index.php/ct-menu-item-1 and
http://triathlon-dx-contest.blogspot.com

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-024, S7, Inner Islands: Bert,CX3AN, will sign S79AN mainly in SSB and CW
on 80m-6m from Mahe Island (WLOTA 3286, Loc LI75sh) from Feb 4-11.
Preferred times for South America are: 1800 UTC on 21280 kHz and
2000 UTC on 14180 kHz. QSL via EB7DX.

AN-016, VP8/A, Antarctica: Nick,RW6ACM, starts working as RI1ANP from the
Russian Antarctic base Progress (AA U-03, WAP RUS-11) on Feb 1 and
will stay until the end of 2013. QSL via RN1ON.

AS-013, 8Q, Maldive Islands: Andrew,G7COD, plans to show up again as 8Q7AK
from the Kaafu atoll. He will spend his holidays on the island for
three weeks in February. He will work holiday style on the HF bands
mainly during these times: 0730-0830 UTC, 0900-1100 UTC, 1300-1500 UTC
and 1730-1800 UTC. QSL via G7COD (bureau/direct).

EU-089, CU8, Western group: Hermann,CT3FN, will take part in the upcoming
Mexico International RTTY Contest (Feb 2/3) signing CR2V as single OP.
QSL via HB9CRV (bureau/direct/LoTW).

NA-102, FG, Guadeloupe: Jean-Pierre,FG/F6ITD, is going to Guadeloupe from
Feb 1-25. First he will visit Guadeloupe (Basse Terre, DIFO FG-019)
from Feb 1-8 and then La Desirade Island (DIFO FG-004, WLOTA 1121)
until Feb 25. Listen for him in SSB and digital modes on the HF bands.
QSL via F6ITD (bureau/direct).

NA-110, W4, South Carolina State group: En route to the "ARRL SC State
Convention" Sean,KX9X, im plans to activate Dewees Island (USi SC042,
Loc FM02DU) as KX9X/4 for the "US Islands Award". He plans to become
active on Feb 1 (1500-2000 UTC) using his FT-817 (QRP) in SSB and CW.
He hopes to have a loud signal because he wants to put up his antenna
in salt water. QSL via KX9X.

OC-016, 3D2, Viti Levu and Vanua Levu group & OC-060, 3D2, Rotuma Island:
Bob,W7YAQ, plans to activate Fiji and Rotuma from Feb 2-21. His first
stop is Viti Levu Island (OC-016, WLOTA 0055) as 3D2NB from Feb 2-7.
The second trip leads him to Rotuma (OC-060) from where he will show up
as 3D2RX from Feb 8-21. QSLs for both calls via W7YAQ.
The logs will be uploaded to the LoTW as well.

Special Event Station - GB6GVS - Gresham Village School

Posted: 31 Jan 2013 05:01 AM PST
http://forums.qrz.com/showthread.php?377968-Special-Event-Station-GB6GVS-Gresham-Village-School&goto=newpost

Advance notification after a successful year one as (GB2GVS) this small school of approx 80 pupils (aged 6 to 11) will be hosting GB6GVS (Gresham Village School, near Cromer in Norfolk UK) in March 2013.

The school is now 116 years old and was built and opened in 1897.

Last year the children were very excited to speak via D-Star repeater system to Japan, USA, Canada, Switzerland, Netherlands, Poland to name but a few. The event was so successful that the school has adopted one week a year of their curriculum to Science week. This will include 2 days of Radio. The children once again will be learning and sending their name in Morse Code for a certificate, followed by a chance to talk to someone in another country many miles away. The children last year were very proud and excited to talk to people from around the world and collect their Amateur Radio Certificate at the end of the week.

We will be operating on Analogue again this year as well as digital. Unfortunately due to health and safety, we are unable to put up a mast for HF antennas on the school premises, and as they are all young children, we don't think that this is necessary, as they were all thrilled and excited to use the equipment that we had available for them on the day.

The Two independent operators this year are Andy 2E0AIV and Billy G0UIQ

The callsign is GB6GVS, so if you hear us, please spare a few moments to speak to one of our children as you will make their day

any questions or if you are representing a school and wish to make a schedule then please email and we will try to accommodate

2e0aiv@2e0aiv.co.uk

national air ambulance week sept 23--30 2013

Posted: 30 Jan 2013 01:47 PM PST
http://forums.qrz.com/showthread.php?377899-national-air-ambulance-week-sept-23-30-2013&goto=newpost

SIR DAVID JASON

PLEDGES SUPPORT FOR NATIONAL AIR AMBULANCE WEEK 23-30 SEPTEMBER 2013

... One of Britains most famous and respected actors Sir David Jason is getting behind the first National Air Ambulance Week. Sir David has come a long way from his days as an electrician; since then he has won many prestigious awards for his work, with roles greatly varying from the comical Del Boy in Only Fools and Horses, to the more serious role of Jack Frost in A Touch of Frost.

Sir David became interested in flying when he was young and has a keen interest in space exploration and all things aeronautical. He started out his own flying experience in gliders and then progressed to helicopters. Because of this keen interest Sir David became involved with the Association of Air Ambulances (AAA) and in March 2009 Sir David was asked, and agreed to lend his support to the work of Air Ambulance Charities by becoming Patron of AAA.

Speaking of his involvement, Sir David said:

"I am honoured to be fronting the very first united National Air Ambulance Week campaign across the UK. It is vitally important that we spread the word that Air Ambulance Charities up and down the UK are not Government funded and rely on public donations to remain operational. Everyday lives are being saved by the highly skilled Air Ambulance crews. Please give whatever you can spare to support your local Air Ambulance."

The heart of the week long Appeal will be very much encouraging the communities and businesses across the country to support their local Air Ambulance charity. By doing so it will make a huge difference and effectively help to save lives in the community that you live in. Every penny really goes a long way in helping save lives.

NAAW is an initiative put together by the Association of Air Ambulances (AAA), the trade body which unites not only Air Ambulance charities from across the country, but also operators and ambulance services.The Association gives a national voice to a local service.

Clive Dickin, Director of the Association of Air Ambulances (AAA) said We are delighted to have Sir David Jason as our patron. It really does help us to raise awareness of our members and the essential work that they carry out locally. Our members are encouraging fundraising very much at a grass roots level for example mufti or a dress up/dress down days at schools, colleges or work places? Fundraising should be fun!

You may wish to organise your own event maybe you want to hold a cake sale, fete, or do something more daring like a parachute jump or sponsored

swim. Whatever you decide to do, rest assured that all monies raised will stay local, helping to keep your local Air Ambulance flying.

To show your support and find out more about how you can help your local Air Ambulance

hello all @ over the world please can you click on my vistiors map please

==> + ARRL BOARD OF DIRECTORS CONVENES IN NEW ORLEANS FOR 2013 ANNUAL
MEETING

The ARRL Board of Directors held its 2013 Annual Meeting January
18-19, 2013 in New Orleans, Louisiana, under the chairmanship of
President Kay Craigie, N3KN. The Board welcomed two newly elected
members to the Board family: Hudson Division Director Mike Lisenco,
N2YBB, and Northwestern Division Vice Director James Pace, K7CEX;
Lisenco and Pace were elected in November 2012. At its meeting, the
Board set its legislative objectives for the 113th Congress, approved
the organization's amended financial plan, elected members to the
Executive Committee and ARRL Foundation, bestowed awards and more. Read
more here

-2013-annual-meeting>.

==> + NASA TO HONOR FALLEN ASTRONAUTS THIS FRIDAY

On Friday, February 1 -- the 10th anniversary of the Columbia accident
-- NASA will pay tribute to the crews of Apollo 1
```

<http://www.nasa.gov/externalflash/DOR2013/apollo1/apollo1.html> and space shuttles Challenger <http://www.nasa.gov/externalflash/DOR2013/challenger/challenger.html> and Columbia <http://www.nasa.gov/externalflash/DOR2013/columbia/columbia.html> with a Day of Remembrance <http://www.nasa.gov/home/hqnews/2013/jan/HQ_M13-021_NASA_Day_Remembrance.html>.
Flags across the agency will be flown at half-staff in their memory.

On January 27, 1967, Virgil "Gus" Grissom, Edward White and Roger Chaffee were killed in the Apollo 1 fire during a launch pad test. On January 28, 1986, Greg Jarvis, Ronald McNair, Ellison Onizuka, Judith Resnik, Michael Smith, Dick Scobee and Christa McAuliffe were killed when the space shuttle Challenger exploded just 73 seconds into its flight. On February 1, 2003, Rick Husband, William McCool, Michael Anderson, Kalpana Chawla, KD5ESI, David Brown, KC5ZTC, Laurel Clark, KC5ZSU, and Ilan Ramon -- were killed when the space shuttle Columbia disintegrated. According to ARISS International Chairman Frank Bauer, KA3HDO, Chawla served as the Astronaut Interface -- the liaison between NASA and the Amateur Radio on the International Space Station (ARISS <http://ariss.rac.ca/oindex.htm>) program -- before being selected for her mission on board Columbia.

NASA Administrator Charles Bolden and other NASA senior officials will hold an observance at Arlington National Cemetery on Friday morning, while NASA Television <http://www.nasa.gov/ntv> will provide live coverage of a wreath-laying ceremony at the Space Mirror Memorial <http://www.kennedyspacecenter.com/astronaut-memorial.aspx>, located in the Kennedy Space Center Visitor Complex in Florida, beginning at 10 AM (EST). You can watch live online <http://www.nasa.gov/multimedia/nasatv/index.html> on the NASA TV Public and Media channels, or on your television. Contact your local provider for the NASA TV channel in your area.

==> + FCC DENIES MISSOURI HAM'S PETITION REGARDING CC&RS

On January 28, the FCC denied a Petition for Reconsideration (PFR) filed by James E. Whedbee, N0ECN, of Gladstone, Missouri. Whedbee filed the PFR in May 2012 in response to the FCC denying his Petition for Declaratory Ruling (PDR) filed in April 2012 that urged the FCC to address covenants, conditions and restrictions (CC&Rs).

In his PDR, Whedbee argued that CC&Rs restrict Amateur Radio facilities in violation of Section 310(d) of the Communications Act of 1934, as amended. He also asserted that there is a "controversy of CCR enforcement against Amateur Radio operators," and "requested a declaratory ruling terminating the controversy by holding that such CC&Rs are unenforceable."

The FCC concluded that the Mobility Division "properly acted" on Whedbee's PFR: "Given the opportunity for public comment already

afforded by the Public Notice and the opening of GN Docket No. 12-91, and in light of the pendency (and later release) of the Commission's report to Congress and the statutory purpose of that report, your Petition was moot, premature, repetitive and frivolous." Read the FCC's letter to Whidbee here <http://transition.fcc.gov/Daily_Releases/Daily_Business/2013/db0125/DA-13-101A1.pdf>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: The sunspot numbers and the solar flux barely changed this past week: The average daily sunspot numbers were 55.7, down slightly from 56.4 the previous week, while the average daily solar flux was 98.7, down from 110.7. Geomagnetic conditions continued their quiet spell. The most active day was Saturday, January 26, when both the mid-latitude and planetary A index were 18, and Alaska's College A index was 46. The predicted solar flux is 100 for January 31-February 1, 105 on February 2-5, then 110, 120, 130 and 125 on February 6-9, 120 on February 10-11, then 115, 110 and 105 on February 12-14, 110 on February 15-18, and back down to 105 on February 19-23. The predicted planetary A index is 5 on January 31-February 4, 8 on February 5-6, 5 on February 7-8, 8 on February 9-10, 5 on February 11-18, 8 on February 19, 5 on February 20-21, then 15, 10 and 8 on February 22-24. Look for more on the ARRL website on Friday, February 1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + SILENT KEY: FORMER ARRL NEW ENGLAND DIVISION DIRECTOR JOHN SULLIVAN, W1HHR (SK)

John "Sully" Sullivan, W1HHR, of Columbia, Connecticut, passed away <http://potterfuneralhome.com/?p=523> November 12, 2012. He was 83. An ARRL Life Member, Sullivan served as ARRL New England Division Director from 1975-1985. He was a veteran of the US Navy. A private service was held November 16 in Willimantic, Connecticut.

==> THIS WEEK IN RADIOSPORT

This week:

- February 1 -- NCCC Sprint Ladder
- February 2 -- Minnesota QSO Party; AGCW Straight Key Party
- February 2-3 -- Vermont QSO Party; Mexico RTTY International Contest; 10-10 International Winter Contest (SSB); Black Sea Cup International; EPC WW DX Contest
- February 2-4 -- Delaware QSO Party
- February 3 -- North American Sprint (CW)

Next week:

- February 8 -- NCCC Sprint Ladder
- February 8-10 -- YLRL YL-OM Contest

- February 9 -- Asia-Pacific Spring Sprint (CW); FISTS Winter Sprint
- February 9-10 -- New Hampshire QSO Party; Louisiana QSO Party; CQ WW
RTTY WPX Contest; YL-ISSB QSO Party (CW); KCJ Topband Contest; Dutch
PACC Contest; OMISS QSO Party; RSGB First 1.8 MHz Contest; AWA
Amplitude Modulation QSO Party
- February 10-11 -- Classic Exchange (Phone)
- February 11-15 -- ARRL School Club Roundup
<http://www.arrl.org/school-club-roundup>
- February 13 -- NAQCC Straight Key/Bug Sprint
- February 13-14 - CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 2 -- ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-2>, North
Charleston, South Carolina; ARRL Virginia State Convention
<http://www.arrl.org/hamfests/virginia-state-convention-frostfest-1>,

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

NZART Headquarters Infoline Issue 266

1 February 2013
NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ – Council Election nominations

· Review of 70cm Bandplan

· Jock White Field Day

· IARU R1 – Bulgarian Federation of Radio Amateurs.

Debby says…I have been requested by the Returning officer to advise the upcoming election nominees.

As you can see there will only be voting required in the Midlands region for 2 Councillors, three nominees have been submitted.

There are also 2 nominees for President; therefore all current financial transmitting members will receive voting papers to vote.

Elections 2013

The following will be published in the Jan/Feb issue of Break In due out next week.

Elections will be held in February/March 2013 for the following positions on the NZART Council: President and Councillors representing the Midlands Electoral District.

Nominations for the positions on Council have been received from:

President (1 Required)

John Andrews ZL2HD

Vaughan Henderson ZL1TGC

Northern Electoral District (3 Councillors Required)

Neill Ellis ZL1TAJ

Stephen Hayman ZL1TPH

Phil King ZL1PK

No election required

Central Electoral District (3 Councillors Required)

Warren Harris ZL2AJ

Fred Johnson ZL2AMJ

Ted Linney ZL2TB

No election required

Midlands Electoral District (2 Councillors Required)

Ann Fraser ZL3TNT

Philip Holliday ZL3PAH

Stewart Watchman ZL2TW

Southern Electoral District (1 Councillor Required)

Terry Thomas ZL4TAE

No election is required for councillors representing the Northern, Central or Southern Electoral Districts as the nominations received in each district equals the number of councillors required.

All association members entitled to vote will therefore receive a ballot paper for the Presidential Election. The Ballot paper for Association members from within the Midlands District will be included with the ballot paper for the election of the Association President.

Those members entitled to vote who receive Break-In will receive their voting paper, instructions and envelopes with the January/February edition of Break-In. Other Association members who do not receive a personal issue of Break-In, but are entitled to vote will have the respective paper and envelopes mailed to them.

Evan T Sayer

Returning Officer

8 January 2013

Talk soon…Debby ZL2DL

Review of the 70 Centimetre Band Plan

NZART Council has decided a review of the current 70 cm Bandplan is desirable as a conflict with the IARU Region III Bandplan has been identified by a number of formal complaints to both NZART and Radio Spectrum Management (RSM). Council considers it part of its responsibilities to amateur radio that it reviews the Bandplans when significant changes occur in the use of the spectrum.

This proposed review is now on the agenda of the Council Face to Face (FTF) meeting in February and it is hoped that submissions will be called for shortly afterwards. The review is also planned to be a discussion topic at

the Technology Convention in Auckland, where it is anticipated it will be presented as a Draft Final Recommendation for comment, before being presented to NZART Council.

Due to the discrepancy between the NZART 70 cm Bandplan and the IARU Region III Bandplan, the review will give consideration to concerns regarding the operation of Amateur Television. It will also consider interference received from UHF Low Interference Potential Devices – LIPD's by equipment we operate such as 70 cm repeaters (the National System was re-engineered to be resistant to this some time ago).

NZART Council will seek feedback from existing operators on the 70 cm band. We are interested in any interference presently being received or perceived may occur in the future whilst operating on this band.

NZART will soon be inviting comment from parties interested in providing submissions to a Committee appointed at the Council FTF to do this review. Submissions from 70 cm Band users on the current 70 cm Bandplan and any issues perceived with it, or suggestions to improve it will be most useful.

Neill Ellis ZL1TAJ and Stephen Hayman ZL1TPH

For NZART Council

Jock White Field Day

Coming up on 23rd and 24th February. Full details on the NZART web site:

http://www.nzart.org.nz/activities/contest-rules/rules-jock-white-field-day/

By now you should be planning your field station: operators, site, power source, radios, antennas, shelter and last but not least, food and drink.

This year the Kapiti Coast Museum plan to operate as a home station using the special call sign ZL6KCM, you can count them as contact points but like any home station, they are not valid as a branch point.

International Amateur Radio Union Region 1

Bulgarian Federation of Radio Amateurs

11th World High Speed Telegraphy Championship

22-26 September 2013

Borovets, Bulgaria

Bulletin No 1

(28 January 2013)

Bulgarian Federation of Radio Amateurs (BFRA) is pleased to invite High Speed Telegraphy (HST) teams, individual competitors and visitors/guests from all over the world to 11th World HST Championship to be held in Bulgaria in September 2013.

Venue:

The Championship will be held in Borovets, 70 km south of capitol Sofia (60 km from Sofia Airport). Borovets is one of well known Bulgarian mountain resorts situated in Rila Mountain at height 1200 m above see level.

Correspondence and information:

Address for correspondence: BFRA, P.O. Box 830, BG-1000 Sofia, Bulgaria

Telephones: +359 897 949888 (President), +359 894 292211 (Secretary)

E-mail: bfra_hq@hotmail.com

Website: www.bfra.org

Transportation to the venue:

Some of the teams travel, as tradition, by their own bus/cars. Suitable transportation will be organized for the rest, who will arrive at Sofia Airport or Sofia Railway Station.

Accommodation:

The accommodation and the competition will be organized in a luxury four-star hotel.

Double and triple rooms with WC, bath, TV and Wi-Fi Internet are provided. Single accommodation is available upon request (see bellow). Accommodation prior and post Championship is also available upon request.

Weather:

The weather in this period of the year is stable, usually sunny, with daily temperatures 18-19 degrees C, early in the morning down to 8 degrees C.

Visa requirement:

The citizens of majority countries expected to take part in the Championship do no need visa to enter Bulgaria. Those societies that need visa will be informed accordingly after receiving their Letter of Intent.

Program of the Championship:

22 September, Sunday – Arrival, accommodation, official opening;

23 September, Monday – Competition, awarding;

24 September, Tuesday – Competition, awarding;

25 September, Wednesday – Day off, excursion, awarding, closing ceremony and banquet (hamfest);

26 September, Thursday – Departure.

Entry fee and terms of payment:

There are lots of options depending on the status of the participants, needs of accommodation/full board, and date of payment as follows:

Description
Premium fee (payment till 30 June 2013) per person
Late fee (payment after 30 June or upon arrival) per person

Full package for competitors and team leaders including accommodation, all-inclusive full board, participation fee, excursion, banquet
EUR 290,-
EUR 315,-

Reduced package for competitors and team leaders including participation fee, excursion, banquet
EUR 160,-
EUR 175,-

Full package for visitors including accommodation, all-inclusive full board, excursion, banquet
EUR 140,-
EUR 165,-

Reduced package for visitors including excursion and banquet
EUR 70,-
EUR 80,-

Special package for newcomer societies (participating for first time in World/Regional Championship) including accommodation, all-inclusive full board, participation fee, excursion, banquet
EUR 245,-
EUR 260,-

Single accommodation – the relevant price above plus EUR 50,- per person.

Transfer:

The price from Sofia Airport (or Railway Station) to Borovets and back is EUR 20,- per person.

Important notes:

1. Please find enclosed a LETTER OF INTENT. It must be fulfilled and sent back to reach the organisers at least on 28 March 2013.

2. All additional information and next Bulletins will be distributed only to societies that have responded and only to the contact person regarding the Championship.

3. Bulgarian Federation of Radio Amateurs would like to draw your attention on the fact that the Championship will be held in a season when all the hotel reservations must be made in advance. Therefore BFRA will consider all

late entries (received after 28 March 2013) with a willingness to help but without any guarantee that they will be satisfied and participants accepted.

Bulgarian Federation of Radio Amateurs

Housekeeping

Amateur Radio Newsline(tm) Report 1851 - February 1 2013

Amateur Radio Newsline report number 1851 with a release date of February 1 2013 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC turns down a petition for reconsideration on its report to Congress about ham radio emergency communications; The 2013 Global Amateur Radio Emergency Conference to be held this June in Zurich, Switzerland and ham radio assistance in the Australian flooding begins as Tasmanian brush fire communications winds down. Find out the details are on Amateur Radio Newsline(tm) report number 1851 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: PETITION FOR RECONSIDERATION FROM DENIAL OF PETITION FOR DECLARATORY RULING GN DOCKET NO. 12-91 DENIED

The FCC has turned down a petition for reconsideration on the text of its report to Congress dealing with amateur radio and how land use restrictions might interfere with emergency communications. Mark Abramovich, NT3V, is here with the details:

--

The FCC's Scot Stone, deputy chief of the mobility division in the Wireless Telecommunications Bureau, responded to the petition from James Whedbee, N0ECN, of suburban Kansas City.

And, Stone's legal language was pretty direct - essentially, the matter is decided and Whedbee should stop wasting the FCC's time.

In his reasoning for refusing Whedbee's petition, the FCC's Stone says the division which rejected his first appeal of the matter was within its rights to do so without any further public hearing.

Stone also stated in legal terms that Whedbee engaged in a "frivolous statutory interpretation," of the FCC's regulations, especially those stemming from PRB-1 which authorized limited preemption of state and local regulations governing amateur station facilities, including antennas and support structures.

But those regulations don't extend to private codes, covenants and restrictions, known as CC&Rs, including homeowner association rules that restrict amateur radio facilities.

However, in 2001, the FCC left open the door on prohibiting CC&Rs from interfering with amateur radio if Congress so decided it should do so.

This latest chapter in the ongoing debate was launched in February 2012 when President Obama signed the Middle Class Tax Relief and Job Creation Act of 2012.

That bill also included a provision requiring the FCC to report to Congress on the uses and capabilities of Amateur Radio Service communications in emergencies and disaster relief.

It also directed the study identify impediments to enhanced Amateur Radio Service communications and make recommendations regarding the removal of such impediments, including "the effects of unreasonable or unnecessary private land use restrictions on residential antenna installations."

The FCC record shows Whedbee filed comments pretty quickly claiming CC&Rs violated sections of the Communications Act.

He also demanded the commission issue a legal decision called a declaratory judgement - essentially asking the FCC to rule without any further hearings or delays that CC&Rs were indeed an impediment to amateur radio operations, causing a controversy for amateur radio and were unenforceable.

The FCC denied Whedbee's petitions saying that was going to be addressed in its report to Congress.

But Whedbee kept at it, asking the FCC to reconsider.

When the FCC issued its report to Congress last August, it stated there was no overwhelming public comment supporting any problems related to CC&Rs and amateur radio.

The FCC's Stone finally addressed Whedbee's appeal petition in a January 25th letter in which he explained the report to Congress essentially trumped Whedbee's appeal and rendered the matter - using a legal term - moot or essentially of little value or meaning given the FCC's findings in the report to Congress.

Amateur Radio Newsline made several attempts to reach Whedbee, but was unsuccessful as we went to air with this report.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

At airtime it's not known if Whedbee plans to file any further appeals on this matter. You can read the entire text of this FCC decision on-line in PDF format at tinyurl.com/petition-turned-down. (FCC)

RESCUE RADIO: GAREC 2013 TO BE IN GENEVA JUNE 25 - 28

IARU Region One has announced that this years Global Amateur Radio Emergency Conference or GAREC 2013 will be held in Zurich, Switzerland from June 25th to 28th. Among the draft topics to be discussed are the relevance of Amateur Radio Emergency Communication in the '1st World,' and the HAMNET high speed data network. There will also be presentations from the three regions of the IARU and talks by groups with recent experience in disaster relief communications.

General information on GAREC 2013 including information on the venue, registration fees and the tentative agenda and the registration forms is now available on line at www.garec2013.ch. This website will be updated frequently to keep all updated with the latest news and program changes. You may also e-mail to info (at) garec2013 (dot) ch for updates.

It should be noted that this years conference has been timed to precede Europe's largest amateur radio exhibition, HAM RADIO in Friedrichshafen. Germany. This is so that people can attend both events. (IARU-R1)

**

RESCUE RADIO: WICEN HAMS RESPOND TO FLOODING DOWN UNDER

Flooding has hit the Australian state of Queensland. This as ex-tropical cyclone Oswald that had already caused record flooding has moved south.

Jim Linton, VK3PC, is the Chairman IARU Regon 3 Disaster Communications Committee. He tells Amateur Radio Newsline that as this disaster unfolds that a picture of emergency communications provided by radio amateurs is starting to emerge. According to Linton, several High Frequency links have been requested to be set up by the ham radio emergency response group WICEN by the Queensland Water Police. These links are to connect the city of Brisbane to Cairns. WICEN's role is expected to expand in the coming days.

As this newscast is being prepared, four people are reported to have died and others are reported missing. Many thousands have been left homeless and taking shelter in relief centers as the widespread flooding, which included tornados, is continuing. (VK3PC)

**

RESCUE RADIO: WICEN TASMANIAN BUSH FIRES OPERATIONS END

Meantime, ham radio assistance by WICEN in the Tasmanian brush fires has now come to an end as we hear in this report from the Wireless Institute of Australia's ham radio news service:

--

WICEN in Tasmania was finally stood down after 20 continuous days of operation at the Incident Management Centre at Cambridge, near Hobart airport. Operations have now been wound back.

WICEN was posted by the Tasmania Fire Services to mainly control the busy 80MHz radio traffic during massive fires.

Although those the major fires, which started on the 3rd of January on the Tasman Peninsula and in the Derwent Valley, are still active, one being classified as contained and the other controlled.

The days serviced by WICEN and other southern Tasmanian radio amateurs varied between 12 and 24 hours.

WICEN Tasmania (South) Operations Coordinator Rod Finlayson VK7TRF reports that 24 radio amateurs contributed to the effort, totalling 666 hours at the radio desk, plus time in logistical support keeping up the supply of operators to the task.

Seven operators did in excess of 45 hours each, including three more than 60 hours and one working a total of almost 80 hours. Initially there were two operators on each of the two networks, but this was wound back to one after ten days.

--

For those who may not be aware, WICEN is an acronym for the Wireless Institute Civil Emergency Network. It is described as a group of Australian amateur radio operators trained to assist in emergency situations. Their job is to provide emergency and safety communications when normal communications do not exist or are inadequate. (WIA News, VK3PC)

BREAKING DX NEWS: MARION ISLAND TO BE ON BY SUMMER

Some breaking news in the world of DX. Marion Island should be on the air before the start of summer in the Northern latitudes. This according to reports that South African radio amateur David Hartzenberg, ZS1BCE, has been appointed to be the new radio technician to that rare location for one year between April of this year and May of 2014.

Hartzenberg is expected to depart from Cape Town on April 15th, and his amateur radio operations are expected to begin about four weeks later. Currently, he does not have a Zed-S-8 callsign, but plans to apply for ZS8D. Once set up, his operations will be on SSB on most High Frequency bands.

And less we forget to mention: His QSL Manager will be Pierre Tromp, ZS1HF, who just happens to have been the last operator from Marion Island using the call ZS8M. And we will have more DX news for you near the end of this weeks newscast. (OPDX)

RADIO LAW: NEW RECOMMENDATION ON PLASMA TV EMISSIONS IN EUROPE

Tired of hearing this when you tune your favorite ham radio band?

--

Plasma TV radiation audio here

--

That's the sound made by a near-by plasma television set. And now Europe is starting to set some standards to make it a thing of the past

Thilo Kootz, DL9KCE, in Wabern, Germany reports that a European specification or recommendation on the limitation of the emissions of plasma TVs between 150 kHz and 30 MHz. One that was approved in the last meeting of the Comit&#65533; International Sp&#65533;cial des Perturbations Radio&#65533;lectriques.

Even though it does not have the same legal implications as a regular Electromagnetic Compatibility standard, it does show the plasma industry what could be part of one in the future. It should be noted that this new recommendation is the result of work started in 2007 by an Electromagnetic Compatibility working group of IARU Region One. (Southgate, IARU-R1)

**

ENFORCEMENT: FCC ISSUES $8000 NAL FOR EAS VIOLATION

A noncommercial FM station in Puerto Rico has been dinged $8000. This after the FCC found that it was incapable of issuing an EAS alert without human intervention.

Based on a complaint that it received, last April agents from the Commission's San Juan office inspected WVID FM in Anasco, Puerto Rico. At that time the station personnel demonstrated to the agents that the EAS equipment couldn't transmit an emergency message without someone manually reducing the on-air programming volume down to zero or mute. The station employee also told the agents that he believed the equipment had needed manual intervention since at least September 2011.

Now in issuing the proposed monetary forfeiture, the FCC notes that all stations must ensure that EAS encoders, decoders, attention signal generating and receiving equipment is installed and operational so that the monitoring and transmitting functions are available when the station is operating. When a station is unattended, the rules require stations to use automatic systems to interrupt programming to transmit

an alert. WVID is only staffed from 6 a.m. to 7 p.m. and unattended overnight.

Centro Colegial Cristiano is the owner of WVID FM and was given the customary 30 days to appeal or pay the fine. It also has the same amount of time to submit a sworn statement to the San Juan office certifying that its EAS equipment is now fully operational when the station is unattended. (FCC, RW)

RESCUE RADIO: NPR LABS HOPES TO DEVELOP EMERGENCY ALERT RADIO FOR THE DEAF

A new way to alert the deaf and hard of hearing to oncoming disaster situations may soon be on its way. Amateur Radio Newsline's Heather Embee, KB3TZD, is here with the details:

--

The trade newsletter Radio World reports that NPR Labs personnel hope to begin a project that demonstrates an emergency alerting system for the deaf and hard-of-hearing population in the United States. This, using broadcast radio as the transmission medium.

The end goal of this research is to develop a deaf-accessible radio receiver with a large text display and bright flashing lights. This in turn could alert the user of a potential threat to life and property.

Rich Rarey is the NPR Labs Manager of Strategic Technology Applications. He told Radio World that there are currently some AM radios with aural warnings and FM H-D receivers that have very small text displays but without accessible warning mechanisms. He says that the aim of NPR Labs is to create a receiver that is useful for deaf and hard-of-hearing people, which will also be helpful for alerting the general public as well.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, in Berwick, Pennsylvania.

--

You can read the entire report of this potentially life saving project on-line at tinyurl.com/emergency-alerts-for-the-deaf (RW)

RADIO LAW: PODCAST IS A PATENTED TERM OWNED BY PERSONAL AUDIO LLC

If you are a podcaster or thinking of becoming a podcaster, even on a very small scale, then its worth your time to read an article on who owns the rights to the term podcasting that appeared in a recent issue of the chron dot com business report.

In a nutshell, it appears as if the term podcast is not generic as most people might think. Rather it is a patented system owned by a company called Personal Audio LLC that developed it and other internet streaming back in 1996. And now Personal Audio LLC has decided to assert its rights by going after both podcast content creators as well as podcast distributors.

So far it has won every case that has gone to trial. Even Apple has lost to them. In that case a jury awarded Personal Audio LLC an $8 million judgment plus $4 million in interest for infringing on the company's The Playlist Patent.

So if you run a podcast or are thinking of creating one, you might want to take a few moments to read the story at tinyurl.com/podcast-patent and then talk to a knowledgeable patent attorney before proceeding or continuing your podcasting journey. It could theoretically save you every penny that you have ever will make or have saved. (chron.com)

RADIO LAW: MAN WHO POINTED LASER AT AIRCRAFT ARRESTED

The San Francisco Chronicle reports that an unnamed Oakland resident has been arrested for allegedly shining a laser at two aircraft hovering over the scene of a shooting on Monday, January 21st.

The 40-year-old man is alleged to have aimed a red laser several times at a KGO television helicopter as it flew about 1,000 feet over the scene of the incident in which an undercover Oakland officer was shot in the arm. The man is also alleged to have shined the laser at a California Highway Patrol fixed wing aircraft that was circling at about 3,500 feet. Thankfully no one aboard either aircraft was injured.

Under Title 18 Sub-part 39A, whoever knowingly aims the beam of a laser pointer at an aircraft in the jurisdiction of the United States, or at the flight path of such an aircraft, shall be fined or imprisoned for up to 5 years, or both. (Media News)

RADIO LAW: COALITION PUSHES FCC TO RECLAIM AT LEAST 120 MHZ OF BROADCAST SPECTRUM

The coalition of broadcasters willing to sell spectrum rights has grown to 39 major market stations. This according to comments filed to the FCC by the Expanding Opportunities for Broadcasters Coalition. The trade group also wants the regulatory agency to make the auction as attractive as possible by not limiting wireless bidders or which stations can share spectrum.

The coalition was formed because the principal broadcast trade association, the National Association of Broadcasters, is focusing on making sure the auctions hold harmless broadcasters who are not selling and want to remain in the business. The coalition members don't have

to identify themselves publicly because of the obvious competitive and operational issues related to publicizing their willingness to sell. However they are reportedly pushing the FCC to reclaim at least 120 MHz of spectrum.

The deadline for comments on the FCC's framework for broadcast incentive auctions was January 25th. Reply comments are due in March. (B&C)

EMERGING TECHNOLOGY: ADAPTING RFID TO IDENTIFY AND MONITOR HUMAN ACTIVITY

Australia's University of Adelaide computer scientists are leading a project to develop a novel sensor system to aid senior citizens. One that would help older people to keep living independently and safely in their own homes. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

To accomplish this far reaching goal of aiding the senior citizen community, researchers down-under are adapting radio frequency identification better known as RFID sensor technologies to automatically identify and monitor human activity. This in turn makes it possible to determine if an individual's normal routine is being maintained so that timely assistance can be provided if it is needed.

Although RFID technology has been around since World War II and is in common use today in applications such as anti-shoplifting and vehicle identification at toll road collection points, its potential use in interpreting human activity remains largely in the laboratory.

The chief investigator for this project is Dr. Michael Sheng at he University of Adelaide. He says that work will be among the first few projects in the world conducting large-scale common-sense reasoning in automatic human activity recognition. In addition the system will be low-cost and unobtrusive, and without the privacy issues and intensive monitoring of video surveillance. There will be no need for older people to wear anything or turn anything on or off.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW. In Los Angeles.

--

The technology will be first investigated in a laboratory setting and then in hospital trials with geriatric patients. More aboiut this possible new use for RFID is on line at tinyurl.com/senior-citizen-RFID (Radio Comms E-zine, VK7WI News)

WORLDBEAT: SARL ANTENNA DEFENSE FUND GETS A MAJOR BOOST

The South Africa Radio League's Antenna Defense Fund increased to 37,100 Rand which equates to 4100 U.S. dollars. This, on its way to its 50000 Rand or 6000 U-S dollar target.

The funds first contribution from industry came from the Radio Accessories and Data Modems Company which made 6000 Rand donation to the fund. As previously reported, this fund is to assist South African hams facing antenna restrictions and the like. (SARL)

**

WORLDBEAT: PH00ZWAT ON THE AIR UNANNOUNCED FROM FLEVOLAND

Shortwave radio writer Kim Andrew Elliott advises that a special short term amateur radio station with the callsign P-H-00-Z-W-A-T was active January 26th and 27th UTC time. This from the former Radio Nederlands Flevoland antenna site near the town of Zeewolde in the Netherlands.

The operators were reported to be using relatively low power feeding the various curtain type directional arrays at 120 meters height on the various High Frequency amateur radio bands.

According to Jonathan Marks, G8WGN, there have been several events like this. The first was in February 1985 when special event station PA6FLD took to the airwaves. Video of that operation was included in the ARRL film "The New World of Amateur Radio" produced and hosted by the late Roy Neal, K6DUE. (G8WGN via Critical Distance Weblog)

**

DX

In DX, word that W1USN, AA1M and W1SSR will be on the air stroke PJ2 from Curacao between March 8th and the the 22nd. Their activity will be on 160 through 10 meters using CW, SSB, PSK and RTTY. QSL via their home callsigns either direct or by the bureau.

Members of the Westnet DX Group will once again be active as EJ7NET from the Aran Islands between May 10th and the 15th. Operations will be on all HF bands and modes. QSL via Logbook of thr World or direct to EI6FR. No eQSL or bureau QSLs will be accepted for this operation.

DF7ZS will again be on the air from Aruba between March 26th and April 3rd. Activity will include the CQ World Wide WPX SSB Contest from March 30th to the 31st as a Single-Operator All-Band entry. Some casual

operations will take place before and after the contest on 17 and 12 meters. QSL via his home callsign.

PA0FAW says that he will be operating with the special callsign PF100ZOO between February 1st and the 28th. This activity is to commemorate the 100th anniversary of the Arnhem Zoo. Operations will mainly be CW and SSB, with some digital modes. QSL via PA0FAW either direct, via the bureau or electronically using eQSL. SWL reports are also welcome and appreciated.

TU5KG is once again traveling through the South Indian Ocean on a fishing boat. As in past years, he will be sailing in both the Kerguelen and Crozet Island regions, and may activate the islands if he goes ashore) using his new callsigns. These are FT5XT for Kerguelen and FT5WQ for Crozet. When at sea he will sign TU5KG maritime mobile. QSL via F4DXW, direct only.

Lastly, ten operators from the Oceania DX Group will be operational from Norfolk Island between May 3rd and the 13th as VK9NT. The group plans to have 4 stations covering all bands 80-10 meters on CW, SSB and RTTY. An Online QSL Request Service will be available for bureau and direct cards on ClubLog which is the preferred method or direct to VK2CA.

(Above from various DX news sources)

**

THAT FINAL ITEM: 15 YEAR OLD INVENTOR FROM SIERRA LEONE VISITS MIT

And finally this week, the story of a young inventor who is already leaving a very positive mark on society. Here's David Black. KB4KCH, with the rest of the story:

--

Kelvin Doe is not a ham radio operator but he is being called the wonder kid of Sierra Leone and with good reason. This is because the 15 year old who recently won a trip to visit the Massachusetts Institute of Technology taught himself how to build generators, batteries, and FM radios using parts he found in the trash.

In the best tradition of the maker and hacker movement he does it using things that would otherwise have been thrown out and, with almost no formal training, turns them into useful products.

Doe's inventions are especially valuable in his hometown where, according to Kelvin, the lights there only turn on "about once a week." Kelvin builds batteries and generators to provide electricity for his family. He also uses his home made gear to operate a successful radio station where he is known as DJ Focus.

Kelvin says he hopes to use his radio station as a way for the youth in Sierra Leone to debate about issues in their area. He says he plans to

build a windmill generator to provide more stable electricity for his town.

Kelvin Doe visited MIT as part of the university's Visiting Practitioners Program. The Syllabus allows inventors to use MIT's plentiful resources and perform their own research in the schools labs.

Kelvin Doe became the youngest ever Visiting Practitioner after winning the Innovate Salone Challenge. Innovate Salone runs a program that asks young citizens of that nation to creatively come up with solutions to problems facing their community.

>From the South-East Bureau in Birmingham Alabama, I'm David Black, KB4KCH.

--

In our view, its young people like Kelvin Doe, who will be the ones who will truly advance all of mankind in the years and decades to come, and the world really needs a lot more like him. (StarAfrica.com)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a note to those of you who obtain these newscasts over the 661-296-2407 dial up line. While we have decided to keep it in service a while longer, it will be down for equipment maintenance from Febdruay 4th to the 12th or there-abouts. Parts are getting really scarce for the antique gear used to feed the phone line, so we must do what we can to keep things going. If you are a phone access user, please make alternate arrangements to obtain the newscast until we can return the system to operation.

Also a reminder that the Dayton Hamvention is seeking nominations for its 2013 Radio Amateur of the Year, Technical Achievement, Special Achievement and the Radio Club of the Year awards. The cutoff date to submit nominations is February 15th. More information and official nominating forms are now on-line at www.Hamvention.org/awards.PHP.

For now, with Bill Pasternak, WA6ITF, at the editors' desk, I'm Jim Damron, N8TMW, in Charleston, West Virginia, saying 73 and we thank you for listening.

SB PROP ARL ARLP005
ARLP005 Propagation de K7RA

Sunspot numbers and solar flux barely changed in the past week. Average daily sunspot numbers were 55.7, down slightly from 56.4 the previous week, and average daily solar flux was 98.7, down from 110.7. Geomagnetic conditions continued their quiet spell.

The most active day was Saturday, January 26, when both the mid-latitude and planetary A index was 18, and Alaska's college A index was 46.

The predicted solar flux is 100 for February 1, 105 on February 2-5, 110 on February 6-7, 120 and 125 on February 8-9, 120 on February 10-11, then 115, 110 and 105 on February 12-14, 110 on February 15-18, 105 on February 19-23, 95 on February 24-25, 110 on February 26, and 125 on February 27 through March 1. Flux values peak again at 140 on March 3-4.

The predicted planetary A index is 5 on February 1, then 12, 18, 15 and 8 on February 2-5, 5 on February 6-8, 8 on February 9-10, 5 on February 11-18, 8 on February 19, 5 on February 20-21, then 15, 10 and 8 on February 22-24, 5 on February 25 through March 7, and 8 on March 8-9.

OK1HH believes we will see quiet conditions on February 1-3, quiet to unsettled February 4, mostly quiet February 5, quiet to active February 6, mostly quiet February 7, quiet to unsettled February 8, quiet to active February 9-10, quiet to unsettled February 11, mostly quiet February 12, quiet to active February 13-14, active to disturbed February 15, quiet to unsettled February 16, quiet on February 17-21, active to disturbed February 22, quiet to unsettled February 23 and quiet February 24.

Regular readers know we've been tracking a three-month moving average of sunspot numbers for several years now. The average daily

sunspot number for the three calendar months ending January 31 was 82.8, better than last month, but nothing like the numbers we saw over a year ago in fall 2011.

The three-month averages for the past year, the months ending in February 2012 through January 2013 were 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9, 89.9, 81.2, 82.3, 74.4 and 82.8.

The one month average sunspot number for January was 98.9, the highest monthly average since May and July of last year.

Not much news in reports from readers this week, but N8II of West Virginia reported last Friday, January 25, "Today was pretty decent considering the now double digit SFI and K of 2. I worked RC4HAA on 15 meter CW who was S6-9, and 12 meters opened well to Europe from 1400-1440Z. I got in on the tail end of it with QSOs with SV3, HB9, OM0 and G4.

"Last night at 0200Z I caught T6LG in Afghanistan on 80 CW for a new band/country. He was about S3-S6 and not hearing the USA stations calling him that well (about 10 callers when I was there)."

Glenn Axelrod, N6INM/9 in Mundelein, Illinois wrote: "Are SFI and conditions going to improve by the Spring/Summer? Are we ever going to see numbers again like in '58 in my lifetime? I am 48 years old."

By SFI, Glenn means solar flux index. We have no way of knowing when this cycle will peak, or even if it may have already peaked, but peaks of solar cycles become easier to predict later in the first part (the upswing) of any cycle.

Until recently experts predicted this cycle would probably peak in Spring of 2013, which begins in less than seven weeks. But later predictions moved it out to Fall of 2013, with slightly lower numbers. We had a period of higher solar activity in November and December of 2011, which led some to believe that perhaps the cycle had peaked early. Others believe we may see a double-peak in this cycle, as we have in some earlier solar cycles.

But we should see seasonal improvements in HF conditions in the Spring and again in the Fall. By seasonal, I mean that even if we saw no change in solar activity, just due to the season and position of the Sun relative to us, we see better conditions on the higher frequencies in Spring and Fall than we tend to see in Summer and Winter.

In September through December 2011 the monthly averages of daily sunspot numbers were 106.4, 123.6, 133.1 and 106.4. The previous four months (May through August) saw averages of 61.5, 55.5, 67.2 and 66, so the final third of 2011 showed a dramatic jump in activity. But the next year the numbers dropped back again. The average daily sunspot number for all of 2012 was 82.3. The average for all of 2011 was only 29.9, so that jump at the end of the year

was exciting, and convinced many of us that the cycle was starting to really ramp up. The January 2013 average was a little less than 100.

There is a hypothesis which posits that we may see a grand minimum, decades of depressed sunspot numbers, but of course that cannot be proven by observation in the next decade or two. I hope it isn't true. I hope we see future activity which is strong and surprises everyone, but I wouldn't count on it. I was licensed during the low point between Cycle 19 (the biggest in history) and Cycle 20, and along with many others have been wishing for decades to see another like Cycle 19. But Cycle 19 turned out to be a rarity. But just like Cycle 19 surprised many people, I hope we can be surprised again.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for January 24 through 30 were 60, 44, 55, 60, 52, 63, and 56, with a mean of 55.7. 10.7 cm flux was 103.4, 100.5, 99.4, 97.7, 97.6, 95.4, and 96.6, with a mean of 98.7. Estimated planetary A indices were 1, 6, 18, 6, 4, 2, and 2, with a mean of 5.6. Estimated mid-latitude A indices were 1, 7, 18, 5, 3, 2, and 2, with a mean of 5.4.

http://forums.qrz.com/showthread.php?378114-Contesting-info&goto=newpost

I've never "contested" and now I think I'd like to get involved in this part of our hobby.

I have questions about procedures, record keeping, etc. Any help or links to any web sites that have tutorials would be appreciated.

SIR DAVID JASON

PLEDGES SUPPORT FOR NATIONAL AIR AMBULANCE WEEK 23-30 SEPTEMBER 2013

... One of Britain□s most famous and respected actors Sir David Jason is getting behind the first National Air Ambulance Week. Sir David has come a long way from his days as an electrician; since then he has won many prestigious awards for his work, with roles greatly varying from the comical Del Boy in Only Fools and Horses, to the more serious role of Jack Frost in A Touch of Frost.

Sir David became interested in flying when he was young and has a keen interest in space exploration and all things aeronautical. He started out his own flying experience in gliders and then progressed to helicopters. Because of this keen interest Sir David became involved with the Association of Air Ambulances (AAA) and in March 2009 Sir David was asked, and agreed to lend his support to the work of Air Ambulance Charities by becoming Patron of AAA.

Speaking of his involvement, Sir David said:

"I am honoured to be fronting the very first united National Air Ambulance Week campaign across the UK. It is vitally important that we spread the word that Air Ambulance Charities up and down the UK are not Government funded and rely on public donations to remain operational. Everyday lives

are being saved by the highly skilled Air Ambulance crews. Please give whatever you can spare to support your local Air Ambulance."

The heart of the week long Appeal will be very much encouraging the communities and businesses across the country to support their local Air Ambulance charity. By doing so it will make a huge difference and effectively help to save lives in the community that you live in. Every penny really goes a long way in helping save lives.

NAAW is an initiative put together by the Association of Air Ambulances (☐AAA☐), the trade body which unites not only Air Ambulance charities from across the country, but also operators and ambulance services.The Association gives a national voice to a local service.

Clive Dickin, Director of the Association of Air Ambulances (AAA) said ☐We are delighted to have Sir David Jason as our patron. It really does help us to raise awareness of our members and the essential work that they carry out locally. Our members are encouraging fundraising very much at a grass roots level ☐ for example mufti or a dress up/dress down days at schools, colleges or work places? Fundraising should be fun!☐

☐You may wish to organise your own event ☐ maybe you want to hold a cake sale, fete, or do something more daring like a parachute jump or sponsored swim. Whatever you decide to do, rest assured that all monies raised will stay local, helping to keep your local Air Ambulance flying.☐

To show your support and find out more about how you can help your local Air Ambulance please log onto the AAA website at

http://www.aoaa.org.uk/naaw/

WIANEWS WEEK COMMENCING FEBRUARY 3 2013.

Australia Day Honour for VK3

The Centre Victoria RadioFest

First award for all Victorian National Parks

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING FEB 03 2013.

Australia Day Honour

Congratulations go to Peter Mill VK3APO who has been recognised for years
of community service through the Australia Day Honours.

Receiving the Medal (OAM) in the General Division, he was given the honour
on our National Day January 26, for service to the community, particularly
in the field of radio communications.

Peter VK3APO said, "The honour caught me by total surprise. I never dreamt
of being rewarded in such a way for something I enjoy doing and contributes
in a small way to the efficient use of the radio spectrum."

He earned the honour after decades of voluntary service in the field that saw his early involvement with the planning of the first amateur radio repeaters in Australia.

At Albury in July 1972, he was present when it was decided that a 600Hz shift between the transmitter and frequency be adopted for repeaters on the 2-metre band.

He looks after the vast Amateur Radio Victoria network, is the WIA Repeater and Beacon Coordinator responsible for ACMA applications, plus the maintenance, enhancement and submissions related to the communications for St John Ambulance Australia.

During the years he has had a lot of input on frequency assignments in consultation with users, including those for state-wide or national emergency use and the deployment of new transmission modes.

Peter VK3APO, a WIA life member, has a respect and understanding with the staff of the ACMA, both at a state and federal level.

He listens to other viewpoints before making a decision, is seen as a representative in many forums, and readily shares his knowledge, skill and experience with others.

(Jim Linton VK3PC)

WIA BOARD TALK

President Phil Wait VK2ASD vk2asd@wia.org.au
Vice President Chris Platt VK5CP vk5cp@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Discover - 3 February 2013, 0'42"

Have you prepared for the last weekend in May;
the 2013 WIA AGM and Conference?

Once you've made it to Western Australia, you should take the opportunity to extend your stay and visit the vast country that represents this state, from a million acres in El Questro Wilderness Park, to the Karri Forests in the South West, from the dolphins in Monkey Mia to the Super Pit in Kalgoorlie, from the beaches in Broome, to the wineries in Margaret River, Western Australia is an enormous place and you should take the time to meet it head on.

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

You'll find all the information online at the VK6 conference site, conference.vk6.net

BEST OF ALL registrations are now open for the 2013 Annual Conference and you will also find the online registration form at that conference.vk6.net site.

The Conference is on the last weekend of May, 24th-26th, at the Tradewinds Hotel Fremantle.

The organisers have negotiated a special room price for the conference, and you'll need to mention the WIA Conference at the time of making your hotel reservation with Tradewinds hotel. Their phone number is (08) 9339 8188 and their website is http://www.tradewindshotel.com.au/

There is an early bird discount of $10 per person for registrations made before April 1st, so do get in early to save a few bucks.

The WIA gives Australian radio amateurs and electronics enthusiasts access to an extensive range of locally and internationally sourced publications including those from the ARRL and the RSGB.

Our bookshop is designed to provide you with a simple and secure way to purchase the latest amateur radio books and publications online. We use a secure commercial e-commerce gateway for all credit card transactions and delivery to your door is provided by Australia Post.

Purchasing the latest in amateur radio publications is both secure and easy.

We hold a wide range of the most popular publications suitable for those starting out in the hobby as well as books popular with the more experienced hobbyists.

If there is a particular publication that you are trying to locate that is not listed in our online catalogue, then we would be more than happy to help you. Please send an email with the details of the book you are looking for to bookshop@wia.org.au

Both WIA members and non-members are able to purchase from the WIA online bookshop, however the bookshop provides significant discounts to members of the Wireless Institute of Australia.

>From time to time we do run specials on some publications, so keep an eye on your Amateur Radio magazine each month for details.

This is Mal VK3FDSL for the WIA Bookshop

HAMS ACROSS AUSTRALIA.

The Centre Victoria RadioFest

Yes only a week to go, before this big amateur radio event is held Sunday February the 10th at Kyneton Racecourse, only an hour from Bendigo, Ballarat and Melbourne.

Socialise, see, learn and enjoy. Entry tickets on sale from 9am with the gates opening at 10am. Free for children aged under 13.

Hot breakfast from 8am with food catering throughout the day. Free tea and coffee.

Commercial sellers are in the Traders Hall, there's a Second-hand Sellers Market and a variety of Club Corner displays.

A full display of the Elecraft K-line will be on show thanks to Gary Gregory VK1ZZ, as well as vintage radio and club displays.

The Mini-lectures are Wayne Merry VK3WAM - 'Summit on the Air',
Kevin Forbes VK3UKF - things in orbit,
Drew Diamond VK3XU - homebrewing,
and Alan Devin VK3XPD and Michael Coleman VK3XH - an alternative entry to the Millimetre Wave Bands.

Ready to help you enjoy the event are volunteers from Amateur Radio Victoria and the Central Goldfields Amateur Radio Club.

For full details please visit the website radiofest.amateurradio.com.au

See you at the Centre Victoria RadioFest, next Sunday February the 10th .
I'm Barry Robinson VK3PV and you are listening to VK1WIA.

Wyong Field Day 24th February 2013

In numerology, keywords of the number 21 are communication and society with versatility a positive characteristic as well.

What has this got to do with Amateur Radio?

Well it's just 21 days until Amateur Radio's big day out where Australian amateurs will communicate, socialise and show off their versatility

21 days until Wyong Field Day, 24th February 2013, the largest gathering in the Southern Hemisphere.

Gates open 6.30am - Traders open 9am - Free shuttle bus from Wyong Station

Lucky Gate prizes, Raffles, Lectures, Flea Market and much more

Admission $15 Adults - under 17 free

For more information, please go to the website: www.fieldday.org.au

Wyong Field Day proudly brought to you by the Central Coast Amateur Radio Club

www.ccarc.org.au

DISCUSSION POINT

What use is an f-call?

It occurred to me recently that there are people listening who don't yet have a license of any kind. They may be listening with a shortwave receiver, a handheld, on a local CB repeater who relays the news, or they might have

downloaded the news from one of the many places that it's available.

I've been talking about having an F-call, or Foundation Call, that is, having passed a foundation licence and applied for an amateur radio call-sign. It's a simple step to take and one that is easy to achieve once you know how.

So, if you're in a position to hear what I'm talking about, but you don't have a license, this is for you. And if you do have a license, then I have something for you shortly.

Let me start off with the notion that getting an Amateur Radio License is hard. It's not. Let me say that again. It's not hard to get an Amateur Radio License. You need access to basic learning skills, the ability to understand and follow discussions. You'll need to be able to remember a couple of things and you will need to learn the NATO standard phonetic alphabet. In terms of electronics, there is a little maths, but nothing more sophisticated than a few fractions and some simple addition and subtraction.

There is no requirement for morse code - though I suspect once you find yourself with a license, you might want to start investigating that - I know I am.

In terms of time, depending on how you do it, as a Scout it will take a long weekend, you can do it online, or get a book and teach yourself, or you can go to your local Amateur Radio Assessor who can teach you, generally a weekend of theory and practice, followed by an exam on the next weekend.

You should budget for around $200 bucks for course materials, exam, license application fee and coffee.

Of course that's the beginning of the journey. The Wireless Institute of Australia has much of this information available and there are several other amateur organisations in Australia who will happily help you out.

As promised, If you already have a license, then perhaps it might be helpful to go to a local science teacher, or the local yacht club or community radio station and introduce the concept of Amateur Radio to their midst.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

AMSAT-NA WEBSITE COMPROMISED BY HACKING

AMSAT North America says that on or about January 20th its main web site at www.amsat.org was compromised by a hacker. The attack took the form of the contents of the supporting database, including non-public information, being posted on other publicly available web sites.

According to AMSAT, the main site was developed roughly 10 years ago by a group of AMSAT volunteers under a more benign Internet environment of the time. The team that built that

site is no longer associated with AMSAT, so work has been underway over the last several months to move to a modern, maintainable, and very secure infrastructure. AMSAT says that this recent breach will accelerate that activity.

NAB BROADCAST ENGINEERING CONFERENCE TOPICS ANNOUNCED

The National Association of Broadcasters has released a list of topics for its Broadcast Engineering Conference for its trade show this spring.

For radio broadcasters some of the more interesting programs include Advanced Technologies for Radio; IP for Radio; Spectrum Matters; Technical Regulatory Issues; Radio Receiver Technologies; AM Band Revitalization; Cloud Based Storage and Distribution and Planning for Safety.

Also planned is a special RF Boot Camp called Understanding Radio and Television Transmission. This is designed for personnel who might be unfamiliar with transmission technology but should have a solid acquaintance with it such as station and network I-T personnel or small station management.

The National Association of Broadcasters Convention is slated for April 6th to the 11th in Las Vegas, Nevada.

THE 21ST CENTURY PHONE BOOTH EMERGES IN NYC

In the wake of Super storm Sandy, the humble phone booth took on renewed importance in the Metro New York area.

This as cut-off residents used pay phones to try to connect with one another during and after the emergency.

New York City has officially launched a plan to transform pay phones into giant touch screens that provide city information, emergency broadcasts and local business deals. Located in the same places as existing phone booths, the new platforms are to be operated as a partnership between New York City, Cisco Corporation and City 24/7.

These smart screens were tested in a pilot project but now are live across the city and appear to be very reliable.

Like traditional phone booths they will also serve as a communication tool during emergencies but in a far more sophisticated way. For instance, in the event of another disaster like Hurricane Sandy, the screens will become two-way distress devices that let citizens call for help or receive instructions about how to find safety.

Welcome to the phone booth of the 21st century.

Promoting amateur radio in the Philippines

The inaugural Regional 'Radshow' (Radio Show) is at City of San Fernando on February the 4th to the 9th, and IARU member society the Philippine Amateur Radio Association (PARA) is participating.

The conference-trade event of the National Telecommunications Commission is organised with the Regional Disaster Risk Reduction and Management Council, and Philippine Red Cross.

It aims to create an awareness of radio communications during disasters. Ham Emergency Radio Operators have shown their value during recent typhoons.

PARA has been invited to Radshow to hold examinations for prospective radio amateurs.

Foundation Licence DY exam seminars will be led by Alex Laguisma 4F3LA, who is the PARA Manager for DU3.

Finally if you are lucky enough to be travelling to the USA for DAYTON listen up:-

Reservations and tickets are now available for the 24th Annual Dayton TopBand dinner slated for Friday evening May 17th.

This year's venue is the Presidential Ballroom of the Crowne Plaza hotel in downtown Dayton, Ohio. Social hour is at 6:15 PM and the dinner begins at 7:15 PM. All times are Eastern Daylight. Noted Top Band enthusiast Larry "Tree" Tyree, N6TR, will be this years featured speaker. More is on-line at topbanddinner.com

OPERATIONAL NEWS

Hi This is Ed, VK2JI from the Central Coast ARC and I'm happy to report that all is arranged for the upcoming Mini Contest University at Wyong on the 23rd. of February.

The venue is booked, the equipment arranged, a full program of lectures in place and even the location of the Field Day and MCU dinner set.

The flow of attendee registrations has been very encouraging but we still have room for a few more however only those who registered before the end of January will be entered into the prize draw for the DX handbook.

Full details about the MCU and the Field Day itself can be found on the web at www.fieldday.org.au

73 and "see you at Wyong", this is Ed VK2JI.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Alpine Ski World Championships - Special Event

Every Austrian amateur radio operator has a chance to operate with the special callsign OE2013(???) (their own suffix) between January 15th and February 18th (2013).

Activity is to celebrate the Alpine Ski World Championships 2013 taking place in Schladming.

An award is available for three different classes (Gold, Platinum and Diamond). Each class requires a certain number of special event stations and OE stations logged. Each special event station or OE station will only count once on each band. All bands and the below listed modes may be used; the only exception Packet radio and Echo Link contacts do not count.

The award may be worked in the following modes:
CW, SSB, DIGITAL, MIXED and QRP (max. 10 Watts).

For complete details, visit:
http://wmdiplom2013.oevsv.at/export/sites/wmdiplom2013/downloads/Diplomausschreibung_Englisch.pdf

F6ITD will be on the air stroke FG from Guadeloupe and two islands between February 1st and March 25th. He will be using SSB and the Digital modes during his stay.
Logs will be uploaded to both ClubLog and Logbook of the World.
QSL via his home call F6ITD direct or via the bureau.

Special event station 8 J 6 HAM will be operational from the Island of Kyushu Japan, until March 3rd. Activity is in celebration of the 12th West Japan Ham Fair with operations on all bands and using many modes.
QSL via the JARL Bureau.

AA 9 A will again be active from Antigua between February 11th and the 20th using a new callsign V 24 A.

Operations should be on 160 through 10 meters using CW, SSB and possibly RTTY. QSL via his home callsign AA9A direct or the bureau.

8N119T - celebrating the 65th anniversary of the Tokyo Fire Department (119 is the emergency fire/ambulance number in Japan)
On now until 25 March on all HF bands and modes.

F 6 KOP expected to be active from Uganda as 5 X 8 C between Feb 6 to 18 from a location some 20 Km from Entebbe airport. 5X8CX has announced they will comply to the last IARU band plan on 40 meters for the region with the frequencies of the PSK and RTTY moved to 7040 and 7042 kHz.
For more details see www.5x2013.com

OPERATIONAL AND AWARD NEWS - DATELINE 2013

ZL Jock White Memorial Field Day Contest Sat and Sun Feb 23 and 24.

WW International Museums Weekends June 15/16 and 22/23

First award for all Victorian National Parks

The honour of the first Keith Roget Memorial National Parks Award by operating from all 45 parks, goes to Peter Fraser VK3ZPF.

Award Manager Tony Hambling VK3VTH said this is a great effort that has taken several years of dedication to achieve. Well done and congratulations.

Not only did Peter VK3ZPF operate portable from all national parks, but also worked from 25 of them on the 20m, 40m and 80m bands. In addition he made contact with 25 on mixed bands and 15 on 40m.

So far Amateur Radio Victoria has issued 13 certificates and a few more are expected, particularly after the 3rd KRMNPA Activity Weekend on November the 15th to the 17th.

(Jim Linton VK3PC)

WW SPECIAL INTEREST GROUPS --- FEMALES IN RADIO

BRF-Young Ladies-Award

The international DX-group Brave Radio Friends has instituted the Young Ladies-Award. The award is open to all amateur radio operators and on a heard basis to shortwave listeners under the same rules:

Each YL worldwide only counts once with her personal call sign.

Club call signs or special event stations also count, provided that it is sure from the QSL card that the station was operated by a YL.
In this case, however, each call sign only counts once, even if it was operated by different YL's. QSL cards by YL-SWLs also count towards the award.

There are no time restrictions. Contacts can have been made/heard prior to the start of this award.

The award can only be applied for electronically by e-mail to de3ear@darc.de

There is no award fee.

http://braveradiofriends.weebly.com

(forwarded by Trent VK4TS)

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

NASA TRANSMITS MONA LISA IMAGE TO ORBITER AT THE MOON

As part of the first demonstration of laser communication with a satellite orbiting the moon, scientists with NASA's Lunar Reconnaissance Orbiter program have successfully transmitted an image of the Mona Lisa to the spacecraft from Earth using only a high powered laser.

The digitized image travelled some 240,000 miles form from the Next Generation Satellite Laser Ranging station at NASA's Goddard Space Flight Centre in Greenbelt, Maryland to the Lunar Orbiter Laser Altimeter instrument on the spacecraft. By transmitting the image piggyback on laser pulses that are routinely sent to track the devices position, the team achieved simultaneous laser communication and satellite location. The success of the laser transmission was verified by returning the image to Earth

using the spacecraft's radio telemetry system.

NASA TO ADD EXPANDABLE MODULE TO THE ISS

NASA has officially signed a contract to attach an
inflatable private module to the International Space
Station. Under the agreement announced on January 11th,
NASA will pay $17.8 million to the Nevada based private
spaceflight firm Bigelow Aerospace for the
company's Expandable Activity Module or BEAM which will be
attached to the orbital lab as a technology demonstration.

NASA officials have said that BEAM could be on orbit about
two years after getting official approval. The module will
likely be launched by one of the agency's contract cargo
carriers such as SpaceX or Orbital Sciences Corporation.

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

Hallo everyone, the Old Timers are back again!

This is Clive VK6CSW letting you know that tomorrow, Monday Feb 4th, you can
hear the first of this year's Radio Amateurs Old Timers Club of Australia's
monthly newscasts.

Tomorrow's feature is the story behind the issuing of a US Patent for a
wireless telegraphy system some years before Marconi was born.

The principal HF transmission is on 20 metres on 14,150 MHz USB.
At 0100 UTC it is beamed north from Melbourne for Eastern states listeners
and at 0200 UTC the transmission is beamed westward for VK6 listeners.

Also at 0200 UTC Barry VK6WF will be transmitting on 40m on 7060 kHz LSB.
for WA country listeners beyond our linked repeater system coverage.

South Australian listeners may well be able to copy this transmission, too.

Numerous other local relays occur throughout the day on various HF and VHF
frequencies. To find the times and frequencies for your area please visit
the RAOTC website at www.raotc.org.au

Everyone, RAOTC members and non-members alike, is invited to listen to this
interesting half-hour of Old Timer news, information and stories, and of
course, call backs afterwards from all listeners are very welcome.

So once again, the RAOTC monthly bulletin can be heard tomorrow, Monday
February 4th.

73 from Clive VK6CSW.

W2LPT HONOURED WITH QCWA 75 YEAR AWARD

Quarter Century Wireless Association Palm Beach Chapter member
Seymour "Sy" Levine, W2LPT is to be presented with the prestigious

75 Year Award from QCWA National Headquarters.

W2LPT was first licensed in 1938 in New York City. The
ceremony was to take place at the Veterans Administration
Hospital in Riviera Beach, Florida. In addition to the award, Levine
was also to be presented with a Life Membership in the National QCWA.

WW SPECIAL INTEREST GROUPS --- RADIO SCOUTING

Scout radio hams identified

Helping to further raise the profile of amateur radio at the Jamboree On
The Air, held each October, and at another gatherings of scouts, is the
identification of those already licenced.

The latest to join this recognition is the Boy Scouts of America (BSA) that
has a special patch to be displayed on their uniform.

It follows the Scouts Australia initiative, which has a badge on the right
sleeve of the uniform. A similar change has happened in The Netherlands.

Now all BSA youth members and adult leaders who also hold a licence are
eligible to wear the patch, with the words 'Amateur Radio Operator'.

The American scouts have long given a similar recognition, starting with
the Wireless Merit Badge in 1914 and moving to the Radio Merit Badge in 1924.

The latest move in Australia, The Netherlands and now USA readily identifies
the achievement and promotes the hobby, with the first exposure to it for
many being through the scouts.

(Jim Linton VK3PC)

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

WICEN involvement in flooding

The Queensland flood disaster continues, but as that state begins its big
clean-up and recovery phase, a picture of emergency communications provided
by radio amateurs is starting to emerge.

Initial reports from Ewan McLeod VK4ERM, the WIA National WICEN Coordinator,
are that HF links were requested by Queensland's Water Police from Brisbane
to Cairns.

Other WICEN help was given to the Townsville and Rockhampton regions pending
repair of Telstra of its fibre optic cables to north.

Widespread power and communication disruption will take a number of days
work by repair crews.

No more is immediately known about WICEN and its emergency role, but this
should be learnt in coming days.

At least six people have died in Queensland. Others are missing.
Many thousands are homeless and sheltering in relief centres, while some
towns remain inundated and isolated.

The weather system, ex-tropical cyclone Oswald that caused record flooding
in many areas, has moved south to affect parts of New South Wales.

(Jim Linton VK3PC, Chairman IARU Regon 3 Disaster Communications Committee)

GAREC 2013 in Switzerland

The Global Amateur Radio Emergency Conference (GAREC) is the premier annual
event attended by those with an interest in amateur radio providing emergency
communications during training exercises or in response to disasters.

Since it was first held in 2005, the conference has taken place in all three
IARU regions and is open to all emergency communications groups.

GAREC returns to IARU Region 1 to be held in Zurich, Switzerland, between
the 25th to 28th June, preceding the famous HAM RADIO exhibition in Friedrichshafen,
Germany, so people can enjoy both events.

General information on GAREC 2013 and registration details are now available
at www.garec2013.ch/

Among the draft topics are the relevance of Amateur Radio Emergency Communication
in the '1st World', and the HAMNET high speed data network, along with IARU
regional reports and presentations from groups with recent disaster relief
communications operations.

The past GAREC presentations are now available at www.iaru.org/garec.html

(Jim Linton VK3PC, Chairman, IARU Region 3 Disaster Communications Committee)

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh 'and always if the news room is to read your
item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

SARL NEWS SUNDAY 03 February 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we announce that the key of Franz Taschl, call sign ZS6EU, went silent on 11 January 2013 in Austria.

We extend sincere condolences to the family and friends of Franz.

(PAUSE)

IN THE NEWS TODAY:

WHERE HAVE ALL THE YOUNG RADIO AMATEURS GONE?

THE SARL REGULATORY WORKGROUP HELD ITS FIRST MEETING TO PREPARE COMMENT ON TWO REGULATORY ISSUES

SARL AWARDS AND HOW TO NOMINATE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

WHERE HAVE ALL THE YOUNG RADIO AMATEURS GONE?

The SARL is planning a special feature between 09:00 and 10:00 on Saturday 23 February to celebrate the 2013 Youth Sprint which will run from 10:00 - 12:00 CAT but to do this we need your voices. You need to tell us why you became and radio amateurs and how you are enjoying. Tell us what is cool about being a radio amateur?

The SARL will be making voice recordings between 13 and 16 February. Send your details and telephone number to youth@sarl.org.za and tell us which of the evenings between 20:00 and 21:00 you will be available.

Club chairmen don't let your club be left out in the cold! Encourage your young members to share their passion.

THE SARL REGULATORY WORKGROUP HELD ITS FIRST MEETING TO PREPARE COMMENT ON TWO REGULATORY ISSUES

The SARL Regulatory Workgroup (SRWG) held its first meeting on Thursday last week to discuss the SARL's comments on two government gazettes covering regulatory issues that affect amateur radio. The SRWG discussed the second draft of the Frequency Migration Regulations and is currently formulating the SARL response to ICASA. The frequencies in question are in the SHF region used for amateur satellites, amateur Wi-Fi applications and repeater linking.

The Workgroup also scrutinised the draft table of frequency allocations and will petition ICASA to consider expansion of the 160 metre band. It is still too early to put forward a 5 MHz allocation as this will be on the agenda of the WRC15. The SARL will however continue with it request for the allocation of two channels in the 5 MHz range for experimental and test purpose with the objective to support the WRC15 agenda item with the results of the propagation studies. In a recent email from ICASA they indicated that they are currently going through the licensing approval process. Stay tuned for details on SARLNEWS and on www.sarl.org.za. The Workgroup also came across some minor anomalies which will be pointed out in the SARL's comments to ICASA.

The final documents, once completed will be made available on www.sarl.org.za, select Amateur Radio Today and follow the links from there to the SRWG page.

On a general note the SRWG also discussed interference caused by radio amateurs in the top end of the 10 metre band. The frequencies between 29,7 and 30 MHz are shared with a number of other users.

This portion of the band is available to radio amateurs for disaster communication exercises and during real emergencies. Please do not use this portion for general communication as it is shared with other users who are restricted to very low power. Radio amateurs may not cause interference. Please show the real amateur spirit.

GAREC 2013 TO BE IN GENEVA JUNE 25 - 28

IARU Region One has announced that this year's Global Amateur Radio Emergency Conference or GAREC 2013 will be held in Zurich, Switzerland from June 25th to 28th. Among the draft topics to be discussed are the relevance of Amateur Radio Emergency Communication in the '1st World,' and the HAMNET high speed data network. There will also be presentations from the three regions of the IARU and talks by groups with recent experience in disaster relief communications.

General information on GAREC 2013 including information on the venue, registration fees and the tentative agenda and the registration forms is now available on line at www.garec2013.ch. This website will be

updated frequently to keep all updated with the latest news and programme changes. You may also email to info.garec2013.ch for updates. It should be noted that this year's conference has been timed to precede Europe's largest amateur radio exhibition, HAM RADIO in Friedrichshafen. Germany. This is so that people can attend both events.

SARL AWARDS AND HOW TO NOMINATE

The closing date for nomination for SARL awards is 15 February 2013. Details of the various awards were published in SARL Newsletter sent to all members by email in January 2013.

How to nominate?

The Council of the SARL and the SARL Awards Manager will meet on 22 and 23 February for the annual strategy indaba. This is when the nominations are evaluated. When submitting a nomination, please give as much detail as possible. Remember that the persons reviewing the nomination may not know the person and what he or she has achieved. It is up to the nominator/club to convince in their submission that the nominee is worthy of the award. Rather submit too much than too little information.

Mail nominations as soon as possible, but not later than 15 February, to secretary@sarl.org.za. By sending in nominations early will give the secretary an opportunity to ask for more details should this be required. The awards will be presented at the annual awards dinner on Saturday 27 April 2013 in Gauteng.

ANOTHER SOUTH AFRICAN ELECTED TO THE FOC

Only the third South African has been elected as a member of the 'First Class CW Operator Club'.

The honour befell Raoul Coetzee, ZS1REC, last week when he was welcomed as a member of the elite club of Morse code operators. The international club, which was founded in 1938, has only about 500 members world wide. Only two other South African operators are members of the club, they are Vide Le Grange, ZS1EL, and Al Smith, ZS1AAX.

To become a member of the club is really an exceptional achievement and not an easy task. Congratulations to Raoul. For m&#xFFFD;re information on this Morse code club, and how to become a member, visit www.g4foc.org/.

The SARL welcomes the following radio amateurs as new members to the league: Harold Krause, ZS6CAR; Marthinus Venter, ZS6TIN; Christo Pietersen, ZU6CAT; Rayne Meyer, ZS1RM. SARL membership now stands at 1 677.

We trust that you will have a long and happy relationship with us.

CONTEST NEWS

The February leg of the 2013 SARL National Field Day will be run next weekend, starting at 10:00 UTC on Saturday 9 February and ending 24 hours later. Stations may work CW, SSB and digital modes on 160 to 10 metres, excluding the WARC bands, and the exchange is the number of transmitters, the class of participation and the provincial abbreviation.

There are six classes of participation to choose from for the weekend. This is an ideal weekend for a Club outing and operating with portable power.

The rules have been changed for 2013, so read the new rules in the 2013 SARL Contest Manual.

CLUB NEWS

The Bloemfontein ARC is preparing for RAE classes for the May RAE. Persons interested in attending the classes can contact Warren, ZS4W, by e-mail to zs4whiskey@mweb.co.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to continue at low to very low levels. None of the currently visible sunspots are actively flaring.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 44.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 03 February - Today - AWA CW Activity ends at 10:00 UTC. 9-10 February - SARL National Field Days. 15 February - Last day for submission of nominations for SARL awards to secretary@sarl.org.za. 23 February - SARL Youth Sprint 10:00 to 12:00 CAT with a special event starting at 09:00.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission

on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

WICEN Involvement in Queensland Flooding:

Posted: 02 Feb 2013 04:34 AM PST
http://www.eham.net/articles/29703

The great flood disaster in the Australian state of Queensland continues, but as it begins its big clean-up and recovery phase, a picture of emergency communications provided by radio amateurs is starting to emerge. Initial reports from Ewan McLeod VK4ERM, the WIA National WICEN Coordinator, are that HF links were requested by Queensland?s Water Police from Brisbane to Cairns. Other WICEN help was given to the Townsville and Rockhampton regions pending repair of Telstra of its fibre optic cables to north. Widespread power and communication disruption will take a number of days work by repair crews. No more is immediately known about WICEN and its emergency role, but this should be learnt in coming days. At least six people have died in Queensland. Others are missing. Many thousands are homeless and sheltering in relief centres, while some towns remain inundated and isolated.

HamRadioNow: Ski Break

Posted: 02 Feb 2013 05:04 AM PST
http://hamradionow.tv

HamRadioNow Episode 53: Ski Break

Or "Ski & Scan" might be a more radio-oriented title. Gary and XYL Cyndi KD4ACW took a week off to go skiing. It wasn't a big ham radio event, but Gary did scan the resort's communications as he slid down the mountain, and he and Cyndi used FRS to talk to each other. Cyndi plopped a Go-Pro-ish camera on her helmet, and Gary took advantage of that to do an impromptu HamRadioNow episode.

kb8zun@gmail.com

Dayton Hamvention on D-Extra

X-Reflector XRF038 Charlie

Press Release

Lorain County Ohio ☐ After a successful launch of the D-Extra X-Reflector XRF038 the Northern Ohio Digital Interconnect Group will provide XRF038C for the Dayton Hamvention.

Both D-Extra XRF038C and D-Plus REF038C will be available and open for all linking, traffic and activities surrounding the Dayton Hamvention. This will give more options for D-STAR users as well as a larger global audience for the Hamvention. Non D-STAR assets will also potentially be linked to XRF038C allowing for an even greater exposure for the Hamvention and D-STAR.

XRF038 was put into service early in 2012 in response to a large number of D-STAR users asking that a more open & experimental friendly system capable of linking outside the D-STAR community be made available. NODIG initially moved the Ohio Wide D-STAR Net to XRF038A to gauge performance and participation. The OWDN & NODIG experienced an overwhelming positive response and increase in performance paving the way for a global roll out.

For more information on the Dayton Hamvention please visithttp://www.hamvention.org/

Or our Facebook page
https://www.facebook.com/pages/Northern-Ohio-Digital-Interconnect-Group/145438878885464

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, WK3N, AA4NC, N4AA & QRZ DX, N4JF, KH6BZF, WB7DXA, K8AV, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IZ0EGB, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PY3DF, RSGB IOTA Web Site, Sixitalia Weekly, SM7GIB, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-Jan, through Sunday, 3rd-February there were 229 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2013 FD PACKET NOW AVAILABLE. The ARRL states, "It's that time of year again -- time to start gearing up for ARRL Field Day, June 22-23, 2013! ARRL's flagship operating event -- always held the fourth full weekend

in June -- brings together new and experienced hams for 24 hours of operating fun. For the complete announcement, go to: http://www.arrl.org/news/view/2013-field-day-packet-now-available For the FD packet: http://www.arrl.org/field-day

3D2/R, ROTUMA. Antoine, 3D2AG, will once again be active as 3D2AG/p from Rotuma (OC-060) between late March/April. He states, "Now looking for spare parts for my 14-years-old ICOM 706-MKII, which is faulty (no TX). If anyone can help please contact me, so that I can be operational on 6m from Rotuma. Thanks in advance." His E-amil address is on QRZ.com. He also mentions, "QSL direct only to Fiji address. Please include at least two green stamps or one IRC with AIRMAIL SAE for first class return postage. After intense lobbying by 3D2AG, IRCs are now exchangeable at the normal UPU rate in Fiji. Please don't forget to put an airmail label on your return envelope, and write your country name clearly."

5X, UGANDA (Reminder). Members of the F6KOP team are expected to be active as 5X8C between February 6-18th, from a location some 20 Km from Entebbe airport.

CORRECTION/OOOPPPSS DEPARTMENT. In OPDX.1097, under "NH0, MARIANA ISLANDS (Update)", we mentioned that YL Miho/JJ2VLY was Joe's/JA1LZR XYL; this is incorrect. It should have read: "JJ2VLY (YL Miho (Yutaka's [JQ2GYU] XYL, also WS2M)".

CT9, MADEIRA ISLANDS. Operators Jozef/OM3GI, Tibor/OM3RM and Julius/OM7JG will be active as CR3A during the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. QSL via OM2VL.

D4, CAPE VERDE (Correction/Update). Mats, SM7GIB, will be active as D44TIB from Cape Verde (AF-086) until February 7th (not between February 25th and March 8th). Activity will be holiday style using a K3 into a wire vertical for 160-10 meters. Look for him to be on the radio in the early mornings and evenings - on CW. QSL via his home callsign.

E6, NIUE. Operators Alan/VK4WR and Graeme/VK4FI will be active as E6RQ and E6SG, respectively, from Niue (OC-040) between March 22-29th. Their activity will focus on 6 meters as well as some HF operations. QSL both callsigns via VK4FI.

FG, GUADELOUPE. Oliver, F6ARC, is now active as FG/F6ARC from Guadeloupe (NA-102) until February 14th. Activity will be holiday style with a focus on 40 and 30 meters CW, using wire antennas. QSL via FE11DX, by the Bureau or direct (see QRZ.com).

FS & PJ7, ST. MARTIN AND SINT MAARTEN. Andy, DK5ON, will be active as FS/DK5ON from French St. Martin (NA-105, WLOTA 0383) and PJ7/DK5ON from Dutch Sint Maarten (NA-105, WLOTA 0711, DIFO FS-001) between March 10-29th. Activity will be on 80-6 meters, including 17/12 meters, using SSB, RTTY and PSK. QSL via DK5ON, direct or by the Bureau. No eQSL.

IOTA NEWS.....
AF-019. An international team of operators will be active as IG9Y from

Lampedusa Island between October 17-30th. Operators mentioned are Khalid/A61BK, Gianni/IT9BUN, Don/JH5GHM, Dale/N3BNA, Frederic/ON4LG, Frank/ON9CC, Aurelio/PC5A, Romeo/S52RU, Peter/S54W and Drago/S59A. Activity will be on 160-6 meters using CW, SSB, and RTTY, with four stations on the air. The team will be in the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. QSL via ON4LG. An OQRS will be available for direct and Bureau cards. Visit their Web page at: http://ig9.ii9p.com

AS-085. Members from the Korea Contest Club will be active as D85C from Chongsan Island (WLOTA 1602) between June 6-9th. More details to be forthcoming.

EU-120. Operators Terry/G3VFC, Keith/M0KJA, Fred/M0RFD, Rob/M0VFC, Dave/M6KOM, Maureen/M6VFC and Richard/2E1EVK will be active as GX5MW/p from the Isle of Wight (WLOTA 2985) between March 16-23rd. Activity will be on all HF bands and modes. QSL via M0RFD, direct or by the Bureau.

NA-143. Joe, K5KUA, will once again operate portable from Galveston Island (USI TX001S, Galveston County, TX) in the Gulf of Mexico between February 15-17th. Activity will be holiday style on the HF bands. QSL via K5KUA, direct or by the Bureau.

OC-129. Chris, OE9MON, is now active as DU6/OE9MON from Panay Island. He is there on holiday with his family, and the length of his stay is not known. Activity will be on 160-6 meters using wire antennas. QSL via LZ1JZ, direct, by the Bureau or LoTW.

OC-245. Rohadi, YB6AR, and several other operators will be active from Bunta Island between February 15-17th. Operators are expected to use portable callsigns (YB6AR/P etc). Activity will be on 40/30/20/15/10 meters using SSB and RTTY. They plan to use five transceivers with 500 watt amps. All their antennas are homebrew (verticals, yagis and Spiderbeam). QSL via the operator's instructions.

ISWL CALLSIGNS (For February). The following ISWL club callsigns will be used throughout the month of February 2013:

GX4BJC/A - Operated from Bream, in Gloucestershire, by Chris, G0SDD. (/A WAB Square SO60, England, IOTA EU-005 and WLOTA LH-1841)

MX1SWL/A - Operated from Hartford, in Cambridgeshire, by Tom, G3RPV. (/A WAB Square TL27, England, IOTA EU-005 and WLOTA LH-1841)

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

J8, ST. VINCENT. Dave, G3TBK, will once again be active as J88DR between February 14th and March 11th. Activity will include the ARRL DX CW Contest (February 16-17th) and the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/Low-Power entry. He will also be in the RSGB's 75th Commonwealth Contest (March 9-10th). Activity outside of the contest will be on all HF bands, especially 30/17/12 meters, using CW, SSB and RTTY. QSL via G3TBK, direct or by the RSGB Bureau.

JD1, OGASAWARA (Update). Three JA operators will be active from Chichijima Island (AS-031) in the Ogasawara group between April 28th and May 5th. The callsigns to be used are JD1BLC (Operator Toshi/JP1IOF) and JD1YBT (World Wide Club station callsign). Activity will be on 160-6 meters using CW, SSB, RTTY and FM. QSL JD1BLC via JP1IOF direct or by the Bureau to JD1BLC. QSL JD1YBT via JP1IOF direct or by the Bureau to JD1YBT. Also, LoTW and an OQRS (via ClubLog) will be available for both callsigns at:
https://secure.clublog.org/logsearch/JD1YBT
https://secure.clublog.org/logsearch/JD1BLC

KP2, U.S. VIRGIN ISLANDS. Operators Philip/KT3Y, Frederick/K9VV and Robert/WP2XX will be active from the KP2M rental shack on St. Croix Island (NA-106) during the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. QSL via AI4U (DIRECT ONLY) OR LoTW. NO BUREAU QSLs.

KP2, U.S. VIRGIN ISLANDS. Look for operators and callsigns Munekazu/JI3DNN (KP2/KI3DNN), Yoshiaki "Aki"/JR3QFB (KP2/W3JH), Yoshiro/JL3SIK (KP2/K2JA), Takeshi "TAKE"/JS6RRR and KP2/NH2KY (Club callsign) to be active from the U.S. Virgin Island between March 13-19th. Activity will be on 160-6 meters using CW, SSB, RTTY, PSK31 and JT65A. Check QRZ.com for QSL details.

KP2, U.S. VIRGIN ISLANDS. Before his JD1YBT and JD1BLC Ogasawara operations (see JD1 above), Toshi, JP1IOF, will be active as WH7P/KP2 from U.S. Virgin Islands between April 3-9th. Activity will be on all bands and modes. QSL via JP1IOF, by the Bureau or direct. Also, LoTW and an OQRS (via ClubLog) will be available at: https://secure.clublog.org/logsearch/WH7P/KP2

LX, LUXEMBOURG. Philippe/LX2A and a team of operators will be active as LX7I from Eschdorf during the CQWW WPX RTTY Contest (February 9-10th) as a Multi-2 entry, and the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. QSL via LX2A. QSL via LX2A. Visit the following Web page at:
http://www.lx2a.com

MJ, JERSEY. Richrad, M5RIC, will be active as GJ2A for the ARRL DX SSB Contest (March 2-3rd). QSL route (See http://www.qrz.com/db).

NODXA'S MEMBER RTTY ACHIEVEMENT. The ARRL RTTY Honor roll contains 124 callsigns. Northern Ohio DX Association (NODXA) member "Scotty", WK3N, joined their ranks this week with his approved submission bringing him a total of 334 confirmed on RTTY. Scotty is the second NODXA member to achieve this status, Don, K8MFO, was our first.

QSLS RECEIVED VIA THE BUREAU: 4O/OK1IEC, 4O/OK4ZW, 5R8HL, 5R8IC, 6W1RY, C50C, CN2DJ, ET3TK, EY8/F4EGS, FG/F6BFH, FG4NO, FG8NY, FK/F4BKV, FO8RZ, FR1FF, FY/F6CKD, HB0/F5PAC, HB0/OK1XD, HB0/OK6DJ/P, HR1RTF, IS0R, JW/F8DVD, KP2/AA1TR, MU/F5CWU, MU/F5NHJ, OH0/WS4T, OX/OK1JST, OX4OK, PJ4L, SV9/OK1AMM/P, TB0DX, TC03W, TC07DX, TC098A, TJ3AY, TK/F8DZY, TK12IOTA, TO5A, TO11A/P, TT8PK and ZA/OK1MBZ

T6, AFGHANISTAN. Eric, K9GY, will be active as T6MO from the Helmand Province (Grid MM21) during the ARRL DX CW Contest (February 16-17th) as a Single-Op/Low-Power entry. He states that he will probably be active during the first 28 hours or so, and it may be a Single-Band effort. QSL via LoTW or to K9GY (see QRZ.com) direct or by the Bureau. ADDED NOTE: Eric will also be active during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Single-Band (possibly 15 or 10m)/Low-Power.

TX5, CLIPPERTON ISLAND (Update). The March TX5K Clipperton Island DX-pedition Web page now has a new URL: http://tx5k.org
The current updated list of operators are Bob/KK6EK (Organizer, Expedition Leader), Christian/DL1MGB (Co-organizer), Walt/N6XG (Logistics), Ed/KE3D, Igor/US0VA (Doctor), Robert/SP5XVY, Dietmar/DL3DXX, Dave/WJ2O, Luis/XE1L, Mathias/DJ2HD, Mike/WA6O, Yann/F1NGP, Andreas/DL5CW, Roman/US5WDX, Rick/KF4ZZ, Heye/DJ9RR, Lance/W7GJ (6m), Tom/DL5LYM, Jef/DD2CW, Giovanni/I5JHW, Ken/OZ1IKY, Markus/DJ7EO, Gerhard/DJ5IW and Carlos/NP4IW (Logistics). Louis-Philippe Loncke will be there for documentation. There are four honorary team members: Chod Harris/VP2ML (SK - DXpedition Dedication), Yasuo "Zorro" Miyazawa/JH1AJT (Honorary DXpedition Leader), Conrad Limbaugh (Expedition Dedication) and Dan Gotshall (Honorary Expedition Leader). The "Technology Development" team members are: Bob/N2OO is the QSL Manager, Peter/W6OP and Dean/N7XG are Software Development, Rich/KY6R (Social Media),

Alan/AD6E (Satellite Communications), Dean/N6BV (Radio Propagation Modeling) and Felipe (Internet Data). Regional Coordinators (pilots) are: Gary/DF2RG (Chief Pilot, Germany), Marcus/DL9RCF (Germany), Stan/KH6CG (Hawaii), Col/MM0NDX (Scotland), Cesar/PY2YP (Brazil), Andre/V51B (Namibia), Bill/VK4FW (Australia), XE2HWJ (Mexico) and Rex/NR6M (USA). There will be four members on the Scientific Program team, and one is a ham - Alain/F6BFH. The vessel Shogun will leave from San Diego on February 19th. Schedule/Tenative activity dates are between February 28th and March 10th.

V6, MICRONESIA. Mike, WB7DXA, will be active as V63DXA in Micronesia between February 21st and March 21st. While there, he plans to operate from the islands of Kosrae (OC-059), Pohnpei (OC-010) and possibly Mokil and Pingelap Atolls (OC-226). He informs OPDX [edited], "I am sailing on a boat with a marine radio. The captain believes it works on 20 meters and possibly some additional bands. He isn't a ham so he can't try it out. So I am hoping that it works out when I get there. As it stands I arrive into Kosrae on February 23rd. Then leave Pohnpei on March 22nd. I plan to operate from Kosrae for about a week and then on to the Atolls (OC-226) on the way to Pohnpei, but it all depends on WX and other factors. As far as bands, I think 20 meters phone is what I am looking to operate mostly. I'll bring a key for CW just in case I can get it going. The other bands will need to be determined after I get there." Mike plans on using LoTW as the primary QSL vehicle, but you can send cards direct to him or by the Bureau.

VP2, MONTSERRAT. Will, AA4NC, will be active as VP2ME from Montserrat (NA-103, WLOTA 1475) between February 13-20th. Activity will include an entry in the ARRL CW DX Contest (February 16-17th). Outside the contest, he will be on RTTY, CW, and SSB mainly on the 30/17/12 meter bands. QSL via LoTW.

VP2, U.S. VIRGIN ISLANDS (NA-106). Matt, K0BBC, (along with his XYL Valeriw, K0VAL) will be heading south and will once again be active as KP2/K0BBC from the Hull Bay Cottages on St. Thomas Island (USI VI004S) between February 26th and March 5th. Activity will be holiday style on the HF bands. Matt plans to be active in the ARRL DX SSB Contest (March 2-3rd). QSL via K0BBC, direct, by the Bureau or LoTW.

WP2, U.S. VIRGIN ISLANDS (NA-106). Operators Stan/K8MJZ, Fred/NP2X, Robert/WP2XX and possibly others will be active from the Island Villa Contest Club WP2Z superstation on St. Croix during the CQWW WPX SSB Contest (March 30-31st) as a Multi-Single entry. QSL via KU9C.

WRTC-2014 NEWS RELEASE #15 (WRTC2014 Names Judging Committee). An excerpt from a press release dated January 31st states: "WRTC2014, Inc., host of the 2014 World Radiosport Team Championship competition is pleased to announce the judging committee that will be responsible for certifying the results of the competition. David Sumner, K1ZZ, will serve as Chief Judge leading the committee of Nodir Tursoon-Zadeh, EY8MM, Don Field, G3XTT, Dan Street, K1TO, and Dick Norton, N6AA." To read the whole press release, go to: http://www.wrtc2014.org/wrtc2014-names-judging-committee

XR2, CHILE (Chilean Lighthouse). Manuel, CE2UNE, will be active as XR2BH from the Puerto Aldea (Caleta Hornilla) Lighthouse (NAC 133, ARLHS CHI-110, Admiralty G1896.20) between February 20-24th which also includes the "Weekend South American Lighthouses" event (February 22-24th). The beacon is located in Tongoy Bay, near the village of Puerto Aldea, Elqui Province, Coquimbo Region, Chile (WW Loc. FF49EQ). QSL XR2BH via CE2AA (QRZ.com).

XT, BURKINA FASO (Update to OPDX.1097/Callsign Change). Members of the "Italian DXpedition Team" will be active as XT2TT (not XT1T as first announced) from Ouagadougou (Grid Loc. IK92fi), Burkina Faso, between February 21st and March 6th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL I2YSB for direct QSLs and IK2CIO for Bureau QSLs (no E-mail request please). A OQRS will be available for direct cards only. Now available on their Web page is a survey for both bands and modes needs. The official Web site is: http://www.i2ysb.com/idt
Official forum is: http://www.hamradioweb.org

XU, CAMBODIA. John, KF0RQ, will once again be active as XU7ACQ but from a new location (east and west Cambodia) between February 10th and March 18th. Activity will be on 80-10 meters using CW, SSB and the Digital modes. He is still looking for Delaware and South Dakota for his WAS. QSL via KF0RQ. Online logsearch is available at ClubLog.

Z8, SOUTH SUDAN (Update). Massimo, IZ0EGB (ex-9L1MS, EL2GB), informs OPDX that he is now living in Juba, South Sudan, and plans to be on the air as Z81B soon. He will be using 600 watts into wire antennas for 40-6 meters, and operate on SSB and the Digital modes. Massimo adds that the equipment is installed already and was expected to be on the air this past week. Occasionally, Massimo will operate from other locations using only 100 watts into a T2FD (a terminated, tilted and folded dipole) operating SSB only. QSL via IZ0EGB: Alessandro Colasanti, Via Pia Nalli 30, 00134 Rome, Italy. Massimo states, "Colleagues should please avoid sending IRC coupons. Alessandro will periodically upload my log onto LoTW and ClubLog."

ZF, CAYMAN ISLANDS. Dave, N4QS, will be active as ZF2DP from Georgetown, Grand Cayman (NA-016, WLOTA 1042), between February 8-12th. Activity will be from the ZF1A club station and running low power using his Elecraft K3. He plans to be active during the CQ WPX RTTY Contest (February 9-10th), and will also operate some CW and SSB on the days before and after the contest -- primarily on the WARC bands. He will attempt to upload his log to ClubLog in real-time using the N1MM Gateway. You can see if you are in his log by clicking here: https://secure.clublog.org/logsearch/ZF2DP QSL via LoTW or his home callsign.

ZS8, MARION ISLAND. There has been an announcement by various sources that a second operator will be active from Marion Island. Pierre, ZS1HF, is reporting that Carson, ZR6CWI, has been appointed as the Space Weather Engineer on Marion Island between April 2013 and May 2014. Carson has just completed a one year work assignment at the SANAE (South African National Antarctic Expedition) Antarctic Base and is expected to be back in Cape Town on February 19th. Carson informed Pierre that he will be active from Marion Island over this period. No callsign has been allocated yet. His QSL Manager will be ZS1HF/ZS8M. At this stage SSB only. No further

info is available. Stay tuned!

All members are asked to attend and new members interested in joining the group are also very welcome to come along. For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter.

DX News

The well-known DXers Bob W7YAQ and Bill N7OU will operate from two Pacific DXCC entities in the coming weeks. Firstly they will be in Fiji as 3D2NB and 3D2OU respectively from 2 - 7 February. They then travel on to Rotuma Island where they will sign 3D2RX and 3D2RO from 8 - 21 February. QSLs go via the home calls.

Jack F8AEJ will be on holiday in Togo from 4 February until 15 March. While there he will operate as 5V7JD. QSL to his home call.

Gerry EI8CC reports that due to storm damage he is off the air as 7P8CC in Maseru, Lesotho. Last Tuesday night the roof of his shack suffered serious damage when part of a tree fell on it during high winds and heavy rain. He hopes that repairs can be done soon and that he will return to the airwaves before long.

Other Lesotho stations on the air at present include 7P8RI and 7P8ZM. A new arrival this week was N2DE who will be there for a few days and is on the air as 7P8US.

Prefix hunters will be interested in the special event station PF100ZOO. This will be active until the end of the month. It is to celebrate 100 years of the Burgers Zoo in Arnhem. The operator and QSL Manager is PA0FAW.

EI13CLAN

Any member wishing go on air with EI13CLAN should contact Dave EI6AL at dave.ei6al /at/ gmail.com or by phone on 0861000000.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Sussex Co. Seeking Ham Radio Volunteers:

Posted: 03 Feb 2013 01:42 AM PST
http://www.eham.net/articles/29704

The Sussex County Emergency Operations Center is seeking amateur radio operators interested in volunteering during disasters and other large-scale events. The Sussex County Emergency Operations Center is seeking amateur radio operators interested in volunteering during disasters and other large-scale events. An informal meeting for amateur radio operators will be held at 7:30 p.m. on Feb. 19 in the training room of the Sussex County EOC at 21911 Rudder Lane in Georgetown.
During the meeting, Director Joseph Thomas will describe the duties of the emergency center and explain how volunteer radio operators serve critical roles in crisis situations. Amateur radio operations, or "hams," regularly support the EOC by relaying field information like weather conditions, property damage and other observations that are vital to supplying a coordinated emergency response, particularly when conventional means, such as telephone and Internet service, are unavailable.

In my day 'youth' was interested in sex, booze, and rock-and-roll.

I guess it still is, and DXing doesn't register on the radar.

LOL

Me neither...

GB2RS NEWS

Sunday 3rd February 2013

The news headlines:

Centenary Challenge

GM100RSGB on the air this week

Regional club of the year deadline extended

Amateurs may have heard or worked G100C last weekend. This is a special callsign that has been granted to the RSGB's GR2HQ Team that provides the RSGB's HQ entry to the IARU Contest each year. The G100C callsign, or its variant for the other UK DXCC prefix areas, will be operated on many weekends during 2013 by different members of the Team. The next time is the weekend of 9 and 10 February. Details of the Centenary Challenge have been put onto the RSGB Centenary website, www.rsgb.org/centenary/. Certificates will be issued to the stations with the most number of different Region or band contacts for the Centenary station, Gx100RSGB, and there are also certificates for the leading stations in terms of band or mode slots for G100C, GM100C, etc.

The special event callsign celebrating the RSGB Centenary continues its stay in Region 2 this week. Today, 3 February, Dundee ARC will be on the air from Monikie[pronounced Moneekee] in Angus and will run both HF and VHF stations. On the 4th the station moves to Perth, with HF operation from the GMDX Group. The 5th sees operation from Ross and Cromarty with another HF station run by the GMDX Group. On the 6th, the GMDX Group takes the HF station to Invergordon, then hands over to Moray Firth ARS for the 7th to 10th. Moray Firth ARS plan to run both HF and VHF stations using SSB, CW, RTTY and PSK. For those who haven't tried it yet, there is a comprehensive `Am I in the log' feature at www.rsgb.org/centenary/ that shows on which Regions and Bands you have contacted the Centenary station. Details of how to get your QSL card are also on the website.

The deadline for Regional entries for the Club of the Year competition has been extended until 14 February. Any club that would still like to enter should contact their Regional Manager as soon as possible. The 13 Regional winners will go forward to the National Club of the Year competition. The winner and runners-up of the national title will be announced at the RSGB AGM in April.

Italian amateurs have regained access to 70MHz until 31 December 2013. All Italian stations are authorised to use 70MHz, unless they are within 30km of the Italian border with Austria, Switzerland or France. Frequencies in use are 70.100, 70.200 and 70.300MHz, with 25kHz of bandwidth. All modes are permitted with a maximum power of 50 watts ERP.

A new animated video has been released that tells the story of the UK Space Agency's first CubeSat, UKube-1, which is slated to launch in the 3rd quarter of 2013. UKube-1 will carry a set of AMSAT-UK FUNcube transponder boards. These will provide a 435 to 145MHz linear transponder and a 1200 bps BPSK beacon for educational outreach. For more information on FUNcube and a link to the video please go to www.amsat-uk.org.

And now for the details of rallies and events for the coming week

Today, 3 February, the 28th Canvey Radio & Electronics Rally will take place at The Paddocks, Long Road, Canvey Island, Essex SS8 0JA. The venue is at the southern end of the A130. Doors open at 10.30am. For more information, contact Vic Rogers, G6BHE on 01702 308 562.

Also today, 3 February, the Radio-Active Rally will be held at the Civic Hall, Nantwich, Cheshire CW5 5DG. Organised by the Mid Cheshire Amateur Radio Society, doors open at 10.30am. There will be trade stands and a Bring & Buy. More details from Simon, G8ATB on 01270 841 506.

On Sunday 10 February the Harwell Radio and Electronics Rally will take place at Didcot Leisure Centre, Mereland Road, Didcot. Doors open at 10.30am and admission is ?2.50, with under 12s free. There will be trade stands and special interest groups. For more details contact Ann, G8NVI, on 01235 816 379.

Wakefield & District Radio Society announces with regret that the annual Northern Cross Rally, which was scheduled for Sunday 17 February, has had to be cancelled due to circumstances beyond their control. For more information, contact the Chairman and Rally Manager, Ken Quinn, G8FSO on 07 900 563 117.

Now for the news of special events

PA0FAW says that he will be operating with the special callsign PF100ZOO between 1 and 28 February. This activity is to commemorate the 100th anniversary of the Arnhem Zoo. Operations will mainly be CW and SSB, with some digital modes. QSL via PA0FAW either direct, via the bureau or electronically using eQSL. SWL reports are also welcome and appreciated.

Moray Firth ARS will be operating GM100RSGB in celebration of the 100th Anniversary of the RSGB over the weekend 7 to 10 February. The location will be Clochan Community Hall near to Buckie, which is postcode AB56 5EP. There will be various demonstrations featuring equipment through the ages, Morse code and information on how to gain a licence. They plan to operate on 80m, 40m and 20m using SSB, CW, PSK and RTTY. Other bands and modes will be announced as necessary. The club welcomes any assistance with setup from 10.30am on 7 February; the sooner they are

set up, the sooner they will be on the air! All visitors will be most welcome and refreshments will be available at the hall.

And now the DX news, compiled from 425 DX News and other sources

F6KOP is expected to be active from Uganda as 5X8C between 6 and 18 February, from a location some 20km from Entebbe airport. They have announced that they will comply with the latest IARU band plan on 40 meters for the region, with the frequencies of the PSK and RTTY moved to 7040 and 7042kHz. For more details see www.5x2013.com.

Bert, CX3AN will be on the 6 to 80m bands as S79AN from Mahe Island, which is IOTA reference AF-024, from 4 to 11 February, mainly using SSB and CW. Preferred times for South America are around 1800UTC on 21.280MHz and 2000UTC on 14.180MHz. QSL via EB7DX.

Jean-Pierre, FG/F6ITD, will be in Guadeloupe until 25 February. First he will visit Guadeloupe until 8 February and then La Desirade Island, IOTA NA-102, until 25 February. Listen for him in SSB and digital modes on the HF bands. QSL via F6ITD either via the bureau or direct.

Bob, W7YAQ and Bill, N7OU will activate Fiji and Rotuma until 21 February. The first stop is Viti Levu Island, which is IOTA reference OC-016, and they will use the callsign 3D2NB until 7 February. The second trip leads them to Rotuma, which is IOTA reference OC-060, from where they will show up as 3D2RX from 8 to 21 February. They will operate mostly CW, with some RTTY and SSB on the 10 to 160m bands using vertical antennas next to salt water on a north-facing shore at both locations. QSLs for both callsigns go via W7YAQ. The logs will be uploaded to the LoTW as soon as they get back to the USA.

Now the contest news

The first VHF event of the month is the final Super League event of the 2012/2013 season, the 432MHz AFS. It takes place today, 3 February, between 1000 and 1300UTC. The nature of 70cm means that a good takeoff makes a huge difference to your QSO potential. If you're not blessed with a good site and/or the owner of multiple long Yagis, the best way of moving yourself up the results table is to head off to a hilltop and operate portable. The exchange is signal report, serial number and locator.

The European Phase Shift Keying Club's Worldwide DX Contest finishes today, 3 February, at 1200UTC. Activity is on PSK63 only. There are no fewer than 22 categories that you can enter and certificates are on offer to the winner of each of them in each DXCC Entity. Even if you don't manage to come first in your country, there are certificates for the top three in each continent. Using the 3.5 to 28MHz bands the exchange is signal report and serial number.

The wait is over for the new 80m Club Championship series. The first session, using SSB, takes place on Monday 4 February. For the whole series the maximum permitted power is 100 watts, although there is also

a 10 watt section for Foundation licensees and those who enjoy the extra challenge. It's a team event that runs for six months, but unlike AFS contests there's no 50-mile limit. Instead there is a 35-mile limit for Local Clubs. If your team includes any members outside of this limit you become a National Club. Running from 2000 to 2130UTC the exchange is signal report and serial number.

Tuesday 5 February sees the 144MHZ UK Activity Contest taking place from 2000 to 2230UTC. Using all modes, the exchange is signal report, serial number and locator.

The First 1.8MHz Contest takes place for four hours on the evening of Saturday 9th, from 2100 to 0100UTC. This is the first of this year's HF Championship events and you can enter CW-only, SSB-only or mixed mode. Exchange a signal report, serial number and the first two letters of your postcode.

For 48 hours on the weekend of the 9th and 10th, the CQ WW WPX RTTY Contest takes place from 0000UTC to 2359UTC. There are numerous entry categories, but single operator stations are limited to a maximum of 30 hours activity. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number.

The PACC Contest takes place for 24 hours on the same weekend, running from 1200 to 1200UTC. There are numerous single-op categories for non-Dutch stations. Work everyone, but concentrate on working the Netherlands because multipliers are awarded for the twelve Dutch provinces. Using the 1.8 to 28MHz bands, the exchange is signal report and serial number, although Dutch stations send their Province too.

And now the solar factual data for the period from Friday the 25th to Thursday the 31st of January, compiled by Martin Harrison, G3USF, on Friday the 1st of February.

Solar activity was mostly very low, with only two small C-class flares over the entire week. The Solar flux declined from 101 on the 25th to 97 on the 30th, then recovered to 103 on the 31st. The average was 99, compared with 108 the previous week. The 90 day solar flux average was 119 on the 31st - one point down on last week. X-ray flux levels declined from an average of B2.1 units to B1.3, with little daily variation. At the start of the period the geomagnetic field was mildly disturbed as a consequence of a high-speed coronal stream, which brought the Ap index up to 18 on the 26th. Bright arctic auroras resulted, with radio aurora at high geomagnetic latitudes during the afternoon and evening of the 26th. However, for the rest of the week the geomagnetic field was very quiet, with the Ap index in low single figures. Solar wind data from the ACE spacecraft showed a decline from 590 kilometres per second on the 26th to 274 kilometres a second on the 31st. Particle densities were mostly in single figures. Bz varied between plus 12.7 and minus 12 nanoTeslas during the disturbance, and between plus or minus five nanoTeslas on the quiet days. MUFs were around predicted values every day except the 26th. At HF, openings up to 28MHz were reported on

most days, while 24MHz remained in good shape.

Finally, the solar forecast. During the coming week solar activity is expected to be low or very low, with only occasional C class solar flares. There is only a very small chance of a large flare. Solar flux levels may well recover much of their recent losses, reaching the 120s. On current expectations the geomagnetic field will remain quiet or slightly unsettled on most days, though it may be a bit more unsettled around the 4th and 6th. As always, the possibility of a coronal mass ejection cannot be completely excluded. MUFs during daylight hours at equal latitudes should continue to be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 8MHz. Paths to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 26MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 1200 and 1700 UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Wythall Radio Club has a club trip to the MIDCARS Nantwich rally today. The club net is on 145.225MHz from 8pm today and next Sunday. Tuesday sees a Morse class from 7.45pm, followed by the start of the construction project by Barry, M0DGQ. The shack social is on Friday from 7.30pm. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday on 144.165MHz USB, vertical polarisation. Tuesday sees the monthly meeting, with a SDR dongle demo by Jess, M0VBR. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday it's the club net on 145.450MHz. Contact the FELCC Information Line on 07554 362 020 for more information.

Gloucester Amateur Radio & Electronics Society is having a talk and demo on SSTV & digimodes courtesy of Thornbury & South Gloucester Amateur Radio Society on Monday. Next Sunday there's a club visit to the Harwell Radio & Electronics Rally. Contact Anne, 2E1GKY, on 01242 699 595, daytime.

South Birmingham Radio Society is having an open meeting on Monday, then a lecture in the main hall on Wednesday. Thursday sees training classes

with Dave Murphy, G8OWL and there's shack and aerial work on Friday. Contact Mick Cleary, G7RRP, on 07595 696 359.

Lincoln Short-Wave Club is putting G5FZ on the air from the shack on Wednesday and having a natter night at the BSA Club. Thursday sees a repeater net on 145.725MHz from 20.00. On Saturday there's the surgery and mentoring from 9am in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

Now we return to the traditional listing in date order. On Monday Aldridge & Barr Beacon Amateur Radio Club is addressing members' problems. Contact Albert, G0KFS, on 01922 614 169.

On Monday Sutton Coldfield Amateur Radio Society is running an open net on 145.250MHz from 7 30pm. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is having a talk on repairing vintage radios by Ian, G8SNF. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Midland Amateur Radio Society is holding a general meeting with the shack on the air and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday Telford & District Amateur Radio Society is putting GX3ZME on the air and holding a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Friday Bromsgrove & District Amateur Radio Club is on the air on VHF. Contact Chris, M0BQE on 01905 776 869.

On Friday Coventry Amateur Radio Society is holding its rescheduled annual dinner. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND

RSGB Region 4 is looking for a new Deputy Regional Manager for Region 41, which covers the north east Durham and Newcastle areas. If you are an RSGB Member in that area who would like to get involved, please call Harold, G0UGE, on 07838 634 777.

On Monday Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a social night and taking part in the RSGB 80m Club Contest as G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Workington and District Radio and IT Group is on the air. Details form Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday Chester & District Radio Society is looking at the other man's mobile shack. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society is having a demonstration of slow scan television by John, M0JPA and Martin, M0GQB, plus a talk on contest logging using computers by Richard, M0RBG. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday Stockport Radio Society is having a NARSA preparation night, led by Peter Ridley, M1PTR, Contact Nigel Roscoe, on 07973 312 699.

On Wednesday Denby Dale Radio Club is having a demonstration of SDR receivers by Chris, G4HYG of Cross Country Wireless. Next Saturday sees the start of the two-day Foundation course at Pie Hall. Details from Richard, M0RBG, on 07976 220 126.

On Thursday South Manchester Radio and Computer Club is having an antenna and propagation clinic with Ron, G3SVW. Details from Ron, G3SVW, on 01619 693 999.

On Thursday Spen Valley Amateur Radio Society is on the air. Details from Russell, G0FOI, on 01274 875 038.

On Friday Tynemouth Amateur Radio Club is looking at the use of computers in radio. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND

On Tuesday Mid Ulster Amateur Radio Club is having a shack night. Next Sunday there's a talk by guest speaker Joe, Gi7KMJ on the duties and responsibilities of local RAYNET operations. Contact Brian Burns, Mi0TGO, by email to muarc.secretary@yahoo.co.uk.

On Thursday Bangor & District Amateur Radio Club is having a talk on PCB construction by Norman, Gi3YMY. Contact Mike, Gi4XSF, on 02842 772 383.

On Friday Ballymena Amateur Radio Group is holding its winter Bring and Buy sale from 6.30pm at the new Ahoghill Community Centre. Contact Hugh Kernohan, Gi0JEV, on 02825 871 481.

NEWS FOR SCOTLAND

On Tuesday Dundee Amateur Radio Club is having a club night. Contact Paul, GM0BKC, on 07846 412 862.

On Wednesday Ayr Amateur Radio Group is having a presentation on pervasive radio. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Thursday Aberdeen Amateur Radio Society is holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with news that Chelmsford Amateur Radio Society is now holding Morse classes every Thursday evening. Run by Andrew Kersey, G0IBN, the classes have proved very popular. Foundation holders have been particularly keen to find out more about this mode, which enables DX working using very low power levels. The classes are held in the function room at the Bell Bar and Bistro in Danbury, CM3 4DT. Those interested in learning Morse code or wanting to increase their Morse skills should contact Andrew, G0IBN, on 01621 868 347.

Bromley and District Amateur Radio Club is planning to run a two day Foundation course on Saturday 16 February and Sunday 10 March. An Intermediate course will follow in April, commencing on the 6th. More details are online at www.bdars.org/training0206.shtml.

Now for clubs that have several events this week. Worthing & District Amateur Radio Club has its monthly breakfast meeting at the Goring Caf&#65533; from 9am today. On Wednesday there's a discussion evening and the 80m CC-SSB contest. Contact John, G8FMJ, on 01273 593 232.

Farnborough & District Radio Society has a slow CW net on 3.570MHz on Monday from 1pm, then a Top Band net with G2DX on 1.995MHz at 8pm. On Wednesday there's slow speed CW on 1995MHz from 8pm, and Friday sees the 2m G6FRS net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Southdown Amateur Radio Society is having a talk at Chaseley on Monday. On Wednesday there is operation at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

Now we return to the traditional listing in date order. Today, Chelmsford Amateur Radio Society is at the Canvey Rally. Contact Martyn, G1EFL, on 01245 469 008.

Also today, South Essex Amateur Radio Society is at the Canvey Radio & Electronics Rally. Contact Dave, G4UVJ. 01268697978, g4uvj@btinternet.com

Today, Thames Amateur Radio Group Club is holding a net from 8pm on GB3DA. Details from Pete Sipple, M0PSX, on 07940 579 116.

On Monday Braintree & District Amateur Radio Society is having a talk with slides by Tony, G0IAG, on airfields he has visited. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club is having a talk on Top Band by John, G3PQA. Contact Dave, G4XDU, on 01628 625 720.

On Monday East Kent Radio Society is having a talk on amateur radio developments by Ken Smith, G3JIX. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday Felixstowe & District Amateur Radio Society is having reminiscences on the 60th anniversary of the Felixstowe Floods by Paul, G4YQC. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Monday Newbury & District Amateur Radio Society is taking part in the 80m Club Championships SSB. Contact Rob, G4LMW, on 01635 862 737.

On Monday Surrey Radio Contact Club is having a talk by Alan, G4WGE on contesting for beginners and those who need a refresh. Contact John, G3MCX, on 02086 883 322.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Wednesday Dover Radio Club is discussing this year's outdoor events, led by Peter, G0KOK. Details from Pete, M0PKH, by email to peter.halloway@sky.com.

On Wednesday Norfolk Amateur Radio Club is taking a random walk in mathematics, looking at 1089 and other oddities with Peter, M0HBL. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday Bredhurst Receiving and Transmitting Society members should meet at the shack or in the bar because Parkwood is closed. Charles G4VSZ, 07982 244 788, secretary@brats-qth.org

On Thursday Cray Valley Radio Society is having a presentation on the history of Burndept by Dave, G4NOW. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Tim Ward, 2E0TJW, on 07810 481 182.

On Thursday 7 February Shefford & District Amateur Radio Society is having a DXpedition of the year 2012 video night. Contact John Burnett, 2E0OAK, on 07860 804 793.

On Friday 8 February Chelmsford Amateur Radio Society is having a vintage radio, TV and test equipment meeting at Great Baddow village hall. Contact Martyn, G1EFL, on 01245 469 008.

On Friday 8 February Itchen Valley Amateur Radio Club is looking at the club project, a radio amateur's Swiss army knife, with Duncan, G3RQF. Details from Liz, M0ACL, on 02380 254 599.

On Friday 8 February Wimbledon & District Amateur Radio Society is having a talk on HF antennas by Denis, M0NDJ. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday 9 February Hastings Electronics and Radio Club is holding its winter auction. Details from Gordon, on 01424 431 909.

NEWS FOR THE SOUTH WEST

We start with clubs that have several events this week. On Monday Exeter Amateur Radio Society is holding its HF net on 3.675MHz from 7.45pm. The Tuesday 2m net is on 145.575MHz at 7.45pm and on Thursday it's the 4m

net on 70.425MHz from 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

Thornbury & South Gloucestershire Amateur Radio Club is having a rally planning meeting on Wednesday, and has a 2m club net on Friday at 8pm. Contact Tony, G0WMB, on 01454 417 048.

Now we return to the traditional listing in date order. On Tuesday Riviera Amateur Radio Club is meeting and putting MX0RIV on the air from 19.30 to 21.30. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Thursday Cornish Radio Amateur Club is holding its main meeting. Details from Steve, G7VOH, on 01209 844 939.

On Thursday Saltash & District Amateur Radio Club is having a talk by Eric, G1OMZ, on World War 2 airborne radar. Contact Brian, M0BHG, on 01752 844 321.

On Thursday South Bristol Amateur Radio Club is having a talk on the RNLI by Dr Glyn Hayes, Lifeboat Press Officer for the Weston-super-Mare RNLI station. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club is holding its junk sale. Contact George Davis, G3ICO, on 01935 425 669.

On Friday Poole Radio Society is having short talks and the results of Colin's Challenge 2012. More info from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is having a natter night and an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday Dragon Amateur Radio Club is having a project night. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Monday 4 February Llanelli Amateur Radio Society is on the air. Contact Craig, MW0MXT, on 01269 845 773.

On Tuesday 5 February Wrexham Amateur Radio Society is having a quiz night. Details from Frank Bailey, M1EYH, by email to fcbailey20@btinternet.com.

Highlights of Solar and Geomagnetic Activity
28 January - 03 February 2013

Solar activity was at very low to low levels for the past week. The
largest flares of the period were a C8/Sn flare at 03/0610 UTC from
region 1667 (N22, L=197, class/area Dsi/160 on 03 February) and two
C2/Sf flares at 02/1958 UTC and 03/0224 UTC, also from region 1667.
An asymmetric, partial-halo Coronal Mass Ejection (CME) was observed
in SOHO/LASCO C2 coronagraph imagery around 31/0800 UTC with an
estimated plane-of-sky speed of 550 km/s. The event appeared to
orginate from a filament eruption on the southeast limb. No further
earth-directed CMEs were observed.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels. Moderate levels were observed on 29-31
January and again on 02-03 February.

Geomagnetic field activity was quiet to unsettled except for a short
period of active to minor storm levels at high latitudes on 02
February. Solar wind speeds began the period at about 430 km/s and
gradually decreased to around 300 km/s by 30/2300 UTC. By 01/2115
UTC, an increase in solar wind speed and temperature was observed
indicative of a negative polarity coronal hole high speed stream.
Total field (Bt) increased from 4 nT to 11 nT while the Bz component
of the interplanetary magnetic field varied between +/- 9 nT. The
geomagnetic field responded with quiet to unsettled conditions
through 02 February with periods of active to minor storming at high
latitudes. By 03 February, solar wind speeds were in decline as
effects from the coronal hole high speed stream began to wane. The
geomagnetic field was quiet on 03 February. Solar wind speeds ended
the period at approximately 400 km/s. At 03/1130 UTC, the lower
energy particle flux reported by the EPAM instrument aboard the ACE
spacecraft rose sharply and then leveled off while some of the lower
```

energy channels declined. This was likely indicative of the passage of the 31 January CME, however there was no clear shock signature associated with it.

Forecast of Solar and Geomagnetic Activity
04 February - 02 March 2013

Solar activity is expected to be at very low to low levels with a slight chance for M-class flares until region 1667 rotates around the west limb on 14 February. Very low to low levels are expected for the rest of the forecast period, barring significant active region emergence or development.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels throughout the forecast period with possible high levels on 06-07, 11-12, and 24-25 Februrary due to coronal hole high speed stream effects.

The geomagnetic field is expected to be quiet to unsettled with a chance for active periods on 09-10, 22-23 February, and again 01-02 March due to recurrent coronal hole high speed stream activity. Otherwise, mostly quiet conditions are expected.

I never had any problems with the sex & drugs, it was playing the bloody
guitar that was the difficult bit!

Amateur Radio Supplies Announces Winner of Its Promote Youth Contest:

Posted: 04 Feb 2013 02:00 AM PST
http://www.eham.net/articles/29706

Haverhill, MA, February 03, 2013 -- (PR.com) -- Amateur Radio Supplies of Haverhill, Mass., today announced the winner of its biannual giveaway to promote youth in amateur radio DXing and contesting. "After receiving and evaluation hundreds of entries, we'd like to congratulate our winner, Adam Donaldson, callsign KC9VIV, of Weston, Wisconsin," said Jeff Demers, owner, Amateur Radio Supplies. "Adam was selected as the winner after being nominated by his scoutmaster, Roger Branton, who describes Adam as, 'an Eagle Scout, an A student, a cross-country distance runner and an all-around great teen'." Adam has been interested in electronics since he was 10. At age 15, he discovered amateur radio while visiting his grandparents, who are missionaries in southern Mexico and are both HAM operators. While visiting them, he helped set up a tower and antenna system and begin his first works as a HAM. Adam then passed his technician's license test and became involved in the local HAM club, working his first Field Day this year as their youngest team member. He then passed his general test. He's an excited and enthusiastic HAM and volunteers his time working with the Wisconsin Valley Radio Association Club. He's currently learning Morse Code so that he can participate in the Rookie Roundup in December. He has a 2 meter rig that he uses at home and built his own antenna system from scratch. "It's Adam's dream to someday be able to communicate with this grandparents over Amateur Radio airways," said Branton. "Winning this will help him to realize this dream."

HamRadioNow: Bdale Garbee KB0G Banquet Talk at the DCC

Posted: 04 Feb 2013 01:54 PM PST
http://hamradionow.tv

Bdale Garbee KB0G is one of those highly accomplished hams with a broad and deep background - RF design, computers and digital, rocketry, fabrication... and being a devoted dad. The kind of ham you tend to find in a group like TAPR. You'll meet him 'up close and personal' as he gives the talk at the Saturday night banquet at the 2012 ARRL/TAPR DCC. The banquet talk is more personal and less technical than the rest of the TAPR presentations, so if some of the technology is over your head, this one's lots more accessible, though Bdale does manage to drop a technical phrase or concept in now and then to keep you on your toes. Bdale's talk runs about an hour.

Then KN4AQ adds some comments about the audience that's developed for the TAPR conference videos and HamRadioNow in general... more naval gazing for those of you interested in tracking the development of podcasting for Amateur Radio.

Texas State Parks On The Air First Annual Contest

Posted: 04 Feb 2013 11:42 AM PST
http://forums.qrz.com/showthread.php?378570-Texas-State-Parks-On-The-Air-First-Annual-Contest&goto=newpost

From the folks that bring you the Texas QSO Party, the Northwest Amateur Radio Society (NARS), we would like to announce the First annual Texas State Parks On The Air (TSPOTA) contest April 6-7, 2013. You will be part of TSPOTA history and our hope is that it will be a long and rewarding one.

It is our hope that the TSPOTA Contest is just a starting point for Texas Amateurs and Amateurs visiting our great State to activate one or more Texas State Parks, Natural Areas, and Historic Sites. To that end the TSPOTA Committee also sponsors the WATXSP Certificate for successfully working all ninety-nine Texas State Parks, Natural Areas and Historic sites listed on the Texas Parks and Wildlife and TSPOTA web sites.

Who:

The contest is open to all Amateurs world-wide, but especially Texas Amateurs. Non-Texas stations may work only Texas stations located in a Texas State Park; Texas stations not located in a Texas State Park may only contact stations operating from inside a Texas State Park. Stations located in a State Park, Natural Area or Historic Site may work all stations.

When:

April 6-7, 2013 from 1800 UTC Saturday to 2100 UTC Sunday.

Objective:

To work as many stations as possible on any and all amateur bands (excluding the 60, 30, 17, and 12- meter bands) and in doing so to learn to operate in abnormal situations in less than optimal conditions. A premium is placed on developing skills to meet the challenges of emergency preparedness as well as to acquaint the general public with the capabilities of Amateur Radio.

To have competing stations, individual or club, operating from as many of Texas' ninety-nine state parks as possible. Making contacts from a Texas State Park to other Texas State Parks is the goal all stations should

strive for.

HamRadioNow: Bdale Garbee KB0G at the DCC... and 'Gone Skiing'

Posted: 04 Feb 2013 06:58 AM PST
http://forums.qrz.com/showthread.php?378528-HamRadioNow-Bdale-Garbee-KB0G-at-the-DCC-and-Gone-Skiing&goto=newpost

HAMRADIONOW.tv

Episodes 53 and 54

Episode 53: Gone Skiing

Where have we been? No, HAMRADIONOW hasn't gone off the air ☐ we took some time off to go skiing at the Park City resort in Utah. Not a lot of hamming, but Gary was 'radioactive' scanning the resort's radio system for Ski Patrol action, missing skiiers and lift shutdowns, and using FRS to keep track of XYL Cyndi KD4ACW. This is a quick report how he did it, shot with a Go-Faux (phony Go-Pro) helmet-cam atop Cyndi's head.

Episode 54: Bdale Garbee KB0G ☐ Saturday Night Banquet at the 2012 ARRL/TAPR DCC

This wraps up our coverage of the 2012 DCC! On to the Orlando HamCation....

Bdale Garbee KB0G is one of those highly accomplished hams with a broad and deep background - RF design, computers and digital, rocketry, fabrication... and being a devoted dad. The kind of ham you tend to find in a group like TAPR. You'll meet him 'up close and personal' as he gives the talk at the Saturday night banquet at the 2012 ARRL/TAPR DCC.

The banquet talk is more personal and less technical than the rest of the TAPR presentations, so if some of the technology is over your head, this one's lots more accessible, though Bdale does manage to drop a technical phrase or concept in now and then to keep you on your toes. Bdale's talk runs about an hour.

Then KN4AQ adds some comments about the audience that's developed for the TAPR conference videos and HamRadioNow in general... more naval gazing for those of you interested in tracking the development of podcasting for Amateur Radio.

Watch these episodes at our web site, www.HamRadioNow.tv.

LOG4OM now with Net Control

Posted: 03 Feb 2013 05:03 AM PST
http://forums.qrz.com/showthread.php?378377-LOG4OM-now-with-Net-Control&goto=newpost

The latest release of the free LOG4OM logging program now includes a unique
Net Control program which can be used by controllers and members alike.

LOG4OM also now includes the start of our SO2R support which will be
enhanced during coming months.

This new release and updated user guide, which details the new features,
will be available on Monday 4th February and can be downloaded free
from.....

http://www.pisto.it/wordpress/log4om-en/

The new user forum for LOG4OM can be found at http://www.pisto.it/forum/

There are several more program enhancement in the latest release all of
which are detailed in the user guide.

Terry G4POP

The Noise Blankers' Ham Hijinks, a Amateur Radio-Based Satire News Site

Posted: 02 Feb 2013 10:45 AM PST
http://forums.qrz.com/showthread.php?378273-The-Noise-Blankers-Ham-Hijinks-a-Amateur-Radio
-Based-Satire-News-Site&goto=newpost

The Noise Blankers, a amateur radio group based out of Northwest Arkansas,
has a simple mission:

Do radio stuff.Have fun doing it.Show people just how fun it is.

They also enjoy poking fun at the hobby they so dearly love, including
poking fun at themselves. What started as funny ham radio headlines we
shared among the group developed into our attempt at humorous, satirical
news stories with a ham radio flavor. Have a taste and enjoy the hobby with
us!

The Noise Blankers' Ham Hijinks Site

Solar Flare Drowns Out Radio Communications on Earth:

Posted: 05 Feb 2013 03:10 AM PST
http://www.eham.net/articles/29708

On 2 February, a tiny spot on the sun erupted into a moderately sized solar flare that was particularly loud in radio waves. With the sound of a roaring wave, it completely drowned out radio communication all over the Earth between 28 MHz and 21.1 MHz. The recording above comes from either a short wave radio station or a Ham radio transmission, said amateur radio astronomer Thomas Ashcraft, who works with Nasa's Radio JOVE project. It's interesting to hear the voices get "swallowed up as the solar wave passes through," he added in an email to Wired.com. The sun is entering a period of high activity as it enters its solar maximum, the peak of an 11-year solar cycle. Despite this, our local star has been relatively quiet for the last few months, producing few large solar flares or coronal mass ejections - which occur when the sun throws off charged particles at millions of kilometers per hour. The radio burst that happened on 2 February accelerated electrons to high energies. This electron stream created plasma and radio waves in the sun's atmosphere, which traveled to Earth and disrupted some communications. The event was a fairly good-sized surge, said radio astronomerJames Thieman, who leads the JOVE project.

DXNL 1818 - Feb 6, 2013
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

5V, TOGO
Jackie,F8AEJ, is working in holiday style mainly in digital modes
signing 5V7JD from Lome with his FT897D, AT tuner and 6 band Windom
until Mar 15. Logsearch with ClubLog (QRZ.com). QSL via homecall.

5X, UGANDA
A large multinational team (DF1LON, DJ7JC, DL1YFF, DL8OBF, EI9FBB,
F2DX, F2JD, F2VX, F5CWU, F5EOT, F5NHJ, F5NKX, F5UFX, F5UOW, F5VHQ,
F6ENO, F8BJI, F8IXZ, F9IE, FM5CD, K4SV, ON4LO, ON7RN, RG8K, UA9KGH/1)
will show up as 5X8C with six stations and focus on the lowbands
from Feb 8-18. Pilot stations are F4TTR and V51B. Their QRGs will be:
CW: 1826.5, 3524, 7024, 10104, 14024, 18074, 21024, 24892, 28024 kHz
SSB: 1850, 3785, 7075, 14145, 18140, 21295, 24960, 28480 kHz
RTTY: 1842, 3585, 7042, 10142, 14082-90, 18102, 21082, 24922, 28082 kHz
PSK: 3570, 7040, 10140, 14072, 18100, 21072, 24920, 28122 kHz
RX 160m CW: 1834.5 (EU/NA) and 1821.5 (AS/OC).
QSL via F1NGP, LoTW. See also: http://www.5x2013.com

6V, SENEGAL
Vladimir "Vlad",RK4FF, will be QRV as 6V7S from "Le Calao" in Ngaparou
for at least four times this year. He plans to show up from there
from Feb 11-Apr 3, May 13-30, July 1-16 and Oct 22-Nov 27. Activities
will take place in CW/SSB/RTTY on 80/40/20/15/10m. QSL via homecall.

DU, PHILIPPINES, OC-129
Carl,DU6/OE9MON, and his family are spending their holidays on
Panay Island (Visayan Islands, OC-129, Loc PK11bo). He has been
worked in SSB on 20m with 100 watts and a vertical. Carl wants to use
homemade verticals on all bands 160m-6m. QSL via LZ1JZ, LotW and eQSL.

FG, GUADELOUPE, NA-102
Oliver,FG/F6ARC, is working holiday style in CW with focus on 30m/40m
from Guadeloupe (NA-102, DIFO FG-001, WFF FFF-004, WLOTA 0644) until

Feb 14. QSL via FE11DX.

Jean-Pierre,FG/F6ITD, is active on the bands until Mar 25. He stays in
Basse Terre on Guadeloupe (DIFO FG-019, WLOTA 0644) until Feb 15 and
on La Desirade (DIFO FG-004, WLOTA 1121, ARLHS GUA-005, Loc FK96lh)
from Feb 16 until Mar 22. He is using a FT450D, PA, RV7C antenna and
dipoles in SSB/RTTY/PSK/JT65 and some CW on 160m-10m.
QSL via homecall. See also: http://www.QRZ.com/db/FGF6ITD

HA, HUNGARY
The special event station HG66MALEV remembers the former Hungarian
airline MALEV in CW, SSB and digital modes on 80m-10m until Mar 31.
Last year the airline has terminated its service after 66 years of
civil aviation. QSL via HG4I, unfortunately only direct with SASE.

I, ITALY
The special event station IR7WAP is on the air until Mar 3 on the
occasion of the 10th Antarctic Activity Week (AAW).
QSL via IK7XNF, unfortunately only direct and eQSL.

J5, GUINEA-BISSAU
The Verona DX Team members Livio,IZ3BUR, Libero,IK3RBE, Enzo,IK3VVD,
Ilario,IZ3STA, and Milena,IK3VZJ, are returning to Cumura to help with
the mission work and will be active as J52HF on SSB on HF and 50 MHz
during their spare time between Feb 10 until Mar 2. QSL via I3LDP.
See also: http://www.ari.verona.it/veronadxteam/en and
http://photo.net/photodb/photo?photo_id=9451214

LX, LUXEMBURG
The LX7I team from Eschdorf will join the WPX RTTY Contest (Feb 9/10)
in the M2 category. QSL via LX2A.

LY, LITHUANIA
The special event station LY16W celebrates the Act of Independence of
Lithuania (Feb 16, 1918) during February. QSL via LY5W.

PA, THE NETHERLANDS
The special event station PF13ANT (WAP-239) will be activated by
Rob,PA0RDY, during the 10th AAW from Feb 11-28.
QSL via homecall, via direct preferred but bureau QSLs are fine also.

XU, CAMBODIA
John,XU7ACQ, will be QRV in SSB, CW and digital modes on 80m-10m
from Feb 10 until Mar 18. QSL via KF0RQ.

AFRICA DXPEDITION: Steve,HA0DU, and Laci,HA0NAR, are planning a DXpedition
to Senegal (6V2R) and Guinea Bissau (J5NAR) in February. Their journey
will start in Cabrousse in the south of Senegal on Feb 9 and will take
them Guinea-Bissau. They will activate also Carabane Island (AF-078) as
6V2R/p and Jeta Island in the Bissagos archipelago (AF-093) as J5NAR/p.
The whole trip is paid by themselves and so they would appreciate any
donations via PayPal (ha0nar[AT]hotmail.com) to reduce the high
logistical costs. QSLs via HA0NAR.

CARIBBEAN/ATLANTIC TRIP: Hilkka,OH1DV (YL), Markku,OH1MV, Pekka,OH1TV,
Rami,OH2BCI, Leena,OH2BE (YL), Martti,OH2BH, Osmo,OH2KH, Heikki,OH4NS,
Seppo,OH6TJ, and Osmo,OH8KN, are on a cruise with the "M/S Kristina
Katarina" working as OJ0H/mm usually on 14267 kHz or in CW. They plan
to meet hams in many of their stopovers in 6Y, P4, PJ4, YV7, J49, FM,
V2 and HI. After that they will continue to the Azores Islands from
where they will join the ARRL CW and SSB Contests as CR2X and CQ8X.
QSLs via OH2BH.
See: http://www.kristinacruises.com/en/cruises/ms-kristina-katarina

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Feb 8-10 YLRL YL-OM Contest
Feb 9 Asia Pacific Sprint Contest
Feb 9/10 CQ WPX Contest, RTTY
Feb 9/10 PACC Contest
Feb 9/10 KCJ Topband Contest
Feb 9/10 RSGB 1,8 MHz CW Contest
Feb 12 FISTS Sprint Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AN-016, several, Antarctica: Oleg,ZS1OIN, will be the new chied of the
Rusisan Bellinghausen Basis (WAP RUS-01, AA U-04, WFF RFF-154) on
King George Island (WLOTA 0312). Starting on Feb 12 he plans to be QRV
as RI1ANU (instead of RI1ANF) mainly in CW. QSL via ZS1OIN (direct).

NA-001, C6, Great Bahama Bank group: Drew,N2RFA, is going to visit the
Bahamas (WLOTA 1115) from Feb 10-21. He will sign C6ABB in PSK31, JT65,
RTTY and SSTV on 80m, 40m, 20m and 17m.
QSL via N2RFA (direct). The log will be uploaded to the LoTW and eQSL.

NA-016, ZF, Cayman Islands: Dave,N4QS, will take part in the upcoming
WPX RTTY Contest as ZF2DP from Grand Cayman Island (WLOTA 1042).
He can use the station of ZF1A from Feb 8-12. Listen for him in SSB
and CW mainly on the WARC bands before and after the contest.
The log will be uploaded to LoTW afterwards and in realtime also to:
http://www.clublog.org/logsearch/ZF2DP
QSL via N4QS (bureau/direct).

NA-024, J3, Grenada: Roy,KE4TG, will be on Grenada (WLOTA 0718, Loc FK92dd)
again for the fifth time from Feb 6 until Mar 8. Listen for J38RF in
JT-65, PSK31 and RTTY on 80m-10m. Depending on the propagation he may
also work on 60m in SSB, CW and digital modes. QSL direct via KE4TG.
The log will be uploaded to the LoTW.

NA-097, 6Y, Jamaica: Yuri,VE3DZ, announced to join the WPX RTTY Contest
as 6Y2T in the SOAB category. QSL via homecall.

NA-100, V2, Antigua and Barbuda: Tom,AA9A, will be QRV in SSB, CW and RTTY
on 160m-10m signing V24A from Antigua (WLOTA 1118) from Feb 11-20.
He plans to take part in the ARRL CW Contest as well. QSL via AA9A.

NA-103, VP2M, Montserrat: Bill,AA4NC, will show up as VP2ME from the island
of Montserrat (WLOTA 1475) from Feb 12-20. He will work in CW, SSB and
RTTY on all bands with emphasis put on the WARC bands and also the
ARRL CW Contest. The log will be uploaded to the LoTW.
QSL only direct via AA4NV.

NA-107, FM, Martinique: Valery,R5GA, can use the station of FM5BH again from
Feb 11-17. He will produce a loud signal from Martinique (DIFO FM-001,
WLOTA 1041, DDFM 97). FM/R5GA will be active mostly in CW on the WARC
bands. He will join the ARRL CW Contest as TO5X. The log will be
uploaded to the LoTW. QSLs for both calls via UA3DX (direct).

OC-026, KH2, Guam Island: The first stop of the Pacific trip of Bob,5B4AGN,
will be Guam (USi GU003S, WFF KFF-110, WLOTA 0064). He will be active
as KH2/G3ZEM from Feb 9-13. His next stop will be Pohnpei (OC-010).
QSL via M0URX (OQRS). See also: http://www.5b4agn.net

OC-010, V6, Pohnpei Islands: After visiting Guam Bob,5B4AGN, will stay on
Pohnpei from Feb 13-23. He plans to work as V63ZM on 80m-10m.
QSL via M0URX (OQRS).

iHAB-9 Launch Announcement

Posted: 06 Feb 2013 07:55 AM PST
http://forums.qrz.com/showthread.php?378809-iHAB-9-Launch-Announcement&goto=newpost

iHAB-9 Launch Announcement

The iHAB Team is excited to announce the next launch of the iHAB Project! iHAB-9 is scheduled to launch February 16, 2013 at 16:00Z (9AM CDT). In conjunction with Engineers Week 2013, sponsored by Cedar Valley Amateur Radio Club (CVARC), Collins Amateur Radio Club (CARC), and Rockwell Collins Inc in Cedar Rapids, the Iowa High Altitude Balloon Project.

Engineers Week celebrates the positive contributions engineers make to society and is a catalyst for outreach across the country to kids and adults alike. Engineers Week is part of many corporate and government cultures and is celebrated on every U.S. engineering college campus.

This year□s Engineers Week theme celebrates you□engineers, engineering students, and technicians□and all of the amazing things you do everyday to make the world a better place. Launch

Date/Time

February 16th, 2013

Webcast: 14:ØØZ - 8AM CDT

Launch: 15:ØØZ - 9AM CDT

Launch Location

North of the Rec Center - Building 154 - on the Rockwell Collins Campus

Cedar Rapids, Iowa.

N 42. Ø314ØØ, W -91.647ØØ

Payload includes a new "micro" 20 Meter QRP CW beacon designed and built by Dave Cripe - NM0S, Hi-Def Video, and 1.2Ghz live video downlink. The CW beacon controller is a new version (not yet available for purchase) of the EZKeyer from 4SQRP. The EZKeyer v2 has expanded memories, AND beacon mode!

Visit http://www.ihabproject.com/iHAB-9/ for updated Flight News, and Launch Information.

=== The launch of iHAB-9 will be webcast LIVE starting at/around 9:00AM CDT, so please plan to visit Mission Control. ===

FM Simplex Contest

Posted: 05 Feb 2013 10:39 PM PST
http://forums.qrz.com/showthread.php?378770-FM-Simplex-Contest&goto=newpost

Sunday Feb 10 is the 10th annual FM Simplex Contest for Southeastern Wisconsin as sponsored by the Milwaukee Radio Amateurs' Club (MRAC). The contest is to encourage simplex operation on the VHF (and 1 UHF band). It is a sprint style contest starting at 1PM CST on 2M and then moving to 70 cm from 2-2:30, 6M from 2:30-3, and finally 1.25M from 3-3:30. The contest exchange is your callsign and grid square (Milwaukee has the intersection of 4 grids). There are categories for HT, mobile and base. A contact with the club station, W9RH is 10 bonus points. Individual scores can also be applied to a club score. The winning club has their name and year engraved on a plaque which hangs at the AES Milwaukee store. For details and logging info see the club web site, www.w9rh.org.

Dutch PACC contest 2013

Posted: 05 Feb 2013 01:05 PM PST
http://forums.qrz.com/showthread.php?378705-Dutch-PACC-contest-2013&goto=newpost

This weekend is the weekend of the Dutch PACC. http://pacc.veron.nl/

Saturday Feb. 9th 1200 UTC till Sunday Feb. 10th 1200 UTC

PI4CC will be active as a multi /multi station. With a great team of operators, dedicated to ham radio, we will be active with simultaneous setups on all 6 HF bands. Mode CW and SSB. For more info see: http://www.pi4cc.nl/ We're located along the North Sea coastline. A great location and the team just upgraded the antenna farm. On all bands a dedicated K3 with Acom amplifier. The expectations are high.

We're looking forward to have a qso with you. Please give it a try and listen for PI4CC. Would be nice to have a qso with you. Thanks in advance.

vy 73 on behalf of the PI4CC crew, Eric PA2REH

OH/PA3BIY & SM/PA3BIY 4 ZP9EH 5
4O/IV3GTH 4 UN/DL9LBH 4

As the result of the MMMonVHF Voting 2012 we are happy to announce
the following person / groups as winner:

MS Category:

1st Place and the ï¿½BEST VHF MS Expedition of 2012ï¿½
EW/UY5HF & EW/UR7GO & EW/US8ZAL

Behind the callsign the Team could activate the really Most Wanted Squares
on VHF as KO32 and KO42 during their trip.
Congratulate to the TEAM ï¿½ for the nice expedition and very hard work as always.

EME Category:

1st Place and so ï¿½BEST VHF EME Expedition of 2012ï¿½
5X1EME
No surprise to win the trophy on EME section the Team behind Rene ï¿½ PE1L who was
managed the best EME expedition of 2011 too. Let us see where will be appear the Team in
2013?

We would like to congratulate to all Expeditions and Teams and thanks for your effort
and great job during 2012.

As we mentioned we also spread out one extra T-shirt with 'MMMonVHF logo' within
all voters in random.

The winner of all Voters is Peter, DJ9MG

Many thanks for your participation and hope to see your expedition and info again in the
Year 2013

Kind regards from Frank DL8YHR (main sponsor of the Trophy) and Jani, HA5CRX,
in the name of the MMMonVHF-Team

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: J5 ; Guinee Bissau ; Square: IK21 ; start 2013-02-11

Guinee Bissau (IK21dt) qrv on HF and 50 MHz

J52EME and J52HF will be again on air from february 11 to march 2, 2013. Some members of
Verona DX Team will return to Cumura to help the Mission with their work and install new
devices.
In the spare time they will be on air on HF and 50 MHz Tropo and EME, if the condition will
be good.
Not 144 and 432.

SOURCE: tnx to Lucio, I3LDP, direct to MMMonVHF

** DXCC: FG ; Guadeloupe ; Square: FK96 ; start 2013-02-15

Activity from FG4KH FK96HF again

FG4KH will be on air by the middle of the next month for a small activity in EME and tropo from
Guadeloupe Island. The set up will be light this year with FT897, 200w, LNA and only H pol on
the 2 x 3WL DK7ZB. I will try to make some tropo QSO to south America and Cara?bean area.
I will be QRV also time to time on the HF bands from 80 to 10 meters
Cu soon from the French West Indies
Philippe F1DUZ

SOURCE: Phillipe F1DUZ, direct to MMMonVHF

** DXCC: TX ; Clipperton ; Square: DK50 ; start 2013-03-01

I am planning to have at least 1kw output and low loss feedline to a 6M8GJ with
manual elevation. There are very good windows with EU moonsets. PSE read my webpage
for more details and procedures. I will transmit in the first sequence JT65A when operating EME.
This is about the only way anyone from EU will ever work Clipperton on 6m, so please be ready!

SOURCE: tnx for Info Lance, W7GJ, direct to MMMonVHF

** DXCC: DL ; Germany ; Square: JO44 ; start 2013-03-01

DL0AT qrv from JO44HI
Aktivate the Lighthouse Westerhever with big power on the top on the lighthouse.
2x7 ele es 2x 9 ele with 2x 750 watts. FED: 260; LH 0063

SOURCE: tnx to Andy, DG3XA, direct to MMMonVHF

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe
DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV
from 4 April to 18 April 2013 however, for Central Europe the EME window will open only
around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in

combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

Ham Radio Equipment Auction Feb. 22 in New Providence:

Posted: 06 Feb 2013 03:29 AM PST
http://www.eham.net/articles/29711

NPARC -- the Amateur Radio Club of the Watchung Mountain area will hold its annual auction and flea market on Friday, Feb. 22 at 7 p.m. This event will take place in the Municipal Center Gym (Academy Street and Springfield Avenue) in New Providence. There will be a large array of Ham Radio and other electronics equipment on display. After about two hours of auction, remaining items will become available for direct sale as at a flea market. Members and non-Members of the club are encouraged to bring items for sale, to bid on items offered at the auction, or just to come and be part of the activities. There is plenty of free parking in the area, and a wide range of refreshments will be available. The general public is welcome at this event, and all are encouraged to participate in buying, selling, and learning about Ham Radio related equipment. NPARC provides radio communications service in the event of an emergency and for various civic events such as street fairs and parades.

Radio Body Eyes Aftermarket Installs

Hidden "radio" buttons in Apple's iOS 6.1

W.I.A. Contest Champion - VK4PJ Peter Brown Trophy

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING FEB 10 2013.

Radio Body Eyes Aftermarket Installs

After making inroads with Toyota, Audi, BMW and more, Commercial Radio
Australia (CRA) is chasing the digital radio install market.

On Wednesday the 20th of February, the CRA will be leading a breakfast
workshop covering the latest on aftermarket products and how to optimise
their installation. Additionally the CRA will provide an update on DAB+
coverage and its rollout to areas beyond the five state metropolitan capitals.

Commercial radio listening figures for 2012 show 34% of radio listening is in
the car and the radio industry is keen for those listeners to experience
digital radio.

Chief executive officer of Commercial Radio Australia, Joan Warner said: "There are around 16 million registered vehicles in Australia, mostly with analogue radios; the DAB+ digital radio aftermarket sector provides a great opportunity for aftermarket retailers, installers and manufacturers."

Places at the workshop are limited.

Aftermarket retailers and installers should contact Commercial Radio Australia, email info@commercialra dio.com.au for spaces and more detail.

UPI.com say hidden "radio" buttons in Apple's iOS 6.1 operating system suggest an Apple radio service intended to compete with Pandora and Spotify.

A set of buttons and references in the software code relate to "radio," a feature found in iTunes on Macs and PCs but not on the iPad or iPhone.

The buttons' existence is more evidence of Apple's much-rumored radio service, which would allow people to stream music much like they do on Pandora, but with deep ties to Apple's iTunes library.

Another button bearing the legend "buy" suggests the ability to make purchases of songs from within the radio feature, presumably from iTunes.

VKG Roundup http://www.police.nsw.gov.au/news

Hello Everyone, I'm Rod VK2LAX

Did you know that the 10th February is International Umbrella Day?

No?

Do you know what else is special about the 10th February?

It's just two weeks until Wyong Field Day, 24th February 2013 The largest gathering of its type in the Southern Hemisphere.

>From the free Wyong station shuttle bus to the lucky gate prizes, the lectures, flea market and raffle, and of course, the commercial traders with bargains for all -....this year's Wyong Field Day is better than ever.

Gates open 6.30am - Traders open 9am

Please note that admission is $15 for Adults and under 17 free, not 17yrs and under as advertised in the latest AR magazine.

And here's some late breaking news, there will be a demonstration of transmitting and receiving equipment on the brand new 630 metres (472-479KHz) band at the field day.

For more information, please go to the website: www.fieldday.org.au

Wyong Field Day, proudly brought to you by Central Coast Amateur Radio Club

www.ccarc.org.au

ARNSW Anniversary BBQ.

Those who have received their membership badge will have seen included in the posting an early notification of an Anniversary BBQ which is to be conducted by ARNSW on Sunday the 10th of March at the Dural site.

Al VK2VEC is collecting names of those who will be attending.

You can email your RSVP to office@arnsw.org.au or telephone 02 9651 1490

ARNSW at its Dural site will be conducting the next Foundation course on Saturday the 23 March and assessments for all license grades on Sunday 24th.

Prior booking required by email to education@arnsw.org.au or call 02 9651 1490 and leave contact details.

Candidates need to bring passport photo.

VK3

Southern Peninsula Amateur Radio Club (SPARC) joins in The 2013 Rosebud KiteFest March 10th.

The Rosebud KiteFest is a huge community event, featuring a breathtaking array of kites flown over the beautiful waters of Port Phillip Bay.
Many Mornington Peninsula organizations & attractions will be on show, with SPARC showcasing amateur radio & launching kites carrying long wire antennas

high into the sky.

It all happens on the foreshore at Rosebud, Sunday March 10th, thanks to the Rosebud KiteFest Committee.

EMDRC will be promoting Amateur Radio with a display at the Scoresby Steamfest over the Long weekend of 9-11th March. On display will be HF, VHF/UHF and ATV.

As usual live ATV will be broadcast via the Melbourne ATV repeater VK3RTV and also available via BATC.

For more information re the festival.
www.melbournesteam.com.au or www.emdrc.com.au

The 2013 Gippsland Gate Radio & Electronics Club (GGREC) Hamfest date has now been fixed for Saturday 20th July at the Cranbourne Public Hall. Bookings for tables will soon be available.

DISCUSSION POINT

What use is an f-call?

You may have noticed over the past little while that I've been talking about off-air activities more than the ones achieved whilst actually sitting behind a radio. It's not because I'm no longer interested in talking about that, it's because of late I've had little opportunity to actually be on-air. Suffice to say, I'm working on it - hi hi.

Until now I've only really used my Amateur Radio for making QSOs, that is, making contact with stations and having a quick exchange of signal report, sometimes a description of our respective equipment and perhaps the local weather.

Recently I had the opportunity to use it for a slightly different purpose, which gave me a hands-on feel for why we have the protocols we do. Several Amateurs were all gathered in a 50 square km area, all well within VHF range, but out of sight of each other.

Within 10 minutes each Amateur on frequency knew where everyone else was and each was heading for the same location.

That in itself doesn't sound that remarkable, but it was the first time that I'd actually experienced the purpose of the way we use our call-signs and how multiple stations work together on the same frequency to achieve a common objective without anyone missing out, getting stomped on, or being misdirected.

There's a big difference between being taught how to operate your radio, doing a contest, having a chat, and actually using your radio to achieve a more directed goal.

If you've only had your radio ready for making call backs to the news, or for participating in a contest, all I can do is encourage you to try and use your radio in different situations. You may find that the things you've been

taught actually obtain a different meaning if you observe or use them in a different context.

In what environments have you had the opportunity to use your radio, and what did you learn from that? Let me know.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

World Radio Day 2013

February 13 is the day proclaimed by UNESCO and endorsed by the United Nations General Assembly to celebrate Radio as a medium; to improve international cooperation between broadcasters; and to encourage major networks and community radio alike to promote access to information and freedom of expression over the airwaves.

UNESCO encourages all countries to celebrate World Radio Day by planning activities in partnership with regional, national and international broadcasters, non-governmental organizations, the media and the public.

The International Committee for the World Radio Day is constituted by agreement among the most representative broadcasting organizations. Its purpose is to internationally promote the celebration of the World Radio Day, whom the first edition will be held February 13, 2013 by means of different activities.

For more information on this event take a look at the links on the email edition of this broadcast.

http://www.wrd13.com/

USA National Weather Service (NWS) Warning Coordination Meteorologist Hector Guererro reports that a case of vandalism at the Coleman NWS transmission site has taken the NWS Weather Radio station transmitter off the air.

Guererro said that Coleman County authorities reported that vandals broke into the transmitter building and stole the copper data feed lines.

The lines are being replaced and the transmitter should be back on shortly. The transmitter, identified as WXN-89, operates at 162.475 MHz and many area Weather Alert radios and scanners are tuned to that frequency for up to date weather alerts and current conditions in that part of 'The States'.

Review of the New Zealand 70 Centimetre Band Plan

NZART Council has decided a review of the current 70 cm Bandplan is desirable as a conflict with the IARU Region III Bandplan has been identified by a number of formal complaints to both NZART and Radio Spectrum Management (RSM). Council considers it part of its responsibilities to amateur radio that it reviews the Bandplans when significant changes occur in the use of the spectrum.

This proposed review is now on the agenda of the Council Face to Face meeting and it is hoped that submissions will be called for shortly afterwards.

Due to the discrepancy between the NZART 70 cm Bandplan and the IARU Region 3 Bandplan, the review will give consideration to concerns regarding the operation of Amateur Television. It will also consider interference received from UHF Low Interference Potential Devices - LIPD's by equipment such as 70 cm repeaters (the National System was re-engineered to be resistant to this some time ago).

NZART Council will seek feedback from existing operators on the 70 cm band.

UK LOTTERY money is being used to preserve the history of a World War Two radio transmitter hidden deep in the Ashdown Forest.

A grant of £9,800 has been awarded to Hadlow Down-based charity Sound Architect Creative Media to record events and memories surrounding the Aspidistra, one of England's most closely guarded secrets of the 20th century.

Anyone anywhere in the world with information or who would like to help with the Aspidistra project should visit www.soundarchitect.org

==========

NEWS FROM ARNEWSLINE USA

15 YEAR OLD INVENTOR FROM SIERRA LEONE VISITS MIT

Here's David Black. KB4KCH, with the rest of the story:

--

Kelvin Doe is not a ham radio operator but he is being called the wonder kid of Sierra Leone and with good reason. This is because the 15 year old who recently won a trip to visit the Massachusetts Institute of Technology taught himself how to build generators, batteries, and FM radios using parts he found in the trash.

In the best tradition of the maker and hacker movement he does it using things that would otherwise have been thrown out and, with almost no formal training, turns them into useful products.

Doe's inventions are especially valuable in his hometown where, according to Kelvin, the lights there only turn on "about once a week." Kelvin builds batteries and generators to provide electricity for his family. He also uses his homemade gear to operate a successful radio station where he is known as DJ Focus.

Kelvin says he hopes to use his radio station as
a way for the youth in Sierra Leone to debate
about issues in their area. He says he plans to
build a windmill generator to provide more stable electricity for his town.

Kelvin Doe visited MIT as part of the
university's Visiting Practitioners Program. The
Syllabus allows inventors to use MIT's plentiful
resources and perform their own research in the schools labs.

Kelvin Doe became the youngest ever Visiting
Practitioner after winning the Innovate Salone
Challenge. Innovate Salone runs a program that
asks young citizens of that nation to creatively
come up with solutions to problems facing their community.

>From the South-East Bureau in Birmingham Alabama, I'm David Black, KB4KCH.

--

In our view, its young people like Kelvin Doe,
who will be the ones who will truly advance all
of mankind in the years and decades to come, and
the world really needs a lot more like him.

OPERATIONAL NEWS - DATELINE 2013

ZL Jock White Memorial Field Day Contest Sat and Sun Feb 23 and 24.

WW International Museums Weekends June 15/16 and 22/23

W.I.A. Contest Champion - VK4PJ Peter Brown Trophy

The W.I.A. Contest Champion is awarded annually for the best combined effort
in W.I.A. Sponsored Contests.

To qualify for the trophy you must be a member of the WIA and submit a log to
at least 3 of the qualifying contests

Points for the contest(s) are awarded on the following scale
1st place in section 100 Points
Second 80 points
Third 60 points
Fourth 40 points
Fifth 20 points

You can only claim one score per contest. eg. If you entered 2M SSB and you
were also the overall winner only one of the section wins count not both.

For operation as a member of a multi operator station scores are 0.6 of
normal eg member of 1st place multi op maximum points are 60 points.

NB Operators of Multi ops callsigns MUST be submitted with the log or no
points can be allocated.

If you change callsign during the calendar year the most recent callsign will be used and it is your responsibility to notify the contest committee of the change.

In the event of a tie the title is shared.

The score is taken from the best performance in each category in a contest and there are 7 different W.I.A. contests.

The qualifying contests are;

Ross Hull Contest
John Moyle National Field Day
Harry Angel
Remembrance Day Contest
Oceania DX Phone
Oceania DX CW
VHF/UHF Field Days * (Best Score from one only)

(Trent Sampson VK4TS@wia.org.au WIA - Director for Awards and Contests)

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

MARION ISLAND TO BE ON BY NORTHERN SUMMER

This according to reports that South African radio amateur ZS1BCE, has been appointed to be the new radio technician to that rare location for one year between April of this year and May of 2014.

ZS1BCE is expected to depart from Cape Town on April 15th, and his amateur radio operations are expected to begin about four weeks later.

Currently, he does not have a Zed-S-8 callsign, but plans to apply for ZS8D.

Operations will be on SSB on most High Frequency bands.

And less we forget to mention: His QSL Manager will be Pierre Tromp, ZS1HF, who just happens to have been the last operator from Marion Island.

(via OPDX)

With lectures on What not to do in contests, An introduction to contesting, A contesters view of the sport, R.T.T.Y. contesting and an open forum for questions and answers from some leading contesters it's hoped the Mini Contest University at Wyong has something for everyone wanting to get into the radio contesting sport.

Although aimed at those who want to learn contesting skills, it also plans to be a fun event with socialising being a major part of the day, as well as in the evening when we will all meet up at a local restaurant with others who have travelled to be at the field day, the next day - to relax and enjoy a good "ragchew" with friends old and new.

So if you want to be part of the MCU day please register at
fieldday.org.au/contest_university

This is Ed, VK2JI "see you at Wyong"!

INTRUDER WATCH - ENFORCEMENT ZONE

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an
intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

Marine radio interference

A recent case of a very low level of interference was affecting the maritime
VHF distress and calling channel 16 at the Maritime New Zealand's Wairarapa
and Picton sites.

The investigation into the interference took seven days to locate and resolve
and involved contacting ships and shore stations on the Wairarapa coast, as
well as both ground and helicopter searches. However, no interference
was detected in the Wairarapa area.

Eventually a very low level signal was detected, and direction finding
indicated it was from a broadcast transmission site 120km from the affected
Wairarapa site and 185km from the Picton site.

A visit to the broadcast transmission site was arranged and the low level
interference source was traced to a high power television transmitter.

The cause of the interference was an open inspection panel which had been
left open for maintenance purposes.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

NEW ANIMATED UK VIDEO FEATURES UKUBE-1 AND FUNCUBE

A new animated video has been released that tells
the story of the UK Space Agency's first CubeSat
UKube-1 slated to launch in the 3rd quarter of
2013. UKube-1 will carry a set of AMSAT-UK
FUNcube transponder boards to provide a 435 to
145 MHz linear transponder and a 1200 bps BPSK

beacon for educational outreach. For more
information on FUNcube and a link to the video
please take your web browser to www.amsat-uk.org

Young Hams Net 3.590 - 7:30pm Victorian time.

Amateur Radio Supplies announces winner of its 'Promote Youth in Amateur Radio' contest

"After receiving and evaluating hundreds of entries, we'd like to congratulate our winner, Adam Donaldson, callsign KC9VIV, of Weston, Wisconsin," said Jeff Demers, owner, Amateur Radio Supplies.

"Adam was selected as the winner after being nominated by his scoutmaster, Roger Branton, who describes Adam as, 'an Eagle Scout, an A student, a cross-country distance runner and an all-around great teen'."

Amateur Radio Supplies awarded Adam a complete HF (high frequency) station, including:

Alinco DX-SR8T/E 160-10m All Mode Transceiver & 30 Amp PS

LDG AT-100 Pro II Desktop Antenna Tuner

Choice of Rugged All Band G5RV or HyGain DX-77A Vertical

100' of Premium RG-213 Coax

Vibroplex Brass Racer Iambic Paddles

SignaLink USB Sound Card for Digital Modes

Heil Pro Set Plus Headset

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Let's see what's happening re the 2013 floods..

During the Australia day floods Ian Wells vk4fnaa and Dave Mclain vk4ee of the Banana Shire Repeater Association assisted with communications in the recent rescue of people trapped in vehicles on kroombit creek just south of biloela.The two meter repeater allowed emergency communication direct with the biloela police which we kept them informed of the situation while telstra mobile network was offline. Our new amateur repeaters faired reasonably well staying on air most of the time during the floods . Repairs and improvements to the repeaters will be in progress in future weeks to guarantee communication during flood events when other communications fail.. our association is now considering forming a wicen and cb emergency communication

group to work with the local council,police and ses during emergency events.

I'm Geoff Emery, VK4ZPP.

As the days pass, stories of kindness and grief are being presented in the aftermath of the storms and floods. The same is happening in the areas that were seared in the record summer heat.

It is the human story of these events that touches us but more things are in the mix. Disaster planning has adopted a catch word, "resiliency", the ability to stretch and to also bounce back. I would expect to hear this word more and more as communities try to rebuild.

However, it should not be forgotten to analyse what happened during the emergencies. I am aware of some issues in my local area and I have heard reports of others elsewhere. The obvious area of concern to radio amateurs is maintaining communications. Lack of resources, equipment or people, create choke points which have to be eliminated for the job to be done well, next time.

Clusters of people, flooded and without telephones or electricity surrounded the population centres that were being reported on social and broadcast media. Locally, I believe there is one registered SES member. In a rural area this is hardly going to provide much feedback or help.

Sadly I think this story is going to be heard much more widely. Then for me, what can we amateurs do to assist, to provide resiliency now and in the future?

I'm Geoff Emery and that's what I think....how about you?

SPECIAL INTEREST GROUPS --- SUMMITS ON THE AIR
www.sotawatch.org
www.sota.org.uk

Launch of Summits on the Air program in VK1

On the 1st of February the SOTA program was launched in VK1, so operators can now activate any of the 43 approved summits in the VK1 area and qualify for points under the SOTA award scheme. VK1 joins VK3 and Vk5 which have been operational during the last 4 to 12 months.

On the 1st of February a bunch of people activated summits in the VK1 area, making contacts with other summits in VK1, VK3 and VK5 using portable equipment and antennas.

SOTA Activators are required to carry their equipment to the summit and must use only battery or natural power sources and MUST walk for at least the final 25m of the ascent to the summit.

The summit itself has to have at least 150 metres of prominence over its surrounds to qualify for SOTA.

Access to some mountains requires a lot more than 25m of climbing and walking, but others are readily accessed. There is a range of difficulty and challenge, with higher summits giving operators more points than the lower ones.

SOTA stations need to have at least 4 contacts with other stations, which can be either other activators or any other stations, who are called "chasers". There are awards for both activators and chasers.

All licence classes are included.

You don't have to do this solo, groups of amateurs can combine their resources and carrying capacity to activate a summit. A great club project. Imagine a Field day any weekend - every weekend if you like! There is even some activation during weekdays. Clearly SOTA is addictive!

More details of the SOTA program are easily found at sota.org.uk where the lists of associations, summits and current activations can be viewed. SOTAWATCH.ORG provides Alerts and Spots for SOTA operations. There is a mailing group on Yahoo Groups for SOTA Australia, new members are welcome.

(Andrew VK1DA)

REWIND

Wanted .. Donations for VK4KG Memorial Station

They finally have a building to call their own, but it currently lacks mains power.

They have some fine examples of working Military Transmitters and Receivers and some older RadioAmateur Transceivers but don't have anything modern to demonstrate the newer modes of operating to the General Public.

The volunteers of the VK4KG Memorial Amateur Radio Station located at RAAF Garbutt need donations from you to enable them to demonstrate Amateur Radio to the public on a regular basis.

Any modern HF Transceiver you are not using is a good candidate for this most worthy cause.

Can You Help?

Contact WIA National News and we will put you onto the VK4KG Station Co-ordinator, Wayne/VK4WDM.

Oh, if you are an electrician or electrical firm in the Townsville area that can donate time and materials to help the station get connected to mains that is only 10 metres away then your donations would also be gratefully received.

The VK4KG volunteers, with help of donations, hope to be operational again by the 2013 Remembrance Day Contest and be open every Sunday for the General Public.

Well it's definitely the silly season for Hamfests Bryan, what with the Kyneton Hamfest on today and the Central Cost Field Day on in two weeks time

Bryan
Ahhh yess.. but, unfortunately as much as I would like to, I wont be going to Wyong this year it's a long drive but your right .. its deffinately hamfests and out club the EMDRC is in there as well with it's big annual hamfest or better known as the EMDRC White Elephant sale on next month the 24th of March.

Robert
It's one of Melbourne's biggest hanfests with all the major traders and you know the best part (and this is the part I like) is that you don't need a day pass or a weekend leave pass from the Missus to get there you can be out and back again in no time.

Bryan
And your right about big Rob, from memory its the second biggest hanfest or something like that - but it also has a friendly atmosphere and I think that's just as important. So if you're a trader and would like to book a table for the big friendly hamfest, give Max VK3WT a call on 03 90059251 or email: wes2013@emdrc.com.au

RAC Bulletin 2013-002E - RAC Director Election / Appointments
2013-02-06

RAC Director for British Columbia/Yukon

Congratulations are extended to Mr. William (Bill) Gipps, VE7XS who was recently acclaimed as the RAC Director for British Columbia/Yukon. Mr. Gipps ran unopposed, eliminating the need for a balloted election. His term as Director will be for two years starting January 1, 2013 and ending on December 31, 2014.

Mr. Gipps has been an amateur operator since 1989 holding call signs VE7XS, VE7ISV, VA7XXI, V31BG and has been involved in many aspects of the hobby. He recently travelled as a team member with call 7P8BG on a DX-Pedition to the Kingdom of Lesotho.

RAC Director for Atlantic

Congratulations are extended to Mr. Everett Price, VO1DK who was recently acclaimed as the RAC Director for Atlantic. Mr. Price ran unopposed, eliminating the need for a balloted election. His term as Director will be for two years starting January 1, 2013 and ending on December 31, 2014.

Mr. Price has been an amateur operator over over thirty two years and has been involved in many aspects of the hobby. He can also frequently be heard as marine mobile enjoying his sailing sloop "IdlEase" in eastern Newfoundland coastal waters.

RAC Director for Midwest

Congratulations are extended to Mr. Derek Hay, VE4HAY who was recently appointed as the RAC Director for Midwest. Mr. Hay has generously stepped forward to continue his RAC Director???s role after there were no eligible nominees resulting from a second call for nominations according to the Constitution, Section 7, Article 6 i). His term as Director will be for two years starting January 24, 2013 and ending on December 31, 2014.

Mr. Hay has been an amateur operator since 1990 and has been involved in many aspects of the hobby. Derek has been Chairperson for the RAC Administration and Finance Committee for the past two years. This time of year you will find Derek making calls of a different kind from the hack at the curling rink.

What a surprise - not. We all know the reason for the decline, isn't it time the RSGB woke up, smelled the coffee and did something about the shameful three tier system and it's woefully low standard "give away everything to the retards for nothing for life" entry level?

Just ignore Jimbo, he does his jibbering via the keyboard- like Frank et
al.

They really must have very empty lives.

I don't see what all the fuss is about....other organisations that have been miss-managed and lost their way are just allowed to collapse.....the hobby is fucked anyway....does anybody really think all those 11m pirates WANTED to be members? they just used the RSGB to gain "respectability" with a hammy mens Licence for no effort and in the process making mugs of established hams or produced their own "trainers" .....anarchy is the foundation stone of 11m pirates and they will continue to do exactly what they want to regardless of the RSGB or OFCOM ....we are just kicking over the ashes of a once fine hobby.......

The only "leap" that comes to mind is the decision to wreck the qsl
bureau and further alienate the amateur community.

What a bunch of tossers...seriously. We know the problem, we know the
solution but pride and arrogance won't allow them to admit how wrong
they got things.

Thursday, February 14.

==> FIELD DAY: 2013 FIELD DAY PACKET NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field
Day, June 22-23, 2013! ARRL's flagship operating event -- always held
the fourth full weekend in June -- brings together new and experienced
hams for 24 hours of operating fun.

Field Day packets are now available for download
<http://www.arrl.org/fieldday> and include the complete rules, as well
as other reference items such as forms, ARRL Section abbreviation list,
entry submission instructions, a Frequently Asked Questions section,
```

guidelines for getting bonus points, instructions for get-on-the-air stations and a kit for publicizing your event with the local press. New for 2013: Stations operating as Class A or B may begin setting up at 0000 UTC on Friday (which will be Thursday 8 PM EDT, 7 PM CDT, 6 PM MDT and 5 PM PDT). The groups may start and stop their set-up, resuming the set-up later, but may spend only a maximum of 24 hours cumulative time for setting up their sites.

An informational flier with basic "What Is Field Day?" has also been included in this year's Field Day packet. Amateur Radio clubs and individuals are encouraged to reproduce this flyer as a handout. Find it and more on the ARRL's Field Day web page <http://www.arrl.org/fieldday>.

==> ON THE AIR: IARU REGION 2 SEEKS INPUT ON HF BAND PLAN

The International Amateur Radio Union (IARU) Region 2 conference will be held later this year in Mexico. The Region 2 conference -- held every three years -- is attended by delegations from the national Amateur Radio societies in the western hemisphere that are members of the IARU. The ARRL is the IARU Member Society for the US.

One of the topics on the conference agenda will be the Region 2 HF band plan. This band plan is "harmonized" with -- spectrum management-speak for "very similar to" -- the IARU Region 1 and Region 3 band plans. Many hams in the US may not know there is such a thing as a Region 2 band plan. Other American hams have heard of it but may not know how -- if at all -- this band plan affects them. Read more here <http://www.arrl.org/news/iaru-region-2-seeks-input-on-hf-band-plan>.

==> ON THE AIR: RIDE THE WAVE IN THE 2013 ARRL INTERNATIONAL DX CW CONTEST

CW DXing and contesting take center stage the weekend of February 16-17, as the 2013 ARRL International DX CW Contest takes to the airwaves. If you've never operated the CW contest, now is the time to start. "You can work a lot of DX with 100 W and a simple dipole or vertical antenna," explained ARRL Contest Branch Manager Sean Kutzko, KX9X. "Some stations -- with some perseverance -- have worked more than 100 DXCC entities during the contest period. And who knows? You just might achieve DXCC during the contest." Read more here <http://www.arrl.org/news/ride-the-wave-in-the-2013-arrl-international-dx-cw-contest>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of January -- takes a look at the 2013 Annual Meeting of the ARRL Board of Directors, how the ARRL is supporting Amateur Radio in the classroom, new publications, updates from the ARRL Development Office, reports from the Official Observer Desk and more. Read more here

<http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-54>.

==> AMATEUR RADIO IN SPACE: HOST A REAL-TIME CONVERSATION WITH CREWMEMBERS ABOARD THE ISS

Proposals are now being accepted from US schools, museums, science centers and community youth organizations to host an Amateur Radio on the International Space Station (ARISS) contact between November 1, 2013 and May 1, 2014. To maximize these radio contact opportunities, US ARISS program partners -- the ARRL, AMSAT and NASA -- are looking for organizations that will draw large numbers of participants and integrate the contact into a well-developed education plan. Proposals are due March 1, 2013. Read more here <http://www.arrl.org/news/host-a-real-time-conversation-with-crewmembers-aboard-the-iss>.

==> ITU OFFERING FREE DOWNLOAD OF 2012 INTERNATIONAL RADIO REGULATIONS

The International Telecommunication Union (ITU <http://www.itu.int/>) is offering an electronic version of the 2012 International Radio Regulations <http://www.itu.int/pub/R-REG-RR-2012> at no charge. These regulations incorporate the decisions of the World Radiocommunication Conferences of 1995 (WRC-95), 1997 (WRC-97), 2000 (WRC-2000), 2003 (WRC-03), 2007 (WRC-07) and 2012 (WRC-12), including all Appendices, Resolutions, Recommendations and ITU-R Recommendations incorporated by reference.

While Article 25 <http://life.itu.ch/radioclub/rr/art25.htm> of the International Radio Regulations defines the Amateur Radio Service, the regulations as a whole define the allocation of different frequency bands to different radio services, as well as the mandatory technical parameters to be observed by radio stations, procedures for the coordination and notification of frequency assignments made to radio stations by national governments and other procedures and operational provisions.

The free download -- as well as paper copies and a DVD -- are available in English, Arabic, Chinese, Spanish, French and Russian. While the electronic version is available at no charge, the individual paper versions and the DVD containing versions in all six languages cost CHF 398 (approximately $438 USD). The free download is available through mid-2014.

==> BE A STAR! THE QST VIDEO CONTEST DEADLINE IS MARCH 1

Grab your cameras -- you only have until March 1 to send your entry for the 2013 QST Video Contest. Shoot a video on any tasteful subject relating to Amateur Radio and send it our way. If your video takes first, second or third place, we'll post it on the ARRL website for everyone to see. (Only one per ARRL member, please.)

Your video can be up to 5 minutes in length and the topic can be anything that illustrates the excitement of Amateur Radio. Videos will

be judged on overall quality and composition. The first place winner will receive $500; the second place prize is $250 and the third place prize is $100 (winners of the 2012 competition are ineligible). The winning videos will be displayed on the ARRL website and the ARRL's YouTube channel. Read more here <http://www.arrl.org/news/qst-video-contest-deadline-approaching>.

==> NEW INTERNATIONAL REPLY COUPON INTRODUCED

The Universal Postal Union has introduced the newest model of the International Reply Coupon (IRC): The Doha model -- so named for the 25th Universal Postal Congress that took place in Doha, Qatar in October 2012 -- will replace the current model, known as the Nairobi model. Although the US Postal Service no longer sells IRCs, they are still available in other countries and post offices in the US are mandated to redeem them. The Doha model IRC will be available for purchase on July 1, 2013. It is valid for exchange until the end of 2017. The Nairobi model remains valid until December 31, 2013. Read more here <http://www.arrl.org/news/new-international-reply-coupon-introduced>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: The average daily sunspot numbers hardly changed from last week and the week prior, but the average daily solar flux bounced back to about the level it was from two weeks ago: The average daily sunspot numbers were down 5 points to 50.7, while the average daily solar flux was up 7.7 points to 106.4. The predicted solar flux values are 105 on February 7-9, 110 and 105 on February 10-11, 100 on February 12-14, 115 on February 15-16, 110 on February 17, 115 on February 18-19, 110 on February 20-21, 105 on February 22, 115 on February 23-24, then 110, 105 and 100 on February 25-27, and back down 95 on February 28 through March 2. The predicted planetary A index is 5, 8, 18 and 10 on February 7-10, 5 on February 11-18, 8 on February 19, 5 on February 20-21, then 15, 10 and 8 on February 22-24, 5 on February 25-28, then rising to 10 and 8 on March 1-2. Look for more on the ARRL website on Friday, February 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> ARRL RECOGNIZES: ROBERT NICKELS, W9RAN, WINS JANUARY QST COVER PLAQUE AWARD

The winner of the January QST Cover Plaque award is Robert Nickels, W9RAN, for his article "Cheap and Easy SDR <http://www.nxtbook.com/nxtbooks/arrl/qst_201301/index.php#/32>." Congratulations Robert! The QST Cover Plaque Award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the February issue today.

==> CORRECTION: SERBIAN PRIME MINISTER IVICA DACIC DOES NOT HOLD
PERSONAL CALL SIGN

In a news item
<http://www.arrl.org/news/ivica-da-i-yu1yu-elected-prime-minister-of-serbia>
posted on the ARRL website on August 1, 2012 and published in the
October 2012 issue of QST, it was reported that Serbian Prime Minister
Ivica Dacic held the call sign YU1YU. The ARRL has learned that
although Prime Minister Dacic was a radio club member and passed the
examination for an Amateur Radio operator license, and while YU1YU was
suggested to him as a call sign for which he could apply, he has never
applied for a personal call sign.

==> THIS WEEK IN RADIOSPORT

This week:

- February 8 -- NCCC Sprint Ladder
- February 8-10 -- YLRL YL-OM Contest
- February 9 -- Asia-Pacific Spring Sprint (CW); FISTS Winter Sprint
- February 9-10 -- New Hampshire QSO Party; Louisiana QSO Party; CQ WW
RTTY WPX Contest; YL-ISSB QSO Party (CW); KCJ Topband Contest; Dutch
PACC Contest; OMISS QSO Party; RSGB First 1.8 MHz Contest; AWA
Amplitude Modulation QSO Party
- February 10-11 -- Classic Exchange (Phone)
- February 11-15 -- ARRL School Club Roundup
<http://www.arrl.org/school-club-roundup>
- February 13 -- NAQCC Straight Key/Bug Sprint
- February 13-14 - CWops Mini-CWT Test

Next week:

- February 15 -- NCCC Sprint Ladder
- February 16 -- Feld Hell Sprint
- February 16-17 -- ARRL International DX Contest (CW)
<http://www.arrl.org/arrl-dx>
- February 17-18 -- Russian PSK Worldwide Contest
- February 20 -- AGCW Semi-Automatic Key Evening

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more

//
23rd ANNUAL DOWN EAST HAMFEST - SATURDAY - APRIL 27, 2013

Posted: 07 Feb 2013 01:09 AM PST
http://forums.qrz.com/showthread.php?378913-23rd-ANNUAL-DOWN-EAST-HAMFEST-SATURDAY-APRIL-27-2013&goto=newpost

The 23rd ANNUAL DOWN EAST HAMFEST, an ARRL Sanctioned hamfest will be held

Saturday, April 27, 2013. The location is Lenoir Community College Gymnasium. Lenoir Community College is located at 231 Highway 58 South, Kinston, NC (intersection of NC Highway 58 South & US Highway 70 East (Please use the Highway 58 entrance).

Doors open at 8:00 AM. Set Up 6:00 - 8:00 AM (Due to circumstances, we cannot set up the night before as in past years, nor will we have our traditional Pig Pickin').

*** WE ARE ACTIVELY SEEKING THE FOLLOWING VENDORS IN THE FOLLOWING CATAGORIES: (New & Used Amateur Radio Equipment; Electronics Parts; Embroidery and/or Name Tags; Amateur Radio Manufacturers; Computer & Electronics Dealers; Crafts and Hobby-Related Materials.) NO WEAPONS OR PORNOGRAPHIC ALLOWED ON SITE!

IF YOU HAVE AN AMATEUR RADIO RELATED PRODUCT, WE INVITE YOU TO COME TO EASTERN NORTH CAROLINA!

Pre-Registration Info: Tickets $5.00 each or 3 for $12 (Advance Sales thru April 20, 2013) Tables are $12 each. Tailgating Spaces are $12 for TWO (2) Parking Spaces PLUS Hamfest Ticket. Indoor Electrical Hookup (Outlets) are $5.00 each. TABLE LOCATION ASSIGNED BY HAMFEST

TABLES & ELECTRIC CONTACT: Gene Rybolt KA9DGI

EMAIL: grybolt@icomnet.com PHONE: (252) 523-0988

Day of Hamfest Info: Tickets $6.00 each or 3 for $15 Remaining Tables (if available) will still be $12 Electricity if available $5.00

FCC EXAMS AT 11:00 AM WALK-INS ONLY * SKYWARN TRAINING 9:00 AM BY NWS NEWPORT

HAMFEST INFO: CONTACT BYRON HIGHLAND K4BMH EMAIL: bhighland@nc.rr.com PHONE: (252) 347-1498

Pre-Registration Prize: VHF/UHF Handheld Radio Main Prize: VHF/UHF Mobile Radio

Hourly Prizes: MUST BE PRESENT TO WIN! Economical Meals & Refreshments available ON-SITE!!

Amateur Radio Newsline(tm) Report 1852 - February 8 2013

Amateur Radio Newsline report number 1852 with a release date of February 8 2013 to follow in 5-4-3-2-1.

The following is a Q-S-T. New Zealand to take a fresh look at its 70 centimeter bandplan; Italian amateurs regain temporary access to the pan-European 70 MHz band; an update on ham radio assistance in the flooding down-under and radio helps solve another mystery of the universe. Find out the details are on Amateur Radio Newsline(tm) report number 1852 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: REVIEW OF THE 70 CENTIMETER BAND PLAN DOWN-UNDER

A frequency conflict on 70 centimeters has lead to the review of a ham radio bandplan down-under. Amateur Radio Newdline's Jim Meachen, ZL2BHF, reports:

--

The New Zealand Association of Radio Transmitter's or NZART Council has decided a review of the current 70 cm bandplan is desirable as a conflict with the IARU Region III bandplan has been identified by a number of formal complaints to both NZART and Radio Spectrum Management or RSM. The Council considers it part of its responsibilities to amateur radio that it reviews the Bandplans when significant changes occur in the use of the spectrum.

Due to the discrepancy between the NZART 70 cm Bandplan and the IARU Region III Bandplan, the review will give consideration to concerns regarding the operation of Amateur Television. It will also consider interference received from UHF Low Interference Potential Devices by equipment ham radio operate such as 70 cm repeaters even though the National System was re-engineered to be resistant to this some time ago.

This proposed review is now on the agenda of the Council face to face meeting in this month and it is hoped that submissions will be called for shortly afterwards. The NZART Council will seek feedback from existing operators on the 70 cm band. It is interested in learning about any interference presently being received or any that may occur in the future while operating on this band. The review is also planned

to be a discussion topic at the Technology Convention in Auckland, where it is anticipated it will be presented as a Draft Recommendation for comment, before being presented to NZART Council.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

The NZART says that it will soon be inviting comment from parties interested in providing submissions to a Committee appointed at the Council Face To Face gathering to perform this review. Submissions from New Zealand 70 cm Band users on the current 70 cm Bandplan or suggestions to improve it will be most useful.

(NZART)

**

RESTRUCTURING: ITALIAN AMATEURS BACK ON 70MHZ

Italian amateurs have regained access to the pan-European 70MHz band. That is at least until December 31st of this year.

All Italian stations are authorized to use 70MHz, unless they are within 30km of the borders with Austria, Switzerland or France. Frequencies in use are 70.100, 70.200 and 70.300MHz, with 25kHz of bandwidth. All modes are permitted with a maximum power of 50 watts Effective Radiated.

(Southgate)

**

RESCUE RADIO: VK FLOODING UPDATE

Ham radio continues to provide aid in the wake of flooding that hit the Australian state of Queensland. WIA Newsman Graham Kemp, VK4BB, has the latest:

--

VK4BB: "The Queensland, VK4 disaster continues and as the state begins its big clean-up and recovery phase, a picture of emergency communications provided by radio amateurs is starting to emerge.

Initial reports from Neil McCloud, VK4ERM. WIA National WICEN Coordinator are that HF links were requested by Queensland Water Police. Other WICEN help was given to the Townsville and Rockhampton regions pending repair by Telstra of its fiber optic cables to the North.

Widespread power and communications disruption will take a number of days by repair crews. No more is immediately known about WICEN and its emergency role, but this should be learn't before next weeks

broadcastcast.

At least six people have died in Queensland; others are missing and many thousands are homeless and sheltering in relief centers while some towns remain inundated and Isolated.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

The weather system that caused record Queensland flooding was caused by ex-tropical cyclone Oswald, That weather system then moved south to affect many parts of the Australian state of New South Wales. (WIA News)

**

RADIO POLITICS: ARRL BOARD MEETING REPORT NOW ON LINE

Back on this side of the Pacific, the ARRL Board of Directors held its 2013 Annual Meeting January 18th and 19th in the city of New Orleans, Louisiana. At the meeting, the board set its legislative objectives for the 113th Congress, approved the organization's amended financial plan, elected members to the Executive Committee and ARRL Foundation, bestowed awards and more. You can read the complete report of the Boards actions on line at tinyurl.com/arrl-board-2013. (ARRL)

**

RADIO LAW: FIRST FCC HEARINGS HELD ON HURRICANE SANDY

In the first of several field hearings to discuss the aftermath of superstorm Sandy, several communications industry experts said access to fuel before, during and after a crisis was of utmost importance. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is here with more on what transpired at the gatherings held last week in New York City and New Jersey:

--

While there was not much that affected ham radio, right off the top it was noted that none of the broadcast stations in the areas affected by hurricane Sandy went off the air. In the case of Clear Channel Communications which owns a number of broadcast properties in the region most impacted by the super-storm the company had pre-staged generator fuel well ahead of time. Clear Channel Chairman John Hogan noted that some employees even camped out for days, making sure the groups facilities stayed on the air.

Dave Davis is the president and general manager of WABC television in New York City. He agreed disaster planning is essential. Anticipating power outages due to the storm, Davis asked asked ESPN to feed content to the company's two sister radio stations in the affected market.

Those stations also remained on the air.

The manager of social media for the New York Fire Department described how she kept in contact with residents who had no phone service using Twitter. She then passed along their information to 911 authorities. As a result, the panelists discussed how to better incorporate more social media into emergency alerting. However WABC's Davis noted that while social media can be a great tool, that the public needs accurate information, especially to disprove Internet rumors.

Finally, in his commentary Clear Channel Chairman Hogan said the FCC might want to encourage wireless carriers to include or activate FM chips in their cellphones. This he said would make radio available to more people in an emergency even if other forms of communications are not.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Studio, in Los Angeles.

--

In her comments, FCC Commissioner Ajit Pai cited Arbitron ratings service information that estimated about one million people were listening to radio the day Sandy hit the East coast. (RW, other published news reports)

(5 sec pause here)

**

PROPAGATION: 15 TO 10 METER RADIO BLACKOUT CAUSED BY ERRUPTING SUNSPOT

If you operate 10 and 15 and were listening on Saturday February 2nd and several days afterward, the bands likely sounded like this:

--

Actual band noise recording.

--

That's what happened to the spectrum from 21 to 28 or so Megahertz when a tiny sunspot erupted into a moderately sized solar flare/ One that radio astronomers say completely drowned out radio communication on these frequencies world-wide.

The recording was made at our studio on a venerable Kenwood TS-520 and MFJ vertical soon after we heard about the flare. And as reported by

several solar observation sources, it appears as if the sun is beginning a period of high activity as it enters its maximum of its 11-year solar cycle.

Radio Astronomer James Thieman, who leads NASA's JOVE project described the event was a fairly good-sized surge. He explained that the solar burst that happened on February 2nd accelerated electrons to high energies. This electron stream created plasma in the sun's atmosphere which traveled to Earth and caused some disruption in high frequency radio communications.

Despite this, many astronomers note that the Sun has been relatively quiet for the last few months, producing few large solar flares or coronal mass ejections. These occur when a star throws off charged particles into space that travel at speeds of millions of kilometers per hour. (NASA, SDR, Wired, others)

**

HAM RADIO IN SPACE: CONGRESS REMOVES EXPORT PROHIBITION ON SATELLITES

The National Defense Authorization Act for Fiscal Year 2013, passed by Congress in late December and now signed by President Obama has removed a restriction that has essentially shut down international cooperation for building amateur satellites in the past decade.

Under the old law, satellites and their component parts were considered to be "munitions" and their export to other countries was severely limited. This made it impossible for amateur satellite organizations in different countries to work together on major projects. For example, the last big amateur satellite, Phase 3D. It was built jointly by AMSAT groups in the U.S., Germany and other countries, but that was before the international cooperation measure was put in place.

The new law restricts satellite exports only to China, North Korea and countries identified as state sponsors of terrorism, as well as those under trade embargoes. A recommendation from the Departments of State and Defense said the old law impeded the ability of American satellite builders to work with international partners while providing no noticeable benefit to national security. (CQ)

**

HAM RADIO PUBLIC RELATIONS: THAT GUY WITH THE HAM RADIO

Kraft foods has produced a new set of television commercials called the Velveeta-Eat-Like-That-You-Know campaign, and one of the 15 second spots features ham radio in a very positive light.

The ham radio spot is titled "That Guy with the Ham Radio" and appears to be one of five new commercials for Kraft's Velvita Shells and Cheese lunch and dinner product. Others in the series are titled "That Guy That Drives That Limo," "That Guy That Paints Those Landscapes," "That Helicopter Guy at the Mall" and "That Guy That Owns That Aquarium

Store."

All are fast paced and fun to watch. You can see them on-line at genericbaldman.com/Velveeta-Eat-Like-That-You-Know. But be forewarned, watching any of these spots may leave you quite hungry. (ARRL PR Remailer)

**

MEDIA SURVEY: KPMG SAYS TELEVIEWERS ARE MULTITASKERS

A new study by the research firm KPMG has concluded that 60% of American television viewers are also devoted multitaskers who watch television while accessing the Internet at the same time.

KPMG's findings were based on a global online survey of 9,000 people in nine countries, including the United States that was conducted lasst October. The survey also concluded that even though multiple devices vie for consumers' attention, that most people still prefer to watch television shows, movies and other video on the TV. Only 14% of those surveyed prefer to watch video on their smartphones or tablets.

According to KPMG, these results suggest that the next big disruption in living room viewing may come from so called "Smart TVs." These arer Internet-connected sets that afford the viewer access to traditional TV broadcasts as well as online services such as Netflix, Hulu or Amazon.com.

KPMG is one of the world's largest professional services companies and one of the so-called Big Four auditors with global headquarters located in the Netherlands. Its findings hold implications for network programmers and advertisers, which can no longer be sure which screen is drawing the viewer's eyes. (Published news reports)

**

NAMES IN THE NEWS: FCC CHAIRMAN WILL NOT DISCLOSE HIS FUTURE CAREER PLANS

Some names in the news. FCC chairman Julius Genachowski remains silent on whether he is planning to leave that post anytime in the near future. According to news reports Genachowski would not respond to a press conference question asked on Thursday, January 31st regarding his short-term plans.

Genachowski would only say that he is working hard every day and that the FCC has a terrific agenda and that he is focused on that agenda. That echoed his answer over the last several months when asked whether he is leaving given the widespread belief in D.C. communications circles that he would exit early in the president's new term, either for a private sector job or another Administration post. (B&C)

**

NAMES IN THE NEWS: SATELLITE EXPLORER APP NOW AVAILABLE

Tom Doyle, W9KE, has released "Satellite Explorer." This is described as a Windows 8 app that runs on Intel based tablets, laptops and desktops as well as Windows RT tablets like the Microsoft Surface. It is available in the Windows Store if you search for "Satellite Explorer." The app itself is free but if you find it of value you are asked to please contribute to your favorite AMSAT project. A video preview of it can be seen on-line at tinyurl.com/satellite-explorer-2013. (W9KE)

**

NAMES IN THE NEWS: FIRST AWARD FOR ALL VICTORIAN NATIONAL PARKS TO VK3ZPF

The honor of the achieving the first Keith Roget Memorial National Parks Award by operating from all 45 parks in Australia's Victoria State has gone to Peter Fraser, VK3ZPF. Not only did Fraser operate portable from all national parks, but also worked from 25 of them on the 20, 40 and 80 meter bands. In addition he made contact with 25 on mixed bands and 15 on 40m. (VK3PC)

**

HAM HAPPENINGS: 11TH WORLD HIGH SPEED TELEGRAPHY CHAMPIONSHIP IN BULGARIA

Turning to the ham radio social scene, the Bulgarian Federation of Radio Amateurs will host the 11th World High Speed Telegraphy Championship in the city of Borovets. This from September 22nd to the 26th. Competitors from all over the world are invited to take part. More information is on-line at www.bfra.org or by e-mail to bfra_hq (at) hotmail (dot) com. (BFRA)

**

ELECTRONIC TRAINING: PROMER ON MICS IN NYC ON FEBRUARY 12

"Is This Thing On? . Let's Talk Mics" is the title of a primer on microphones being held on Tuesday, February 12th by the Audio Engineering Society's New York Section. The venue is the New School Jazz Performance Space in New York City with the session beginning at 6:30 p.m.

The host is David Bialik, who is the CBS Radio streaming operations project manager. He'll be joined by Mike Webber, Peter E. Schmitt Co., David Shinn, and Henry Cohen.

The event is open to the public. The site is located at 55 West 13th Street, between 5th and 6th Aves on the fifth floor. (RW)

**

HAM HAPPENINGS: SPEAKERS NEEDED FOR 2013 HAM RADIO TOWN MEETING

And for the past 15 years or so, Amateur Radio Newsline has produced and presented "The Ham Radio Town Meeting" at the Dayton Hamvention. Whenever possible, we try to stay close as possible to the Hamvention's overall theme which this year is simply "DX." And in going with that theme, this years Ham Radio Town Meeting will be titled "What DXing Means To Me" and will be a very personal glance at the various aspects of DXing from those who are involved in so many different ways.

The 2013 Ham Radio Town Meeting will be on Saturday, May 18th, at the Hara Arena in Dayton, Ohio. We usually are scheduled from 11:45 a.m. to 2 p.m. EDT. If you are interested in being a speaker please contact us by e-mail to newsline (at) arnewsline (dot) org or using the fill-in-the-blanks form at www.arnewsline.org/contact. Either way, please include all of your act information, including a SKYPE ID if you have one so that I can get back to you.

Thank you in advance and we hope to see some of you this May at Hamvention 2013. (ARNewsline)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: TETHERCELL BLUETOOTH REMOTE CONTROL

Looking for a new way to remotely control things? Tethercell may be the answer to your needs.

Tethercell is a plastic case the size of an AA battery, embedded with Bluetooth 4.0 transponder, which is powered by an AAA battery that fits inside. The Bluetooth-enabled battery is then synced with an app on your smart phone that allows you to turn the device on and off, set a timer and even monitor the amount of power remaining.

According to its inventors Trey Madhyastha and Kellan O'Connor, this first version of Tethercell as a test bed for future applications. Its also an opportunity to get the technology in the hands of the public.

Only one catch. If you want one, you'll have to wait until May or June to get one. More including a demonstration video is on-line at tinyurl.com/tethercell. (OnLine News)

**

WORLDBEAT: COMMUNITY RADIO COMING TO NIGERIA

AllAfrica.com reports that Nigeria is about to activate some 800 low-power community radio stations throughout rural areas of the country. This to broadcast information about the federal government's policies and programs.

Mike Omeri is the Director General of Nigeria's National Orientation Agency. He explainede that the venture is in collaboration with the Nigeria Community Radio Coalition. Omeri said that the new radio stations are a result of problems found in rural communities that currently have less access to information about the government.

Joseph Obodeze is the Director of Research and Policy. He added that some areas of Nigeria are so remote that they only receive radio transmissions from neighboring Cameroon instead of domestic stations. Nigeria hopes to have all of the new low power stations in operation by the middle of the year. (AllAfrica.com, RW)

**

RADIO ADVENTURES: TOUR OF NEW BBC BROADCASTING HOUSE STARTS IN APRIL

If you are planning a vacation in the United Kingdom and are interested in radio, then you will be happy to know that the British Broadcasting Company's new facility tour launches in April.

While on the tour some of the things you're likely to see include a camera's eye view into some of the studios broadcasting such programs as the Six O'Clock News and Radio 1. Trained guides will also present a rich history of the building and the BBC.

The Broadcasting House Tour will be available seven days a week. Further details at tinyurl.com/new-bbc-tour (Southgate)

**

HAM RADIO IN SPACE: OSSI 1 TO LAUNCH IN 2ND QUARTER OF 2013

OSSI-1, the Open Source Satellite Initiative developed by DS1SBO, is now planned for launch in the 2nd quarter of 2013. The tiny satellite will be placed into a 575 km high, 63° inclination orbit after being carried aloft on-board a Soyuz-2-1b rocket from the Baikonur launch facility in Kazakhstan.

Initial reports say OSSI-1 will have a beacon in the 145 MHz band, a data communications transceiver in the 435 MHz band although actual operating frequencies have yet to be published. The data communications transceiver is reported to be using an open protocol although details have not yet been released yet. OSSI-1 will also carry a 44 watt LED optical beacon to flash Morse Code messages to observers on Earth. (ANS)

**

IARU SATELLITE COORDINATION BOARD SAYS DOVE-1 WILL NOT USE 145.825

The Dove-1 technology development experiment to be launched on the inaugural launch of Antares rocket in February from Wallops Island, Virginia will no longer be using frequencies in the amateur radio bands. This based on information posted on the IARU satellite coordination web page for the mission.

The satellite sponsors had requested coordination for a 1 watt transmitter on 145.825 MHz to downlink a 1200 baud AFSK AX.25 beacon with telemetry and health data. What new non-amateur radio frequencies Dove-1 will use are not shown in the latest frequency coordination listings. (AMSAT-UK)

**

HAM RADIO IN SPACE: AMSAT-UK TO PROVIDE AMATEUR RADIO PAYLOAD FOR ESEO SATELLITE

AMSAT-UK reports that it will be providing an FM transponder and a BPSK telemetry beacon for the European Student Earth Orbiter or ESEO satellite.

The target audience of this mission is primary and secondary students and the project includes the development of a simple ground station operating on VHF frequencies in the Amateur Satellite Service.

The ground station will consist of an omni-directional antenna feeding a FUNcube Dongle PRO+ SDR receiver. This system will receive signals direct from the satellite and transfer the data to specially developed graphical software running on any Windows laptop.

The satellite is planned to launch in the 2015 to 2016 time frame into a low Earth orbit and will be the third mission within the European Space Agency's Education Satellite Program. (AMSAT-UK)

**

HAM RADIO IN SPACE: FOX-1 MAIN COMPUTER ENGINEERING PROTOTYPE COMES ALIVE

The Fox-1 development team reports that the first engineering model of the satellite's Integrated Housekeeping Unit or IHU has been constructed. Bdale Garbee, KB0G, performed the assembly work, and he was able to load and run the operating system on first power up on January 24, 2013.

Meanwhile, the software team is hard at work getting drivers and features ready to fully test the hardware. They have committed to a March delivery of software for IHU testing. (ANS)

**

DX

In DX, RW6ACM will be active as RI1ANP from the Russian Antarctic station Progress from February 1st through the end of year. Modes and exact operating times are not known. QSL via RN1ON, direct or via the

bureau.

I2JIN is currently operational from El Salvador as YS3CW. He is reportedly operating mainly CW on the 10 to 80m bands. QSL via I2JIN, direct, via the bureau or electronically using Logbook of the World.

F6AML is visiting Zanzibar until February 28th and signing 5H1Z on the 10 to 40m bands using SSB and CW. He will also try to activate the Islands on the Air groups AF-054, AF-063 and AF-075 while in the area. QSL via F6AML via the bureau or direct. No eQSLs on this one.

K0YAK will operate as ST2SF from the Sudan until mid-April. He hopes to be on 40 through 10 meters. QSL to his home call.

SM7GIB will be active as D44TIB from Cape Verde between February 25th and March 8th. His operation will be holiday style using a wire vertical on 160-10 meters. QSL via his home callsign.

Lastly, Prefix hunters will be interested to hear that TC16BURSA will be active through March 19th. This station is located in Bursa, Turkey and operated by members of local branch of the Turkish Radio Amateur Club. QSL as directed on the air.

(Above from various DX news sources)

**

THAT FINIAL ITEM: EXPLAINING A MYSTERY OF THE SOLAR SYSTEM

And finally this week, thanks to radio and radio astronomy, another of the mysteries of the solar system has been solved. Heres Amateur Radio Newsline's Don Carlson, KQ6FM, with the details:

--

According to a team of astronomers, they now understand why particles from inside the solar system bounce off what is described as a ribbon of energy boundary and as a result, neutral atoms from that collision stream inward toward the Sun. This they say is caused by a strange band of energy that appears to wrap around the entire solar system and creates a sort of energy field that push particles inward.

The ribbon of energy was first discovered by NASA's Interstellar Boundary Explorer or IBEX mission. Since that data was radioed back to Earth, astronomers and scientists around the world have struggled to identify the source of the barrier, and explain why particles seem to be driven back towards the sun.

Now, in a paper published in the Astrophysical Journal, astronomers lead by Dr. Nathan Schwadron of the University of New Hampshire have put forth the so-called retention theory that for the first time explains the key observation of the unexplained ribbon's width. The theory says that the mysterious band of energy exists in a location where neutral hydrogen atoms from the solar wind meet a local galactic

magnetic field. As a result, the neutral atoms, which are not affected by magnetic fields, become charged ions and begin gyrating rapidly around magnetic field lines. The result is that these ions are aimed back toward the sun.

While the latest theory is not the first to propose a solution to the galactic puzzle, Schwadron's hypothesis provided a key point overlooked by other researchers. That being the rapid rotation creates waves or vibrations in the magnetic field, and the charged ions then become physically trapped in a region by these waves, which in turn would amplify the ion density and produce the broader ribbon seen.

The result of all this is that Schwadron's theory could provide astronomers with a better understanding of how the solar system interacts with interstellar space. It could also provide insight into the magnetic fields of the interstellar medium, which astronomers say still remain largely a mystery.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, watching the clear nighttime sky up here in Reno.

--

Right now the ultimate source of the bands itself still remains largely unclear. NASA has yet to announce any future plans aimed at discovering the ultimate source of the ribbon itself. You can read more about this interesting phenomena at tinyurl.com/space-boundry. (Space Reporter, Space News, others)

Aspidistra.

Part of the air defences of the Third Reich was the switching-off of the local transmitters of national radio
services, to warn the population that an air raid was heading for that region.

Aspidistra was part of a system that monitored said national programmes, and also the local transmitters in the
areas concerned. When the target transmitters went off the air, they were replaced by Aspidistra rebroadcasting
the national programme on the same frequency, thus delaying the warning to the local population. It was said
that this could be done in about a millisecond, little more than a click in the local population's receivers.

'Total War', an invention of the Germans, was somewhat callous, the UK being absolved from any opprobrium
due to not being one of the parties that started it.

Aspidistra, named from a Gracie Fields (spit)[1] song containing the line 'the biggest Aspidistra in the world'.

[1] Singing 'There'll Always Be An England', from the safety of New York, having married an Italian which just
happened to have the benefit of keeping them both out of the (heavily bombed) UK, and in complete and utter
contrast to, say, Bebe Daniels and Ben Lyon.

For quite some time into the war, the British authorities were not
exactly friendly to non-combatant Italians. I doubt if Boris would have
been all that welcome here - and probably would have been interned.
[Didn't this prompt him to get (or try to get) US citizenship?] I
understand that, later on, Gracie Fields did a fair bit moral-boosting
by touring and performing with ENSA.

GB2RS NEWS

Sunday 10th February 2013

The news headlines:

Details published of Ofcom-RSGB meeting

Raspberry Pi powers Echolink node

GM100RSGB on the air this week

A report of the meeting between Ofcom and the RSGB which took place on 23 January is now available on the RSGB website. Among the topics discussed were Repeater and Beacon NoVs, Licence re-validation, Enforcement and Commonwealth Games 2014. Read the report at www.rsgb.org.

The GB3LV IRLP/Echolink node, located in Enfield, north London, is now powered by a tiny Raspberry Pi computer running a reduced version of Debian Linux and a version 3 IRLP interface. This reduces the energy and physical footprint of the node dramatically. This development, over the past 3 months, has only been possible because of a great deal of work done by Dave Cameron, VE7LTD.

The special event callsign celebrating the RSGB Centenary continues its stay in Region 2 this week. Today, 10 February, Moray Firth ARS plans to run both HF and VHF stations using SSB, CW, RTTY and PSK. On Monday and Tuesday, Caithness ARS takes the callsign to Thurso with HF and VHF stations. Then, on Wednesday and Thursday, Upper Speyside ATG will run their HF station from Tomintoul. Friday the 15th sees Caithness ARS on the air again with HF and VHF stations, followed by next weekend with an HF station run by Lerwick ARS in Dunrossness. For those who haven't tried it yet there is a comprehensive `Am I in the log' feature at www.rsgb.org/centenary/ that shows on which Regions and Bands you have contacted the Centenary station. Details of how to get your QSL card are also on the website.

The RSGB Training and Education Committee is beginning preparations to run a pilot of the revised Train the Trainers course. This first course is aimed at those who are new to amateur radio training and it is hoped to have attendees from a wide area. Attendees will be expected to provide feedback on the course content and delivery methods to help with final development before it is rolled out across the UK. A second course is being developed for those that have been training for some time and would like to update themselves and/or prepare to step up to delivering

Advanced level training. That course will be piloted later in the year. The team are therefore looking for volunteers who are new to amateur radio training to register interest. The course is likely to be over a weekend but the date and venue are not yet finalised; it is expected to be in the spring and will be located as central to the attendees as possible. Those interested in attending should contact Steve Hartley, G0FUW, by email to tec.chair@rsgb.org.uk, to receive full details.

Are you an active 2E Series call holder in England, with space and time to sort and distribute around 12,000 cards each quarter, to your fellow members? If so, the QSL bureau would like to hear from you. If you have an interest in helping others this could be a rewarding opportunity. The ideal candidate needs to be available by e-mail and have some basic Excel spreadsheet knowledge, time, and a little patience. Interested? Please e-mail the bureau via qsl@rsgb.org.uk.

And now for the details of rallies and events for the coming week

Today, 10 February, the Harwell Radio and Electronics Rally takes place at Didcot Leisure Centre, Mereland Road, Didcot. Doors open at 10.30am and admission is ?2.50, with under 12s free. There will be trade stands and special interest groups. For more details contact Ann, G8NVI, on 01235 816 379.

It is with regret that the Wakefield & District Radio Society announces the annual Northern Cross Rally, which was scheduled for Sunday 17 February, has had to be cancelled due to circumstances beyond their control. For more information, contact Chairman and Rally Manager, Ken Quinn, G8FSO on 07 900 563 117.

Now for the news of special events

TC16BURSA will be active until 19 March in Bursa, Turkey. It is operated by members of local branch of the Turkish Radio Amateur Club. QSL as directed on the air.

The Upper Speyside Contest Group will be operating GM100RSGB in celebration of the 100th Anniversary of the RSGB on 13 and 14 February. The location will be Aanside Studios in Tomintoul, the highest village in the Highlands of Scotland, Postcode AB37 9EX. They expected to operate on 80, 40 and 20m using SSB & CW. Other bands and modes will be announced as necessary. Further details from Barry Horning, GM4TOE, on 01807 580 376.

Prefix hunters will be interested in the special event station PF100ZOO. This will be active until the end of the month. It is to celebrate 100 years of the Burgers Zoo in Arnhem. The operator and QSL Manager is PA0FAW.

And now the DX news compiled from 425 DX News and other sources

RW6ACM will be active as RI1ANP from the Russian Antarctic station Progress until the end of year. Modes and exact operating times are not

known. QSL via RN1ON, direct or via the bureau.

I2JIN is currently operational from El Salvador as YS3CW. He is reportedly operating mainly CW on the 10 to 80m bands. QSL via I2JIN, direct, via the bureau or electronically using Logbook of the World.

F6AML is visiting Zanzibar until 28 February using the callsign 5H1Z. Operation is on the 10 to 40m bands using SSB and CW. He will also try to activate the Islands on the Air groups AF-054, 063 and 075 while in the area. QSL via F6AML via the bureau or direct. No eQSLs on this one.

Jack, F8AEJ will be active holiday style as 5V7JD from Lome, Togo until 15 March. QSL via his home callsign and log search on Club Log.

Drew, N2RFA will be active as C6ABB from Nassau in the Bahamas, IOTA NA-001, from 10 to 21 February. He will be using the 10, 17, 20, 40 and 80m bands with some PSK31, JT65, RTTY and possibly SSTV. QSL via N2RFA, eQSL and Logbook of The World.

Elena, RC5A and Alex, RA1AGL will be active as HC2/home callsign from Ecuador between 10 February and 9 March. They will operate SSB and CW on the 6 to 160m bands. QSL via their home callsigns either direct or via the bureau.

Now the contest news

The CQ WW WPX RTTY Contest finishes at 2359UTC today, 10 February, having run for 48 hours. There are numerous entry categories, but single operator stations are limited to a maximum of 30 hours activity. Using the 3.5 to 28MHz bands the exchange is signal report and serial number.

The PACC Contest finishes its 24 hours at 1200UTC today, 10 February. There are numerous single-op categories for non-Dutch stations. Work everyone, but concentrate on working the Netherlands because multipliers are awarded for the twelve Dutch provinces. Using the 1.8 to 28MHz bands the exchange is signal report and serial number, although Dutch stations send their Province too.

The 432MHz UK Activity Contest takes place from 2000 to 2230UTC on Tuesday. Using all modes the exchange is signal report, serial number and locator.

The 80m Club Championships takes place on Wednesday from 2000 to 2130UTC. Using datamodes the exchange is signal report and serial number.

The full 48 hours of the 16th-17th is when the ARRL International DX Contest takes place. This is the CW leg of the event. The SSB leg takes place next month. Work the USA, contiguous 48 States, and Canada only, giving them a signal report and your transmitter power. US/Canadian stations give a signal report and their State/Province code.

And now the solar factual data for the period from Friday the 1st to Thursday the 7th of February, compiled by Neil Clarke, G0CAS on Friday

the 8th of February.

Several small simple sunspot groups were visible every day. Solar activity was very low on the 1st and again on the 7th, with no C class solar flares taking place. Activity then increased, with a small number of C class solar flares taking place on the remaining days. The largest flare was a C8 on the 6th; a coronal mass ejection was associated with this flare. Solar flux levels increased slightly to peak at 112 units on the 2nd before declining to 103 units by the 7th. The average was 107 units. The 90 day solar flux average on the 7th was was 120 units, that's one unit up on last week. X-ray flux levels showed little variation day to day and averaged B2 units. Geomagnetic activity was quiet every day and the average was Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 300 and 480 kilometres per second. Particle densities were low every day except for the 7th, which increased briefly to 63 particles per cubic centimetre. Bz varied between minus and plus 5 nanoTeslas most days.

And finally the solar forecast for the coming week. This week solar activity is expected to be low, with only a small chance of activity increasing any higher. Solar flux levels should be around the 100 mark or slightly below for most of the week. Geomagnetic activity could be unsettled today due to a recurring coronal hole but then decline to quiet levels for the remainder of the week. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 27MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 1000 and 1400 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found on the RSGB website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with news of a high-profile launch at the RSGB National Radio Centre at Bletchley Park. On Thursday morning, a new DAB digital radio service covering Bedfordshire, Hertfordshire and Buckinghamshire will be inaugurated from the National Radio Centre. The switch-on will occur at around 8.45am, before the normal opening time of the Park. Those present at the proceedings will include Iain Stewart MP and Paul Eaton of Now Digital. Following a countdown by animated character D Love, the switch-on will be performed by Milton Keynes Football Club chairman Pete Winkelman. To mark the occasion, BBC Three Counties Radio and Heart will

broadcast their breakfast shows live from the National Radio Centre.

Now for clubs that have several events this week. Gloucester Amateur Radio & Electronics Society is at the Harwell Radio & Electronics Rally today. There is no meeting on Monday because the school is closed. Details from Anne, 2E1GKY, on 01242 699 595, daytime.

Wythall Radio Club net is on 145.225MHz from 8pm today and next Sunday. Tuesday sees a Morse class from 7.45pm and a committee meeting later. The shack social is on Friday from 7.30pm. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday it's the repeater net on GB3FR. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is having a contest planning meeting on Monday. Thursday sees training classes with Dave Murphy, G8OWL and there's shack and aerial work on Friday. Contact Mick Cleary, G7RRP, on 07595 696 359.

On Monday Sutton Coldfield ARS is on the air and having a talk by John, G3JZF, on restoring 405 line TVs. Tuesday sees the 4m open net on 70.475MHz from 7 30pm. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Wednesday Lincoln Short-Wave Club is putting G6COL on the air in the shack and having a natter night at the BSA Club. Thursday sees a club net on 145.375MHz from 20.00. On Saturday there's the surgery and mentoring from 9am in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

Central Radio Amateur Circle is on the air on Thursday from 20:00 on 145.375MHz. On Saturday there's a Plug and Play day at Barr Beacon from 10am, weather permitting. Contact Martin Hallard, G1TYV, on 07906 905 071.

Now we return to the traditional listing in date order. On Monday Stratford Upon Avon District Radio Society is having a talk on the ?17 software defined VHF/UHF receiver by Clive, G0CHO. Contact Clive, G0CHO, on 01608 664 488.

On Tuesday Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is hosting an open forum for radio clubs around Loughborough. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday Worcester Radio Amateurs Association is having a talk on all things electromagnetic by Eddie Humphries. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday Midland Amateur Radio Society is holding training classes and a committee meeting. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday Telford & District Amateur Radio Society is holding its under ?5 construction competition. Contact Mike, G3JKX, on 01952 299 677.

On Friday Bromsgrove & District Amateur Radio Club has a committee meeting. Contact Chris, M0BQE on 01905 776 869.

On Friday Coventry Amateur Radio Society is having a skittles night. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND

On Monday Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a talk on the secret of learning Morse code the easy way by Ian, G4XFC. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday Chester & District Radio Society is holding a committee meeting. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society looking at PSK31, seeing how the software works and trying out limited range transmissions. Details from Martin, M0GQB, on 01422 341 317.

On Wednesday Denby Dale Radio is on the air from 1930 on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Thursday 14 February South Manchester Radio and Computer Club is watching the Secret War DVD. Details from Ron, G3SVW, on 01619 693 999.

On Friday 15 February East Cleveland Amateur Radio Club is having a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 15 February Tynemouth Amateur Radio Club is looking at the use of computers in radio. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND

Today, Mid Ulster Amateur Radio Club is having a talk on RAYNET by Joe, Gi7KMJ. Tuesday sees the Intermediate course continue, plus a shack night. Details from Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND

On Tuesday Dundee Amateur Radio Club is having a construction night. Details from Paul, GM0BKC, on 07846 412 862.

On Tuesday Kilmarnock & Loudoun Amateur Radio Club is having a talk on using the antenna analyser and gate dip oscillator in wire antenna

construction. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com.

On Wednesday Lothians Radio Society is having a talk on wire aerials for HF by Malcolm Hamilton, GM3TAL. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

On Thursday Aberdeen Amateur Radio Society is having a talk by Stanley Sutherland, GM4BKV. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday Cockenzie & Port Seton Amateur Radio Club is having a construction night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with news of a high-profile launch at the RSGB National Radio Centre at Bletchley Park. On Thursday morning, a new DAB digital radio service covering Bedfordshire, Hertfordshire and Buckinghamshire will be inaugurated from the National Radio Centre. The switch-on will occur at around 8.45am, before the normal opening time of the Park. Those present at the proceedings will include Iain Stewart MP and Paul Eaton of Now Digital. Following a countdown by animated character D Love, the switch-on will be performed by Milton Keynes Football Club chairman Pete Winkelman. To mark the occasion, BBC Three Counties Radio and Heart will broadcast their breakfast shows live from the National Radio Centre.

Farnborough & District Radio Society has a slow Morse net on 3.570MHz on Monday from 1pm, then a Top Band net with G2DX on 1.995MHz at 8pm. On Wednesday there's a club meeting at the Farnborough Community Centre, and Friday sees the 2m G6FRS net on 144.675MHz. Details from Neville, G3SPD, on 01252 404 816.

On Monday Coulsdon Amateur Transmitting Society is holding an EGM to consider the society's future and rule changes, plus a social evening. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday West Kent Amateur Radio Society is having a presentation on RF in Broadcasting by Colin, M0NLP. Details from Keith G4JED, by email to info@wkars.org.uk.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Harwell ARS is holding its construction contest. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday South Essex Amateur Radio Society is having a workshop evening with hints and tips on how to solder. Contact Dave, G4UVJ, on 01268 697 978.

On Tuesday Stevenage & District Amateur Radio Society is having an operating evening. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday Dover Radio Club is having a natter night. Details from Pete, M0PKH, by email to peter.halloway@sky.com

On Wednesday Harwich Amateur Radio Interest Group is having a talk by the Harwich RNLI. Details from Kevan, 2E0WMG, on 07766 543 784.

On Wednesday Newbury & District Amateur Radio Society is taking part in the 80m Club Championships DATA. Contact Rob, G4LMW, on 01635 862 737.

On Wednesday iNorfolk Amateur Radio Club is having an informal meeting in the main room and workshop evening in the side room. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday Southgate Amateur Radio Club is taking rambles through the RadCom CDs with Graeme, G8DVY. Contact Mr K Mendum, G8RPA, by email to g8rpa@arrl.net.

On Wednesday Worthing & District Amateur Radio Club is having a talk by Barrie Turner of Shoreham Coastwatch. Contact John, G8FMJ, on 01273 593 232.

On Thursday Bredhurst Receiving and Transmitting Society is having a talk on D-Star radio. Contact Charles, G4VSZ, on 07982 244 788.

On Thursday Edgware & District Radio Society is having a talk on measuring SWR by John, G3SJE. More information from Mike, G4RNW, on 020 8950 0658.

On Thursday Lowestoft & District PYE Amateur Radio Club is holding its construction competition and quiz at Lowestoft Railway Indoor Bowls Club. Details from Tim Ward, 2E0TJW, on 07810 481 182.

On Thursday Reading & District Amateur Radio Club is having a talk on practical antennas for the small yard or garden by Eddie Searle, G3VMY. Details from Pete, G8FRC, on 01189 695 697.

On Thursday Shefford & District Amateur Radio Society is having a talk by the winner of the construction competition. Contact John Burnett, 2E0OAK, on 07860 804 793.

On Saturday Itchen Valley Amateur Radio Club is participating in Thinking Day on the Air for Chandlers Ford Guides. Details from Liz, M0ACL, on 02380 254 599.

NEWS FOR THE SOUTH WEST

We start with clubs that have several events this week. On Monday Exeter Amateur Radio Society is having a talk on digital modes by Nick, M0NRJ in the Moose Centre from 7pm and holding its HF net on 3.675MHz from 7.45pm. The Tuesday 2m net is on 145.575MHz at 7.45pm and on Thursday it's the 4m net on 70.425MHz from 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

Thornbury & South Gloucestershire Amateur Radio Club is having a carnival planning meeting on Wednesday. Friday sees the 2m club net from 8pm. Contact Tony, G0WMB, on 01454 417 048.

Now we return to the traditional listing in date order. On Tuesday Plymouth Radio Club is holding its AGM. Details from Rob James, 2E0ONO,

via email to Robert-james@virginmedia.com.

On Tuesday Riviera Amateur Radio Club is putting MX0RIV on the air from 19.30 to 21.30. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Thursday South Bristol Amateur Radio Club is having a film night. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club is having a talk. Contact Den, M0ACM, on 07810 317 750.

On Thursday Yeovil Amateur Radio Club is having a talk by G3MYM on 91 years ago today. Contact George Davis, G3ICO, on 01935 425 669.

On Friday Poole Radio Society is having an activity night. More info from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is having a natter night and 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday Llanelli Amateur Radio Society is having a social night and club raffle. Contact Craig, MW0MXT, on 01269 845 773.

On Thursday Aberystwyth & District Amateur Radio Society is having a talk at Waunfawr Hall on ships and places at sea by Bruce, GW4XXF. Details from Ray, GW7AGG, on 01970 611 853.

Propagation Forecast Bulletin 6 ARLP006
>From Tad Cook, K7RA
Seattle, WA February 8, 2013
To all radio amateurs

SB PROP ARL ARLP006
ARLP006 Propagation de K7RA

Average daily sunspot numbers hardly changed from last week and the
week prior, but average daily solar flux bounced back to about the
level it was from two weeks ago.

Average daily sunspot numbers were down five points to 50.7, and
average daily solar flux was up 7.7 points to 106.4.

Predicted solar flux values are 105 on February 8-10, 110 and 105 on
February 11-12, 100 on February 13-14, 110, 115 and 110 on February
15-17, 115 on February 18-19, 110 on February 20-21, 105 on February
22, 115 on February 23-24, then 110, 105 and 100 on February 25-27,
95 on February 28 through March 2, 115 on March 3-4, 120 on March
5-6, and 125 on March 7-8.

The predicted planetary A index is 22, 15 and 10 on February 8-10, 5
on February 11-18, 8 on February 19, 5 on February 20-21, then 15,
10 and 8 on February 22-24, 5 on February 25-28, 10 and 8 on March
1-2, 5 on March 3-7, and 8 on March 8-9.

OK1HH says geomagnetic activity should be quiet to unsettled on
February 8, quiet to active February 9-10, quiet to unsettled
February 11-12, quiet to active February 13-14, quiet to February
15-16, quiet February 17-21, active to disturbed February 22-23,
quiet to unsettled February 24-25, quiet on February 26-27, mostly
quiet February 28, quiet to active March 1, quiet to unsettled March
2, and mostly quiet on March 3.

I've been looking at the predictions for planetary A index and solar
flux, and it is interesting to note how they change over time. The
planetary A index prediction for February 3 for over a month was a
value of 5, until January 31, when it changed to 18. Then on
February 1 it was 15, and the same on February 2. But on February
3, the actual value was 4. A similar thing happened with the

February 4 prediction. It was 5 up until January 31, when it changed to 15, then for March 1 and 2 it was 12, then it changed back to 15 on March 3. The following day, March 4, the actual value was 4 again, just as it was the day earlier.

On February 7 the planetary A index prediction for February 8 is 22, and on February 6 the prediction for February 8 was 8. Prior to that it was 5. We will see the actual value at the end of the day today, February 8.

We heard from Fabrizio Valdirosa, a shortwave listener in Italy, who inquired about the average sunspot number for all of 2011. We mentioned recently that it was 29.9, but Fabrizio thought this was too low while looking at the monthly averages at, http://www.swpc.noaa.gov/ftpdir/weekly/RecentIndices.txt.

I recalculated by again totaling all of the daily sunspot numbers for 2011, which is 29,239. Divide that by 365 days, and we get an average daily sunspot number for that year of 80.1. I have no idea how 29.9 was previously calculated, except that I somehow came up with a total for the year of 10,913 instead of 29,239 and it was my own error. So the average yearly sunspot numbers for 2008-2012 were 4.7, 5.1, 25.5, 80.1 and 82.3.

Don Street, HS0ZEE wrote to ask about seasonal variations mentioned in the bulletin, and asked, "Here in Asia, Spring and Fall are not so well defined, perhaps for reader like me it would be helpful to mention which month you refer to." We are just referring to the seasons as the time between Equinox and Solstice, Solstice to Equinox, etc. This page gives the dates for the seasonal changes:

http://wwp.greenwichmeantime.com/longest-day/equinox-solstice-2010-2019.htm.

Don also likes the HAP charts for HF propagation produced by the Australian government and notes, "I find the charts near to actual band conditions. Unfortunately they are based on the previous hours observed conditions, but still very useful."

Here is the link Don refers to:

http://www.ips.gov.au/HF_Systems/6/6/1.

Bill Bliss, W1WBB of Portsmouth, Rhode Island wrote: "Don't believe I've seen these two new forecast products from the SWPC mentioned in your weekly column, found via link on their home page: http://www.swpc.noaa.gov/index.html

"They are issued twice daily and I've found them helpful as an additional tool for predicting near-term propagation on the HF/MF amateur bands. Links for feedback on both the 3-Day Forecast and the Forecast Discussion are also provided. Positive feedback on these 'experimental' products from the amateur community (accepted up through Feb. 12) may help ensure they become a permanent part of

SWPC's Data and Products area."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for January 31 through February 6 were 47, 65, 54, 79, 30, 41, and 39, with a mean of 50.7. 10.7 cm flux was 102.7, 103.7, 111.8, 111.1, 106.7, 105.1, and 103.5, with a mean of 106.4. Estimated planetary A indices were 1, 4, 9, 4, 4, 2, and 2, with a mean of 3.7. Estimated mid-latitude A indices were 1, 4, 9, 6, 3, 2, and 2, with a mean of 3.9.

I think this period of her life was graced, if that be the term, with less popularity than previously, and some at
least of her ENSA shows were well received - by foreign troops such as the Australians in New Guinea.

Bebe Daniels and her husband were living here anyway, and stayed on through the blitz despite having a young
family.

"Licence re-validation

It was noted that there had been changes with the website login authentication process that
had caused
difficulties. Ofcom was considering automatically re-validating all licences until
end-2016 to provide time to
correct this, and also to bring in an alternative paper based process."

This is turning into a farce.

Mrs Spike's validation only worked once or twice, and now mine has failed too.

The idea was to validate yearly, but this essentially the problem looks like being kicked
into the long grass of
2017 - and I may well be past caring by then.

Amateur Radio Enthusiasts Looks for Ways to Give Back:

Posted: 08 Feb 2013 06:14 AM PST
http://www.eham.net/articles/29734

Bryan County Probate Judge Sam Davis spends much of his personal time sitting in front an electronic bank of lights, sounds and receivers listening to and talking with people he has never met. Davis is one of about 15 people who belong to the Coastal Amateur Radio Team, a group of local ham radio enthusiasts. Also known as amateur radio, ham radio is a designated band of radio frequencies used for non-commercial message exchange. In the case of local CART members, the team started as a way to give back to a group of local veterans known as Wounded Warriors. The Wounded Warrior Project is a national nonprofit organization whose goal is to "honor and empower wounded warriors" of the United States Armed Forces. Wounded warriors are military members wounded in combat anywhere in the world. Davis said local ham radio enthusiasts became involved with the project in 2011, when the Fort McAllister Sport Fishing Club arranged to take some Fort Stewart and Hunter Army Airfield Wounded Warriors sport fishing as a way of showing their appreciation for the warriors' sacrifices. "We offered to provide communications for them, just in case they needed them for emergencies or other needs," he said. From that, Davis said, the idea grew to expand the club's offerings to providing back-up communications during weather-related and other emergencies.

//
Draper Ham Radio Operators Answer the Call:

Posted: 08 Feb 2013 06:12 AM PST
http://www.eham.net/articles/29733

The message came in loud and clear: during an emergency, cell phones might fail and people could find themselves without a way to call emergency responders and city public works crews for help. So city officials and local volunteers are planning for the worst-case scenario during an emergency by working out a backup communications system, with help from the members of the Draper Ham Radio Association. "One of the biggest [emergency preparation] issues we have here in Draper is communication," Draper resident Col. Gary Vaughn said. "Cell phones don't work very well up here because of the hills. [Ham radio] is a very reliable technology, in case everything else goes down." Vaughn, a long-term resident of Suncrest and retired member of the U.S. Marine Corp, is the current chairman of the

Draper Ham Radio Association. The all-volunteer group is made up of licensed operators that are working with the Draper Police Department and city officials to organized a "public safety net," or communication network for use in the event of a public emergency.

SARL NEWS SUNDAY 10 February 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

WHERE HAVE ALL THE YOUNG RADIO AMATEURS GONE?

FIRST SMARTPHONE BASED NANOSAT TO BE LAUNCHED END FEBRUARY

USA REMOVE EXPORT RESTRICTION ON SATELLITES

A QUEST FOR HIGHER POWER ON VHF

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

WHERE HAVE ALL THE YOUNG RADIO AMATEURS GONE?

Apparently there are no young radio amateurs in South Africa as last week's news item did not elicit one response! Here is the news item again:

The SARL is planning a special feature between 09:00 and 10:00 on Saturday 23 February to celebrate the 2013 Youth Sprint which will run from 10:00 - 12:00 CAT but to do this we need your voices. You need to tell us why you became and radio amateurs and how you are enjoying. Tell us what is cool about being a radio amateur?

The SARL will be making voice recordings between 13 and 16 February. Send your details and telephone number to youth@sarl.org.za and tell us which of the evenings between 20:00 and 21:00 you will be available. Club chairmen don't let your club be left out in the cold! Encourage your young members to share their passion.

FIRST SMARTPHONE BASED NANOSAT TO BE LAUNCHED END FEBRUARY

Surrey Space Technology Limited will launch the first of a series of cubesats based on smartphones at the end of January. The first one is called STRaND, the acronym for Surrey Training, Research and Nanosatellite Demonstration and the programme is intended to be a long-term arrangement between the space company SSTL and academic researchers at the Surrey Space Centre (SSC), with STRaND-1 the first of a long line of STRaND nanosatellites.

The SSTL employees and SSC researchers involved with the STRaND programme are all volunteers. It is a condition of the programme that volunteers from SSTL and SSC use their own, free time for STRaND activities (such as lunches and breaks). The project has no budget for staff so is entirely dependent on volunteers.

The innovative amateur radio STRaND-1 CubeSat aims to carry a NEXUS Android smartphone into space to demonstrate the feasibility of using cheap smartphone electronics to control a spacecraft. A software-based speech synthesiser will be included to pay homage to the UOSAT family of satellites OSCAR 9 and 11, that were launched in 1980 & 1982. There will be an amateur radio AX.25 packet radio downlink on 437,575 MHz using data rates of 9k6 or 19k2 bps.

USA REMOVE EXPORT RESTRICTION ON SATELLITES

In another space related story the USA Congress in late December removed restriction on export of satellites and now signed into law by President Obama has removed a restriction that has essentially shut down international cooperation for building amateur satellites in the past decade.

Under the old law, satellites and their component parts were considered to be "munitions" and their export to other countries was severely limited. This made it impossible for amateur satellite organizations in different countries to work together on major projects. For example, the last big amateur satellite, Phase 3D. It was built jointly by AMSAT groups in the U.S., Germany and other countries, but that was before the international cooperation measure was put in place. The new law restricts satellite exports only to China, North Korea and countries identified as state sponsors of terrorism, as well as those under trade embargoes. A recommendation from the Departments of State and Defense said the old law impeded the ability of American satellite builders to work with international partners. This will also open a window of opportunity for SA AMSAT to get access to launch opportunities in the US.

EXPLAINING A MYSTERY OF THE SOLAR SYSTEM

According to a team of astronomers, they now understand why particles from inside the solar system bounce off what is described as a ribbon of energy boundary and as a result, neutral atoms from that collision stream inward toward the Sun. This they say is caused by a strange band of energy that appears to wrap around the entire solar system and creates a sort of energy field that push particles inward. The ribbon

of energy was first discovered by NASA's Interstellar Boundary Explorer or IBEX mission. Since that data was radioed back to Earth, astronomers and scientists around the world have struggled to identify the source of the barrier, and explain why particles seem to be driven back towards the sun.

Now, in a paper published in the Astrophysical Journal, astronomers lead by Dr. Nathan Schwadron of the University of New Hampshire have put forth the so-called retention theory that for the first time explains the key observation of the unexplained ribbon's width. The theory says that the mysterious band of energy exists in a location where neutral hydrogen atoms from the solar wind meet a local galactic magnetic field. As a result, the neutral atoms, which are not affected by magnetic fields, become charged ions and begin gyrating rapidly around magnetic field lines. The result is that these ions are aimed back toward the sun.

While the latest theory is not the first to propose a solution to the galactic puzzle, Schwadron's hypothesis provided a key point overlooked by other researchers. That being the rapid rotation creates waves or vibrations in the magnetic field, and the charged ions then become physically trapped in a region by these waves, which in turn would amplify the ion density and produce the broader ribbon seen.

The result of all this is that Schwadron's theory could provide astronomers with a better understanding of how the solar system interacts with interstellar space. It could also provide insight into the magnetic fields of the interstellar medium, which astronomers say still remain largely a mystery.

A QUEST FOR HIGHER POWER ON VHF

Last year there was a lot of excitement about the request for an increase of RF power from 400 Watt to 1 500 Watt, as already in use by radio amateurs in several other countries. This matter is currently being discussed between the SARL and ICASA.

Higher power would be most beneficial for operation on the VHF bands, such as 50 MHz and 144 MHz. Weak Tropo Scatter signals with QSB are often observed across the country throughout the day and night on these bands. Tests conducted between Cape Town station ZS1NAZ and Port Elizabeth station ZS2FM on 50 MHz have shown that a 100 Watt signal is just above the noise level, but became very readable when the power was increased to 400 Watt. Just imagine how the Tropo scatter signals will improve with another increase of four times, resulting in country-wide communications most of the time; other propagation modes would perform even better.

The 144 MHz band could benefit the most during Tropo Ducting making DX contacts possible between South Africa and Brazil and/or with Australia. High power solid state linears operate off 50 volts DC and are not lethal. Furthermore, the Great Conveyer Belt is a massive

circulating current of hot plasma on the Sun and is slowing down affecting solar activity as well as F2 propagation. NASA predicts that this slowdown means that Solar Cycle 25, peaking around the year 2022, could be one of the weakest in centuries.

NEW MEMBERS

A hearty welcome to the following 4 radio amateurs who recently joined the SARL as members: Richard Whiteway - ZR6WR; Gideon Joubert - ZS6GFJ; Gerhard Gericke - ZSL1057; Richard Bigwood - ZS6BYD. We trust that you will enjoy a long and pleasant relationship with the SARL.

The SARL now has 1 684 members.

CLUB AFFILIATION

Last week 1 more club has affiliated with the SARL. We welcome the Sutherland Amateur Radio Club, ZS3OBS. This brings the total number of affiliated clubs to 34.

If you are travelling in the Sutherland/Fraserburg area listen out for a new repeater which is now operational on an experimental bases on 145,600 NARROW FM and requires an 88,5 Hz tone. Please give the Sutherland radio amateurs a call.

For a complete list of affiliated clubs go to the SARL web page and click on Club Talk.

RESULTS OF THE QRP CONTEST HELD ON THE 26TH JANUARY 2013

There were 119 participants who took part in the contest and the contest committee received 18 logs. It is a pity that more logs were not received.

12 year old Francois Reyneke, ZU6FR, took part in his first contest and did exceptionally well by coming 11th. Francois keep it up and we will see you in the next contest.

1st - ZS2PE - 546 points 2nd - ZS2ACP - 456 points 3rd - ZS4JAN - 448 points

Congratulations to the winner and many thanks to those who submitted their logs.

RAE COURSE

The East Rand Club will start with RAE classes for the May 2013 exam on the 19th of February at 18:00 at Arrowe Park, Ebenezer Street, Benoni. Those interested in attending the classes should contact Elize at 073 490 6642.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to continue at low to very low levels. None of the currently visible

sunspots are actively flaring.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 45.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 10 February - Today, last chance to take part in the SARL National Field Day. 15 February - Last day for submission of nominations for SARL awards to secretary@sarl.org.za. 23 February - SARL Youth Sprint 10:00 to 12:00 CAT with a special event starting at 09:00.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 UTC on 4 895 kHz ((A new time and frequency!). Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 16:30 UTC as the frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send reports to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Russian WW PSK Contest 15-16 February

Posted: 08 Feb 2013 12:26 PM PST
http://forums.qrz.com/showthread.php?379083-Russian-WW-PSK-Contest-15-16-February&goto=newpost

Dear Fellow Radio Amateurs,

We invite all fans of digital modes to take part in Russian WW PSK Contest from 21.00 UTC on Friday 15th February till 21:00 UTC on Saturday 16th February, 2013. Types of modulation: BPSK31, 63, 125. The repeated contacts are permitted on different bands and different modes providing that a contact will be made not earlier than in 3 minutes. The output power should not exceed 10 watts on 160 meters and 100 watts on other bands. Only one transmitted signal is permitted at any time. Bands: 160 m, 80 m, 40 m, 20 m, 15 m, 10 m.

You may send your log only via the web interface:
http://ua9qcq.com/contests/robot.php/

All logs must be submitted no later than 5 days after the contest.

Contest Rules, software and sample cabrillo, certificates and plaques, etc:

100 Plus Years of Amateur Radio Broadcast:

Posted: 08 Feb 2013 04:01 PM PST
http://www.eham.net/articles/29740

Amateur radio began more than 100 years ago at Iowa State. With its first transmission of Morse code in 1911, the event led to the existence of WOI radio and ultimately changed the history of broadcast. The history of ISU amateur radio, also known as ham radio, is described as a technological revolution by Jeff Stein, who is an Iowa broadcasting historian, author and a former lecturer at Iowa State's Greenlee School of Journalism and Communication. "The fact that Iowa State was one of the first places to pay attention to this technology that ultimately revolutionized our lives in the 20th century is important because it shows that Iowa State has consistently been dedicated to being first in developing communication technologies," Stein said. For Wyatt Hagen, president of the Cyclone Amateur Radio Club, the significance of the radio history is great. "I think it's a big deal for the campus because it's 100 years of the campus working toward and celebrating the early achievements that Iowa State made in developing radio communication," Hagen said. The communication systems were quickly evolving and Iowa State was one of the pioneers in the amateur radio development.

It's nice to see that the Iowa State Daily article correctly prefers
"amateur radio" instead of the dumbed-down term "ham radio"!

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-February, through Sunday, 10th-February there were 225 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA (Rare IOTA). An International group, along with the Tunisian Radio Amateurs and the Engineering University of Gabes, are planning a second IOTA DXpedition to Djerba Island (AF-083, WFF 3VFF-007, WLOTA

L-1394 and ARLHS TUN-022), between April 29th and May 6th. The Association des Radio Amateurs Tunisiens (ARAT) is expected to receive the callsign TS8TI on March 15th. Current operators/club participants mentioned are 3V8SA (ARCS of Tunisian Scout), 3V8ST (ARC of Tunis), 3V8ESG (Department of Communications and Networking National Engeneering School of Gab&#65533;s), 3V8SF (Scout Radio Club of Sfax), Leopoldo/I8LWL, Fred/IK7JWX (Team Leader), Antonello/IK2DUW (QSL Manager), Titti/IK8GQY (YL), Ferruccio/ IK8TEM, Ampelio/IS0AGY, Rosy/IW2NLC (YL), Ashraf/KF5EYY, Danny/ON4ON, Harvey/ON5SY and Pat/ON7PQ. Activity will be on all HF bands, including the 30/17/12 meter bands and the CW, SSB, RTTY, AMTOR and PSK31 modes. They are looking for operators, sponsors and individual contributions.

5X, UGANDA (Update). Members of the F6KOP team are now active as 5X8C until February 18th, from a location some 20 Km from Entebbe airport. The crew has been on the air since February 7th, around 1530z. Reports indicate that some individuals are seeing their QSOs confirmed via LoTW. Log is being uploaded to ClubLog. Check your QSOs at: http://www.5x2013.com/index.php/online-log
However, the following has been added on Clubog page: "Due to a high number of dupes made by guys trusting the online-log instead of their ears, we decided to STOP the live upload." As this was being typed, the 5X8C team has made over 23k QSO with about 9k unique callsigns. Remember, Yann, F1NGP, is their QSL Manager (100% OK Direct, ClubLog's OQRS, Bureau and LoTW). For more details and updates, see: http://www.5x2013.com

6Y, JAMAICA. Yuri, VE3DZ, is once again active as 6Y2T from Jamaica (NA-097) until February 19th. He was active this past weekend during the CQ WW WPX RTTY Contest, but he is also expected to be in the upcoming ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/High-Power entry. Activity outside of the contest will be on 160-10 meters, including the 30/17/12 meter bands and using CW, SSB and RTTY. QSL via VE3DZ.

7T50/7T9, ALGERIA. Members of the Algerian Radio Amateurs (ARA) will activate special event callsigns 7T9A and 7T50ARA to celebrate the 50th anniversary of the Algerian Amateur Radio Association. QSL both callsigns by the Bureau or direct to: PO Box 1, Algiers RP 16000, Algeria. (NO IRCs)

8P, BARBADOS. Gerry, W1VE, will be active as 8P9RM from Barbados (NA-021) starting February 26th. Activity will be on 160-6 meters, but with a focus on CW and the low bands. He will end his activity by being in the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/Low-Power entry using the callsign 8P1V. QSL via W1VE.

9H, MALTA. Operators Adam/DJ0IF and Mek/SP7VC will be active as 9H3RX and 9H3KK, respectively, from Gozo Island between February 13-19th. Adam informs OPDX that he will be active as 9H3RX during the ARRL DX CW Contest as a Single-Op/All-Band entry. Outside of the contest, Adam will be active on CW (focus on low & WARC bands). Mek will be active on SSB (all bands). QSL via their home callsigns.

9U, BURUNDI (Update). An international team of operators from ON, PA and GM will be on the air from Bujumbura between February 14-23rd (2013). In

total they will have 9 operators and four stations and airing the call-
sign 9U4U. Operators currently mentioned are Patrick/ON4HIL, Theo/ON4ATW,
Marc/ON6CC, Luc/ON4IA, Ronald/PA3EWP, Marc/ON4AMX, Stefaan/ON4FG and
Franky/ON7RU. Pilot station will be Bjorn/ON9CFG and a guest operator
will be Anton/ON6NL. Activity will be on 160-10 meters using CW, SSB and
RTTY. Suggested frequencies will be:
CW - 1828.5, 3503, 7003, 10123, 14033, 18083, 21033, 24903 and 28033 kHz
CW (RX) - 1833-1838/US/Overall and 1815-1820/JA; other freq. listen up
SSB - 3773, 7083, 14183, 18153, 21283, 24963 and 28943 kHz
SSB (RX) - 3805-3810/US, 3802/JA, 7187-7192/US/JA; other freq. listen up
5-10
RTTY - 7044, 10142, 14088, 18104, 21082, 24924 and 28108 kHz
RTTY (RX) - Listen Down for JA on 40m; Overall listening Up/Down
QSL Manager will be M0URX. A Web site is now online at:
http://www.9u4u.be
This DXpedition will also has a Twitter page <https://twitter.com/9U4U>.
Also, this Expedition is organized by the "Belgian Rockall Team". The
latest press release from the 9U4U Web page as of February 9th, from
the 9U4U team states: "All systems are go! Today we packed all gear into
the suitcases and are ready to leave. The computer network was tested
with 4 stations and the equipment was double checked, and properly labeled
for transport, so no mistake could be made once we begin with our setup
in Burundi. In total we have 21 suitcases, 23 kg each makes 483 kg, with
only radio stuff. We have much more equipment than the last expedition
(TN2T). Below you see the happy faces from a great team... (picture on
their Web page at <http://www.9u4u.be/images/stories/global_picture.jpg>"

CUBAN IOTA DXPEDITION. Members of the Russian Robinson Club (RRC), a team
of highly skilled island activators, will be active from the following
IOTAs and callsigns to celebrate the 20th anniversary of the RRC:
T48RRC Moa Grande Island (NA-218) between February 11-14th
T47RRC Coco Island (NA-086) between February 14-16th
T46RRC Santa Maria Island (NA-204) between February 16-18th
T46T - Santa Maria Island (NA-204) during the ARRL DX CW Contest
(February 16-17th) as a Multi-Single or Multi/2 category
Operators mentioned are Winston/CO2WF, Orelvis/CO6LC, Ra l/CO8ZZ, Yuri/
N3QQ, Igor/UA3EDQ, Oleg/R3FA, Andy/RK7A, Sergey/RA3NAN, Alex/RW3RN,
Eugene/RZ3EC and Andy/RZ3EM. Activity will be on 160-6 meters, including
the 30/17/12 meter bands, using CW, SSB and the Digital modes with 3
stations on the air at the same time on different bands and modes. Their
suggested frequencies are:
CW - 1831.5*, 3520, 7020, 10120, 14020, 18070, 21020, 24890 and
28020 kHz
* RX 1825/JA and 1830/EU & USA
SSB - 1842, 3790*, 7060, 14260, 18140, 21260, 24960 and 28460 kHz
* RX 3775-/3825+
RTTY (TX) - 1840.7, 3585, 7038, 10132, 14082, 18097.7, 21082, 24922 and
28082 kHz
RTTY (RX) - 1855+, 3586+, 7039+, 10133+, 14083+, 18099+, 21083+, 24923+
and 28083+ kHz

6m - 50103/CW/beacon (RX up 2+) and 50115/SSB (RX up 5+)
An online log will be available. Three options to QSL. An OQRS will be
available for both direct and Bureau QSLs. Direct QSL can be sent to:
Eugene Shelkanovtcev, PO Box 70, Orel, 302028, RUSSIA (NO IRCs please).
All QSOs will be uploaded to LoTW. For more details, visit the Web page
at: http://cuba2013.ru

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting
the following operations for DXCC credit:
** 5X8C - Uganda; Current Operations commenting in 2012
** T6BP • Afghanistan; Current operation commenting 2011
T6TJ • Afghanistan; Current operation commenting 2012

If you've had cards declined (except LoTW applications) please send an
E-mail to bmoore@arrl.org to be placed on the list for an update.
** These operators have uploaded logs to LogBook of The World (LoTW).

Note: If your QSOs were only via LoTW they were not imported to DXCC
since at the time of your application these were not yet approved. LoTW
QSOs can be reclaimed via your next submission only.

ET, ETHIOPIA. "The Daily DX" reports that before Ken, K4ZW, heads to Juba,
South Sudan (see above), he will go to Addis Ababa and activate the ET3AA
club station during the second half of the ARRL DX CW Contest and again
the weekend of February 22•24th. ET3AA QSOs made by Ken can be confirmed
by N2OO.

FM, MARTINIQUE. Ted, K7TRK, who was active as KP4/HB9WDF (Puerto Rico)
and FY/HB9WDF (Kourou, French Guyana) this past week, will be active as
FM/HB9WDF from Martinique between February 11-21st. Activity will be
holiday style on the satellites (AO-7, FO-29, VO-52, SO-50 and others
if they are active), and the HF bands on PSK-31 and sometimes SSB. QSL
via K7TRK, direct, by the Bureau, LoTW and eQSL.

FY, FRENCH GUYANA. Larry, F6FVY, will be active as FY5KE in the ARRL DX
CW Contest (February 16-17th) as a Single-Op/Single-Band (20m)/High-Power
entry. QSL via LoTW, by the REF Bureau or direct to FY5KE.

GW100, WALES. Adrian, MW1LCR, will be using the special callign GW100C
during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band
entry. QSL via MW1LCR. The special contest callsign is issued to celebrate
100th anniversary of the RSGB. Currently this is the only planned use of
the callsign from Wales during a SSB contest.

IOTA NEWS.............
OC-161. Members of the YB Land DX Club are planning to activate Nias
Island later this month (dates to bet confirmed). The team
will also apply to use the YE6N callsign, which was last used
in 2006 from the same island, or they may sign individual
callsigns/6. More details will be forthcoming.

SA-030. Members of the South Radiogrupo (SUR) of Uruguay will be active
as CV5A from Flores Island (WLOTA LH-0528, RGS CX-104, ARLHS

URU-001) between February 21-24th. Activity will be on all HF
bands, 160-6 meters. QSL via CX2ABC direct only. For more
details and updates, see: http://www.radiogruposur.org

SA-040. Alain, F6BFH, who was active from San Andres as HK0/F6BFH this
past week, and is currently active from Providencia as HK0/F6BFH
until February 11th, will team-up with Pedro/HK3JJH and be
active as HK1/F6BFH and HK1/HK3JJH from Tierra Bomba between
February 13-15th. QSL via the Bureau (E-mail requests can be
sent to f6bfh@f6bfh.net).

M5, ENGLAND. Operators Olof/G0CKV, Kazu/JK3GAD, Seppo/OH1VR and Oliver/W6NV
will be active as M5E from the Marconi Center in Cornwall, England, (see:
http://marconi-centre-poldhu.org.uk) during the ARRL DX CW Contest
(February 16-17th) as Multi-2 entry. Their station will be on the bluff
at Poldhu Point, overlooking the Atlantic Ocean. QSL via G0CKV.

NODXA ADDS A CONDITION TO THEIR DONATION/FUNDING POLICY. The members of
the Northern Ohio DX Association during their February meeting voted (after
a lengthy discussion) to follow the "International DX Association's"
(INDEXA) example/guideline by adding a condition that must be met by
DXpeditions when requesting financial help.
As of February 1st, all DXpeditions requesting funds from NODXA will
now be sent the following question/statement before the release of any
funds:
"Members of NODXA believes that funds contributed to a DXpedition should
be used only for that purpose. If there is a surplus of funds after a
DXpedition is completed, a refund should be made, using some logical
approach, to help offset the personal expenses incurred by individual
team members and/or returned to the major sponsors. NODXA is not
concerned how the refunds are made, but does believe that any excess
funds should not be held by the organizers for other purposes or
projects. Do you agree? Yes or No"

P4, ARUBA. John, W2GD, will be active as P40W from Aruba (SA-036) during
the ARRL DX CW Contest (February 16-17th). He states that this is a last

minute trip. Operations outside of the contest are usually on 160/80m and 30/17/12 meters as time permits. Watch 160m on the hour and 80m on the half hour. QSL via LoTW or direct to N2MM. Logs will be loaded on LoTW upon his return to the USA.

NEW IRC INTRODUCED. The ARRL Letter reports [edited], "The Universal Postal Union has introduced the newest model of the International Reply Coupon (IRC): The Doha model -- so named for the 25th Universal Postal Congress that took place in Doha, Qatar, in October 2012 -- will replace the current model, known as the Nairobi model. Although the U.S. Postal Service no longer sells IRCs, they are still available in other countries and post offices in the U.S. are mandated to redeem them. The Doha model IRC will be available for purchase on July 1, 2013. It is valid for exchange until the end of 2017. The Nairobi model remains valid until December 31, 2013. Read more at:
http://www.arrl.org/news/new-international-reply-coupon-introduced "

MORE QSLs MANAGED BY G3SWH. Phil, G3SWH, has also been appointed as QSL Manager for Thor's, TF4M, various operations as follows: TF1PSN, TF1PS, TF6PS, TF7PS, TF6MM, TF1MM, 4X/TF1MM, TF1MM/YU1, 9A/TF1MM, 9A6MM, OD5/TF1MM, 4U/TF1MM, TF1MM/4L, VK8CW, 4U1ET, TF3MM and TF4MM. There are log searches for all activities are at:
http://www.g3swh.org.uk

USPS TO SUSPEND SATURDAY MAIL DELIVERY. The U.S. Postal Service announced this past week that effective the week of August 5th, it will stop Saturday delivery of most mail, including periodicals, first-class and standard mail, which is used most often for direct-mail advertising.

However, packages, mail-order medicines, priority and express mail will still be delivered on Saturdays. ADDED NOTE: The U.S. Congress may try to fight this! Stay Tuned!

QSL RECEIVED VIA LoTW: 5P1KZX, 5X8C, A61K, A45XR, D3AA, DK0PM, DL1LQA, DL3GD, DM5BB, FK8DD, FY5PO, FY8PE, HC6EP, JA4DND, JA5TNF, JA7QVI, JF3SUL, JH0INP, LB2TB, LY7Z, MU/PA9M, NP2KW, OK2PAY, PA0MJM, PA3UL, PR8ZX, PY2FN/P, PY2XB/1, RX6LG, SM6BZV, SP7HOV, SQ7LRT, SV1ACL, TM7T, TX6BB, UA3RF, UX2KA, V5/DL3XX, VE2OJ, VE4EAR, VP2MRV, VU2NKS, YZ1AU, ZF2BJ and ZX2S

QSLS RECEIVED VIA MAIL: 1A0C, 2O12L, 3C0C, 3W2J, 4S7NE, 5T0SP, 7O6T, 9M6/JA4DND, A92GR, C31CT, H40FN, HK3C, IS0/K7QB, J6/N7QT, JD1BMM, K8SDK/C6A/MM, OD5NJ, OJ0R, T8CW, TI8AA, UU5J, V5/DL3DXX, V63XG, VO2NS, VU3BPZ/MM, VU3BPZ/P, W7AVO/VK9L, W8XGI/KH2, YB0A, Z21BB and Z81Z

QSLS RECEIVED VIA THE BUREAU: DL0FHD, TK4W, V5/DJ2HD, VK9HR and VO1/K5KG

RI1, SOUTH SHETLAND ISLANDS. The "DX World.net" reports that Oleg, ZS1OIN (UA3HK), is the new Chief of Bellingshausen Base on King George Island, South Shetland Islands (AN-010), and will be active on all bands, mostly CW, after February 12th, as RI1ANU instead of the normally used RI1ANF callsign. He plans to stay at the base until March 31st. QSL via ZS1OIN.

T2, TUVALU. Tim, NL8F, is expected to be active from Tuvalu between March 19th and April 2nd. His callsign is not yet known, but he will obtain his license upon his arrival on Tuvalu. Activity will probably be mostly SSB. QSL via K8NA.

T6, AFGHANISTAN. Eric, K9GY, will be active as T6MO from the Helmand Province (Grid MM21) during the CQ 160 Meter SSB Contest (February 22-24th) as a Single-Op/Low-Power entry. He mentions that this will be a limited effort; mainly from sunset to 1730z. Eric will also be active during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/Low-Power entry. He states that activity will be mainly 20 meters (unless 15 and 10 meters is open to USA). Eric will also be active during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Single-Band (possibly 15 or 10m)/Low-Power. QSL via LoTW or to K9GY (see QRZ.com) direct or by the Bureau.

TI8, COSTA RICA. Operators Keith/W4KTR, Eddie/K4UN, Bob/W4BW, Lex/W4XO, Carlos/TI2KAC, Juan Carlos/TI2JCY and Mauricio/TI4ZM will be active as TI8M from Costa de Pajaros, during the ARRL DX SSB Contest (March 2-3rd) as a Multi-? entry. QSL via TI2KAC, direct preferred but bureau "OK". Their operations will be on 160-10 meters. Look for operations before the contest.

TO1, REUNION ISLAND (WFF Op). A team of operators from Reunion Island will be active as TO1PF from the UNESCO World Heritage site of "Piton de la Fournaise" [Peak of the Furnace] volcano during the following dates: February 23-24th, May 11-12th and August 3-4th. Operators mentioned are Jerome/FR1JB, Yvon/FR1GZ, Jacky/FR4NP, FR4DJ, Michel/FR4OA, FR4OM, FR4OO, Fran&#65533;ois/FR4OS, FR4OU, FR4OV, FR4PE, Bruno/FR4PF, Jacques/FR4PG, Alain/FR5CU, Patrick/FR5FC and Philippe/FR5HV. The volcano is a shield volcano

on the eastern side of Reunion island (AF-016, DIFO FR-001, WWFF FFF-011, WLOTA 1812), with an elevation of elevation 2632m. It is currently one of the most active volcanoes in the world. Activity will be on all HF bands and modes. QSL via FR1GZ.

TX5, CLIPPERTON ISLAND (Update). The following update was posted on February 5th, on the TX5K Clipperton Island DXpedition Web page [edited]: "Nearly all the equipment has been assembled, and most has been packed. Transportation will be by truck on February 12th. The boat (Shogun, San Diego) will be loaded on Friday, February 15th.
We have implemented a new domain for the expedition: <www.TX5K.org>.
We have also implemented a BLOG <http://ky6r.com> (link is also on the TX5K homepage) where you can read and enter comments.
We have completed development and emplacing of DXA (version 2). It can be accessed by the link on the TX5K home page, or directly at <www.dxa2.org>. Until the DXpedition goes QRV, the display will be a simulation. Comments on the blog before, during, or after, are most welcome.
The webmaster during the DXpedition will be Rich, KY6R. Please send any news stories or other interesting information to him for possible sharing on the blog or general publicity."

V3, BELIZE. Operators Robert/K5PI (V31AT), Mark/AG9A and John/WC0W (V31TP) will compete in the ARRL International DX CW Contest (February 16-17th) as a Multi-Single entry from Cahal Pech in Western Belize. They will use V31TP for the contest callsign. The trio will be in Belize between February 11-18th, so there will be operations before and after the contest. They will focus on CW and the 30/17/12 meter bands mostly. QSL to their home callsigns.

VISALIA DX CONVENTION NEWS.....
* Steve, WB6RSE, reports: "The 2013 Visalia Top Band Dinner will be held on April 19, 2013. There will be a buffet dinner, door prizes including a Hi-Z Antennas Hi-Z 4 level 2 (PLUS6 Amps) System and a special program: Les Kalmus, W2LK: 'ZL9HR - The Auckland and Campbell Island 160m Challenge.' Cost is 40 (USDs) per person. For further details and reservations, please see:
http://www.dxconvention.com/pages/dinners-topband.html "

* The 18th annual Islands On The Air (IOTA) Dinner will be held in conjunction with the 64th annual Visalia International DX Convention on Friday, April 19, 2013, in the San Joaquin Room at the Visalia Conference Center, Downtown Visalia, 303 East Acequia, Visalia, CA.
See Convention Web site for details on the DX Convention:
http://dxconvention.com (Please note change of Convention site.)
This dinner is open to all who are active in the IOTA program or want to see beautiful pictures of far away islands. If you do not wish dinner, you may sit and enjoy the IOTA program following the dinner.
The IOTA Programs/Speakers as of February 8th, are: Don/G3XTT and Rick/K6VVA. For complete details, see:
http://www.dxconvention.com/pages/dinners-iota.html

VP5, TURKS AND CAICOS. Operators Urb/W1UL and his XYL Pat/W2PKV will be active as VP5/W1UL and VP5/W2PKV from Providenciales Island (NA-002) between March 7-13th. Look for W2PKV to operate primarily on SSB, while W1UL will be primarily on CW. Their activities will be on all bands including 6 meters. QSL both callsigns via W1UL.

XV2, VIETNAM. Operators Georg/DD8ZX, J�rgen/DH0RAK, J�rgen/DH6ICE, Bernd/
DK7TF and Zrinko (Zik)/DK8ZZ will be active as XV2DLH from Mui Ne between February 16-25th. Activity will be on the HF bands using CW, SSB and the Digital (PSK, RTTY) modes. QSL via DK8ZZ. Please note, logs will be uploaded daily on ClubLog Web site.

YO2013, ROMANIA (Special Event). Members of the Sportclub of the University Transilvania Brasov (YO6KSU, <http://www.csu.ro>) will activate the special event station YO2013EYOWF between February 16-24th. Activity is in celebration the "European Youth Olympic Winter Festival" <http://eyowf2013.ro>. Operations will be on 80-10 meters using CW, SSB and the Digital modes. Three special awards will be issued (Gold, Silver and Bronze), and the three different classes require a certain number of QSOs/bands with the event station on different days. Operators mentioned are Victor/YO6MP, Nonu/YO6FUG, Marius/YO6FTV, Lucilius/YO6FPW, Doru/YO6CHB, Adi/YO6GBD and Deszi/YO6UO. For more info, picture of the QSL and the QSL route, see QRZ.com.

Z8, SOUTH SUDAN (Update). Ken, K4ZW, will be returning to Juba and is expected to be active as Z81Z between February 25th and March 6th. "The Daily DX" reports that Ken is "bringing equipment for the lowbands" and will do his best to be active, but work requirements will dictate his schedule. QSL via his home callsign, direct or by LoTW.

ZS8, MARION ISLAND. Various sources report the following update (UPDATE #2) by Pierre, ZS1HF [edited]: "David, ZS1BCE, has not been appointed as the radio technician to join the team going down to Marion Island this year. At this stage, Carson McAfee, ZR6CWI, has been appointed as the Space Weather Engineer and will spend a year on the island. He has appointed me as his QSL Manager and informs me that he will be active from May 2013 to April 2014.
No callsign has been allocated yet and at this stage he will operate SSB only. Once he returns to Cape Town and I have had time to discuss his operating and equipment requirements, I will supply more info. Until then no more info is available. Carson has just completed a year at the SANAE Antarctic Base.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 10th February 2013

Silent Key

It is with great sadness that we have learned of the death of Gavin Halpin EI4J, on February 4th 2013 aged 94. Gavin was one of the last of the original Irish Radio Experimenters. In his 95th year, he was first licenced at the age of 17 in December 1935 at his family home in Rathmines along with his brother Fintan Halpin. In 1947 Gavin moved to Drogheda where he took up the callsign EI9P. In 1972, his other brother Frank, passed away, from whom he took over the EI4J callsign and held it for the remaining years of his life. Gavin passed on the love of the hobby to his son Shane EI4GE who will inherit the Halpin radio legacy. He is survived by his wife Aileen and his 10 children. May he rest in peace.

Syllabus for Amateur Radio Licence

Earlier this year we reported that ComReg had published a revised version of the Amateur Station Licence Guidelines. The new guidelines include changes to the regulations for land mobile and maritime mobile operation that require some amendments to the examination syllabus. An updated syllabus is now available at www.irts.ie/downloads which includes the changes consequent on the publication of the revised guidelines. The new syllabus comes into effect immediately.

Candidates are advised to obtain a copy of the document "Studying for the Harmonised Amateur Radio Examination Certificate" - which is on the IRTS downloads page -and which includes the examination syllabus along with details of the examination format, suggestions for study material and a sample paper showing how the multiple choice questions are presented.

IRTS AGM, Dinner and Radio Rally

This year the 81st IRTS AGM is hosted by Shannon Basin Radio Club. The event takes place in the Shamrock Lodge Hotel in Athlone, Saturday April 27th and Sunday April 28th 2013. Tickets for the Dinner on Saturday night (8.00 for 8.30pm) will be available at 30 Euro each from Brian EI8IU QTHR and through IRTS Committee Members. Dress code, as

usual, is smart/casual. Menu details is available from the IRTS website. Please visit www.irts.ie for more details.

Phoenix Amateur Radio Club Rally

Coolmine rally is being held today Sunday February 10th at the Coolmine Community School. Doors open at 11am. Admission is 5.00.Everyone welcome.

Limerick Radio Club AGM

The AGM of Limerick Radio Club will take place on Wednesday 13th February in the Limerick Institute of Technology at 7.30pm Sharp. All members are requested to attend and club subs can be paid on the night.

Limerick Radio Club Radio Rally

The Annual Limerick Radio Club Rally will take place on Sunday 3rd March 2012 at the Radisson Blu Hotel Limerick. Doors open at 11am and admission is 5. All the usual traders will be present. Bring and Buy tables are Free of charge and will be allocated on a first come basis, they can be booked by contacting Ger McNamara EI4GXB on 087 2532512 or ei4gxb / at/gmail /dot/com.

IRTS Awards Nominations.

It is time once again for nominations for the several awards for IRTS Trophies and cups that are required from within the membership, this includes the awards for:

Service to the Society or to Amateur Radio.

Awards in this category can be to members or non -members.

Awards for Other Achievements:

Awards in this category include the 4 and 6 M Shields; the SWL Award; and the awards for Quality Construction Projects.

These are confined to Members Only.

When considering your nomination, please refer to previous successful winners, please refer to www.irts.ie/cgi/awards/cgi

Nominations may be from Clubs or individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX, Jim EI4HH or, Peter EI4HX, Chair of awards committee, QTHR or by e-mail to ei4hxperimental/at eircom/dot/net

Closing date for mominations is February 28th 2013.

Return of IRTS Awards & Trophies

It is now time to return all trophies presented at last years IRTS, AGM. Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday 10 th February or to any IRTS Committee Member before February 28th 2013.

South Eastern Amateur Radio Club

The AGM of the South Eastern Amateur Radio Group will take place in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford on Monday the 25th February at 8.00 p.m. sharp. All members are asked to attend. For more details please visit www.searg.com.

Dundalk Amateur Radio Society EI7DAR

The AGM of DAR will take place Wednesday 6th March at the Society premises, 'Larkin House’, 113, Castletown Road, Dundalk, commencing at 8pm sharp. Everyone welcome and a reminder to members that membership subscriptions are now due. For more details please visit www.ei7dar.com.

Restoration of Grey Point Fort

A 48 hour special event station, starting at 1700hrs UTC 31st May 2013 to 1700hrs UTC 2nd June 2013, will commemorate the restoration of Grey Point Fort Crawfordsburn, NI. A special website is available at http://www.greypointfort.magix.net/public

---

DX News

An Italian group will operate from Guinea-Bissau in west Africa from 10 February until 2 March. The callsign is J52HF and the QTH will be the Cumura Mission where they operated from last year. Activity will be on SSB only and QSLs go via I3LDP.

John KF0RQ will be back in Cambodia from 10 February until 18 March. He will reactivate his XU7ACQ callsign. He plans to be active on 10 - 80m SSB and CW. QSL to his home call.

A nine member Belgian/Dutch team will operate as 9U4U from Burundi from 14-23 February. Their QTH will be on the shores of Lake Tanganyika. QSL Manager is M0URX.

If you haven't yet worked the 5X8C DXpedition to Uganda they will be QRV until 18 February. Remember that IRTS member Dave EI9FBB is one of the operators so listen out for the Cork accent.

The Pacific island of Tonga will be activated by Werner DJ9KH as A31WH from 13 February until 4 March. QSL to the home call.

The Irish Hour Net takes place on Sundays at 1700 UTC on 21.317 Mhz. Brian, W7DFO, chairs the weekly Net from his QTH in the Pacific North West. It has become what he refers to as a "challenge". Although many of the call-ins to the net are from licensed Irish-Americans. There is a standing invitation to EIs or GIs to participate.

EI13CLAN operation from Galway.

Members of the Galway VHF Group will be operating the Special Event Callsign EI 13 CLAN from Sunday the 10th of February to Sunday the 17th of February inclusive. Operation will be on phone and data modes. The EI 13 CLAN callsign will be on 3.690 MHz immediately after the 80 metre news today to enable anyone wishing to earn a point towards the EI 13 CLAN certificate with operation 40 metres for the rest of the afternoon. During the following week the callsign will be operating on 40 metres and above depending on band conditions. At night there will be a period of operation on 80 metres until midnight. Check out EI4ALE on QRZ.COM for updates of operating schedule for the duration of the operation.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

//
Dixie Regional Adds Amateur Radio to its Back Up Communications Systems:

Posted: 09 Feb 2013 04:09 PM PST
http://www.eham.net/articles/29742

ST. GEORGE -- On Wednesday, Intermountain Healthcare Southwest Region's Dixie Regional Medical Center completed installation of two special antennae on the building that serve as a part of its backup communications system powered by amateur radio. "We're pretty pleased with this," said Bob Vosper, technical manager for Washington County Amateur Radio Emergency Service (WCARES). Much of Intermountain's communications system is Internet-based, Vosper said. If the web goes down, a possible communications blackout could occur. To counter this potential problem, the hospital arranged for WCARES to install an amateur radio broadcast system as a back up that can function without the aid of the Internet or local radio repeaters. The system will also be able to broadcast large blocks of text over amateur radio bands.

Might be worth noting this:

Verifiable on the RSGB website:

Exams:

Foundation £27.50 Intermediate £32.50 Full £37.50

Books:

Foundation Licence Now! £4.99 non members, £3.74 members
Intermediate Licence £6.99 non members, £5.24 members
Advance £11.99 non members, £8.99 members

Additional course fees vary depending on venue costs.

To go from nowt to full would cost at least £115.47 without either the course
fees or the RSGB membership to get the book discounts upon which this
figure is calculated. Some book fees may be shaved by being clever with
Amazon's second hand marketplace.

Makes the Irish exam look a bloody bargain, doesn't it?

(Thanks to Fred Roberts for the above information)(very slightly edited).

General info about the exam, including details of how to get the 5 euro coursework CD here:

http://irts.ie/cgi/licence-exam.cgi

Visit http://irts.ie/cgi/downloads.cgi for:

470kB PDF Studying for the Harmonised Amateur Radio Examination Certificate
127kB PDF Amateur Station Licence Examination Syllabus
(Note: “Studying for the Harmonised Amateur Radio Examination Certificate”
includes a copy of the Syllabus)
141kB PDF Examination Application Form

Here's a sample of return air fares for the last Wednesday (picked at
random) in June next year, the exam window currently being June-July:

London Luton Ryanair £62
London Stansted Ryanair £65
Birmingham Ryanair, Aer Lingus £69
Bristol Ryanair, Aer Lingus £73
Leeds Bradford Ryanair £73
Liverpool Ryanair £73
Manchester Ryanair, Aer Lingus £73
Newcastle Ryanair £73
Blackpool Aer Lingus £75
Cardiff Aer Lingus £75
Glasgow Prestwick Ryanair £75
Isle of Man Aer Lingus £76
East Midlands Ryanair £77
Edinburgh Aer Lingus, Ryanair £77
London Southend AerLingus £78
Glasgow International Aer Lingus £79
Aberdeen Aer Lingus £89
London Heathrow Aer Lingus, British Airways £102

Dublin Bus offers an express AirLink service (route 747) every 10 minutes
at peak times to the city centre and bus station for €6 or €10 return.
This service uses the Dublin Port Tunnel to avoid the city traffic and can
reach the city centre in minutes.

http://preview.tinyurl.com/DublinBusRoute747

The nearest stop to the ComReg offices appears to be that in
Cathal Brugha St., about half-a-mile to the north.

Try this web site for food and drink:

http://travel.thedublinguide.com/food-drinks/

Use a budget airline, sit one 2-hour exam, and get a HAREC for less than £100, depending on your location...and the UK Full (Reciprocal) licence is indistinguishable from any other UK Full licence over the air. Do the 12wpm in Eire and get a swanky two-letter Irish call as well, which could assist in overcoming the minor annoyances of the Reciprocal.
It's also a licence for life, validatable every five years to any postal address in the world.

Much better than all that faffing about with a specially-arranged weekend (has anyone costed this? I bet they daren't publish the figures) to do all three of the current UK exams and their associated tests, appreciations and other irritating obstacles.

HTH

```
:Product: Weekly Highlights and Forecasts
:Issued: 2013 Feb 11 1018 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
04 - 10 February 2013

Solar activity was low. The largest flare of the period, a C8/1f
with associated Type-II (estimated at 548 km/s) and Type-IV radio
sweeps, originated from Region 1667 (N22, L=200, class/area Dso/100)
on 06/0021 UTC. A CME with an earth-directed component was
subsequently observed in LASCO C3 imagery at 06/0042 UTC. A long
duration C2 flare associated with a 27 heliographic degree Hyder
flare eruption centered near N23W06 at 09/0640 UTC was also
observed. This event also produced a potentially earth-directed CME
which was observed in LASCO C2 imagery at 09/0709 UTC. The largest
active region of the period was Region 1665 (N10, L=242, class/area
Hsx/170 on 04 February), but this region failed to produce any flare
events. The most magnetically complex region was Region 1670 (N17,
L=161, class/area Dsi/160 on 10 February), although still on the
disk, this region has also failed to produce any flare events. In
additon to the CMEs already described, several other were noted on
LASCO and STEREO coronagraph imagery throughout the week. Most of
these were associated with filament eruptions, but none deemed
geoeffective.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels.

Geomagnetic field activity was predominately quiet with two periods
of unsettled conditions (08/0600-0900 UTC and 08/1500-1800 UTC)
prompted by the 08/0400 UTC arrival of the 06 Feb CME desribed
above.

Forecast of Solar and Geomagnetic Activity
11 February - 09 March 2013

Solar activity is expected to be very low to low.
```

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels for most of the week, possibly reaching high levels on 13 - 18 February in response to positive polarity coronal holes/high speed streams (CHs/HSSs) 93 and 94.

Geomagnetic field activity is expected to be predominately quiet, with isolated unsettled conditions on 12 Feb, when the Hyder flare CME mentioned earlier is expected to arrive. Quiet to unsettled conditions are expected to persist through 16 February due to CH HSS effects.

9H, MALTA, EU-023
Adam,DJ0IF (9H3RX), and Mek,SP7VC (9H3KK), will stay on Gozo (EU-023)
from Feb 13-19. Adam announced to take part in the SOAB category of
the upcoming ARRL DX CW Contest (Feb 16/17). QSLs via homecalls.

9U, BURUNDI
A team from Belgium and the Netherlands will be active as 9U4U from
Bujumbura with four stations in SSB/CW/RTTY on 160m-10m from Feb 14-23.
They will focus on 160m and 80m with one station every night.
See: http://www.9u4u.be and https://twitter.com/9U4U
QSL via M0URX (OQRS: http://www.m0urx.com), LoTW as soon as possible.

CN, MOROCCO
EA5CP, EA5YU and EA9BLJ will join the ARRL CW Contest as M/S signing
5C5T with 100 watts and dipoles. They are working also before and after
the contest from Feb 14-18. QSL via EA5YU.

CO, CUBA
CO2WF, CO6LC, CO8ZZ, N3QQ, R3FA, RA3NAN, RK7A, RW3RN, RZ3EC, RZ3EM and
UA3EDQ are celebrating the 20th jubilee of the "Russian Robinson Club"
with an IOTA trip to Cuban islands:
Feb 11-14 T48RRC Moa Grande Island (NA-218)
Feb 14-16 T47RRC Coco Island (NA-086)
Feb 16-18 T46RRC Santa Maria (NA-204)
They will work with three stations in CW, SSB and digital modes on
160m-10m and will join the ARRL CW Contest as T46T.
QSLs via OQRS, LoTW, direct QSLs also via RZ3EC.
See also: http://cuba2013.ru

EA, SPAIN
The AAW special event station AO1ICE will be QRV in CW/SSB/RTTY/PSK31
on 160m-10m from Feb 18-24. QSL via EA1WK.
See: http://www.ea1wk.blogspot.com.es/p/antarctic-activity-week.html

---
EA1GIB will use the special callsign EG1WAA (WAP-228) from Galicia
between Feb 18 and Mar 8. QSL via homecall.

EM, UKRAINE
The memorial stations EM70LI and EM70LL are activated by members of
the radio club "Izyumsky Shlyakhov" until Oct 1. Further activities
will be carried out from former battlegrounds as EM70LI/p and EM70LL/p.
QSLs for EM70LI and EM70LI/p via UT3LI, unfortunately only direct,
QSLs for EM70LL and EM70LL/p via UX4LL, unfortunately only direct.

ES, ESTONIA
Toomas,ES5RY, will sign ES95Q from the QTH of ES6Q in Tartu joining the
ARRL CW Contest as SOAB/LP. The special callsign ES95Q celebrates the
95th anniversary of Estonia. QSL via ES5RY, unfortunately only direct.

ET, ETHIOPIA
Before going to Juba in South Sudan Ken,K4ZW, plans to join the second
half of the ARRL CW Contest from the clubstation ET3AA in Addis Ababa.
He will show up again as ET3AA also from Feb 22-24.
QSLs via N2OO (only for QSOs with Ken).

FM, MARTINIQUE, NA-107
Michael,FM/HB9WDF, is spending his holidays on Martinique until Feb 21
working in PSK-31 and some SSB on HF and via satellite (AO-7, FO-29,
VO-52, SO-50, etc). QSL via homecall.

FY, FRENCH GUYANA
FY5KE will take part in the ARRL DX CW Contest in the SO/HP category
on 20m. QSL via REF bureau, LoTW or direct to FY5KE.

G, ENGLAND
The special event station GB8OSC celebrates the 80th jubilee of the
Scarborough Amateur Radio Society in February. QSLs will be sent via
bureau automatically, you do not need to send your QSL.
See also: http://g4bp.webs.com

HA, HUNGARY
The contest station HG1S celebrates its 30th anniversay by using the
special callsign HA30S until the end of the year.
QSL unfortunately only direct, see QRZ.com.

HK, COLOMBIA
Lothar,HK3JCL, announced his regular sked times:
Echolink via DM0ZHS-L (# 249774), 144.962,5 kHz, every day at 1030 UTC
Monday/Tuesday/Thursday/Friday: 1300 UTC on 14.307,5 kHz;
around 1330 UTC on 21.346 kHz and 1900 UTC on 14.330 kHz; other times
and modes if requested. The times may change a bit in March.

JA, JAPAN, AS-007
The special event station 8J4CEH is working in all modes on HF from
the 26th National Confectionary Exposition in Hiroshima (JCC 3501) on
Honshu (AS-007, WLOTA 2376 JCC 3501) until Mar 12. QSL via bureau.

LX, LUXEMBURG
The clubstation LX7I in Eschdorf will join the ARRL DX CW Contest in
the multi/single category. QSL via LX2A.

LZ, BULGARIA
The radio club Blagovestnik (LZ1KCP) is going to remember a saint with
a special call every month this year:
January LZ1771SDG
February LZ969SCP
March LZ1323SKZ
April LZ833MBB

May LZ1876SMB
June LZ1534GWS

July LZ1722SN

August LZ1105PIO

September LZ1406SK
October LZ1795WZM

November LZ1520YYD
December LZ867MWB
A special award is available as well. QSLs via LZ1KCP.

OA, PERU
Hans,OE3NHW, is signing OA6Q again using a TS-480HX, 5 band Spiderbeam
and G5RV on HF until April. QSL via homecall.

PA, THE NETHERLANDS
The special event station PD13BP active from Feb 16-28 celebrates the
official Baden-Powell Day (Feb 22). On Feb 16/17 mainly Girl Guides
take part in the "Thinking Day On The Air" (TDOTA) as the Boy Scouts
have their Jamboree On The Air (JOTA) in October. QSL via PA3EFR.

V3, BELIZE
John,WC0W, George,K5PI, and Mark,AG9A, are going to Belize for the
ARRL CW Contest. They hopre to score well as V31TP. QSL via WC0W.

XV, VIETNAM
Georg,DD8ZX, Juergen,DH0RAK, Juergen,DH6ICE, Bernd,DK7TF, And
Zrinko (Zik),DK8ZZ, will be active on the bands signing XV2DLH from
Mui Ne in CW, SSB and digital modes (PSK, RTTY) on HF from Feb 16-25.
Logs will be uploaded to ClubLog every day. QSL via DK8ZZ.

YA, AFGHANISTAN
Eric,K9GY, will be QRV as T6MO from Helmand province (Loc grid MM21)
during the ARRL CW Contest (SOLP). Most likely he will be active only
during the first 28 hours and maybe also only on a single band.
QSL via K9GY (QRZ.com), LoTW.

Salvatore,IZ1BWB, is a member of the "Brigata Alpina Taurinense".
He and Stefano,I0KTE, will be QRV as YA/IZ1CCK on 21.195 kHz on Feb 10
at 0900 UTC. QSL via IZ1BWB.

YO, ROMANIA
Victor,YO6MP, Lucilius,YO6FPW, Nonu,YO6FUG, Marius,YO6FTV, Doru,YO6CHB,
Adi,YO6GBD, and Deszi,YO6UO, who are members of the Sportclub of the
University Transilvania Brasov (YO6KSU http://www.csu.ro) will activate
the special event station YO2013EYOWF from Feb 15-24 to celebrate the
European Youth Olympic Winter Festival (http://eyowf2013.ro). Operation
will be on in CW, SSB and digital modes on 80m-10m. They have also a
special award issued in gold, silver and bronze. QSL via YO6MP.

YU, SERBIA
On the occasion of the 1700th anniversary of the Edict of Milan, the
special event stations YU313EDICT and YU1700AST will be active until
the end of the year. QSLs via YU1AST.

Spare parts wanted: Antoine,3D2AG, plans to be active again as 3D2AG/p from
Rotuma in late March/April. He is looking for spare parts for his
14-years-old ICOM 706-MKII (no TX).
His e-mail address can be found on QRZ.com.

QSL Manager: Phil,G3SWH, is now the QSL manager for following DXpeditions
of TF4M: 4U/TF1MM, 4U1ET, 4X/TF1MM, 9A/TF1MM, 9A6MM, OD5/TF1MM, TF1MM,
TF1MM/4L, TF1MM/YU1, TF1PS, TF1PSN, TF3MM, TF4MM, TF6MM, TF6PS, TF7PS,
VK8CW. See also: http://www.g3swh.org.uk

DXCC: Following DXpeditions were approved for DXCC credit: 5X8C, T6BP, T6TJ

SILENT KEY: Willy Assold,DL3IE, passed away at the age of 91 on Feb 9. He
was a wellknown DXer and got his first license as DE3842/p in 1936.
Our condolences and sympathy are with his family and friends.
We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Radio-Sport.net: Die website founded by James,NS3T, is back online
after a few months of inactivity. The website will now be managed by
"Washington Square Media of Haverhill, MA" with the new chief editor
Jeff Demers,N1SNB: http://www.radio-sport.net

Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Feb 15/16 Russian WW PSK Contest
Feb 16/17 ARRL International DX Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Luis,EA8AY, announced to be QRV as EF8USA from
Tenerife (DIE S-012, WLOTA 1276, EAA TF, Loc IL28hc) during the ARRL
CW Contest. QSL via W2GR. See also: http://www.ea8ay.com/ef8x

AF-014, CT3, Madeira Archipelago: Rasto,OM3GI, Tibor,OM3RM, and Julo,OM7JG,
will sign CR3A from Madeira (DIP MA-001, PIP MD-001, WLOTA 0053) in the
ARRL CW Contest. QSL via OM2VL (bureau/direct).

AS-004, 5B4, Cyprus: Roman,UR0MC, will join the upcoming ARRL CW Contest
as 5B/UW2M from Cyprus (MIA MCI-002, WLOTA 0051). QSL via US0LW.

AS-015, 9M2, Pinang State group: The special event station 9M4CNY is working
from Georgetown on Penang Island (WLOTA 2743) to celebrate the Chinese
New Year. They will be QRV in SSB on 40m, 20m and 10m on Feb 16 from
0700-1600 UTC. QSL only direct via 9M4CNY.

EU-005, G, Great Britain: Olof,G0CKV, Kazu,JK3GAD, Seppo,OH1VR, and
Oliver,W6NV, will be QRV as M5E from Marconi's historic radio station
(WLOTA 1841) in Cornwall from Feb 15-18. They are working in all modes
on all bands and plan to take part in the ARRL CW Contest as well.
QSL via G0CKV (bureau/direct).

EU-013, GJ, Jersey: Mathieu,MJ0ASP, will be QRV from the Contest clubstation
on Jersey (GJ2A) in St. Brelade (WLOTA 0818, Loc IN89ve, WAB WV-54)
during the ARRL CW Contest. QSL via LoTW.

EU-057, DL, Mecklenburg-Vorpommern State group: Andy,DL6AP, is working
from Ruegen Island until Feb 14. Depending on the waether he wants to
activate lighthouses and WFF areas as DL6AP/p. QSL via homecall.

NA-003, VP5, Turks Islands: Jeff,VP5/K0UU, is QRV mainly on the WARC bands
from Grand Turk Island (WLOTA 0289) from Feb 13-21. He will sign VQ5RP
in the ARRL DX CW Contest. QSL via LoTW or K0UU (bureau/direct).

NA-005, VP9, Bermuda Islands: Kurt,VP9/W6PH, can use the station of VP9GE
in the ARRL CW Contest and plans to join the phone part of this contest
as well. QSL only direct via W6PH. See also: http://vp9ge.com

NA-015, KG4, Cuba: Hurricane Sandy damaged the Guantanamo Bay ARC station
(WLOTA 0358) extensively. Ed,KN4KL/KG4KL (Feb 16-23), and Bill,W4WV/
KG4WV (Feb 17-Mar 1), will repair the antennas and the shack and plan
to hit the airwaves when the repairs are finished.
QSLs via homecalls (direct).

NA-016, ZF, Cayman Islands: John,K6AM, announced to be show up as ZF2AM
from Grand Cayman Island (WLOTA 1042) in the ARRL DX CW Contest.
QSL via LoTW and K6AM.

NA-080, C6, Little Bahama Bank group: George,KQ8Z, will stay on the island
Grand Bahama (WLOTA 0527, Loc FL06uo) from Feb 14 until Mar 6 and wants
to be active as C6AZZ on the HF bands. His main focus will be both the
ARRL DX CW- and ARRL DX SSB Contests. If propagation is good he may
show up also on 6m. QSL only direct via KQ8Z.

NA-097, 6Y, Jamaica: Yuri,VE3DZ, will be QRV as 6Y2T in the ARRL CW Contest.
More information about the last ARRL CW Contest and pictures can be
found on the website: http://www.rigexpert.net/6y2t/6y2t.html
QSL via VE3DZ (bureau/direct).

NA-102, FG, Guadeloupe: Michel,F6GWV, and Gildas,F6HMQ, will be active from
from Guadeloupe (DIFO FG-001, WFF FFF-004, WLOTA 0644) signing TO22C
between Feb 17 and Mar 3. They will work on all HF bands with emphasis
put on 160m. QSL via F6HMQ (bureau/direct).

NA-106, KP2, US Virgin Islands: The Radio Reef DXers Phil,KT3Y, Fred,K9VV,
and Bob,WP2XX, will be QRV as KP2M from St. Croix Island (USi VI002S,
WLOTA 2477, Loc FK77pr) in the ARRL CW Contest.
QSL via AI4U (d) and LoTW. See: http://www.radioreef.com

Another activity from St. Croix (USi VI002S, WLOTA 2477) is planned
by Yuri,N2TTA. He will join the ARRL CW Contest as KP2MM.
See also: http://www.n2tta.info

NA-109, J8, St. Vincent: Dave,G3TBK, is going to visit Kingstown on
St. Vincent (WLOTA 0492, Loc FK93jd) again and plans to become QRV as
J88DR working in CW/SSB/RTTY on the HF bands from Feb 14 until Mar 11.
He plan to take part in both ARRL DX Contests. QSL via G3TBK.
See also: http://j88dr.no-ip.org

NA-143, W5, Texas State East (Matagorda to Jefferson County) group:
Joe,K5KUA, is going to Galveston Island (USi TX001S) again from
Feb 15-17 and plans to work in holiday style as K5KUA/5.
QSL via K5KUA (bureau/direct).

OC-047, H44, Solomon Islands: Phil,G3SWH, and Jim,G3RTE, are travelling to
the Solomon Islands (WLOTA 0086, Loc RI00) from Feb 18-28 and will be
active with as H44KW with two stations in CW on 80m-10m. Emphasis will
be put on working Europe and North America. QSL via G3SWH.
OQRS is installed. See also: http://www.g3swh.org.uk/h44kw.html

OC-049, A3, Tongatapu group: Werner,DJ9KH, will be QRV as A31WH from
Tongatapu Island from Feb 13-23 using an Elecraft K3 and wire antennas.
Preferred frequencies and news can be found at: http://www.tonga2013.de
His next stop will be on Vava'u Island (OC-064). More information on
that can be found in the DXNL 1820. QSL via DJ9KH (bureau/direct).

OC-142, VK4, Queensland State (South Coast) Centre group: Andrew,VK4NM, and
Peter,VK4LAT, plan to act&#65533;vate Fraser Island (WFF VKFF-216, WLOTA 29
76)
as VK4NM/p from Feb 15-18. QSL via M0OXO.

OC-245, YB5-6, Sumatra's Coastal Islands North: Ucok,YB6AR, and a few other
OPs will be QRV as homecall/p from Pulau Bunta (WLOTA 2390). Activities
are planned in SSB and RTTY on 40m/30m/20m/15m/10m from Feb 15-17.
QSLs via homecalls (direct).

SA-036, P4, Aruba: John,W2GD, will join the ARRL CW Contest as P40W from
Aruba. If time permits he will work also on the WARC bands and 160m/80m
before and after the contest. QSL via LoTW and N2MM (direct).

SA-040, HK1, Bolivar/Atlantico Division group: Alain,HK1/F6BFH, and
Pedro,HK3JJH/HK1, are going to visit Isla Terra Bomba (WLOTA 0296)
from Feb 13-15.

QSL HK1/F6BFH via F6BFH (bureau/direct) and HK3JJH/HK1 via HK3JJH (d).

SA-099, PJ2, Curacao Island: John,K9QVB, Howie,K9KM, Kelly,N0VD (via W3HNK),
Mal,NP2L, Andy,W9NJY (via WD9DZV), Bill,W9VA, and Geoff,PJ2DX, will be
QRV as PJ2T on all bands from the Caribbean Contesting Consortium (CCC)
contest station on Curacao from Feb 13-20, incl. the ARRL CW Contest.
The operators may show up as PJ2/homecalls as well.
QSLs for PJ2T via LoTW and W3HNK (direct).

Joeke,PA0VDV, will be active from Curacao (WLOTA 0942) as well between
Feb 15 and Mar 22. Listen for PJ2/PA0VDV only in CW on the HF bands.
QSL via PA0VDV (bureau/direct).

General: New rules for the "Italian Island Award" (IIA) came into effect by
the end of 2012. The new rules can be found online at:
http://www.ari.it/index.php?option&#65533;m_content&view&#65533;ticle&id&#65533;735%3Aiia-italian-islands-award&catid$2%3Aawards&

Isn't THREE mentions of upcoming ISS contacts just a little over-egging things?

The Road to Uncovering a Wartime Colossus:

Posted: 11 Feb 2013 04:05 PM PST
http://www.eham.net/articles/29750

The story of how the Colossus computer at Bletchley Park aided the allied code-cracking effort during World War II is becoming well known. Its claim to be a forerunner of modern-day computers is also well established. What is much less well known is the tale of how Colossus's story came to be told in the first place. It is a tale of how one man's dogged efforts overcame official secrets and official indifference to rewrite computer history. Computer scientist Brian Randell was the man who started uncovering the history of Colossus. That history had to be pried out of the archives because official efforts to cover up its success worked so well. Thousands of people worked in the huts at Bletchley Park during WWII on code-cracking but only a handful were involved with Colossus and fewer still knew everything about it. All those codebreakers signed the Official Secrets Act which demanded that they kept quiet about their wartime career. Almost all the machines were broken up once they ceased to be useful and design documents were burnt or destroyed at the same time. "I got to know more about it than they did," Prof Randell told the BBC. "They were so compartmentalised that those who worked in one hut would not dream of talking to people in another hut." Prof Randell detailed his experiences of uncovering Colossus' history during a talk at The National Museum of Computing at Bletchley Park.

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

February 13, 2013

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Where the World Works You - ARRL DX CW
- Top Band Phone Phreaks - CQ 160 WW SSB
- WRTC2014 - Here Come the Judge(s)
- High Plains QSO Parties
- Transatlantics and Twenty Years of Terrain
- First-ever CQ World Wide Results
- Current and Voltage and L and C - Oh My!
- Bandpass Filter Review
- 15 Meter Moon

NEW HF OPERATORS - THINGS TO DO

Start by spending some time in the shack one of these weekday
afternoons and tune for the School Club Roundup
<http://www.arrl.org/school-club-roundup> - encourage students in their
ham radio endeavors by making a QSO on any mode. If you're into the
digital modes, the NAQP RTTY contest is a great exercise and there's no
better way to work some CW DX than to put in some time with the ARRL DX
CW contest - where the DX wants to work you!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

I'm surprised that only one cartoon aficionado picked up the cue -
Donald Duck is a Disney creation, not Looney Tunes - well done, Peter
N5UWY! And the Marconi Club's call sign is KM1CC, not WM1CC - thanks to
one of the operators, Dave KM3T.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

February 16-17
```

- ARRL International CW DX Contest
- NAQCC Monthly QRP Sprint--CW
- CWops Monthly Mini-CWT Test
- PODXS Valentine Sprint--Digital (Feb 14)
- Russian WW PSK Contest (Feb 15)
- Feld-Hell Annual WAS Sprint

February 23-24

- North American QSO Party RTTY
- Run For the Bacon--CW (Feb 18)
- Semi-Automatic Key Evening (Feb 20)
- CQ WW 160 Meter SSB--Phone (Feb 22)
- REF Contest--Phone
- UBA Contest--CW
- Mississippi QSO Party
- North Carolina QSO Party
- CQC Winter QSO Party (Feb 25)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The judging committee responsible for certifying the results of the WRTC2014 <http://www.wrtc2014.org> competition has been announced. Dave Sumner K1ZZ will serve as Chief Judge leading the committee of Nodir Tursoon-Zadeh EY8MM, Don Field G3XTT, Dan Street K1TO, and Dick Norton N6AA. WRTC2014 Chairman Doug Grant K1DG <k1dg@wrtc2014.org> notes, "Each [member] is highly respected by the contesting community and brings valuable experience and skills to the event. It is our goal to ensure a fairly-judged competition and we are confident this team will do a great job." Andy Blank N2NT, WRTC2014 Director of Competition, will serve as liaison to the WRTC Board of Directors and a log-checking team consisting of Larry "Tree" Tyree N6TR and Trey Garlough N5KO will provide software support and log-checking services to the Judging Committee. Thanks to all of these hams - champions many times over - for volunteering their services in support of WRTC2014.

School Club Roundup <http://www.arrl.org/school-club-roundup> is going on all week - look for our next generation of contesters operating from club stations from elementary school through universities in the afternoon after classes and later in the evening.

The comment period closes on 25 February for the FCC's NPRM 12-338 <http://apps.fcc.gov/ecfs/proceeding/view?name=12-338> regarding (in part) the disposition of the upper 100 kHz of the 160 meter band. The comments of other respondents can be viewed on the FCC's website and there is an ARRL news item <http://www.arrl.org/news/fcc-seeks-to-assign-entire-amateur-portion-of-160-meter-band-to-primary-status-to-amateur-radio-serv> about the NPRM as well. You can submit your own comments by using a word processor, preferably saving your comments as a PDF document. Use this link <http://apps.fcc.gov/ecfs/upload/begin?procName=12-338&filedFrom=E> to submit your comments. (Thanks, Frank W3LPL and Tony K4QE)

Two upcoming VHF+ conferences have been announced. The North East Weak Signal Group is sponsoring the Eastern VHF-UHF-Microwave Conference <http://www.newsvhf.com/vhfconf.html> will be held on April 26-28 in Manchester, CT (near Hartford). There will be a flea market, test lab, banquet on Saturday night, and lots of presentations. A special "Newcomers" registration rate is available, too. Later in the year, the Central States VHF Conference <http://www.csvhfs.org/2013conference/index.html> is scheduled for July 25-28 in Elk Grove Village, IL (near Chicago). Sponsored by the Central States VHF Society, the conference features "Rover Row" and an antenna test range for some shootouts. ARRL CEO Dave Sumner K1ZZ will be the banquet speaker. VHF+ contesters - take your pick!

Another get-together at the other end of the radio dial is coming up, too - the 2013 Visalia Top Band Dinner <http://www.dxconvention.com/pages/dinners-topband.html> will be held on April 19. There will be a buffet dinner, door prizes, and a special program by Les Kalmus W2LK: "ZL9HR - The Auckland and Campbell Island 160m Challenge." (Thanks, Steve WB6RSE)

Chip Margelli, K7JA, a well-known presence in the world of ham radio companies, has a new QTH. InnovAntennas <http://www.innovantennas.us/> announced that Chip will manage InnovAntennas' sales and marketing activities in the Americas and will also contribute to the company's global strategic planning. Chip has more than 35 years of experience working with companies such as Yaesu, Heil Sound, and CQ Communications. His operational expertise spanning HF through the "ultra-highs" will be put to good use as InnovAntennas continues to introduce new and ground-breaking antenna designs.

Just in time for this weekend's contest, N3JFP <http://www.n3fjp.com/> has released ARRL International DX Contest Log 3.0 following updates for NAQP and CQ 160. This is the third application of the re-written software using C#.NET. The older, tried and true VB6 versions are also available. The latest version is completely new code - every single line of it!

A new Morse training program called Morsefusion <http://morsefusion.com/> takes a novel path to learning the world's first digital communications mode. Sending books as a stream of characters that adjusts to your abilities is a fun way to learn Morse and enjoy some literature at the same time. Once you get started, you'll have Great Expectations, for sure! (Thanks, Blaine K0NE)

In the Small World Department, Tom W7WHY notes that his first JT65 QSO last August was with W0ZWV and it turned out that Tom was 'ZWV's very first Novice QSO as WN0ZWV back in 1955!

Web Site of the Week - Kudos to the sponsors of the North Dakota <http://www.w0nd.com/>, South Dakota <http://www.w0blk.org/>, and Nebraska <http://www.qcwa.org/chapter025.htm> QSO Parties for working together to create the "High Plains QSO Parties" on April 20-21. All three remain separate contests but recognizing the attraction of having

these relatively rare states on the air at the same time, the sponsors aligned their dates and times to create a trio of ways to check off some of those 5BWAS counters! Also, a special thanks to the Nebraska chapter of QCWA for responding right away to the need for a new Nebraska QSO Party sponsor.

WORD TO THE WISE

Single-band - If you want to really "learn" a band, operate in a major contest as a single-band entry. Instead of moving up and down in frequency, you'll be able to stay with the band as it opens and closes, including long-path and skew-path openings that a multi-band entry often misses. What's out there in the middle of the night? You might be surprised!

==> SIGHTS AND SOUNDS

More webinars hit the Internet as the World Wide Radio Operators Foundation <http://www.wwrof.org> (WWROF) announces a pair of upcoming crowd-pleasers:

- The First Topband DX Contest - the 1921 Transatlantic Test, hosted by Frank Donovan W3LPL
- What I've Learned in Two Decades of Terrain Assessment, hosted by HFTA author Dean Straw N6BV

Details and registration links are available on the Webinars link <http://wwrof.org/webinars/> on the WWROF home page. (Thanks, Ken K4ZW)

John K7HV wonders, "Is this the first ham radio-focused pop release?" A 45-rpm recording of "CQ Serenade <https://soundcloud.com/user419447599/cq-serenade>", written by orchestra-leader VE2QS and VE2BR, with vocals by Joyce Hahn, was produced around 1951. John found the link on DL6JF's QRZ.com <http://www.qrz.com/> profile.

"But I don't LIKE Spam!" It's not Spam (which your editor actually does like) but, rather, a tasty liver casserole. What is it doing sending CW <http://qrper.com/2013/01/oh6dcs-liver-casserole-cw-key/>? (Thanks, Andy N2NT)

==> RESULTS AND RECORDS

The very first CQ WW DX Contest took place in October and November of 1948. Martin LU5DX points us to this reproduction <http://www.qsl.net/ct1boh/cqww/1948.PDF> of CQ magazine from June 1949 with the complete results. He notes that scores were listed in descending order by zone and there was no distinction between number of operators or power. The world-high phone score came from PY2AC at 124,069 points made in what were apparently very poor conditions. CW operators fared better - GI6TK turned in a score of 452,454 points. No station exceeded 1000 contacts on either weekend! Single-op, multiop, and single-band categories were created for the 1949 contest. What will

operators think of our contest scores in 65 years?

Official contest results have been recently published and/or posted for 11 more WRTC2014 qualifying events. WRTC2014 Event Scores based upon them are now posted <http://www.wrtc2014.org/qualifying/qualification-standings/>. Official results for 44 of the 55 qualifying events are now included and over 27,000 different operators have submitted scores in those events. Eight qualifying events have taken place for which official results are not yet available. Many Selection Area races are coming down to the wire. There are only two events left to operate in the qualifying period - ARRL DX CW and Phone! (Thanks, WRTC2014 Team Selection Director, Dan K1TO)

Vytenis LY2KZ made an audio recording of the LY2W CQ WW 160 CW <http://www.qrz.lt/ly2w/CQWW160/> operation in which you can search for your call sign and listen to the QSO. A similar record has been posted for the 2012 CQ WW DX CW contest <http://qrz.lt/ly2w/wtQsoplayer/>. Server space is limited so the CQ WW DX CW record will only be accessible for another week or so. The CQ WW 160 CW contest audio will be around for another couple of months.

At the deadline, 2218 logs had been submitted for the CQ WW 160 Contest <http://www.cq160.com/logs_received_cw.shtml>, beating last year's total of 2089. The 5-day submission deadline does not seem to be causing any problems! (Thanks, CQ WW 160 Manager, Andy N2NT)

Time to package up and send in your logs - not to the contest sponsors but to the keepers of the call sign databases! Send your VHF+ contest logs (in Cabrillo format) to Dave W9PA <zephd@indy.rr.com> (ex-W9ZRX) for the VHF+ database <http://www.dxc.k3lr.com/w9zrx/> and the HF contest logs to Bob WA1Z at supercheckpartial.com <http://www.supercheckpartial.com/>.

If you made 500 QSOs or more in last weekend's CQ WPX RTTY contest, you are in the running for the CQ Triathlon Award <http://www.cqwpx.com/blog/?p=97>! The award is open to everyone who operates in any Single-Op category in all three CQ WPX contests: RTTY, SSB and CW and makes at least 500 QSOs - not as hard as it may sound. Does your club have a tri-athlete worthy of recognition?

OPERATING TIP

Adding a footstool under your operating desk can help circulation and avoid "sore spots" by lifting your legs above the chair cushion from time to time. It doesn't have to be fancy - even a shallow cardboard box turned upside down will work fine. An adjustable-height chair is also a great way to reduce operator fatigue.

==> TECHNICAL TOPICS AND INFORMATION

Alan W2AEW has put three new videos on YouTube explaining some often hard-to-understand concepts about voltage and current in capacitors and

inductors <https://www.youtube.com/watch?v=ykgmKOVkyW0>, series and parallel resonance <https://www.youtube.com/watch?v=hqhV50852jA>, and self-resonance <https://www.youtube.com/watch?v=vi24SpKYYoQ>.Tektronix has a new How to Use An Oscilloscope <http://www.youtube.com/watch?v=tzndcBJu-Ns> video including a free 60-page publication to go with the video. An 1970s military training film, Introduction to RL Circuits <http://www.youtube.com/watch?v=X_tNR1NfuX4> is also easy to understand - and has terrific intro music, to boot. You just can't have enough good ways to teach technical topics! (Thanks, Don W7WLL)

Alerted by Julius N2WN, this Slashdot article about the bladeRF SDR <http://tech.slashdot.org/story/13/02/02/2156253/group-kickstarting-a-high-bandwidth-software-defined-radio-sdr-peripheral> project caught my eye...or, rather, ear. I hope my readers are catching up on what Software Defined Radio technology is all about because it's displacing analog receiver technology very, very quickly.

Amplifier builders and fixers take note - Harbach Electronics is dropping the Peter Dahl line of high-performance power transformers as of Feb 14th. While the product line may yet be picked up by another manufacturer, check with Electronic Products Design <http://epd-inc.com/> for plate and filament transformers built to the Dahl specifications. (Thanks, Ed KB5GT and Gary K4AVC)

Shack On a Belt may be giving way to Shack In a Pocket! Remote station control, like everything else, is going portable in a big way. Rick K6VVA who operates via remote control from California and the U.S. Virgin Islands, found this neat new app for the Android operating system. Dan YO3GGX is developing his software <http://www.youtube.com/watch?v=b3LWF4xa6nE> to run on tablets and smartphones, including an SDR mode.

Magazine Mailbag - here are some recent technical articles that piqued the interests of your editor. Individual issues of the print magazines may be available from the library or members of your club.

Circuit Cellar <http://circuitcellar.com>, Feb 2013 - QR Coding <http://en.wikipedia.org/wiki/QR_code> for Engineers, by Jeff Bachiochi, explains those "square bar codes"

Scientific American <http://www.scientificamerican.com/>, Feb 2013 - The Battery-Powered Bullet, by Gregory Mone, discusses the challenge of high-speed EVs

Electronic Design <http://electronicdesign.com/>, 10 Jan 2013 - Wired Communications Hold Their Own and A Ubiquitous Wireless World Unfolds, by Louis Frenzel W5LEF, good surveys of current wired and wireless network technology

Popular Science, February 2013 - Rewire Your File-Transfer Routine <http://popsci.com/crossovercable> shows how to make a crossover network cable

Nuts and Volts <http://nutsvolts.com/>, February 2013 - The Wide Range Pulse Generator by Gailbreath and Peterson, a good addition to your test bench

Elektor <http://www.elektor.com/>, Jan-Feb 2013 - Toroid Cutting by Thijs Becker and Aviation Band Antenna by Gert Baars, an interesting way to make a J-pole

IEEE Spectrum <http://spectrum.ieee.org/>, February 2013 - Phreaking Out Ma Bell by Phil Lapsley about the history of the "blue box"

Technical Web Site of the Week - Jim K9YC has just published this detailed article <http://audiosystemsgroup.com/BandpassFilterSurvey.pdf> comparing several popular switchable band-pass filter sets. Look around on Jim's site for his tutorial on ferrites, as well!

==> CONVERSATION

15 Meter Moon

In place of the usual Conversation feuilleton, I am relating a truly amazing accomplishment. Tonno ES5TV has been putting up bigger and bigger antennas every year and recently completed construction of an 8-antenna "H-frame" array - two side-by-side 4-high stacks of 5-element Optibeam <http://www.optibeam.info/> OB5-15 Yagis separated by 12 meters horizontally and 14 meters vertically. The highest antenna in each stack is 64 meters above the ground. Does the array make its own band openings? Well, just about!

We'll start with this high-resolution video <http://youtu.be/Z9fDlbIFhMs> of the tower erection put together by ES5PC. The video also includes the very first QSO with the new stack - it's with Paul K8PO, whose station is near Portland, Maine. The delicate music at the start gives way to more energetic accompaniment later on. (A photo gallery <http://pontu.eenet.ee/es5tv/> is also available.)

Tonno lists the specifications for the array below the YouTube video - 24 dBi forward gain over real ground and a beamwidth of less than 30 degrees (that is between the half-power points and not from dead ahead to one side) give serious consideration to qualifying this antenna system as a "pencil beam" array!

While this is newsworthy in its own right as possibly the largest amateur 15 meter array in the world, there is more to the story. Tonno will certainly be holding a frequency during the coming contests - as will a number of other big stations. Tonno went further, though - much further. In fact, one-half million miles further!

"After two fruitless attempts at moonrise I got [an] EME QSO with myself done during moonset! Here is the video <http://youtu.be/QCP0kisTbME> of the best minute out of a 10-minute period. The signals were audible with strong QSB on January 13th, from

1615 to 1625Z about 2 hours after sunset.

"[The] Moon was setting at about 243 degrees azimuth and the signals were audible while the Moon was from 3.3 to 2.2 degrees of elevation peaking at 2.6 degrees. Antenna was pointing within 3 degrees of the correct direction. [The] Radio: FTDX5000 + ACOM 2000A.

"It is noteworthy that the band was not 100% closed as even some SA signals were heard. Also the amazing strength of the signals ... especially the 3rd time the signals come back ... is probably also attributable to some ground gain at this elevation." U.S. moonbounce guru Gerald K5GW suggests that Tonno's array has a narrow enough beamwidth that he will be able to detect the contribution to received noise of the many sources in the Milky Way.

While several big array builders have reported receiving echoes off the Moon on 10 meters (W0UN and AA7XT (then AA6TT) having built two such systems) none have reported conducting a full two-way EME QSO. This is far more difficult, requiring a second station with a sufficiently large antenna system situated so that the Moon is in the main beam of both systems at the same time - most likely one at moonrise and the other at moonset. These arrays are not physically steerable in the vertical plane although they do have some control of the beam's vertical angle through phase switching.

Will there be a first-ever 15 meter EME contact? At press time, there are some possibilities in the coming weeks but the windows are very short and the odds are long. Of course, the same could be said about the first transatlantic contacts in November of 1923! This is the amateur pioneering spirit at its best - pushing the limits and advancing the radio art - just as Deloy 8AB and Schnell 1MO and Reinartz 1XAM did 80 years ago. We'll be cheering them on as beams are centered on the silvery lune with everything adjusted "just so" hoping to hear those first signals pop out of the aether once again - good luck, Tonno!

73, Ward N0AX

==> CONTESTS

13 February through 26 February

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL International CW DX Contest--CW, from Feb 16, 0000Z to Feb 17, 2400Z. Bands (MHz): 1.8-28. Exchange: RST, state/province or power. Logs due: Mar 19. Rules <http://www.arrl.org/contests>

North American QSO Party RTTY--Digital, from Feb 23, 1800Z to Feb 24, 0600Z. Bands (MHz): 3.5-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com>

NAQCC Monthly QRP Sprint--CW, from Feb 13, 0130Z to Feb 13, 0330Z. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Bands (MHz): 3.5-14. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/sprint201302.html>

CWops Monthly Mini-CWT Test--CW, from Feb 13, 1300Z to Feb 7, 0400Z. Multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies (MHz): 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

PODXS Valentine Sprint--Digital, from Feb 14, 8 PM to Feb 15, 2 AM. Bands (MHz): 1.8-7. Frequencies (MHz): 1.807, 3.580, 7.070/7.035 EU/7.028 JA. Exchange: Name, OM or YL, S/P/C. Logs due: Feb 28. Rules <http://www.podxs070.com>

Russian WW PSK Contest--Digital, from Feb 15, 2100Z to Feb 16, 2100Z. Bands (MHz): 1.8-28. Exchange: RST and oblast code or serial. Logs due: 15 days. Rules <http://www.qrz.ru/contest/detail/384.html>

Feld-Hell Annual WAS Sprint--Digital, from Feb 16, 2000Z to Feb 16, 2200Z. Monthly on 3rd Saturday. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org>

Run For the Bacon--CW, from Feb 18, 0200Z to Feb 18, 0400Z. Monthly on 3rd Sunday night (local). Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org>

Semi-Automatic Key Evening--CW, from Feb 20, 1900Z to Feb 20, 2030Z. Bands (MHz): 3.5. Exchange: RST, serial, first year of bug use. Logs due: Mar 15. Rules <http://www.agcw.de>

CQ WW 160 Meter SSB--Phone, from Feb 22, 2200Z to Feb 24, 2200Z. Bands (MHz): 1.8. Exchange: RST and state/province or CQ zone. Logs due: 5 days. Rules <http://www.cq160.com>

REF Contest--Phone, from Feb 23, 0600Z to Feb 24, 1800Z. Bands (MHz): 3.5-28. Exchange: RS and French dept or serial. Logs due: 15 days. Rules <http://concours.ref-union.org/contest>

UBA Contest--CW, from Feb 23, 1300Z to Feb 24, 1300Z. Bands (MHz): 3.5-28. Exchange: RS, serial, and ON province. Logs due: 2 weeks. Rules <http://www.uba.be/en/hf/contest-rules>

Mississippi QSO Party--Phone,CW,Digital, from Feb 23, 1500Z to Feb 24, 0300Z. Bands (MHz): 3.5-28, 50-432, Frequencies (MHz): CW 3.545, 7.045, 14.045, 21.045, 28.045; Phone 3.857-862-867,7.238,14.275,21.375,28.375;Digital per band plan. Exchange: RS(T) and MS county or S/P/C. Logs due: Mar 31. Rules <http://www.arrlmiss.org>

North Carolina QSO Party--Phone,CW, from Feb 24, 1500Z to Feb 25,
0059Z. Bands (MHz): 3.5-28, 50, 144, Frequencies (MHz): CW 3.54, 3.74,
7.04, 7.14, 14.04, 21.04, 21.14, 28.04, 28.14, Phone 3.86, 7.26, 14.26,
21.36, 28.36. Exchange: RS(T) and NC county or S/P/C. Logs due: Apr 1.
Rules <http://www.ncqsoparty.org>

CQC Winter QSO Party--Phone,CW, from Feb 25, 0100Z to Feb 25, 0259Z.
Bands (MHz): 3.5-14. Frequencies (MHz): 3.560, 7.040, 14.060. Exchange:
RS(T), S/P/C, name, CQC nr or power. Logs due: 30 days. Rules
<http://www.cqc.org>

VHF+ CONTESTS

Mississippi QSO Party--Phone,CW,Digital, from Feb 23, 1500Z to Feb 24,
0300Z. Bands (MHz): 3.5-28, 50-432, Frequencies (MHz): CW 3.545, 7.045,
14.045, 21.045, 28.045; Phone
3.857-862-867,7.238,14.275,21.375,28.375;Digital per band plan.
Exchange: RS(T) and MS county or S/P/C. Logs due: Mar 31. Rules
<http://www.arrlmiss.org>

North Carolina QSO Party--Phone,CW, from Feb 24, 1500Z to Feb 25,
0059Z. Bands (MHz): 3.5-28, 50, 144, Frequencies (MHz): CW 3.54, 3.74,
7.04, 7.14, 14.04, 21.04, 21.14, 28.04, 28.14, Phone 3.86, 7.26, 14.26,
21.36, 28.36. Exchange: RS(T) and NC county or S/P/C. Logs due: Apr 1.
Rules <http://www.ncqsoparty.org>

Alex Tarsha, N0AMT Joins the QRZ Engineering Team

Posted: 12 Feb 2013 03:49 PM PST
http://forums.qrz.com/showthread.php?379586-Alex-Tarsha-N0AMT-Joins-the-QRZ-Engineering-Team&goto=newpost

We're extremely pleased to announce that Alex Tarsha, N0AMT, has joined QRZ as a full time staff member in our systems engineering department. This represents QRZ's second paid employee and is a big step for a small company. We're extremely excited about making this transition and are looking forward to being able to expand QRZ's core functionality to a new level. Prior to Alex's arrival, and for the past 20 years, all of the software and engineering behind QRZ has been done by Fred Lloyd, AA7BQ (that's me).

As it currently stands, QRZ runs on about 40,000 lines of programming code. We've always had big ideas for great new projects, but there is only so much that a single programmer can write, maintain, and support in a day's work. In fact, for the past couple of years, maintaining and supporting the existing system has taken more time than the development of new features. Now, with a second experienced Internet engineer on staff, all of this changes to allow us to unleash new features and services at a pace that we have not seen for several years.

About Alex, N0AMT

Alex is a US Air Force veteran who comes to us from the defense industry where he has recently been serving as a Lead Software Security engineer.

Alex's technical credentials are impressive and his long list of certifications include networking, internet protocols, and classified systems security, as well as multiple programming and database languages. His skillset is a great match for QRZ and with our cloud based services, he will help us maintain our promise of online security for our members.

Alex will be helping with the design and implementation of QRZ systems software, and with day to day operations of our primary systems console. Alex is already an experienced QRZ system administrator (Editor) and he knows our user base and its needs. His skills as a generalist will be a great addition to all parts of QRZ, including our customer support desk which, incidentally, he his helping to rewrite.

Please join me in welcoming Alex to the QRZ Staff!

//
Satellite Tracker Users: Space-Track.org Upgrade

Posted: 12 Feb 2013 02:37 PM PST
http://forums.qrz.com/showthread.php?379578-Satellite-Tracker-Users-Space-Track-org-Upgrade&goto=newpost

Dear Space-Track User,

We are pleased to announce that we will upgrade the current www.Space-Track.org on Wednesday, 20 February 2013 at 12:00 PST to add the look and functionality that matches what is now on https://beta.space-track.org.

The bulk file downloads from our current Space-Track site will continue to be available to scripters for a limited time after the upgrade using established URLs.

This upgrade will vastly improve how the Space-Track User community interacts with orbital element sets, the satellite catalog and conjunction data. With a robust Representational State Transfer (REST-ful) Application Programming Interface (API), scripters will be able to get the latest data available, customized for their purposes.

Here are just a few of the new features that will become part of the upgraded www.Space-Track.org:

- A streamlined and intuitive user interface that is easier to navigate and allows simple searches

- A robust help and documentation section

- "Favorites" lists to identify logical groupings of catalog objects that Users can monitor via the web interface or with the site's API

If you have production scripts that currently use beta.space-track.org, we recommend that you change your scripts to point at www.Space-Track.org on or after 20 February 2013.

If you have scripts that screen-scrape or download text/zip files from the current yellow-colored legacy www.Space-Track.org, they will continue to perform correctly for a few months, but we recommend that you quickly transition your scripts to take advantage of the new API. Documentation is available under ☐Help☐ to assist you, as well as the API query builder tool on the upgraded site.

We have also started sharing information about Space-Track's new features on tumblr, facebook and twitter, so please engage us on your favorite social media platform.

Our sites are http://space-track.tumblr.com, http://www.facebook.com/SpaceTrack and http://www.twitter.com/SpaceTrackOrg

We understand that any significant upgrade has the potential to cause frustration for our user community and we apologize if this creates any

adjustment problems for you. For help or clarification, please email us at admin@space-track.org.

Thank you,

The www.Space-Track.org Team

PC13KING

Posted: 13 Feb 2013 05:21 AM PST
http://forums.qrz.com/showthread.php?379637-PC13KING&goto=newpost

At the 30thof April 2013 Queen Beatrix will abdicate and her son Willem Alexander willbecome the new King of The Netherlands.

We commemoratethis with a special call sign. For schedule look at PC13KING.

Willem IIIwas the last king. He reigned from 1849 till 1890. After three queens,Wilhelmina [1898-1948], Juliana [1948-1980] and Beatrix [1980-2013], theNetherlands will be reigned again by a king.

Promoting Amateur Radio: A New Approach by the RSGB:

Posted: 12 Feb 2013 04:11 PM PST
http://www.eham.net/articles/29753

As part of its Primary Strategies, the RSGB is committed to promote, develop and defend amateur radio in the UK. There are many aspects to promotion and our work in this area is constrained only by the budget and volunteer time we have available, because professional expertise is so expensive and without guarantee of result. Indeed, promotion is at the heart of most of the things we do from the Centenary celebrations to promotional videos to our work with Ofcom and IARU.

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: J5 ; Guinee Bissau ; Square: IK21 ; start 2013-02-11

Guinee Bissau (IK21dt) qrv on HF and 50 MHz

J52EME and J52HF will be again on air from february 11 to march 2, 2013. Some members of Verona DX Team will return to Cumura to help the Mission with their work and install new devices.
In the spare time they will be on air on HF and 50 MHz Tropo and EME, if the condition will be good.
Not 144 and 432.

SOURCE: tnx to Lucio, I3LDP, direct to MMMonVHF

** DXCC: FG ; Guadeloupe ; Square: FK96 ; start 2013-02-15

Activity from FG4KH FK96HF again

FG4KH will be on air by the middle of the next month for a small activity in EME and tropo from
Guadeloupe Island. The set up will be light this year with FT897, 200w, LNA and only H pol on
the 2 x 3WL DK7ZB. I will try to make some tropo QSO to south America and Cara?bean area.
I will be QRV also time to time on the HF bands from 80 to 10 meters
Cu soon from the French West Indies
Philippe F1DUZ

SOURCE: Phillipe F1DUZ, direct to MMMonVHF

** DXCC: TX ; Clipperton ; Square: DK50 ; start 2013-03-01

I am planning to have at least 1kw output and low loss feedline to a 6M8GJ with
manual elevation. There are very good windows with EU moonsets. PSE read my webpage
for more details and procedures. I will transmit in the first sequence JT65A when operating EME.
This is about the only way anyone from EU will ever work Clipperton on 6m, so please be ready!

SOURCE: tnx for Info Lance, W7GJ, direct to MMMonVHF

** DXCC: DL ; Germany ; Square: JO44 ; start 2013-03-01

DL0AT qrv from JO44HI
Aktivate the Lighthouse Westerhever with big power on the top on the lighthouse.
2x7 ele es 2x 9 ele with 2x 750 watts. FED: 260; LH 0063

SOURCE: tnx to Andy, DG3XA, direct to MMMonVHF

** DXCC: 5W ; Samoa ; Square: AH36 ; start 2013-04-04

5W0M (AH36TN) on 144 MHz EME
A German team will activate Samoa from Le Lagoto on Savaii in the northern part of the island
from 80m thru 6m. The good news is that very experienced moon bouncer and DXpeditioner Joe
DL9MS joined the group and will take care of EME operations on 144 MHz. 5W0M will be QRV
from 4 April to 18 April 2013 however, for Central Europe the EME window will open only
around 8 April

Source: http://5w0m.hkmann.de/?Home

** DXCC: 9G ; Ghana ; Square: IJ95 ; start 2013-04-12

After some DXpeditions in the past (last year 5X1EME) the Atleticoteam will go to Africa again.
This time Rene PE1L, Eltje PA3CEE and Johan PE9DX will activate Ghana in west Africa on 144 MHz,
this will be a new one for all of you. The licence 9G5EME is received and the flight and house is booked,
the locator will be IJ95gb on the beach in the town Ampenyi near the city of Cape Coast.
We want to be active at least during two whole weekends when there is good activity in

combination with
good moon conditions. We try to start friday april 12th for the weekend and then start again friday 19th
for one week. (in between the condx are not good so we will do things what normal tourists do)
Internet possibility is unsure but we try to send at least once a day an update via MoonNet,
MMMonVHF and our mailinglist.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Ghana moonbounce site! http://www.emelogger.com/ghana (donations more than welcome)
This is our fifth DXpedition to Africa. Africa came into our blood. We have to come back as often
as possible. We can't resist.... With this expedition we support projects via BEBO Bakery http://www.bebobakery.com

Dont forget to vote at http://www.mmmonvhf.de/voting.php for expedition of the year 2012.

Johan, Eltje and Rene

SOURCE: tnx to Rene, PE1L, direct to MMMonVHF

** DXCC: OJ0 ; Market Isl. ; Square: JP90 ; start 2013-06-12

OH8K team plans to go OJ0 Market Island, June 12-16 2013.
Qrv on 2m EME and MS. Call is confirmed: OJ0C
Team Jukka OH8MSM, Sami OH9GDT, Anssi OH9FKJ and Jussi OH6ZZ More info later

SOURCE: tnx to Jussi, OH6ZZ, direct to MMMonVHF

** DXCC: VP2V ; Britisch Virgin Isl ; Square: FK78 ; start 2013-06-14

>From June 14 to June 28, 2013, Dave, W9DR will be operating from the north shore of the island of Anegada
in the British Vigin Islands (FK78TR) with the call of VP2V/W9DR on 6 Meters. He will be on 50.115 Mhz.
SSB and 50.115,6 Mhz. CW and will also be running a beacon on 50.115,6 when the band is not open.

Please submit confirmation request (QSL) to W9DR home address.

SOURCE: tnx to Dave, W9DR, direct to MMMonVHF

** DXCC: 3B9 ; Rodrigues Isl ; Square: MH10 ; start 2013-09-01

3B9EME will be qrv from Rodrigues Isl. (MH10qh) in september 2013.
After the success of the J52EME DXpedition by the Verona DX Team,
we are pleased to announce the activation of a new one for 2013.

We will be in 3B9, Rodrigues Island, for EME activity in 144 and 432 Mhz.
The period will be 1 to 9 September 2013. Flights and hotel are already booked.
We await the granting of the call 3B9EME, with the aid of the contacts of Rene PE1L,
which is, along with Atletico Team, our example for DXpedition activity.
Soon more news about equipment, antennas and QRG.
Best 73 from Lucio I3LDP, team leader Verona DX Team - ARI Verona

SOURCE: tnx to Lucio I3LDP direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2013-10-25

Frank DH7FB and Bernd DF2ZC will activate Crete in Oktober 2013 on 2m EME.Call sign will
be SV9ANJ.Rig is as always TS2000, 2 x 9 ele M2 and BeKo SSPA with sufficient output power.
Location will Pelamare Apartments in Kokkini Hani, 13 kilometres East of Iraklion,
in the North of Crete. Website http://pelamare.webs.com/. Locator is KM25PH
We are very grateful for Pelamare Apts owner Manos SV9ANJ for supporting this DXpedition!

We are very grateful having BeKo Elektronik http://www.beko-elektronik.de, the
manufacturer
of excellent amplifiers, as sponsor of our DXpedition!

SOURCE: tnx to Bernd, DF2ZC, direct to MMMonVHF

==> + HAM RADIO IN HOLLYWOOD: LAST MAN STANDING TO FEATURE HAM RADIO IN
UPCOMING EPISODE

In an episode to air in mid-March, the hit ABC comedy Last Man
Standing -- starring Tim Allen as Mike Baxter, KA0XTT -- will
prominently feature scenes with cast members using Amateur Radio. This
episode will be the first episode to feature Amateur Radio since the
middle of the show's first season. According to Last Man Standing
Producer John Amodeo, NN6JA, the episode called "The Fight" will
feature several of the regular cast members talking on the radios. "I
can't say much about the episode right now," Amodeo told the ARRL, "But
this episode has the most significant use of Amateur Radio in a TV
comedy since Herman Munster, W6XRL4, got his ham license." Fans of
1960s television will remember the episode of The Munsters (originally
aired January 21, 1965) when Herman, on his ham radio, overheard
```

children using walkie-talkies who were pretending to be Martians. Read more here <http://www.arrl.org/news/em-ham-radio-in-hollywood-em-last-man-standing-to-feature-ham-radio-in-upcoming-episode>.

==> + FCC ADOPTS SWEEPING CHANGES TO EXPERIMENTAL RADIO SERVICE

In a Report & Order (R&O) -- FCC 13-15 -- released February 4, the FCC adopted numerous changes to its Experimental Radio Service (Part 5), revising and streamlining its rules. With the new rules, the FCC states that the Experimental Radio Service will have "a more flexible framework to keep pace with the speed of modern technological change, while continuing to provide an environment where creativity can thrive." The new rules will become effective 30 days after being published in the Federal Register. No date has yet been set for publication.

The FCC's rules contain numerous provisions for experimentation and development of new radio equipment and techniques. The R&O noted that the Experimental Radio Service rules "prescribe the manner in which the radio spectrum may be made available to manufacturers, inventors, entrepreneurs and students to experiment with new radio technologies, equipment designs, characteristics of radio wave propagation, or service concepts related to the use of the radio spectrum. To encourage innovation, the Part 5 rules provide flexibility regarding allowable frequency range, power and emissions. In exchange for this flexibility, experimental operations are not protected from harmful interference from allocated services, and Experimental Radio Service licensees must not cause harmful interference to stations of authorized services, including secondary services."

To accomplish this transition, the FCC -- through the R&O -- is creating three new types of Experimental Radio Service licenses: the Program License, the Medical Testing License and the Compliance Testing License. According to the FCC, this new license structure will "benefit the development of new technologies, expedite their introduction to the marketplace and unleash the full power of innovators to keep the United States at the forefront of the communications industry. Our actions also modify the market trial rules to eliminate confusion and more clearly articulate our policies with respect to marketing products prior to equipment certification. We believe that these actions will remove regulatory barriers to experimentation, thereby permitting institutions to move from concept to experimentation to finished product more rapidly and to more quickly implement creative problem-solving methodologies." Read more here <http://www.arrl.org/news/fcc-adopts-sweeping-changes-to-experimental-radio-service>.

==> + FIELD DAY: 2013 FIELD DAY PACKET NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 22-23, 2013! ARRL's flagship operating event -- always held

the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun.

Field Day packets are now available for download <http://www.arrl.org/fieldday> and include the complete rules, as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for Get-On-The-Air (GOTA) stations and a kit for publicizing your event with the local press. New for 2013: Stations operating as Class A or B may begin setting up at 0000 UTC on Friday (which will be Thursday 8 PM EDT, 7 PM CDT, 6 PM MDT and 5 PM PDT). The groups may start and stop their set-up, resuming the set-up later, but may spend only a maximum of 24 hours cumulative time for setting up their sites.

An informational flier entitled "What Is Field Day" has also been included in this year's Field Day packet. Amateur Radio clubs and individuals are encouraged to reproduce this flier as a handout for information tables. Find it and more on the ARRL's Field Day web page <http://www.arrl.org/fieldday>.

==> + ON THE AIR: IARU REGION 2 SEEKS INPUT ON HF BAND PLAN

The International Amateur Radio Union (IARU) Region 2 conference will be held later this year in Mexico. The Region 2 conference -- held every three years -- is attended by delegations from the national Amateur Radio societies in the western hemisphere that are members of the IARU. The ARRL is the IARU Member Society for the US. One of the topics on the conference agenda will be the Region 2 HF band plan. This band plan is "harmonized" with -- spectrum management-speak for "very similar to" -- the IARU Region 1 and Region 3 band plans. Many hams in the US may not know there is such a thing as a Region 2 band plan. Other American hams have heard of it but may not know how -- if at all -- this band plan affects them. Read more here <http://www.arrl.org/news/iaru-region-2-seeks-input-on-hf-band-plan>.

==> + HAM INNOVATIONS: OKLAHOMA HAM HELPS DEVELOP NEW WINTER WEATHER APP FOR NOAA

The National Oceanic and Atmospheric Administration's (NOAA) National Severe Storms Laboratory (NSSL <http://www.nssl.noaa.gov/>), in partnership with the University of Oklahoma (OU), has launched a free app -- mPING (mobile Precipitation Identification Near the Ground) -- with which users can anonymously report precipitation from their Apple or Android mobile device. Simply select the type of precipitation that is falling at your location and press Submit -- your location and the time of the observation are automatically included in the report.

"mPING gives the public a unique opportunity to act as citizen scientists, allowing them to report their observations of precipitation -- such as snow, rain, ice pellets or a mix -- in real time," said Principal Investigator Dr Kim Elmore, N5OP. Elmore, an ARRL Life

Member, is a Research Meteorologist with the NOAA Cooperative Institute for Mesoscale Meteorological Studies at the University of Oklahoma. Read more here <http://www.arrl.org/news/oklahoma-ham-helps-develop-new-winter-weather-app-for-noaa>.

==> THREE NEW "HOW TO" VIDEOS ON THE ARRL WEBSITE

Three new "how to" videos have been posted <http://www.arrl.org/multimedia> on the ARRL website. All three videos are hosted by W1AW Station Manager Joe Carcia, NJ1Q.

- How to attach a PL259 connector to coaxial cable.
- How to use CTCSS in a typical FM transceiver.
- How to enjoy split-frequency operating.

To view these videos your web browser must support Flash <http://get.adobe.com/flashplayer/> technology. Also, some Internet Explorer browsers may have compatibility issues when attempting to view Flash video within Windows 7 and 8. If you do not see the individual video player screens on the Multimedia page, click your Internet Explorer "Compatibility View" icon located in the right-hand section of the Internet Explorer address entry window.

==> + HARBACH ELECTRONICS TO DISCONTINUE DAHL TRANSFORMERS

Effective February 14, Harbach Electronics will discontinue producing and selling the Peter W. Dahl line of transformers. In 2007 after more than 40 years in business, Peter Dahl, K0BIT, retired and sold his company -- the Peter W. Dahl Company -- to Harbach Electronics. According to an announcement on the Harbach Electronics website <http://harbachelectronics.com/>, the company is in negotiations with other manufacturers to take over the Dahl product line of transformers and magnetics.

==> MICROHAMS DIGITAL CONFERENCE SET FOR MARCH 23

The MicroHAMS Digital Conference will be held Saturday, March 23 at the Microsoft Studios West Campus in Redmond, Washington. The conference, which focuses on digital networking, will feature two local efforts that are leveraging off-the-shelf wireless networking technology for Amateur Radio: NW-MESH -- a local HSMM MESH <http://www.arrl.org/wedothat-page3> program -- and the HamWAN project <http://www.hamwan.org/> that is attempting to provide a high speed wireless backbone for the Greater Seattle area. In addition, representatives from NW Digital Radio <http://nwdigitalradio.com/> will give an update on the UDK56K digital transceiver (as seen in the December 2012 issue of QST <http://www.nxtbook.com/nxtbooks/arrl/qst_201212/index.php#/54>). Due to space limitations, pre-registration is strongly encouraged. The MicroHAMS Digital Conference is an ARRL-sanctioned convention. Find out more about the conference on the MicroHAMS website <http://www.microhams.com/softcontent.aspx?scId=58>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Solar activity continues at the low levels
that we have seen in the past few weeks. The sunspot numbers have been
remarkably consistent, with the average daily numbers for the weeks
since January 17 at 56.4, 55.7, 50.7 and finally 51.3 for this past
week. As you can see, the average daily sunspot number rose less than 1
point from the previous week to the past week, while the average daily
solar flux receded 2.4 points to 104. Geomagnetic conditions remain
calm. This weekend is the CW portion
<http://www.arrl.org/news/ride-the-wave-in-the-2013-arrl-international-dx-cw-
contest>
of the ARRL DX International Contest <http://www.arrl.org/arrl-dx>.
Conditions will probably be about the same as last year, because solar
activity is about the same as it was in 2012. The latest prediction for
solar flux shows values of 105 for February 14-15, 110 and 115 on
February 16-17, 110 on February 18-21, 105 on February 22, 115 on
February 23-24, 110 and 105 on February 25-26, 100 on February 27-March
3, and back down to 95 on March 4-9. The predicted planetary A index is
5 on February 14-16, 8 on February 17, 5 on February 18-21, then 12 and
8 on February 22-23, 5 on February 24-28, then 10 and 8 on March 1-2,
and back down to 5 on March 3-17. Look for more on the ARRL website on
Friday, February 15. For more information concerning radio propagation,
visit the ARRL Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL HEADQUARTERS TO CLOSE IN OBSERVANCE OF PRESIDENTS DAY

ARRL Headquarters will be closed in observance of Presidents Day on
Monday, February 18. There will be no W1AW bulletin or code practice
transmissions <http://www.arrl.org/w1aw-operating-schedule> that day.
ARRL Headquarters will reopen Tuesday, February 19 at 8 AM Eastern
Standard Time. We wish everyone a safe Presidents Day holiday.

==> THIS WEEK IN RADIOSPORT

This week:

- February 15 -- NCCC Sprint Ladder
- February 16 -- Feld Hell Sprint
- February 16-17 -- ARRL International DX Contest (CW)
<http://www.arrl.org/arrl-dx>
- February 17-18 -- Russian PSK Worldwide Contest
- February 20 -- AGCW Semi-Automatic Key Evening

Next week:

- February 22 -- NCCC Sprint Ladder
- February 22-23 -- CQ 160-Meter Contest (SSB)
- February 23-24 -- Mississippi QSO Party; North American QSO Party
(RTTY); REF Contest (SSB); UBA DX Contest (CW)
- February 24 -- High Speed Club CW Contest
- February 24-25 -- North Carolina QSO Party
- February 25-27 -- CQC Winter QSO Sprint

- February 27-28 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 15-16 -- ARRL Arizona State Convention <http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-1>, Yuma, Arizona
- February 16 -- ARRL Arkansas State Convention <http://www.arrl.org/hamfests/arkansas-state-convention-winterfest>, Hoxie, Arkansas
- February 23 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-3>, South Burlington, Vermont
- March 8-9 -- ARRL Oklahoma Section Convention <http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfest-1>, Claremore, Oklahoma; ARRL Louisiana Section Convention <http://www.arrl.org/hamfests/louisiana-section-convention-acadiana-53rd-annual-hamfest>, Rayne, Louisiana
- March 16 -- ARRL Nebraska State Convention <http://www.arrl.org/hamfests/nebraska-state-convention-2>, Lincoln, Nebraska; ARRL West Texas State Convention <http://www.arrl.org/hamfests/west-texas-section-convention-58th-annual-st-patrick-s-day-hamfest>, Midland, Texas
- March 23 -- ARRL South Texas State Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-3>, Rosenberg, Texas
- March 29-30 -- ARRL Maine State Convention <http://www.arrl.org/hamfests/maine-state-convention-3>, Lewiston, Maine
- March 30 -- ARRL North Carolina State Convention <http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest-2>, Raleigh, North Carolina
- April 13-14 -- Communications Academy <http://www.arrl.org/hamfests/communications-academy-2013>, Seattle, Washington
- April 19-20 -- Southeastern VHF Society Conference <http://www.arrl.org/hamfests/svhfs-conference>, Cocoa Beach, Florida
- April 19-21 -- International DX Convention

<http://www.arrl.org/hamfests/international-dx-convention-2>, Visalia,
California
- April 20 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-northeast-louisiana-
regional-ham-radiofest>,
Monroe, Louisiana
- April 26-28 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-3>, Boise, Idaho
- May 31-June 2 -- ARRL Northwestern Division Convention
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-4>,
Seaside, Oregon

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

WIANEWS WEEK COMMENCING FEBRUARY 17 2013.

VI4POLIO CALLING 'CQ POLIO'

WORLD RADIO DAY WEDNESDAY A SUCCESS

VIRTUAL TOUR AVAILABLE OF NEW BBC STUDIOS

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING FEB 17 2013.

Geoff Emery VK4ZPP dropped myself and WIA Office some distubing news through
the week, that we Australian Radio Amateurs May Lose the 2300 - 2302 MHz Band.

Now from WIA President Phil Wait - VK2ASD who wrote on WIA Front Page News.

The ACMA has informed the WIA of proposed changes to spectrum usage in the
2300 - 2302 MHz band, which will result in Advanced Licensees losing access to
that spectrum.

The ACMA proposes to acquire the spectrum for LTE radio purposes. LTE, or
long-term evolution, (marketed as 4G LTE), is a wireless standard for
high-speed data over mobile phones and data terminals.

The change will give LTE services the full 100MHz segment from 2300 - 2400MHz, or twenty 5MHz LTE channels, and naturally the government revenue from any resulting spectrum auction would be very significant.

Losing any spectrum is always a great concern to radio amateurs, and this secondary allocation spectrum is the only viable option for Earth-Moon-Earth (EME) contacts to Region II (where the EME activity is on 2304 MHz) or Region I (which uses 2320 MHz). Australian radio amateur EME activity would then be confined to 2400 MHz and above, where ISM and Wi-Fi equipment is likely to cause interference to local EME stations.

The ACMA plans to recommend the change to the Minister for Broadband, Communications and the Digital Economy, and make the changes under section 153B of the Radiocommunications Act 1992. If the Minister approves the change radio amateurs will probably lose access to the spectrum in 2015.

Before making such a recommendation to the Minister the ACMA is required to undertake extensive consultation with stakeholders, and has prepared the consultation paper with the draft recommendation at Attachment A. The ACMA will also be writing to all Advanced Amateur Radio Operators (who are affected by this proposal) to provide them with a copy of the notice and inviting their comments.

Radio amateurs are encouraged to forward their comments to the ACMA by Wednesday 27th March 2013, to the address in the paper.

More is at wia.org.au

(text edtions only)

World Radio Day marks the day when the United Nations Radio was launched in 1946. Since its establishment, UN Radio has used its multilingual programmes carried by media outlets around the globe to tell the story of the international community's efforts to meet the challenges of building a better world.

The National Film and Sound Archive of Australia (NFSA) celebrated World Radio Day on 13 February with the publication of online profiles of two of Australia's female radio pioneers, Lynn Foster & Dorothy Crawford.

These women were pioneers in the development of Australian radio and were integral to the shaping of our national cultural identity. By the mid-to-late 1930s, women working in radio production gained prominence as producers, directors, writers and performers. This was at a time when most women were encouraged to stay at home as housewives and mothers – many of these radio pioneers were themselves mothers with their own households to manage.

Lynn Foster (1914-1985) was the first woman in Australia to direct a major radio serial on a national network, as well as the first to write and direct one. She also played a major part in the advancement of the status of writers in the radio industry.

Dorothy Crawford (1911-1988) excelled as a radio drama producer, and was also a pioneer in the production of Australian television drama.

Postage stamps were also issued to celebrate World Radio Day 13 February 2013.
